(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of July, 1939, as Reported by Employers

The industrial situation showed further improvement at the beginning of July. The reported increase in employment slightly exceeded the average gain from June 1 to July 1 in the experience of other years since 1920, and was considerably greater than that recorded at July 1 of last summer. Statistics were received by the Dominion Bureau of Statistics from 11,760 establishments whose employees numbered 1,126,216; this was an increase of 26,118 or 2·4 per cent over their June 1 staff of 1,100,098. Reflecting this expansion, the index advanced from 113·1 in the preceding month, to 115·8 at July 1, 1939, when it was higher than that of 113·5 at the same date of last summer. While the level of employment reported in industrial establishments was lower than at July 1 in 1937, it was generally higher than at the same date in other years since 1930.

Since the improvement at July 1, 1939, was rather greater than usual in the experience of other years of the record, the seasonally-adjusted index rose slightly, standing at 113·6, compared with 113·1 at June 1.

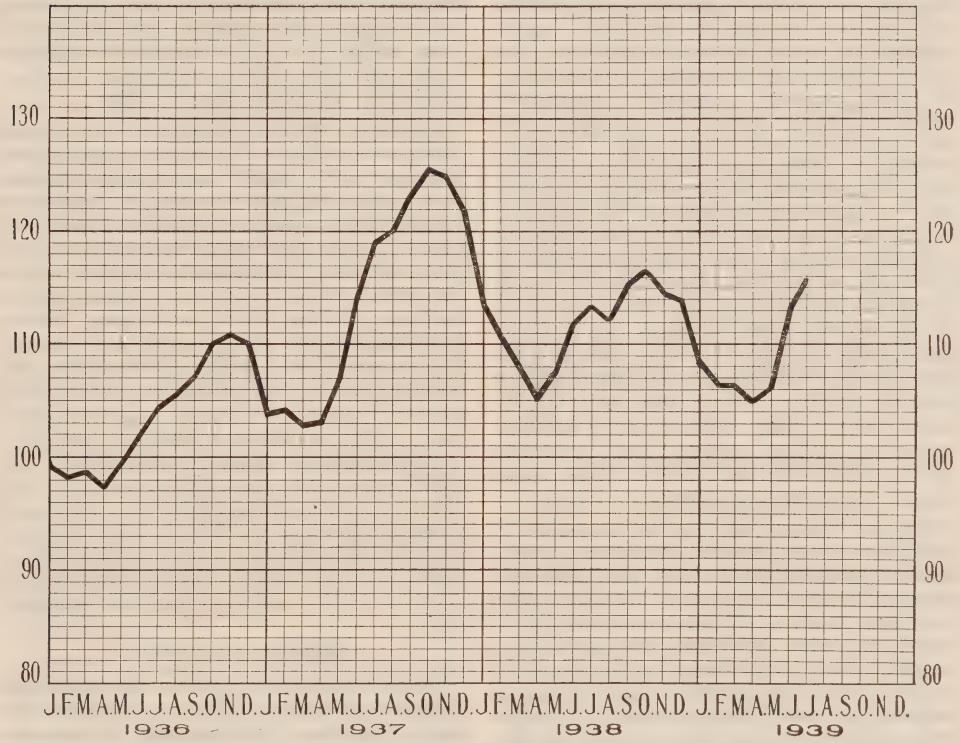
Calculated on the 1926 average as 100, the unadjusted indexes at July 1 in recent years are as follows:—1939, 115·8; 1938, 113·5; 1937, 119·1; 1936, 104·6; 1935, 99·5; 1934, 101·0; 1933, 84·5; 1932, 88·7; 1931, 103·8; 1930, 118·9; 1929, 124·7; 1928, 117·7 and 1927, 109·7.

Employment in manufacturing as a whole showed a slight slowing-up at the beginning of July. There were important gains over June 1 in food, lumber and pulp and paper factories, together with smaller advances in many other branches of manufacturing. Leather, chemical, textile and iron and steel plants, however, reported curtailment. The contractions in textiles and iron and steel were seasonal in character, but they exceeded the average losses recorded at July 1 in the last eighteen years.

Among the non-manufacturing industries, mining, communications, transportation, services, trade and construction and maintenance indicated substantial improvement, that in the last-named being greatest. The increases in mining and communications were above the average at July 1 in the years 1921-1938; that in construction approximated the usual seasonal gain, while the additions to the payrolls reported in services, trade and transportation was rather below average, following the exceptionally large increases recorded in these industries at June 1, 1939. On the other hand, there were seasonal losses in logging as river-driving operations were completed, but the losses were smaller than usual in the experience of past years.

The firms furnishing statements for July 1 of last year had numbered 10,791, and their employees had aggregated 1,086,773, an increase of approximately 14,650 over their June 1, 1938, staffs. A generally upward movement had then been indicated in the non-manufacturing groups with the exception of logging, while manufacturing reported curtailment.

Employment in Financial Organizations



For some months, statistics of their employment have been collected from banks, trust companies and stock market operators. For July 1, 416 firms and branches in these lines of business reported staffs aggregating 33,135 persons, compared with 33,008 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, construction, service and trade industries brings the total number of employees included in the July 1 survey of employment to 1,159,351 in 12,176 establishments and slightly lowers the index of 115·8 in the industries above enumerated, to 115·6; when the employees of the co-operating financial organizations were added to the general figures for June 1, the index declined from 113·1 to 112·9. Comparable data for 1938 are not available.

Employment by Economic Areas

The trend was upward in each of the provinces, the gains ranging from not quite one per cent in Ontario, to 7·7 per cent in Nova Scotia. Numerically, the largest increase was in Quebec, where 8,452 persons were added to the staffs of the co-operating firms. The level of employment in all provinces except New Brunswick was higher than at July 1, 1938. The index in Quebec at the latest date was also above that for July 1, 1937; in the Prairie Area, it was the same, while elsewhere employment showed a falling-off in that comparison. However, the situation generally was more favourable than at July 1 in any of the five or six years immediately preceding.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

Maritime Provinces.—Statements were tabulated from 832 establishments employing 85,530 men and women, as against 79,982 at June 1, 1939. This increase, (to which the three provinces in this area contributed), brought the index to 115·9 at July 1, 1939, when it was fractionally lower than at the beginning of July in 1938; the gain over the preceding month had then been much smaller. Highway construction reported the most pronounced improvement at the date under

review, but there were also additions to staffs in lumber, animal food and iron and steel plants, and in electric current production, mining, building and railway construction and maintenance, services and trade. On the other hand, chemical factories and logging camps were slacker, the losses being largely seasonal in character.

The 791 employers in the Maritime Provinces whose returns were included in the employment survey for July 1, 1938, had reported 85,302 workers, as compared with 81,107 in the preceding month.

Quebec.—Manufacturing, on the whole, showed a falling-off in Quebec; increases in lumber, pulp and paper, rubber, clay, glass and stone, electric light and power, non-ferrous metal and some other classes were more than offset by reductions in animal food, leather, iron and steel and textile factories. In the non-manufacturing industries, mining, construction and maintenance, services and wholesale trade reported considerably heightened activity. On the other hand, transportation and logging released employees. The personnel of the 2,907 co-operating firms included 353,301 persons; as compared with 344,849 at June 1, this was an increase of 8,452, or 2·5 per cent. The advance was seasonal in character, the trend in Quebec having been upward in thirteen of the preceding eighteen years for which data are available. Industrial activity in that province continued at a rather higher level than at July 1 of earlier years of the record. Standing at 124·0 at the latest date, the index was some four points higher than at July 1, 1938, when the 2,654 business enterprises making returns had employed 336,922 men and women, or some 1,700 fewer than in the preceding month.

Ontario.—Further but smaller increases in employment were reported in Ontario, where the 5,140 establishments whose statistics were tabulated reported 455,570 employees, or 4,449 more than at June 1. The situation at July 1 in previous years has usually, though not invariably, shown improvement over the preceding month, the average change being a moderate advance; the gain noted at the date under review was not quite equal to the average, and was also smaller than that indicated in the same month in 1938, when the index was, however, fractionally lower. The expansion at July 1, 1939, took place mainly in logging, mining, transportation, construction, services and trade, while manufacturing was slacker. The largest losses in the last-named were of a seasonal character in the iron and steel and textile industries. On the other hand, additions to staffs were reported in the food, lumber, pulp and paper, electrical apparatus and many other industries.

The 4,711 employers furnishing statistics for July 1, 1938, had reported 445,081 workers, as compared with 438,951 in the preceding month.

Prairie Provinces.—The most important expansion recorded in this area was in work on the highways, but building and railway construction and maintenance services, trade, transportation and communications also afforded more employment. Manufacturing, however, was rather quieter. Data were compiled from 1,667 firms with an aggregate staff of 134,548 persons at July 1, as against 130,630 in their last return. This gain of 3,918 men and women was not equal to the average increase at July 1 in the last eighteen years, although it exceeded that noted at the beginning of July last summer. The index, at 104·0 at the date under review, was a few points higher than that of 99·8 at July 1, 1938, when the 1,512 co-operating establishments reported 127,076 employees, as compared with 123,512 at June 1, 1938.

British Columbia.—Continued advances were made in British Columbia, where a total working force of 97,267 persons was employed at the date under review by the 1,214 firms whose statistics were received, and who had 93,516 on their staffs at the beginning of June. Manufacturing, (particularly of food, lumber and pulp and paper products) was seasonally busier at July 1, 1939, and logging, mining and transportation also reported improvement. On the other hand, railway construction and maintenance showed curtailment, while little general change took place in services and trade. The employment situation was more favourable than at the same date in 1938, and activity was also at a higher level than at July 1 in the years, 1936-1931. The 1,123 concerns reporting for July 1, 1938, had employed 92,392 men and women, an increase of 2,494 over their staffs in the preceding month.

Table 1 gives index numbers by economic areas.

Employment by Cities

Six of the eight centres for which separate tabulations are made—Quebec, Toronto, Ottawa, Hamilton, Winnipeg and Vancouver—showed heightened activity, while the tendency was downward in Montreal and Windsor. The largest gains were in Vancouver. Except in Hamilton, Windsor and Winnipeg, employment in these cities was more active than at July 1, 1938.

Montreal. — Employment in Montreal showed a moderate falling-off, mainly in transportation and manufacturing; within the latter, textile and iron and steel plants reported the largest contractions. On the other hand, building and road construction and

wholesale trade recorded improvement. A combined working force of 167,666 men and women was indicated by the 1,694 co-operating employers, who had 168,371 workers at June 1. A greater decrease had been noted at July 1, 1938, when 1,530 firms had reported a staff of 162,089; the index then was rather lower, standing at 106·4, as compared with 108·3 at the latest date.

Quebec.—An upward movement was evident in Quebec City, where statements were tabulated from 213 establishments with 17,862 employees, compared with 17,423 in the preceding month. Employment in construction and manufacturing advanced, while other industries showed little general change. The index was higher than at the beginning of July, 1938, although a larger increase in personnel had then been indicated by the 183 firms furnishing data, whose payrolls had aggregated 14,832.

Toronto.—There was continued but moderate improvement in industrial activity in Toronto at July 1, when manufacturing, transportation, building construction and wholesale trade were somewhat brisker. The trend was downward, however, in retail trade, services, and, within the manufacturing division, in textiles. The 1,748 employers making returns enlarged their staffs by 398 workers to 140,477 at the beginning of July. At the same date of last year, the 1,606 co-operating business concerns had increased their labour forces by 1,082 persons, to 134,634; the July 1, 1938, index stood at 107·4, compared with 109·4 at the latest date.

Ottawa.—Statistics were received from 228 establishments with 15,134 men and women on their paylists, or 242 more than in the preceding month. Most of the increase took place in construction. A much smaller gain had been indicated at July 1, 1938, when 200 firms had reported 14,085 employees. Employment then was quieter than at the date under review.

Hamilton.—There was a further advance in Hamilton, where 361 workers were added to the forces of the 330 employers furnishing information, bringing them to 34,410 at the beginning of July, 1939. Manufacturing showed improvement, notably in the textile division, and building, services and trade also reported moderately increased activity. For July 1 of last year, 298 returns were tabulated, showing a combined labour force of 35,185, compared with 34,134 at June 1, 1938; activity was then at a higher level than at the latest date.

In *Windsor,* a decline of 3,011 was recorded in the staffs of the 197 co-operating employers, who had 15,853 persons in their employ at the date under review; the loss took place mainly in the iron and steel industries, but the textile and some other divisions were also rather dull. The index was considerably lower than at July 1, 1938, when a smaller contraction had been indicated; the payrolls of the 188 firms then furnishing data had included 17,590 employees.

Winnipeg.—Communications, transportation, construction, manufacturing and trade registered moderate advances, while little general change occurred in other industries. An aggregate working force of 40,952 men and women was reported by the 521 firms making returns; this was a gain of 801 over their June 1 staffs. The improvement noted at the beginning of July last summer had involved a rather larger number of workers, and the index of employment then was fractionally higher than that of 94·3 at the latest date. The 494 reports tabulated for July 1, 1938, had shown a combined staff of 40,913.

Vancouver.—The trend of employment in Vancouver was favourable, according to information from 518 establishments employing 37,544 persons, as against 36,621 in the preceding month. There were increases in all industrial groups, those in manufacturing and transportation being most pronounced; within the former, the largest additions to the payroll were in food and lumber factories. Expansion on a greater scale had been recorded by the 467 concerns co-operating at the beginning of July last year, whose employees had numbered 36,128. The index then, however, was 1·6 points lower than that of 112·6 at the latest date.

Employment by Industries

Manufacturing.—Employment in manufacturing showed little general change at July 1, when 569,948 employees were reported by the 6,410 co-operating manufacturers, a falling-off of 352 from the preceding month. The index stood at 111·3, compared with 111·4 at June 1, 1939, and with 111·8 at the beginning of July in 1938; the latest index was several points lower than the July 1, 1937 figure of 119·0, but was generally higher than at that date in any earlier year since 1930, when it also stood at 111·3.

The movement at the first of July has been downward in eight of the eighteen years for which data are available; however, improvement over June 1 was recorded at July 1 in the remaining years since 1920, and the average change from June to July in this period has been a very slight increase. After adjustment for seasonal influences, the index at the date under review therefore slightly declined, standing at 109·0 at July 1, compared with 109·3 at the first of June.

An analysis of the data for July 1, 1939, shows pronounced improvement in the animal and vegetable food, lumber, pulp and paper and electric light and power groups, with smaller gains in the fur, musical instrument, rubber, beverage, clay, glass and stone, electrical apparatus, non-ferrous metal and non-metallic mineral product industries. On the other hand, leather, chemical, textile and iron and steel plants were slacker. The greatest losses were those of a seasonal character in the textile and iron and steel divisions, in both of which the decreases were unusually large for the time of year.

At July 1 in recent years, the unadjusted indexes in manufacturing are as follows:—1939, 111·3; 1938, 111·8; 1937, 119·0; 1936, 104·7; 1935, 98·5; 1934, 93·8; 1933, 83·0; 1932, 85·4; 1931, 97·2; 1930, 111·3; 1929, 120·3; 1928, 113·1 and 1927, 106·8.

The manufacturers furnishing statistics at July 1, 1938, had numbered 6,180, and their employees had aggregated 569,570, which was a decline of 2,551 from the preceding month.

Animal Products, Edible.—Additions to staffs were recorded in this group, 813 persons being taken on by the 333 establishments making returns, which had 27,824 in their employ. Considerable improvement was noted in fish-canning in British Columbia, and there were also gains in dairies. The index, at 143·2 at July 1, 1939, was slightly higher than at the same date of last year, when the indicated increase was on a similar scale.

Leather and Products.—Statements were received from 324 manufacturers in this division, employing 22,372 workers, as compared with 22,689 in the preceding month. Most of this seasonal decrease took place in boot and shoe factories, and occurred mainly in Quebec. The general situation was more favourable than that recorded at July 1 of last year, a rather larger decline having then been reported.

Lumber and Products.—Rough and dressed lumber mills showed substantially heightened activity, and employment in container factories was somewhat brisker. The general increase in the lumber group considerably exceeded that noted at July 1, 1938, when the index stood at 89·9, as against 93·1 at July 1, 1939. A combined working force of 49,858 employees was reported by the 936 firms co-operating at the date under review; this was 2,590 more than at the beginning of June. All provinces except Manitoba and Saskatchewan shared in the upward movement, but the gains in Quebec and British Columbia were greatest.

Musical Instruments.—Employment in musical instrument works considerably increased at July 1; 36 plants employed 1,461 persons, or 259 more than in the preceding month. The situation was not so favourable as at the beginning of July, 1938, although a smaller increase had then been noted.

Plant Products, Edible.—The resumption of operations in fruit and vegetable canneries caused an important advance, which, however, was smaller than that registered at July 1 of a year ago, when the index was slightly higher. Returns were received from 524 manufacturers of vegetable foods, having 36,233 operatives, as against 34,132 in their last report. The improvement took place mainly in Ontario and British Columbia.

Pulp and Paper Products.—There was a moderate advance in printing and publishing houses and in paper product manufacturing, while pulp and paper mills were decidedly busier. The 708 co-operating employers throughout the Dominion reported 68,520 workers, compared with 67,178 at June 1. A smaller gain had been indicated in the group as a whole at July 1, 1938; the index of employment was then nearly four points lower.

Rubber Products.—Curtailment was registered in rubber factories, in which employment was brisker than in the summer of last year. Statistics were tabulated from 54 firms with 13,561 employees at the date under review, as compared with 13,396 in the preceding month.

Textile Products.—A further and larger contraction was reported by the 1,167 co-operating textile manufacturers, who employed 100,439 workers, or 3,445 fewer than at the beginning of June. The greatest losses were in silk, headwear and garment and personal furnishing factories, and occurred mainly in Quebec and Ontario. A smaller decline had been indicated at the corresponding date in 1938, and the level of employment was then slightly higher. The decreases were seasonal in character, the tendency having been downward at July 1 in fourteen of the eighteen preceding years for which statistics are available.

Tobacco.—Employment in this division showed an upward movement at July 1, according to data from 45 establishments employing 7,988 persons, compared with 7,917 in the preceding month. A falling-off had been noted at the same date last year, when the index was, however, fractionally higher.

Beverages.—Further improvement was recorded in the production of beverages; 147 manufacturers reported 9,356 workers, an increase of 185 over their June 1 staffs. Activity in those industries was at much the same level as at the corresponding date of last summer.

Chemicals and Allied Products.—There was a decline in the personnel of chemical factories, 302 of which had 18,517 employees, compared with 18,833 at June 1. The Maritime Provinces, Quebec and Ontario reported most of the reduction in staffs. A greater loss had been shown at the beginning of July, 1938, and the employment index was then slightly lower.

Clay, Glass and Stone Products.—Continued improvement took place in building material plants, the 220 co-operating establishments enlarging their forces by 376 persons to 10,926 at the date under review. There were moderate gains in Quebec, Ontario and the Prairie Provinces. The level of employment was above that indicated at July 1 of a year ago; the trend had then also been upward.

Electric Light and Power.—A pronounced increase was registered in electric current plants, 100 of which reported a combined working force of 16,960 persons, as against 16,058 at the beginning of June. The index was fractionally lower than at the same date in 1938, when there had also been a large gain.

Electrical Apparatus.—There was an increase of 258 in the staffs of the 124 manufacturers furnishing data, who had 17,741 employees at July 1. Firms in Ontario reported most of the improvement. The number engaged in the production of electrical apparatus was much smaller than at July 1 in the preceding year, although the advance then indicated had not provided work for so many persons.

Iron and Steel.—The trend in iron and steel factories was seasonally downward; the losses were less extensive than those reported at July 1 of a year ago, but employment was then more active. Curtailment at the date under review was noted in crude, rolled and forged, machinery, agricultural implement, automobile and shipbuilding plants, while there was moderately heightened activity in a number of divisions. Returns were compiled from 922 employers whose forces aggregated 122,655 workers, as against 128,472 in the preceding month.

Non-Ferrous Metal Products.—A further increase was registered in non-ferrous metal products; the 187 co-operating manufacturers employed 24,614 operatives, or 143 more than in the preceding month. A loss had been noted at the corresponding date of last year, when the index was practically the same.

Mineral Products.—Continued improvement was shown in this division, in which the index stood at 160·5, compared with 160·0 at July 1, 1938. Statistics were received from 100 employers, whose staffs rose from 12,566 at June 1, 1939, to 12,788 at the date under review.

Logging

There was a moderate shrinkage in logging, 521 men being laid-off from the staffs of the 364 reporting firms, who employed 27,900 at July 1. The losses occurred in New Brunswick and Quebec, while in Ontario and British Columbia heightened activity was shown. A decrease had also been recorded at the same date in 1938, when the index of employment was about nine points lower.

Mining

Coal.—Little general change in employment was shown in coal-mines, 102 of which employed 22,524 men, as compared with 22,491 in their last report. There were gains in Nova Scotia and British Columbia, while lowered activity was indicated in Saskatchewan and Alberta. A decline had been noted at July 1 of last year, but the employment index was then slightly higher.

Metallic Ores.—Another advance was reported in metallic ore mines; statements were tabulated from 246 operators employing 43,579 persons, or 889 more than at June 1. The improvement occurred largely in Quebec, Ontario and British Columbia. The general index, at 349·8, was over thirty points higher than at July 1, 1938.

Non-Metallic Minerals, other than Coal.—There was a further pronounced increase in the staffs of the 102 co-operating non-metallic mineral mines, which employed 10,044 workers, or 769 more than in the preceding month. Employment was brisker than at the beginning of July a year ago, when a smaller gain had been made.

Communications

Continued improvement was indicated in this group, according to the reporting companies and branches, which had a personnel of 22,985 men and women, compared with 22,386 at June 1. Employment on both telephones and telegraphs was in greater volume. A rather larger increase, on the whole, had been recorded at July 1, 1938, and the index in this division was then slightly higher.

Transportation

Street Railways and Cartage.—Activity in the local transportation group showed a gain, 282 firms having 28,945 workers in their employ, as against 28,774 in the preceding month. A much larger advance had been noted at the same date in 1938, but the index then was slightly lower.

Steam Railways.—Statistics tabulated from 100 companies and divisional superintendents in the steam railway operation group showed that they employed 59,668 men at the beginning of July, or 759 more than in the preceding month; general improvement was recorded, except in Quebec. Expansion on a

smaller scale had taken place at July 1 of last year, and employment was then slightly below its level at the time of writing.

Shipping and Stevedoring.—There was a further increase in the number engaged in water transportation, 125 companies having enlarged their staffs by 347 employees, bringing them to 17,540 at July 1. The index stood at 93·9, compared with 98·6 at the beginning of July, 1938, when the trend had also been upward. At the date under review, there were advances in Ontario and British Columbia, while the movement was unfavourable in Quebec and New Brunswick.

Construction and Maintenance

Building.—Continued improvement in employment was noted in building construction, the gain greatly exceeding that indicated at July 1, 1938; activity in this group was then at a slightly lower level. The 854 co-operating contractors employed 26,472 workers, as compared with 22,773 in the preceding month. There was expansion in all provinces except British Columbia, that in Quebec being most pronounced.

Highways.—The number of men engaged on road construction and maintenance substantially increased at the date under review, when the 409 employers furnishing data had 103,595 employees, or 16,535 more than at the beginning of June. There were considerable advances in all provinces except British Columbia, where practically no change was noted; the greatest gains were in Quebec. Employment in this group was brisker than at July 1, 1938, smaller increases having then been indicated.

Railways.—A combined working force of 30,495 persons was reported by the 34 contractors and divisional superintendents whose statistics were tabulated, and who had 29,253 employees at June 1. The largest advances were in Quebec. Curtailment had been noted at July 1 a year ago, and the index then was several points lower than that of 76·2 at the date under review.

Services

There was continued expansion in the service group, according to returns from 593 employers with 32,537 persons on their staffs, as compared with 31,255 in the preceding month. The opening of the summer hotel season caused most of the improvement, which, following unusually large gains at June 1, was not so extensive as that reported at July 1, 1938; employment then, however, was in slightly less volume. The tendency at the date under review was favourable in all five economic areas, the largest increases being in Alberta.

Trade

The trend of employment in retail and wholesale trade was upward, the gain in personnel in the latter, especially, being marked. Statements were tabulated from 2,053 firms having 129,984 employees, as against 129,318 at the beginning of June, 1939. Employment was in somewhat greater volume than at the same date of last summer, when more pronounced improvement had been indicated by the co-operating trading establishments.

TABLES

Index numbers of employment by economic areas and industries are shown in the accompanying tables, in which the columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada at the date under review.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS
(AVERAGE CALENDAR YEAR 1926=100)

——	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
July 1, 1927	109·7	112·8	109·6	108·9	110·7	109·1
July 1, 1928	117·7	116·2	113·6	117·7	129·8	114·0
July 1, 1929	124·7	117·9	119·4	127·2	136·7	118·2
July 1, 1930	118·9	141·1	116·8	116·9	120·4	113·5
July 1, 1931	103·8	109·4	103·2	102·7	108·9	97·9
July 1, 1932	88·7	96·4	86·6	89·2	90·5	83·7
July 1, 1933	84·5	89·9	83·0	85·0	85·0	81·8
July 1, 1934	101·0	100·4	94·1	109·9	94·1	94·1
July 1, 1935	99·5	106·7	94·8	102·7	96·3	99·5
July 1, 1936	104·6	111·7	101·6	106·2	101·9	104·8
July 1, 1937	119·1	135·8	118·0	122·2	104·0	117·1
July 1, 1938	113·5	116·7	119·9	114·0	99·8	108·0
Jan. 1, 1939	108·1	109·2	114·9	108·8	97·1	98·0
Feb. 1,	106·5	100·5	113·0	109·2	93·9	96·2

[1] For explanation of term "Relative Weight", see footnote to Table 1.

(2) Unemployment in Trade Unions at the Close of June, 1939

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle because of illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

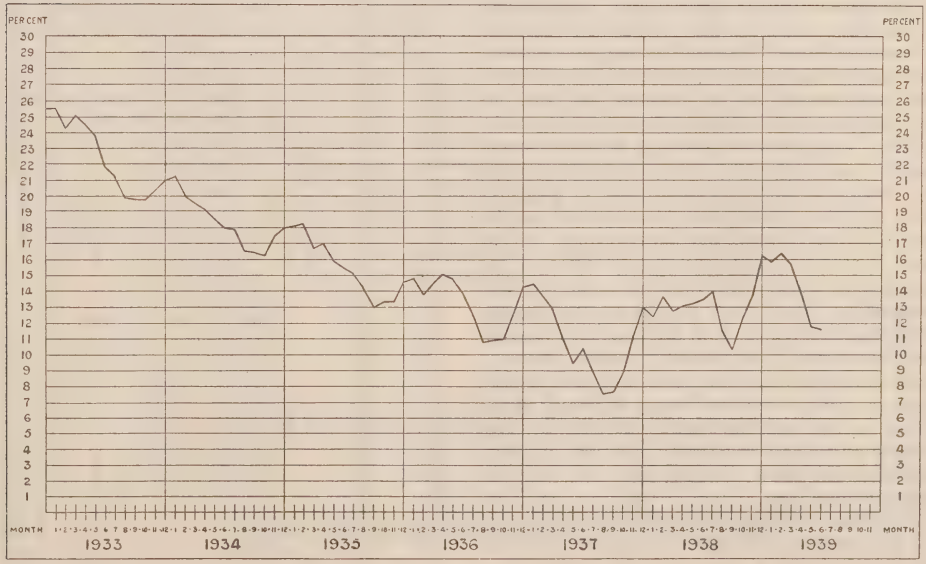
The situation among local trade unions in Canada as a whole during June remained substantially the same as in the preceding month, the percentage of idleness standing at 11·6 as compared with a percentage of 11·7 in May. For the month under review reports

were received from 1,951 labour organizations with a membership aggregate of 244,323 persons, 28,289 of whom were without employment on the last day of the month. Heightened activity on a rather small scale was apparent during June from the corresponding month of last year when 13·5 per cent of unemployed members was recorded. New Brunswick unions showed noteworthy employment recovery during June from the previous month, mainly due to advances in the pulp and paper industry, where a number of mills which had been either entirely or partially closed during May were in June operating at much greater capacity. Ontario unions showed a slight gain in work afforded, and a more favourable tendency was noted in British Columbia, Alberta and Saskatchewan though the variations from May were but fractional. Quebec members, however, indicated a slight falling off in activity from May, the manufacturing industries, particularly the garment trades, being largely responsible for this adverse movement, and in Manitoba nominal reductions in employment occurred. In Nova Scotia the same percentage of idleness was recorded in both months of the comparison. When contrasting with the returns for June a year ago New Brunswick and British Columbia members registered improvement of rather noteworthy degree during the month reviewed, and moderate increases in activity were manifest by Saskatchewan, Manitoba, Ontario and Quebec unions. In Nova Scotia, however, some curtailment in employment was apparent while in Alberta the situation declined by less than one per cent.

Each month the records of unemployment from the largest city in each province with the exception of Prince Edward Island are tabulated separately. Of these, Halifax and Edmonton were the only cities to record an upward movement of employment during June though the changes were quite slight. Montreal, due in large measure to quietness in the garment establishments, showed curtailment in employment of about 4 per cent, and in Saint John somewhat lesser contractions occurred. In Toronto, Vancouver and Regina the tendency was toward lessened activity though the variations from May were of minor importance. The percentage of unemployment among Winnipeg members remained identical with that of May. All cities used in this comparison showed improved conditions during June from the corresponding month last year, Toronto, Edmonton and Vancouver indicating employment recovery of over 5 per cent, and Saint John and Winnipeg gains of more moderate degree. In Halifax, Montreal and Regina the tendency was but slightly upward.

The chart appearing with this article shows the trend of unemployment by months from January, 1933, to date. During the first month of the present year the curve tended in a more favourable direction from the close of 1938, though the change in level was very slight. In February, however, an opposite trend was manifest, denoting curtailment in employment available. The March situation, as represented by the curve, again showed improvement and continued gains in employment, increasing in magnitude, were reflected during April and May. In June, the movement was also toward heightened activity, but the variation from May was merely nominal. The level reached at the end of June remained, however, below that of the corresponding month of last year when the situation was not so favourable for the members reported.

Workers in the manufacturing group of industries were less actively engaged during June than in the preceding month according to the reports tabulated from 582 local unions with 96,863 members. Of these, 13,064 or 13·5 per cent were idle on the last day of the month, contrasted with 11·6 per cent of unemployment in May. An outstanding feature in the less favourable situation shown during June was the curtailment evident in the garment trades. Marked increases in slackness were also indicated among metal polishers who, however, formed but a small group of the members reported in the manufacturing industries as a whole. Activity for general labourers, and hat, cap and glove workers was also considerably curtailed, and among printing tradesmen there was a fractional drop in work afforded. On the other hand, leather workers were much busier than in May and employment for wood workers showed a noteworthy rise. Conditions for papermakers, textile and carpet, and glass workers were moderately improved, and advances of lesser degree were apparent among gas, fur, iron and steel, brewery, and jewelry workers, meat cutters and butchers, mill and smeltermen, bakers and confectioners. The situation in the manufacturing industries showed improvement over June last year when the unemployment percentage stood at 16·7. In this comparison wood workers were decidedly more active during the period surveyed, and large increases in work afforded were noted by hat, cap and glove, and fur workers. Conditions for papermakers and garment workers were also substantially better than in June last year. Bakers and confectioners, and meat cutters and butchers showed employment expansion of much lesser degree and slight advances were reflected by cigar and tobacco, and brewery workers. On the contrary, metal polishers were much slacker than in June, 1938, and activity for general labourers, and textile and carpet workers was considerably restricted. Losses in employment, on a smaller scale, were ap-



parent among leather, iron and steel, glass and jewelry workers, printing tradesmen, and mill and smeltermen.

Reports were compiled at the close of June from 60 unions of coal miners with a membership numbering 21,658 persons, 3,159 of whom or a percentage of 14·6 were idle at the close of the month, contrasted with 15·1 per cent of unemployment in May, and with 11·8 per cent in June last year. Nova Scotia, Alberta and British Columbia unions all shared in the employment advancement noted from May, but the changes were not outstanding in any one province. A considerable falling off in the volume of work afforded in the British Columbia coal fields was apparent during June from the corresponding month of last year, and conditions were somewhat less favourable in both Nova Scotia and Alberta. A number of unions continued to show a noteworthy proportion of their working membership on short time.

The upward movement that employment in the building and construction trades has experienced for several months continued to be in evidence during June, the 209 local unions from which reports were tabulated, involving 25,686 members showing that 6,351 or a percentage of 24·7 were idle compared with 30·4 per cent in May. Carpenters and joiners reflected extensive gains in employment from May and decidedly better conditions prevailed for steam shovelmen and tile layers, lathers and roofers. Heightened activity, on a small scale, was apparent among plumbers and steamfitters, granite and stonecutters, and bricklayers, masons and plasterers. Bridge and structural iron workers, on the contrary, showed a large falling off in employment, and moderate curtailment was indicated by hod carriers and building labourers, and painters, decorators and paperhangers. Among electrical workers the declines registered were but fractional. The level of activity in the building and construction trades as a whole was considerably above that of June, 1938, when unemployment stood at 31·2 per cent. In this comparison bricklayers, masons and plasterers and carpenters and joiners were much busier during the month under review, and among granite and stonecutters noteworthy improvement was manifest. The trend for electrical workers and plumbers and steamfitters was toward heightened employment, though the changes from June last year were slight. A distinctly unfavourable situation, however, obtained for steam shovelmen, and bridge and structural iron workers, and heavy losses in employment were noted by tile layers, lathers and roofers, and hod carriers and building labourers. Among painters, decorators and paperhangers contractions in activity on a much smaller scale occurred.

The transportation industries showed only slight variation during June from the May conditions, the tendency being in a favourable direction. This was apparent from the reports furnished by 830 local unions, embracing a membership of 65,637 persons, 4,113 of whom were without employment on the last day of the month, a percentage of 6·3, contrasted with 6·6 per cent of inactivity in May.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Navigation workers showed moderate advancement from May, and among steam railway employees, whose returns included about 79 per cent of the entire group membership reported, and among street and electric railway employees, and teamsters and chauffeurs there was but a fractional rise in work afforded. In making a comparison with the returns for June, 1938, in the transportation industries when unemployment stood at 7·7 per cent, navigation workers indicated rather noteworthy improvement in conditions during the month reviewed, and slight gains were apparent among steam railway employees. A nominally better situation was reflected by street and electric railway employees. Teamsters and chauffeurs, however, recorded some employment cessation.

Retail shop clerks were quite actively engaged during June as in both the preceding month and June a year ago, the 6 local unions making returns, with a membership total of 1,755 persons showing only 0·1 per cent of idleness as compared with a percentage of 0·2 in May and with a fully employed situation in June, 1938.

Among civic employees during June the tendency was less favourable than in May, though the change was very slight, as manifest by the 84 organizations forwarding reports, with a membership numbering 10,062 persons. Of these, 148 were idle on the last day of the month, a percentage of 1·5 as compared with 1·1 per cent in May. Minor contractions were evident also from June last year when only 0·5 per cent of inactivity was recorded.

From unions in the miscellaneous group of trades during June 139 reports were received covering a membership of 11,142 persons, 585 or 5·3 per cent of whom were unemployed at the end of the month, compared with 6·7 per cent in May. Unclassified workers showed noteworthy improvement in the situation from May, and conditions for barbers, and stationary engineers and firemen were but nominally better. Retarded activity on a small scale, however, was evident among theatre and stage, and hotel and restaurant employees. A better level of employment was also noted in the miscellaneous group of trades, as a whole, from June last year, when 9·3 per cent of the members reported were out of work. In this comparison hotel and restaurant employees, stationary engineers and firemen, and unclassified workers all registered fair-sized gains in work afforded during the month under review. Barbers, on the other hand, suffered slight losses in employment, and the situation for theatre and stage employees remained approximately the same during the two months under comparison.

Fishermen during June showed some slowing up in employment from both the previous month and June a year ago, the contractions in the latter comparison being the more pronounced. This was apparent from the reports received at the close of the month from 6 local unions with 2,123 members, 155 of whom were unemployed, a percentage of 7·3 as contrasted with percentages of 4·0 in May and 0·6 in June last year.

According to the returns tabulated from 5 unions of lumber workers and loggers during June with a membership total of 2,155 persons, 218 were shown as idle at the end of the month, a percentage of 10·1 as compared with 9·0 per cent of inactivity in May. Conditions were also less favourable than in June a year ago when 6·2 per cent of unemployed members was reported.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1929 to 1938 inclusive, and also the percentage of unemployment by provinces for June of each year from 1929 to 1936 inclusive, and for each month from June, 1937, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

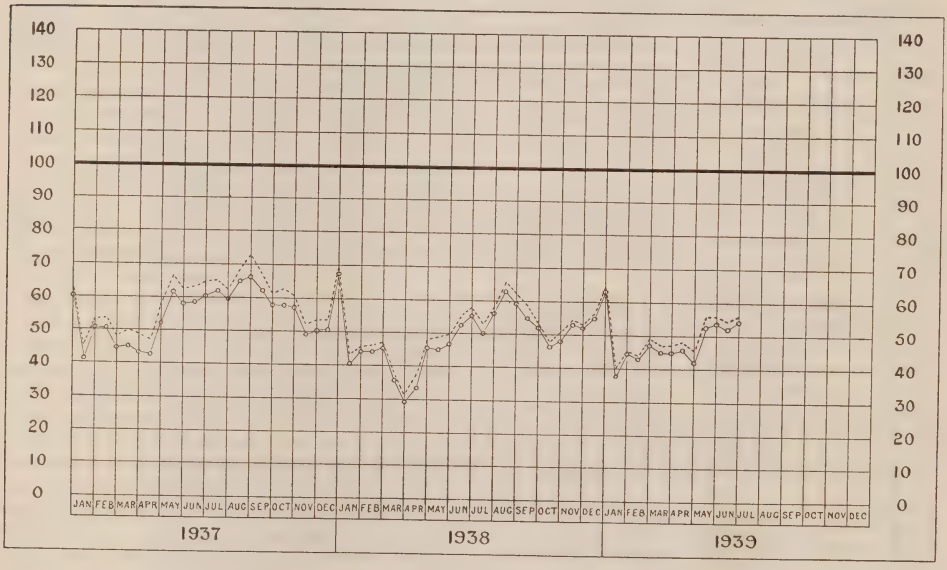
(3) Employment Office Reports for June, 1939



The volume of business transacted by the offices of the Employment Service of Canada during the month of June, 1939, as indicated by the average daily placements effected, was 7 per cent above that of the previous month and nearly 9 per cent more than that of the corresponding period a year ago. Substantial gains over the preceding month were recorded in construction and maintenance and farming, but these were largely offset by a heavy loss in services. Logging and manufacturing also showed moderate increases and mining one of smaller volume; trade recorded a slight decline and transportation remained practically unchanged. In comparison with June, 1938, all industrial divisions, except transportation, construction and maintenance and trade, reported increased placements, the greatest expansion occurring in logging and services, followed by advances, not so large, in farming, mining and manufacturing. Of the decreases registered, that in transportation was the most pronounced.

The accompanying chart shows the trend of employment from January, 1937, to date, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications declined slightly during the first half of the month, but made a recovery during the second half. At the end of the period under review, however, the levels recorded were still somewhat below those attained at the close of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 54·3 during the first half and 56·1 during the second half of June, 1939, in comparison with ratios of 55·5 and 58·0 during the corresponding periods of 1938. The ratios of placements to each 100 applications during the same periods were 51·9 and 54·2 in comparison with 52·6 and 55·4, respectively.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during June, 1939, was 1,441, as compared with 1,367 in the preceding month and with 1,340 during June of last year.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

The average number of applications for employment received daily by the offices during the month under review was 2,612, in comparison with 2,436 in May and 2,359 in June, 1938.

The average number of placements made daily by the offices of the Service during the month under review was 1,386, of which 895 were in regular employment and 491 in work of one week's duration or less, as compared with the total daily average of 1,296 during

the preceding month. Placements in June, 1938, averaged 1,274 daily, consisting of 798 placements in regular and 476 in casual employment.

During the month of June, 1939, the offices of the Service referred 35,847 persons to positions and effected a total of 34,634 placements. Of these, the placements in regular employment numbered 22,378, of which 17,079 were of men and 5,299 of women, while placements in casual work totalled 12,256. The number of vacancies reported by employers was 24,835 for men and 11,178 for women, a total of 36,013, while applications for work numbered 65,291, of which 49,144 were from men and 16,147 from women. Reports for May, 1939, showed 35,539 positions available, 63,320 applications made and 33,694 placements effected, while in June, 1938, there were recorded 33,485 vacancies, 58,975 applications for work and 31,828 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1929, to date:—

Year	Placements		
	Regular	Casual	Totals
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939 (6 months)	104,079	77,965	182,044

Nova Scotia

Opportunities for employment, as indicated by orders received at Employment Offices in Nova Scotia during June, were 2 per cent below those of May and over 30 per cent better than in the corresponding month last year. There was a decline also in placements of over 4 per cent when compared with May, but a gain of more than 33 per cent in comparison with June, 1938. Except for a minor reduction in trade, all groups showed increased placements over June last year, the highest gains being in services and construction and maintenance. Industrial divisions in which most of the placements were effected were:—logging, 113;; construction and maintenance, 471, and services, 701, of which 472 were of household workers. During the month 331 men and 126 women were placed in regular employment.

New Brunswick

During the month of June, positions offered throughout Employment Offices in the Province of New Brunswick were 5 per cent fewer than in the preceding month, but over 27 per cent above the corresponding period of last year. There was a decline of nearly 5 per cent in placements, when compared with May, but an increase of almost 27 per cent in comparison with June, 1938. The advance in placements over June last year was almost entirely made up of a gain in the highway division of construction and maintenance. Moderate expansion was also reported in services and manufacturing and small losses in logging and trade. Changes in other groups were minor only. Placements by industrial divisions included 415 in construction and maintenance and 724 in services, of which 521 were of household workers. There were 46 men and 113 women placed in regular employment.

Quebec

There was a decrease of nearly 5 per cent in the number of positions offered through Employment Offices in Quebec during June, when compared with the preceding month and of nearly 6 per cent in comparison with the corresponding month last year. Placements also were slightly lower than those of May and nearly 4 per cent fewer than in June, 1938. A heavy decline was noted in transportation, with others of smaller volume in construction and maintenance, trade and farming. Appreciable gains, however, were recorded in logging and services and a smaller one in manufacturing. Divisions in which employment was found for the majority of workers were:—manufacturing, 342; logging, 610; farming, 123; construction and maintenance, 3,170, and services, 3,173, of which 2,771 were of household workers. Regular placements numbered 4,422 of men and 1,759 of women.

Ontario

The demand for workers, as indicated by orders received at Employment Offices in Ontario during June, was nearly 4 per cent less than in the preceding month, but over 7 per cent greater than during the corresponding period last year. There was a decline also in placements of almost 3 per cent when compared with May, but a gain of about 8 per cent in comparison with June, 1938. All industrial divisions, except construction and

maintenance, logging and trade participated in the increased placements over June of last year, the most important gains being in services, farming and mining, but minor additions were registered, also, in transportation and manufacturing. Quite a marked loss was shown in construction and maintenance, but the declines in logging and trade were small. Industrial groups in which most of the placements were effected were:—manufacturing, 588; logging, 679; farming, 2,506; mining, 183; transportation, 154; construction and maintenance, 4,373; trade, 299, and services, 4,335, of which 2,550 were of household workers. There were 5,865 men and 1,858 women placed in regular employment during the month.

MANITOBA

Orders received at Employment Offices in Manitoba during June called for 15 per cent more workers than in the preceding month and 108 per cent more than during the corresponding period last year. There was a gain also in placements of almost 15 per cent in comparison with May and of nearly 114 per cent when compared with June, 1938. An outstanding increase in construction and maintenance was mainly responsible for the advance over June last year, although recovery in smaller volume was also registered in farming, logging and manufacturing. A nominal loss was shown only in trade. Placements by industrial groups included:—manufacturing, 64; logging, 217; farming, 613; construction and maintenance, 1,473, and services, 733, of which 571 were of household workers. During the month 2,365 men and 355 women were placed in regular employment.

SASKATCHEWAN

Employment opportunities, as indicated by orders received at Employment Offices in Saskatchewan during June, were nearly 14 per cent better than in the preceding month and 25 per cent in excess of the corresponding period last year. There was an increase also in placements of almost 13 per cent when compared with May and of 26 per cent in comparison with June, 1938. The only marked gains in placements, by industrial divisions, were those in construction and maintenance and logging, all other changes, which included an increase in transportation and declines in services, mining, farming and manufacturing were minor only. Groups in which the largest number of placements were made were:—logging, 244; farming, 303; construction and maintenance, 463, and services, 616, of which 391 were of household workers. Regular placements numbered 909 of men and 323 of women.

ALBERTA

During June, orders were received at Employment Offices in Alberta for 14 per cent fewer workers than in the preceding month and nearly 15 per cent fewer than during the corresponding period of last year. Placements also were 14 per cent less than in May and 17 per cent below those of June a year ago. All industrial divisions, except logging, where a moderate gain took place, recorded declines, the highest being in construction and maintenance and farming. The majority of placements recorded during the month occurred in the following industrial groups:—logging, 212; farming, 398; construction and maintenance, 307, and services, 573, of which 452 were of household workers. There were 879 men and 382 women placed in regular employment.

BRITISH COLUMBIA

Employment Offices in British Columbia were notified of 30 per cent more vacancies than in the preceding month, but recorded over 3 per cent fewer than in the corresponding period last year. Similar percentages of change were reported in placements under both comparisons. A noteworthy gain in logging was more than offset by heavy loss in construction and maintenance. Changes in other groups were very small, except for a moderate increase shown in services. Placements by industrial divisions included:—logging, 1,452; farming, 213; mining, 98; construction and maintenance, 2,245, and services, 808, of which 595 were of household workers. During the month 2,262 men and 383 women were placed in regular employment.

Movement of Labour

During the month of June, 1939, the offices of the Employment Service of Canada made 22,378 placements in regular employment, 11,188 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter 321 were granted the Employment Service reduced transportation rate, 264 going to centres within the same province as the despatching office and 57 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted

(Continued on page 830)

* 4 Placements by offices since closed.

by the railway companies to bona fide applicants at the offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

Transfers at the reduced rate in Quebec during June were of bushmen, 2 in number, who secured their certificates at the Hull office for transportation to employment in the Pembroke zone. In Ontario during June 228 persons took advantage of the reduced rate, 227 of whom were destined to provincial situations and one outside the province. The latter, a farm hand, journeyed from Ottawa to a point in the Rouyn zone. Within the province the Port Arthur office was instrumental in transferring 124 bush workers, 20 construction workers, 11 mine employees, one fisherman, one saw mill worker and one cook to various sections of the Port Arthur zone. To points within their respective zones also, the Fort William office despatched 55 bush workers, 2 highway construction workers, one machinist and one domestic and the Sudbury office 3 bush workers and one mine carpenter. The Sudbury zone received, in addition, 4 saw mill workers from North Bay and one sawyer from Ottawa. At Toronto one hotel clerk was granted a certificate for transportation to Peterborough. The movement of labour in Manitoba during June comprised the transfer of 56 persons, 2 of whom were destined to provincial employment and 54 to centres in other provinces. Within the province the transfers were of farm hands sent from Winnipeg to rural sections in the same zone. All persons going outside the province were shipped from Winnipeg, 51 of whom were bound for the Port Arthur zone. Included among these were 38 bush workers, 8 mine workers, 2 restaurant employees, 2 domestics and one cook. The remaining 3 were farm hands conveyed at the reduced rate to Yorkton. Profiting by the Employment Service reduced transportation rate in Saskatchewan during June 3 miners proceeded to employment in the Yorkton zone on certificates issued at Regina. Reduced transportation vouchers granted in Alberta during June were 28 in number, all provincial. These were effected by the Edmonton office, which was instrumental in the transfer of 11 highway construction workers, 4 transportation company employees, 3 miners, 2 fishermen, 2 saw mill workers, 2 cooks, 2 labourers and one hotel waiter to employment at various centres within its own zone, and of one farm hand to Lethbridge. Those who availed themselves of reduced rate certificates in British Columbia during June numbered 4. These secured their certificates for transportation at Vancouver, from which centre one salesman went to Kamloops and 2 hotel employees and one mine worker within the Vancouver zone.

Of the 321 persons who benefited by the Employment Service reduced transportation rate during June 166 were carried by the Canadian National Railways, 152 by the Canadian Pacific Railway and 3 by the Pacific Great Eastern Railway.

(4) Building Permits issued in Canada during June, 1939

The value of the building represented by the permits for construction taken out in 58 cities during June was greater than in the same month in any other year since 1931. Amounting to $7,581,492, the authorizations showed an increase of $1,190,713, or 18·6 per cent over the May, 1939, figure of $6,390,779, and exceeded by $1,004,018 or 15·3 per cent, the aggregate for June, 1938, when the permits issued were for construction work estimated to cost $6,577,474.

The value of the building authorized in these centres in the first six months of the present year was estimated at $26,861,062, or $1,008,493 more than in the same period of 1938; the 1939 total was also higher than in the first half of any other year since 1931, with the exception of 1937. The aggregate for the months, January-June of each of these years, however, was considerably less than in preceding years of the record. The wholesale prices of building materials have been lower in the first half of 1939 than in the same period of 1938 or 1937; while the average index was higher than in January-June in any of the preceding six years, it was below the average for the years since 1920.

Some 50 cities furnished detailed statistics for June, 1939, showing that they had issued nearly 800 permits for dwellings valued at approximately $2,200,000 and some 3,000 permits for other buildings, estimated to cost almost $4,700,000. In May, authority was given for the erection of about 750 dwellings and 3,000 other buildings, valued at approximately $2,800,000 and $3,000,000, respectively.

All provinces except Prince Edward Island recorded increases in the value of the building permits issued during June as compared with the preceding month, the largest gain, of $451,299, or 129·5, taking place in Manitoba.

As compared with June, 1938, New Brunswick, Quebec, Ontario, Saskatchewan and Al-

berta reported increases, of which that of $1,135,734, or 113·7 per cent in Quebec was largest. In Prince Edward Island, Nova Scotia, Manitoba and British Columbia, there were reductions in this comparison, the greatest, of $181,621, or 14·5 per cent, being in British Columbia.

Of the four largest cities, Montreal and Winnipeg recorded increases in the value of the building represented by the permits taken out in June as compared with the preceding month, and with the same month of last year. Vancouver showed a gain in the first, but a decrease in the second comparison, while in Toronto, the June total was smaller than in either May, 1939, or June, 1938. Among the other centres, the following showed improvement in each of these comparisons; Sydney, Saint John, Quebec, Three Rivers, Brantford, Hamilton, St. Thomas, Sault Ste. Marie, York and East York Townships, Welland, Riverside, Woodstock, Saskatoon, Calgary, Lethbridge, Kamloops, New Westminster and Victoria.

Table I gives the value of the building authorized by 58 cities during June and in the first six months of each year since 1926, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first six months of the same years are also given.

Table I

Year	Value of permits issued in June	Value of permits issued in first six months	Indexes of value of permits issued in first six months (1926=100)	Average indexes of wholesale prices of building materials in first six months (1926=100)
	$	$		
1939.....	7,581,492	26,861,062	34·1	87·5
1938.....	6,577,474	25,852,569	32·8	90·4
1937.....	6,005,958	28,056,942	35·6	94·9
1936.....	4,656,689	18,322,884	23·3	84·4
1935.....	5,104,855	24,640,511	33·8	81·2
1934.....	2,411,460	10,411,377	13·2	82·8
1933.....	3,589,204	10,315,899	13·1	78·9
1932.....	5,028,324	24,341,044	30·9	76·8
1931.....	8,593,958	58,950,508	74·8	83·5
1930.....	18,621,487	85,413,985	108·4	95·0
1929.....	27,816,592	124,609,267	158·2	99·2
1928.....	22,751,960	102,036,987	129·6	95·9
1927.....	18,363,239	80,842,719	102·6	96·0
1926.....	18,718,050	78,760,419	100·0	101·0

The value of the building represented by the construction permits issued by 58 cities was 3·9 per cent higher than in 1938, and

PROVINCIAL TOTALS OF BUILDING PERMITS ISSUED BY 58 CITIES IN THE FIRST HALF-YEAR, 1935-1939

Provinces	1939	1938	1937	1936	1935
	$	$	$	$	$

British Columbia	4,610,113	5,927,167	5,069,677	3,095,038	1,775,038
Canada	**26,861,062**	**25,852,569**	**28,056,942**	**18,322,884**	**24,640,511**

The following shows the January-June aggregate for the four leading cities in the last five years:—

City	1939	1938	1937	1936	1935
	$	$	$	$	$
Montreal	4,038,084	3,185,464	3,923,810	2,297,855	4,421,415
Toronto	3,529,258	3,816,855	4,219,755	3,166,190	5,315,395
Winnipeg	1,449,250	763,350	963,400	618,100	2,262,450
Vancouver	3,491,680	4,684,760	4,377,055	3,050,825	1,331,880
Total	**12,508,272**	**12,450,429**	**13,484,020**	**9,134,970**	**13,331,140**

was also greater than in the same period in other years since 1931, except 1937. As already stated, the aggregate for January-June in each of the last eight years has been decidedly lower than in any other year since 1920, being also much below the nineteen-years' average. As compared with 1938, there has been a decline of 2·9 points in the index number of wholesale prices of building materials, the mean for the first half of 1939 being also below the average for the period, 1920-1938.

The provincial totals for the first half of the years, 1935-1939, are shown in the accompanying table. The aggregates in New Brunswick, Quebec, Manitoba and Saskatchewan were higher in 1939 than in 1938, while the New Brunswick and Quebec figures were also greater than in the same months of any other year since 1931. The Manitoba total in 1939 was only twice exceeded in this period, by the January-June aggregate in 1935 and in 1932; that for Saskatchewan was higher than in other years since 1931, except 1937, 1933 and 1932. In Ontario, the estimated cost of the building authorized in the first half of the present year was lower than in 1938, 1937, 1935 and 1932, but was greater than in 1936, 1934 and 1933. Alberta showed improvement over the corresponding months in any year in the period, 1937-1933, but the 1939 figure was lower than in 1938 or 1932. In British Columbia and Nova Scotia, the value of the building represented by the permits taken out was lower than in either 1938 or 1937, but the totals for the first six months of 1939 considerably exceeded those for any other year since 1931.

The estimated value of the building represented by the permits granted in Montreal and Winnipeg during the first six months of 1939 was larger than that for the same period of 1938, while Toronto and Vancouver showed decreases as compared with last year. Approximately 47 per cent of the total value of the building permits issued by the 58 cities in the months, January-June, of the present year was reported by the four largest centres, practically the same proportion as in 1938 and 1937.

Table II gives the value of the building permits issued by 58 cities during June, 1939, and June, 1938. The 35 cities for which records are available since 1910 are marked thus "*".

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD APRIL TO JUNE, 1939

REPORTS received from the offices of the Employment Service of Canada during the quarter April to June, 1939, indicated an increase of nearly 13 per cent in vacancies listed and of over 14 per cent in placements effected, when a comparison was made with the business transacted during the corresponding quarter of 1938. All groups, except transportation, in which a fairly heavy decline was reported, and trade, in which a more moderate loss occurred, showed increased vacancies and placements over the second quarter of 1938, the highest gains being in construction and maintenance, services and logging, much smaller increases being registered in farming, manufacturing and mining. Provincially, the Maritimes, Ontario, Manitoba, Saskatchewan and British Columbia reported a larger volume of work effected than during the corresponding quarter last year, while Quebec and Alberta recorded declines, Ontario showing the highest gain, of which the greater share took place in the construction group, and Quebec the greatest loss for which decreased placements in that same section and in transportation, also, were chiefly responsible.

From the chart on page 826 which accompanies the article on the work of the employment offices for the month of June, 1939, it will be seen that the curve of vacancies and of placements in relation to applications showed numerous fluctuations throughout the period. The trend of both curves was upward during the first half of April and of May and of the latter half of June and downward during the latter half of April and the first half of June, while during the latter half of May the curve of vacancies remained stationary and that of placements was slightly upward. At the close of June, however, the levels attained were between one and two points below those recorded at the end of the same period a year ago. During the quarter April to June, 1939, there was a ratio of 53·0 vacancies and 50·2 placements for each 100 applications for employment, as compared with 49·7 vacancies and 46·4 placements during the corresponding period last year.

The average number of positions offered daily during the quarter under review was 1,332, of applications registered 2,515 and of placements effected 1,264, as compared with a total daily average of 1,184 vacancies, 2,383 applications and 1,106 placements in regular and casual employment during the second quarter of 1938.

During the three months April to June, 1939, the offices of the Service reported that they had made 97,254 references of persons to positions and had effected a total of 93,474 placements, of which 55,023 were in regular employment and 38,451 in casual work. Of the placements in regular employment, 39,708 were of men and 15,315 of women, while casual work was found for 23,768 men and 14,683 women. A comparison with the same quarter of 1938 showed that 81,780 placements were then effected, of which 52,207 were in regular employment and 29,573 in casual work. Applications for employment during the period under review were received from 137,552 men and 48,528 women, a total of 186,080, in comparison with a registration of 176,287 persons during the same period of 1938. Employers notified the Service during the second quarter of 1939 of 98,546 positions, of which 63,632 were for men and 34,914 for women, as compared with 87,590 opportunities for employment offered during the corresponding period of 1938.

In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of June, 1939.

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF JULY, 1939

Reports of Superintendents of the Employment Service

THE employment situation at the end of July was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces were busy with their growing crops, as well as with haying. All early vegetables were plentiful and of good quality and variety. Logging was quiet, the only placements being those of a small number of men as pulpwood peelers for individual farmers. Good catches of cod, salmon and lobsters were brought in. Coal mines in the New Glasgow area operated from two to six days per week, while those in Cape Breton and vicinity worked from three and a half to five days. Manufacturing was active and no idleness was reported by the iron and steel industry. Sawmills also were busy. All building construction was progressing favourably and highway construction, which was under way, also afforded employment for numerous men. Transportation, both freight and passenger, by rail and water, was heavy. Trade was good, with collections fair and placements of household domestics were well maintained.

Haying was far advanced in the Province of Quebec, although continuous rain in the Chicoutimi district had threatened to destroy the growing crops. Numerous men there were working in the bush, and sawmills were active at Val d'Or. Various manufacturing centres reported nearly all industries working at full capacity, particularly paper mills, textiles, furniture, aluminium, match, toy, clothing, leather and sash and door factories. Building activity, also, attained a new peak with the erection of buildings, or the extension of repairs to those already in use. A number of men, too, had found employment at the St. Maurice Dam and highway construction, likewise, had received its quota of workers. Transportation was active and regular requests were received for household workers in the Women's Division.

Harvesting operations in Ontario continued to provide a good volume of employment for district and local men. Some workers were finding employment in the tobacco fields and soon there would be calls for tomato pickers, but cherry and berry picking was practically completed, so that casual placements in that line had diminished considerably. A slight demand existed for pulp cutters, although owing to the shortness of the peeling season it was difficult to induce men to accept this work. Sawmills at North Bay, Sudbury and Timmins were in full swing, with a few requests for skilled labourers. Mining was quiet at Fort William and Port Arthur, but at Timmins there was a steady call for various classes of miners, steel sharpeners and mill men, with a good supply of all types of mining men available. Manufacturing showed a slightly upward trend, although several industries continued to run with reduced staffs and time, occasioned by stock-taking, vacation periods, or overhauling of machinery. Activity, on the whole, however, was well maintained, seasonal plants, such as fruit and vegetable canneries, being exceptionally busy. Activity in the building trades was favourable, the erection of new dwellings and various alteration jobs giving employment to a number of tradesmen. Highway construction and maintenance also absorbed many workers and railway and steamship lines were busier. Requests for first class cooks and cooks-general exceeded the supply of qualified applicants in the Women's Division and there was also an increased demand for various hotel and restaurant workers, with wages offered slightly above the average. A few women and girls were placed, too, in industrial and clerical positions.

Excessive heat and lack of rain caused early ripening of crops in the southern portions of Manitoba and wheat cutting was general where these conditions prevailed. Elsewhere in the Prairie Provinces requests for harvest help were still rather scarce, although general farm help was in demand for haying. Logging, mining and manufacturing were quiet, but building construction continued to advance, several substantial contracts having been taken out, particularly at Winnipeg and Edmonton. Highway construction also afforded employment for a number of men and registration of boys for forestry camps and vocational training schools continued. Railway operation showed improvement and trade was better. A good demand existed for country domestics in the Women's Department, with a shortage of suitable applicants, city positions being more readily filled.

There was only a moderate call for farm hands for haying in British Columbia, although many men were available. Fruit packing houses were busy with apricots and early peaches and apples. Lumbering was active, also sawmills, and many export orders

had been received. Some mills, however, feared they would be forced to close if the increasing fire hazard reached more serious proportions. Mining was fair, but with no demand for workers. Fishing at Prince Rupert was better and the total pack of sockeye, thus far, was ahead of last year's. Building construction showed moderate activity and highway work advanced. Forestry camps sponsored by the Government, also, absorbed some of the younger men and boys. Drydocks and shipyards were quiet at Prince Rupert, but busy at Vancouver, while longshoremen at all ports were well employed. Trade, apart from that stimulated by tourists, was somewhat slow. Experienced household help was scarce, but work in the canneries and packing houses was accepted by many women and girls.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, July, 1939, summarized the employment situation as follows:—

Employment in June showed a further marked improvement. The greatest improvement occurred in building and public works contracting, agriculture and horticulture, hotel and boarding house service, the distributive trades, engineering, metal goods manufacture, the cotton, wool, hosiery, printing and fishing industries, and the road transport, dock and harbour and shipping services. On the other hand, there was a slight decline in employment in the coal mining industry.

It is provisionally estimated that at June 12, 1939, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,810,000. This was 143,000 more than at May 15, 1939, and, on a comparable basis, about 600,000 more than at June 13, 1938.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at June 12, 1939, was 9·4 compared with 10·4 at May 15, 1939. For June 13, 1938, the percentage (which excludes the classes brought into insurance in April, 1938) was 12·8. For persons insured under the general scheme the corresponding percentages were 9·7 at June 12, 1939, 10·6 at May 15, 1939, and 13·2 at June 13, 1938. For persons within the agricultural scheme the percentages were 4·2, 5·7 and 5·2 respectively.

At June 12, 1939, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,098,793 wholly unemployed, 195,625 temporarily stopped, and 55,161 normally in casual employment, making a total of 1,349,579. This was 142,703 less than at May 15, 1939, and 453,333 less than at June 13, 1938.

The total of 1,349,579 persons on the registers in Great Britain at June 12, 1939, included 695,729 persons with claims admitted for insurance benefit, 488,146 with applications authorized for unemployment allowances, 27,638 persons with applications for insurance benefit or unemployment allowances under consideration, and 138,066 other persons, of whom 26,808 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at June 12, 1939, was 1,417,239, as compared with 1,565,313 at May 15, 1939, and 1,894,548 at June 13, 1938.

United States

According to a press release issued on July 26 by Miss Frances Perkins, United States Secretary of Labor, employment in non-agricultural industries registered a further gain of approximately 400,000 in June. Of this increase approximately 162,000 were accounted for by the settlement arrived at in the bituminous coal industry. In this connection it was stated that "even with this eliminated the current gain of 234,000 workers is larger than any rise in employment reported for the month of June during the past 10 years with the exception of the years 1929 and 1936". Over 1,200,000 more workers were employed in private non-agricultural activities this June than a year ago. These figures do not include employees on Works Progress Administration and National Youth Administration projects nor enrollees in the Civilian Conservation Corps.

The following paragraphs taken from the official press release indicate the employment situation in the United States to be as follows:—

Increases from May to June were reported in virtually all lines of private industrial and business activity. The gains in manufacturing and wholesale and retail trade, while not pronounced, were particularly significant.

Factory employment, which customarily declines from May to June, showed a contraseasonal gain and wholesale trade establishments reported an expansion in forces, instead of the small curtailment customary in June. Employment in retail trade establishments also increased slightly, the increase being noteworthy in that gains in June have been shown in only 4 of the preceding 10 years.

Further employment gains were reported in both private and public construction. Utility companies also added workers to their staffs. With the exception of anthracite mining, employment gains were recorded in all other mining industries, bituminous coal mines reporting a particularly sharp gain which reflected more normal operations following the recent shut-down. Seasonal gains in employment were shown in the laundry and dyeing and cleaning industries. Year-round hotels and brokerage and insurance offices reported fewer employees than in the preceding month.

Class I steam railroads, according to preliminary figures compiled by the Interstate Commerce Commission, showed a gain of 34,000 workers between May and June.

Factory Employment.—There was a contraseasonal factory employment gain of 0·7 per cent or 44,000 wage earners in June. The gains were quite general, 51 of the 87 manufacturing industries covered reporting more workers in June than in May and 57 showing larger pay rolls. The June employment index for all manufacturing industries combined (90·7 per cent of the 1923-25 average) was 11·2 per cent above the level of last year at this time and the June pay roll index (86·2 per cent of the 1923-25 average) was 21·8 per cent higher than the June 1938 figure.

The durable-goods group of industries employed 1·0 per cent more workers than in May and 16·2 per cent more than in June of last year. In the nondurable-goods group, there were corresponding employment increases of 0·2 per cent and 7·3 per cent, respectively.

Many of the employment gains in the separate industries were greater than seasonal, and in some instances they were contrary to the usual seasonal pattern.

Non-Manufacturing Employment. — Retail trade employment showed a slight percentage increase, 0·3 per cent, or 11,000 employees and pay rolls rose 1·3 per cent. The employment gain, while not pronounced, is significant in that gains in June have been shown in only 4 of the 10 preceding years. Employment was 2·9 per cent above the level of June 1938 and pay rolls were 4·2 per cent higher. The general merchandising group, which is of major importance and includes department, variety, general merchandising and mail-order establishments, gained 0·2 per cent in number of workers over the month. Dealers in lumber and building material and in coal-wood-ice increased employment seasonally by 2·4 per cent, while firms dealing in farmers' supplies cut their forces seasonally by 4·4 per cent.

The increase in employment in wholesale trade, 0·6 per cent, was contraseasonal and indicated the return to work of 8,000 employees.

Employment on Public Works.—Employment on projects operated by the Works Progress Administration declined for the fourth consecutive month, decreasing from 2,468,000 in May to 2,438,000 in June. The decline in work relief employment was much more pronounced when compared with the corresponding period in 1938. In June 1938 there were 2,767,000 persons employed on work relief projects. On Federal projects under The Works Program there was an increase in employment of 36,000. Decreases in employment were reported on work projects of the National Youth Administration and on Student Aid.

Employment in camps of the Civilian Conservation Corps fell off 34,000 during the month, leaving 302,000 employees on June 30.

Employment in Private Building Construction.—Employment in private building construction showed an increase of 0·6 per cent from May to June, according to reports from 12,182 contractors employing 115,038 workers in June. Pay rolls decreased 1·4 per cent.

According to the 1939 edition of *Facts and Figures of the Automobile Industry* published by the Canadian Automobile Chamber of Commerce, Toronto, the average monthly employment in automobile manufacturing plants in 1938 totalled 14,872, with salaries and wages amounting to $20,993,362. Manufacturers of parts and materials reported average monthly employment of 15,243 and wages and salaries amounting to $19,063,332. Employment in the industry, as reported, would, therefore, total 30,115, with wages and salaries paid of $40,056,694.

During the month of July there were 5,242 accidents reported to the Ontario Workmen's Compensation Board, as compared with 5,207 during June, and 4,993 during July a year ago. The benefits awarded amounted to $479,282.90, of which $398,656.20 was for compensation and $80,626.70 for medical aid.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contract made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies

and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

NATIONAL HARBOURS BOARD

Reconstruction of No. 24 Grian Shipping Gallery, Halifax Harbour, N.S. Name of contractor, L. G. Ogilvie and Company Limited, Montreal, P.Q. Date of contract, July 10, 1939. Amount of contract, $169,983. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 45
Boatmen (rowboats)	0 40
Brick and hollow tile layers	0 97½
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers:	
Walls	0 75
Floors	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gas. or elec.)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drill runners	0 50
Electricians (inside wiremen)	0 85
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Engineers, crane (steam, gas., elec.)	0 70
Engineers on steel erection	0 75
Firemen, stationary	0 45
Hoist operators—tower (gas. or elec.)	0 50
Labourers	0 40
Lathers, metal	0 60

	Per hour
Machinists	0 70
Machinists' helpers	0 45
Millwrights	0 70
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Painters (spray)	0 65
Painters and glaziers	0 60
Pipefitters—(surface, temporary work)	0 55
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 85
Pumpmen	0 50
Riggers (general)	0 50
Roofers—felt and gravel: patent	0 45
Rodmen—reinforcing steel	0 50
Sheet metal workers	0 70
Structural steel workers	0 75
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 50
Tractor operators	0 50
Watchmen	0 35
Welders and burners:	
Acetylene or electric	0 70
On steel erection	0 75

DEPARTMENT OF NATIONAL DEFENCE

Construction of a Seamanship Instruction Room at the Royal Canadian Naval Barracks, Esquimalt, B.C. Name of contractors, Messrs. Knott and Jones, Victoria, B.C. Date of contract, July 14, 1939. Amount of contract, $4,490. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 80
Cement finishers	0 60
Cement and concrete mixer operator:	
Steam	0 70
Gasoline or electric	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 85
Electricians (inside wiremen)	0 87½
Firemen (stationary)	0 50
Engineers on steel erection	1 12½
Engineers, operating, steam:	
Single drum	0 70
Double drum	0 90
Hoist operators	0 60
Labourers	0 45
Lathers, metal	0 75
Lathers, wood	0 75
Linoleum layers	0 65
Marble setters	0 95
Marble setters' helpers (all men assigned to help tradesmen)	0 50
Mastic floor layers	0 85
Mastic floor rubbers and finishers	0 60
Mastic floor kettlemen	0 60
Mastic floor labourers	0 50
Motor truck drivers	0 50
Motor truck driver and truck	1 50
Ornamental iron workers	0 75
Painters, spray	0 75
Painters and glaziers	0 65
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 90
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Roofers—composition	0 55
Roofers—felt and gravel: patent	0 50
Roofers—sheet metal	0 70
Roofers—shingles (wood, asbestos)	0 80
Sheet metal workers	0 75
Stonecutters	0 80
Stonemasons	1 00
Stonemasons' helpers (mixing and tempering mortar)	0 50
Structural steel workers	1 12½
Terrazzo layers	0 75
Terrazzo finishers and helpers	0 60
Tile setters (ceramic)	0 95
Tile setters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 45

Construction of an extension of Power Lines at the Joint Service Magazines, Esquimalt, B.C. Name of contractors, Messrs. Hume and Rumble Limited, Vancouver, B.C. Date of contract, July 15, 1939. Amount of contract, $4,972.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	0 80
Cement finishers	0 60
Cement and concrete mixer operators: gas. or electric	0 55
Cable splicers	1 09⅜
Driver, horse and cart	0 60
Driver, team and wagon	0 85
Drivers	0 45
Electricians (inside wiremen)	0 87½
Labourers	0 45
Linemen	0 96¼
Motor truck drivers	0 50
Motor truck driver and truck	1 50
Linemen's helpers	0 68¾
Watchman	0 45

Interior plastering at the Royal Canadian Air Force Station Hospital, Trenton, Ontario. Name of contractor, Mr. John J. Macnab, Trenton, Ontario. Date of contract, July 6, 1939. Amount of contract, $1,295.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters	$0 70
Labourers	0 40
Lathers—wood	0 65
Lathers—metal	0 70
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
Plasterers	0 80
Plasterers' helpers (mixing and tempering mortar)	0 45

Renewal of the flat roof of the Armoury at Halifax, N.S. Name of contractors, F. S. Coombs and Company, Halifax, N.S. Date

of contract, July 10, 1939. Amount of contract, $3,146.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters	$0 70
Labourers	0 40
Motor truck drivers	0 45
Roofers, felt and gravel	0 45
Sheet metal workers	0 70

Construction of an addition to the Single Officers' Building at the Royal Canadian Air Force Training Station, Trenton, Ontario. Name of contractors, Frontenac Construction Company Limited, Toronto, Ontario. Date of contract, July 3, 1939. Amount of contract, $37,680. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finisher	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gas. or elec.)	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Electricians (inside wiremen)	0 70
Engineers on steel erection	0 80
Engineers, crane (steam, gas., elec.)	0 70
Firemen, stationary	0 45
Hoist operators—tower (gas. or elec.)	0 50
Insulation workers (cork, asbestos)	0 65
Labourers	0 40
Lathers, metal	0 70
Lathers, wood	0 65
Machinists	0 65
Machinists' helpers	0 45
Motor truck driver	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 60
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 75
Roofers, felt and gravel	0 45
Rodmen, reinforced steel	0 50
Sheet metal workers	0 70
Shovel operators (gas.)	0 90
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Steam shovel firemen	0 55
Stonemasons	0 90
Stonemasons' helpers (mixing and tempering mortar)	0 45
Stonecutters	0 75
Structural steel workers	0 80
Welders and burners on steel erection	0 80
Watchman	0 35

Supplying and laying marble, tile and terrazzo and asphalt tile flooring on the second floor in the Station Hospital, Royal Canadian Air Force Station, Trenton, Ontario. Name of contractor, Mr. Arthur A. Sills, Belleville, Ontario. Date of contract, July 25, 1939. Amount of contract, $2,342.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Cement finishers	0 60
Floor layers, asphalt, tile	0 90
Floor layers', (asphalt, tile) helpers	0 45
Labourers	0 40
Tile setters (ornamental)	0 90
Tile setters' helpers (all men assigned to help tradesmen)	0 45

Department of Public Works

Construction and completion of the Berthier-St. Ignace Island Roadway and Madame-St. Ignace Island Causeways, Berthier Island, P.Q. Name of contractors, Dibblee Construction Company Limited, Montreal, P.Q. Date of contract, June 26, 1939. Amount of contract, $39,457.05 approximately. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 40
Blacksmiths	0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Carpenters and joiners	0 55
Compressor operators (gas. or elec.)	0 45
Dragline operators (steam or gas.)	0 85
Dragline firemen	0 55
Dragline oilers	0 50
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Firemen, stationary	0 40
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Motor boat operators	0 40
Painters and glaziers	0 55
Pipe fitters (surface-temporary)	0 50
Riggers (general)	0 45
Road grader operators (horsedrawn)	0 40
Road grader operators (including team)	0 65
Road grader operators (gas.)	0 45
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gas.)	0 85
Timbermen and cribmen (measuring, scribing, and by the use of axe, adze, etc., cutting and fitting timber)	0 42
Tractor operators	0 45
Watchmen	0 30

Construction of a fishing harbour at Marsh Creek (New Carlisle) Bonaventure County, P.Q. Name of contractors, Messrs. Aiken and MacLachlan Limited, St. Catharines, Ontario. Date of contract, July 17, 1939. Amount of

contract, approximately $99,876.70. A fair wages schedule was included in the contract as follows:—

	Per hour
Machinist	$0 55
Blacksmith	0 50
Blacksmith's helper	0 35
Carpenters and joiners	0 50
Compressor operators (gas. or elec.)	0 40
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 55
Gasoline or electric	0 40
Drill runner (machine)	0 40
Firemen, stationary	0 35
Engineer, operating, steam (single or double drum)	0 55
Labourers	0 30
Painters	0 50
Pile driver foreman	0 65
Pile driver engineer	0 55
Pile driver firemen	0 35
Powder men	0 40
Structural steel workers	0 75
Engineers on steel erection	0 75
Drivers	0 30
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 37½
Welders—acetylene or electric	0 50
Motor truck driver	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85

Construction of a warehouse at Bathurst, N.B. Name of contractors, Laflamme and Laflamme Limited, Montreal, P.Q. Date of contract, July 8, 1939. Amount of contract, approximately $54,200.90. A fair wages schedule was included in the contract as follows:—

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Vegetable Foods, etc.

GUELPH, ONTARIO.—A MANUFACTURER OF MALT SYRUP AND THE INTERNATIONAL UNION OF UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, LOCAL 304, BRANCH 1. (MALT AND SYRUP WORKERS.)

Agreement to be in effect from January 1, 1939, to January 1, 1941.

Only union members to be employed, if available.

Hours: 8 per day, 48 per week; firemen to work 56 hours per week.

Overtime and work on Sundays and legal holidays: time and one half.

Weekly wage rates: pan operators $33, shippers and firemen $31, repairman and cooper $30, brewers $29, helpers $28, assistant shipper and truck driver $27, dry operators and yardmen $26.

During slack period, all men may be laid off in rotation in an impartial manner in their respective departments. The lay-off to be according to seniority.

Disputes which cannot be settled by the parties will be referred to a joint arbitration board whose decision will be final and binding.

TORONTO, ONTARIO. — CERTAIN BAKERIES (JEWISH) AND THE BAKERY AND CONFECTIONERY WORKERS INTERNATIONAL UNION, LOCAL NO. 181.

Agreement to be in effect from June 1, 1939, to April 30, 1940, and until a new agreement made.

Only union members to be employed, if available. The union label to be used.

Hours: 8 per day, 48 per week.

Weekly wages: foremen $43, second hands $39, third hands $35.

FORT WILLIAM AND PORT ARTHUR.—CERTAIN BAKERIES AND THE BAKERY AND CONFECTIONERY WORKERS INTERNATIONAL UNION, LOCAL 284. (BAKERY SALESMEN.)

Agreement to be in effect from January 1, 1939, to January 1, 1940, and thereafter until either party gives notice of change.

Permanent employees must be union members; new employees to join the union.

Six days to be a week's work, except for stablemen.

Wages: bread salesmen $15 per week and 7 per cent commission on retail sales and 3 per cent on wholesale sales (except routes which are 80 per cent or more wholesale, on which routes 5 per cent commission to be paid), a minimum of $20 per week; wholesale cake drivers $15 per week plus 5 per cent commission and a bonus when sales exceed a certain amount, assistant wholesale cake drivers $12 per week plus 5 per cent commission. Employees receiving higher than the above rates are not to have their wages reduced. The company to be responsible for the extension of credit to customers which has been authorized by the management.

VANCOUVER, B.C.—CERTAIN BAKERIES AND THE BAKERY AND CONFECTIONERY WORKERS INTERNATIONAL UNION, LOCAL 468.

Agreement to be in effect from June 1, 1938, to May 31, 1939, and thereafter from year to year subject to notice.

Only union members to be employed and employees to authorize the company to deduct from their wages and pay to the union any dues, fines and assessments owing to the union. The union label to be furnished at cost to employers parties to this agreement.

Hours: 8 per day.

Overtime: time and one half; work on all statutory holidays double time, unless an employee has had a holiday the night before, when time and a half will be paid.

Minimum weekly wages: doughman $31.50 (66 cents per hour); ovenman $30.50 (64 cents per hour); bench hands and machine men $27.75 (58 cents per hour); helpers $24 (50 cents per hour); shipper $30; assistant shipper or checker $23.30; finishers and cake wrappers $17 (36 cents per hour).

Vacation: after one full year's service, each employee to have one week's vacation with pay.

One apprentice allowed up to 12 journeymen and one for every 12 journeymen thereafter.

Any dispute which cannot be settled by the union with the employer will be referred to a joint arbitration board.

Manufacturing: Tobacco and Liquors

WINDSOR, ONTARIO.—A CERTAIN BREWERY AND THE UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, LOCAL 232.

Agreement to be in effect from April 1, 1939, to April 1, 1940, and thereafter from year to year subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, November, 1938, page 1292.

Hours are unchanged at 49 per week from April to September inclusive and 44 from October to March inclusive. Weekly wages are unchanged at: $31 for coopers; $26.50 for watchmen (72 hour week), fermenting room and cold storage, kettlemen, wash house and bottlers operating machines; $24.50 for other bottlers.

WINDSOR, ONTARIO.—A CERTAIN BREWERY AND THE UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, LOCAL 356 (WALKERVILLE).

Agreement to be in effect from April 1, 1939, to April 1, 1940, and thereafter from year to year subject to notice.

Only union members to be employed, if available.

Disputes are to be referred to a joint arbitration board whose decision will be binding.

Brewing and Bottling Department

Hours: 9 per day, 4 on Saturdays, a 49 hour week from April to September inclusive, and 8 per day, 4 on Saturdays, a 44 hour week from October to March inclusive.

Overtime: time and one half. Employees will be paid for four specified legal holidays and if required to work on such days will be given another day off instead.

Weekly wage rates: coopers $31; fermenting room and cold storage, kettlemen, washhouse, man loading bottles on to conveyor feeding soaker, man feeding soaker by hand, bottlers operating machines $26.50; other bottlers, all helpers $24.50; watchman for 12 hours, six days, $26.50.

Vacation: those paid a monthly salary to be given one week's vacation with pay each year during the winter months or when convenient to the company.

Delivery Department

Drivers delivering half barrels and large loads to have helpers.

Hours: drivers on city delivery, 8 per day, a 48 hour week; drivers on transport work, 9 per day, 54 per week from April to September inclusive, and 8 per day, a 48 hour week from October to March inclusive.

Overtime: time and one half.

Wages for all drivers $26.50 per week.

Vacation: one week with pay during the winter months.

EDMONTON, ALBERTA.—TWO BREWERIES AND THE UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, LOCAL 314.

Agreement to be in effect from April 1, 1939, to March 31, 1941, and thereafter from year to year, subject to notice.

Only union members to be employed, if available. The breweries agree to give preference to union made malt, materials and machinery. The use of union label allowed to breweries parties to this agreement.

Hours (except for engineers and firemen) 8 per day, 4 on Saturdays, a 44 hour week; hours for engineers and firemen 8 per day, a 48 hour week.

Overtime: time and one half; work on Sundays, double time. Seven legal holidays to be paid for, but if employees required to work on these days they will be paid double time.

Wages in engineering department: chief or acting engineers $189 per month; second class engineers 78¼ cents per hour, third class engineers 76 cents, firemen 66⅜ cents, general mechanics 72 cents, mechanic's helper 62½ cents. Wages in brewery department: first cellar man $157 per month; first brewhouse man 81¼ cents per hour; first washhouse and fermenting cellar man 75 cents; cellar, brewhouse and washhouse helpers 71⅜ cents. Wages per hour in bottling department: soaker feeders 62½ cents, soaker operators 71⅝ cents, rinsing machine man with inspection 68¾ cents, filler men 75 cents, crowner men 71⅝ cents, pasteurizer men 68¾ cents, labeller 75 cents, labeller assistant 68¾ cents, wrapper men 62½ to 75 cents; packers, header up and trucker from packers, relief men, nailing and sealing machine men 68¾ cents; labourers 57¼ and 62½ cents; first bottle yard men $145 per month. Wages per hour in coopering department: tight barrel coopers 78⅛ cents, slack barrel coopers 75 cents for hand work and 68¾ cents for machine work. Wages per month in delivery department: truck drivers $135, truck drivers' helpers $125, teamsters $120.

One apprentice may be employed to every ten union men in the brewing departments and to serve two years. Apprentices to be paid 43 cents per hour during first year and 48 cents during second year.

Seniority to be considered in making promotions.

In slack periods, employees to be laid off in rotation.

Vacation: after one year's service with a brewery, one week's vacation with pay each year, vacations to be taken as arranged by the employer.

Disputes which cannot be settled between the parties to the agreement will be referred to a joint arbitration board whose decision will be binding.

Calgary, Alberta.—Two Breweries and the United Brewery, Flour, Cereal and Soft Drink Workers of America, Local 124.

Agreement to be in effect from April 1, 1939, to March 31, 1941, and thereafter from year to year, subject to ntoice.

This agreement is similar to the one summarized above for Edmonton, with certain differences among which are:

Wages: in the engineering department, general mechanics 75 cents, pipefitters 69 cents; in the brewery department, first brewhouse man 75 cents; in the bottling department, soaker feeders 68¾ cents, labourers (inside and loading) 62½ cents. Wages per hour for special men: maintenance men 75 cents. Other wage rates are the same as at Edmonton.

Wages per hour for union men in aerated water department: filling machine men 68¾ cents; rinsing man with inspection and labelling machine man 62½ cents. Higher wages being paid any employee when the agreement was made are not to be reduced.

There are no apprentice regulations except that wage rates are the same as at Edmonton (43 cents per hour during first year and 48 cents during second year).

No provision is made for vacation, but it is provided that one week's bonus for 1939 and one week's bonus for 1940 be paid April 1 each year.

Manufacturing: Fur, Leather and Miscellaneous Animal Products

Toronto, Ontario.—Certain Manufacturers of Leather Goods (Handbags, etc.) and the International Ladies Handbag, Pocketbook and Novelty Workers' Union, Local 8 (Leather Workers).

July, 1936, page 657. This agreement as amended remains in effect until April, 1940.

Certain of the hourly wage rates which came into effect January 1, 1938, and which continue to April 30, 1940 are: paper machines—boss machine tender $1.85, machine tenders $1.62 and $1.65, back tenders $1.44 and $1.47, third hand $1.10 and $1.12, fourth hand 70 cents, fifth hand 65 cents, sixth hand 54 cents; mixing box operators 63 cents, broke beaters 54 cents; clothing man $1.07, head oiler 82 cents, oilers 56 cents, cleaners 54 cents; groundwood mill—grindermen 55 cents, wood truckers 54 cents, oiler and screenman 55 cents, wet machines 54 cents; sulphite mill—cooks 95 cents, cook's helpers 75 cents, sulphite screens and chipperman 57 cents, blow pits and rock and material handlers 54 cents; wood room—sawyer 57 cents, other classes 54 cents; engineer 84 cents, firemen 69 cents, coal handlers 57 cents; finishing and shipping—weighman, coreman and electric truck operator, 57 cents, rewindermen 62 cents, others 54 cents; electricians and pipefitters 82 cents; pipefitters', millwrights' and blacksmiths' helpers 66 cents; millwrights (except paper machine millwrights 87 cents), tinsmith, welder, blacksmith and machinists 82 cents; painter 66 cents, cleaners and watchmen 54 cents; locomotive crane engineer 92 cents, locomotive crane fireman 57 cents, helper 54 cents.

FORT FRANCES, ONTARIO.—FORT FRANCES PULP AND PAPER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, LOCAL 92

The agreement which came into effect May 1, 1938, continues in effect with minor changes made in the wage scale May 1, 1939, to April 30, 1940, and thereafter from year to year, subject to notice. The terms of this agreement are similar to those of the previous agreement which was summarized in the LABOUR GAZETTE, October, 1937, page 1153, with the exception of the wage scale.

Certain hourly wage rates in effect from May 1, 1939: pulpwood hoist—riverman and handyman 55 cents, bunchers, slack pullers and car loaders 59 cents; pulpwood storage—labourers 55 cents, car loaders 59 cents; wood room and jack ladders—labourers 55 cents, sawyers 58 cents, sawyer's helper 57 cents; grinder room—labourers 55 cents, wood piler 56 cents, grindermen 58 cents, freeness testers 58 cents; screen room—screen man 60 cents, others 55 and 56 cents, beater and mixing crew—broke beater man and clay man 55 cents; core man 55 cents; stores countermen 65 and 69 cents; finishing and loading crew—trucker 64 cents, roll finisher 57 cents, scalers 58 cents, loaders and wrapper cutter 57 cents; paper testing—inspector 60 cents, testers 57½ cents; yard crew—labourer foreman 57 cents, truck driver 63 cents, labourers 55 cents; steam plant—bunker man and labourers 55 cents; paper machines—head oiler 82 cents, swipers 58 cents; maintenance department—head rigger, head painter, cement mason, saw filer, blacksmith 82 cents; tinsmith 82½ cents, rigger helper 63 cents, painter helper and cement mason helper 60 cents, blacksmith helper and tinsmith helper 70 cents; high water pump operators—pump operators 70 cents, helper 67½ cents.

FORT FRANCES, ONTARIO.—FORT FRANCES PULP AND PAPER COMPANY AND THE INTERNATIONAL BROTHERHOOD OF FIREMEN AND OILERS, LOCAL 146

The agreement which came into effect May 1, 1937, to run from year to year, continues in effect to April 30, 1940, and thereafter from year to year, subject to notice.

Employees to be union members and any new employees to join the union.

Hours: 8 per day.

Overtime (except for tour workers substituting for each other) to be paid at time and one half: work during Sunday or holiday shutdown, time and one half.

Hourly wage rates in steam plant from January 1, 1938: head fireman 90 cents, fireman 76 cents, ash handler 59 cents, bunker man and labourer 57 cents, meter man 73 cents, oilers 65 cents, paper machine engineers and turbine engineers 86 cents.

Seniority to be considered in laying off or promoting employees.

A mutual interests committee to be appointed by the union and will meet quarterly with the company representatives for discussion of matters of mutual interest. An adjustment committee also to be appointed by the union, who shall endeavour to adjust any grievances etc. with the management. If they fail and later if the president of the union and the company cannot agree, the matter will be referred to a joint arbitration board, whose decision will be final and binding.

POWELL RIVER, B.C.—THE POWELL RIVER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 142) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 76).

Agreement to be in effect from May 1, 1939, to April 30, 1940, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1938, page 1405, with the exception of wage adjustments to higher rates for a few classes of workers.

Hourly wage rates from May 1, 1939, for certain of the classes whose rates are changed from those noted in the LABOUR GAZETTE, December, 1938: paper mill—millwrights (inspectors) 90 cents, clothing men 85 and 93 cents; sawmill—classes formerly receiving 55 cents increased to 56 cents; groundwood—grindermen 60 cents, pulp testers 56 cents; beater room—beater engineers 85 cents; mixing machine operators 68 cents; finishing rooms—scale men 60 and 63 cents, biller 56 and 58 cents, others 56 cents; core makers 60 cents; cutter room—those receiving 55 cents raised to 56 cents; lumber yard band saw man 56 cents; technical control testers—paper testers 60 cents, pulp testers 56 cents; steam plant—engineers 64 to 86 cents; docks and storage—checkers 67 cents.

Manufacturing: Printing and Publishing

OSHAWA, ONTARIO.—A PRINTING AND PUBLISHING COMPANY AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 969 (PRINTERS).

Agreement to be in effect from February 16, 1939, to February 15, 1941.

Only union members to be employed. The company to apply for the union label.

Hours: 46 per week for day staff, 42 for night staff.

Overtime: employees may work up to 4 hours overtime in any one week if required, at straight time; all overtime over 4 hours in any week to be paid at time and one-half.

Wages for journeymen: from February 16, 1939, to February 15, 1940, $27 per week; from February 16, 1940, to February 15, 1941, $27.50 per week.

If there is an increase in the staff, men laid off to be reinstated in the reverse order in which they were laid off, before other help employed.

The president and one other union member and two representatives of the management to form a joint standing committee to deal with any disputes.

TORONTO, HAMILTON AND LONDON, ONTARIO.—EMPLOYING PHOTO ENGRAVERS (COMMERCIAL SHOPS) AND THE INTERNATIONAL PHOTO ENGRAVERS' UNION, LOCAL 35.

Verbal agreement in effect from May 1, 1939, to April 30, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, September, 1937, page 1031, with these exceptions:

Wages: the regular wage rate for journeymen photo engravers remains at $55 per week of 40 hours, but it is agreed that in the case of three specified firms their present rate of

$52.50 per week may be continued until April 30, 1940, when a conference between these companies and the union will be held to determine the wage rate for the next year, which in any case must be at least $52.50.

Apprenticeship is increased from five to six years; wages for the sixth year to be $40 per week during first half and $45 during second half. At the end of this term the employer has the privilege of advancing the apprentice to the minimum journeymen's scale on a further six month period, the increase for the six month extension to be $5 per week. One apprentice allowed to each seven journeymen.

A joint committee to be set up to promote the interests of the industry.

St. Thomas, Ontario.—A Certain Newspaper Publishing Firm and the International Typographical Union, Local 459 (Printers).

Agreement to be in effect from December 1, 1938, to November 30, 1939.

This agreement is similar to the 1936-1937 agreement which was summarized in the Labour Gazette, May, 1937, page 576, with these exceptions:

Wages: compositors, stone hands, floormen, operators, machinists and machinist operators to be paid $33 per week (an increase of $3 per week over the 1936-1937 rate).

Vacation: all journeymen with five years' continuous service to receive one week's vacation with pay.

Windsor, Ontario.—A Daily Newspaper Publisher and the International Typographical Union, Local 553 (Printers).

Agreement to be in effect from April 1, 1939, to March 31, 1940, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, November, 1937, page 1269, with these exceptions:

Hours: 8 per day, 4 on Saturdays, a 44 hour week. (Previously hours were 48 per week.)

Overtime: work on eight specified holidays, double time.

Wages are unchanged at 85 cents per hour for day work and 90 cents for night work. No special wage rates are specified for the "lobster" shift, but it is provided that if three shifts are worked, two of them to be considered night shifts. No mention is made of payment of a bonus.

Windsor, Ontario.—Certain Job Printing Offices and the International Typographical Union, Local 553 (Printers).

Agreement to be in effect from April 1, 1939, to March 31, 1940, and thereafter from year to year, subject to notice.

This agreement is the same as the one summarized above between this local union and a newspaper office in Windsor, the only difference being that no provision is made for a vacation.

Winnipeg, Manitoba. — Certain Employing Photo Engravers (Commercial Shops) and the International Photo Engravers' Union, Local 37.

Agreement to be in effect from October 1, 1938, to September 30, 1939.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, December, 1938, page 1407, with this exception:

Hours: 8 per day, 5 days per week, a 40 hour week throughout the year.

Regina, Sask.—Certain Printing Establishments and the International Brotherhood of Bookbinders, Local 205.

Agreement to be in effect from May 1, 1939, to April 30, 1940.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one-half for first three hours; thereafter and work on Sundays and seven specified holidays, double time.

Wages: for journeymen bookbinders 80 cents per hour; for bindery girls (journeywomen) $15 per week.

One apprentice allowed to every five journeymen or major fraction thereof; apprentices to serve four years. Apprentice bookbinders to be paid minimum rates of from $9.50 per week during first six months to $35.20 during eighth six months. Bindery girls to be paid from $9 per week during first six months to $12 during third six months and $15 per week thereafter.

Disputes are to be referred to a joint arbitration board whose decision will be final.

Regina, Sask.—Two Newspaper Publishers and the International Printing Pressmen and Assistants' Union, Local 75.

Agreement to be in effect from June 1, 1939, to May 31, 1940.

Only union members to be employed.

Hours: 8 per day, 5 on Saturdays for day work, and 7½ per night for night work, a 45 hour week.

Overtime: time and one-half for first three hours; thereafter double time. Work on Sundays and seven specified holidays, time and one half.

Wages for pressmen: 81½ cents per hour (an increase of 3½ cents over the previous rate) or $36.65 per week of 45 hours for day work; night scale $3 per week over the day scale.

Apprentice pressmen to be paid from $13.50 per week during first year to $27.15 during fifth year.

Any dispute which cannot be settled by the union and the publishers will be referred to a joint arbitration board whose decision will be final and binding.

Regina, Saskatchewan.—Certain Job Printing Firms and the International Printing Pressmen and Assistants' Union, Local 75.

Agreement to be in effect from May 1, 1939, to April 30, 1940.

Only union members to be employed.

Hours: 8 per day, 4 on Saturdays, a 44 hour week for day work, and 42 per week for night work.

Overtime: time and one-half for first three hours; thereafter and all work on Sundays,

double time. For work on seven specified holidays, time and one-half to be paid for first three hours and double time thereafter.

Minimum weekly wage rates: journeymen cylinder pressmen $35.20, cylinder assistant $25.95, cylinder assistant working part time on cylinder and platen $20.95; platen pressmen $33.10, platen feeders $9 during first six months and $12 for second six months.

Wages for apprentices: from $12 per week during first year to $16.50 during fifth year.

Any disputes are to be referred to a joint arbitration board whose decision will be final.

REGINA, SASKATCHEWAN.—TWO NEWSPAPER PUBLISHERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 657 (PRINTERS).

Agreement to be in effect from May 1, 1939, to April 30, 1940.

Only union members to be employed.

Hours: 8 per day, 5 on Saturdays for day work, 7½ per night, 6 nights, for night work, a 45 hour week.

Overtime: time and one-half for first three hours; thereafter and all work on Sundays (except Sunday work which is part of a regular shift) double time. Work on seven specified holidays, time and one-half.

Wages for journeymen: 81½ cents per hour for day work (an increase of 3½ cents over the previous rate); $40.45 per week of 45 hours for night work.

One apprentice allowed to each seven journeymen and apprentices to serve six years; apprentices to be paid from 25 per cent of journeyman's wage during first year to 70 per cent during sixth year and apprentices working on the night shift to be paid an increase of $2 per week over the day rates.

One machine learner allowed to every seven machines, such learners to be journeymen, the period of learning for beginners on linotype, intertype and monotype machines to be 13 weeks. The machine learners to be paid from 40 per cent of journeyman's scale during first three weeks to 70 per cent during last five weeks.

Any dispute as to wages and employment conditions of this agreement to be referred to a joint arbitration board whose decision will be final.

REGINA, SASKATCHEWAN.—CERTAIN JOB PRINTING FIRMS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 657 (PRINTERS).

The agreement which came into effect May 1, 1937, and was summarized in the LABOUR GAZETTE, November, 1937, page 1269, and September, 1935, page 865, has been renewed without change to April 30, 1940.

Wages for journeymen continue at 80 cents per hour, with a 44-hour week for day work, and for night work $3 per week of 42 hours over the day scale.

EDMONTON, ALBERTA.—A CERTAIN NEWSPAPER PUBLISHER AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 604 (PRINTERS).

Agreement to be in effect from May 16, 1939, to May 15, 1940.

This agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, November, 1937, page 1269, and December, 1935, page 1154.

Wages remain at 90 cents per hour for day work, 96 cents for night work and $1 per hour for the "lobster" shift, with a 45-hour week for all shifts.

VANCOUVER, B.C.—CERTAIN COMMERCIAL PRINTING ESTABLISHMENTS AND THE INTERNATIONAL BROTHERHOOD OF BOOKBINDERS, LOCAL 105.

Agreement to be in effect from November 1, 1938, to October 31, 1939.

Only union members to be employed.

Hours: 40 per week.

Overtime: from 6 p.m. to 10 p.m. and on Saturday p.m., time and one-half; after 10 p.m. and all work on Sundays and seven specified holidays, double time.

Minimum wage rate for journeymen bookbinders: $40 per week; night work to be paid 8 cents per hour over the day scale. Minimum wage scale for journeywomen $20 per week; night work to be paid 5 cents per hour over the day scale.

One male apprentice allowed to first four journeymen, two to eight journeymen and one to each additional five men, male apprentices to serve five years and are to be paid from one-fourth of journeymen's wage during second year to two-thirds during fifth year. One female apprentice allowed to three journeywomen, two apprentices to five journeywomen, three to nine and one additional apprentice to each five journeywomen thereafter; apprenticeship to be for three years and such apprentices to be paid from $9 per week during first nine months to $16.65 for fourth nine months.

If an arbitration agreement is later made, the employers parties to this agreement agree to become party to such arbitration and to be bound by its results.

VANCOUVER, B.C.—CERTAIN COMMERCIAL PRINTING ESTABLISHMENTS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 226 (PRINTERS).

Agreement to be in effect from September 1, 1938, to August 31, 1939, and thereafter subject to 30 days' notice of change from either party.

Only union members to be employed.

Overtime: time and one-half; work on Sundays and seven specified holidays, double time.

Hours: 7¼ per day from Monday to Friday inclusive, 3¾ on Saturday, a 40-hour week for both day and night work.

Wages per hour for journeymen: $1 per hour for day work, $1.10 for night work; for shifts beginning between 11.30 p.m. and 6 a.m., 50 cents extra per shift to be paid over the night scale. Machinist operators to be paid 50 cents per shift over the regular scale.

One apprentice allowed to each office employing from one to eight journeymen and one additional apprentice when more than eight journeymen employed. Apprentices to serve six years and to be paid one-fifth of journeyman's scale during second half of first year to two-thirds of journeyman's rate during last 16 months of apprenticeship.

Provided an arbitration agreement is later arrived at, the employers parties to the agreement agree to be parties to one arbitration proceeding for the employing commercial printers of Greater Vancouver and to be bound by the result of such arbitration.

NANAIMO, B.C.—NEWSPAPER AND JOB OFFICES AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 337.

Agreement to be in effect from March 1, 1939, to February 29, 1940.

Only union members to be employed. The use of the union label is granted to employers parties to the agreement.

Hours: from March 1, 1939, to August 31, 1939, 6 hours and 40 minutes to be a day's or night's work, with a 6 day week, a 40-hour week; from September 1, 1939, to February 29, 1940, 7½ hours per day or night, 5 days per week, a 37½ hour week.

Overtime: time and one half for first five consecutive hours; thereafter double time. Work on Sundays and seven specified holidays (unless part of a regular shift), double time.

Wages: from March 1, 1939, to August 31, 1939, 94 cents per hour for day work and $1.03½ for night work. When necessary to work split shifts running from day into night hours or vice versa, such shift to be 7½ hours and be paid 50 cents in addition to the night rates. Beginning with the first week in August, 1939, the parties agree to negotiate a wage scale for the period September 1, 1939, to February 29, 1940.

One apprentice may be employed to every six journeymen. Apprentices to serve for six years and to be paid one-quarter of journeymen's scale during second year to two-thirds of the scale during last 16 months.

Learners on machines who are journeymen to be paid 40 per cent of regular scale during first five weeks up to 85 per cent of scale during the last six weeks of the 26 weeks of the learning period.

A standing joint committee to be formed for the settlement of disputes. Any dispute which they are unable to settle will be referred to arbitration and the decision binding.

Manufacturing: Miscellaneous Wood Products

FORT FRANCES, ONTARIO.—A CERTAIN LUMBER AND SAWMILL OPERATOR AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL 2601 (LUMBER AND SAWMILL WORKERS).

This agreement came into effect May 1, 1938, to May 1, 1939, and continues thereafter from year to year, subject to notice. It covers the sawmill, lathmill, boom, sorting chain, planing mill, lumber yard, lath yard, tie platform, loading platforms, barn, machine and blacksmith shops, engine and boiler room.

Only union members to be employed, if available.

Hours: 8 per day.

Overtime: time and one-quarter. For work on Sundays and five specified holidays, time and one-quarter. (This does not apply to watchmen, firemen, barnmen and millwrights.)

Wages per hour: In sawmill—second filer 69 cents; machinist 68 cents; filer's helper 58 cents; engineer 57 cents; setters, edgermen, millwright 56 cents; blacksmith 55 cents; fireman and watchman-engineer 53 cents; trimmermen (head) 52 cents; green lumber graders 50 cents; resawyers 48 cents; boom foreman and oiler 45 cents; boom, boot of slip, log deck, riders, tail sawyers, cut off saw, splitters, trimmermen (tail), chainman, yard sorters, tie cut-off saw and bull edger feeder 44 cents; slasherman, resawyer's helper, teamsters 43 cents; bull ring, stripper, resawyer behind, watchman, sweeper and bull edger behind 41 cents; tie loaders 1.65 cents per tie, tie peelers 2.75 cents per tie. In lath mill—bolt shovers, bolt pullers, lath shover, lath puller, graders 45 cents; lath tiers, stock pickers and spareman 43 cents; lath platform 41 cents. In planing mill—engineer 57 cents, machine feeder, behind machine and loading cars 43 cents. Dry lumber—scalers and graders 46 cents; teamsters and loaders in yard 43 cents; tram repairs 42 cents.

Seniority to be considered if laying men off or in case of promotion.

Grievances to be reported to the management by a committee of employees, for adjustment.

VANCOUVER, B.C.—CERTAIN SASH AND DOOR AND MILLWORK MANUFACTURERS AND THE BRITISH COLUMBIA WOODWORKERS' UNION, LOCAL NO. 1.

Agreement to be in effect from February 1, 1939, to January 31, 1940, unless 30 days' notice of change given at any time.

Only union members to be employed. The employer is granted the use of the union label.

Hours: 8 per day, 4 on Saturday, a 44 hour week.

Overtime (except shift work) to be paid at time and one half; nine specified holidays at double time.

Minimum hourly wage rates: mechanics 55 cents, semi-skilled workers 45 cents, door patchers 45 cents, firemen 50 cents, labourers 40 cents, workers 18 to 21 years of age 30 cents, workers under 18 years of age 25 cents.

A shop steward and shop committee to be elected by the union members, and they are to see that the union label is used under proper conditions and to report any infringement of its use to the union.

VANCOUVER, B.C.—CERTAIN SASH AND DOOR AND MILLWORK MANUFACTURERS AND THE AMALGAMATED BUILDING WORKERS OF CANADA, FACTORY WORKERS UNIT NO. 3.

Agreement to be in effect from February 1, 1939, to January 31, 1940.

The terms of this agreement are similar to the one summarized above between certain other manufacturers and the British Columbia Woodworkers' Union, Local No. 1, with the exception of the wage scale.

Wages per hour: mechanics and foremen 55, 60, 65 and 70 cents; door patchers 55 cents; labourers, kiln pilers and semi-skilled workers over 21 years of age 48 and 55 cents; helpers and semi-skilled workers 18 to 21 years of age 30 cents; boys under 18 years of age, 25 cents.

Manufacturing: Metal Products

BROCKVILLE, ONTARIO.—A CERTAIN MANUFACTURER OF COPPER WIRE, CABLES, ETC. AND THE UNITED ELECTRICAL AND RADIO WORKERS OF AMERICA, LOCAL 510 (ELECTRIC WIRE WORKERS).

This agreement which came into effect July 30, 1937, continues until either party gives 60 days' notice of change.

The company recognizes the union and neither the company nor the union will discriminate between employees for belonging or not belonging to the union.

Hours: 8 per day, 4 on Saturdays, a 44 hour week; in the roller mill, a 44 hour week worked in 5 nights.

Overtime: time and one half; work on Sundays and eight specified holidays, double time. In the rolling mill, however, overtime paid only after 9 hours' work in any one run and all overtime after 44 hours work in any one week.

Wages: effective July 14, 1937, an increase in wages of 15 per cent was provided for, this increase to apply to hourly, piece and bonus rates. New male employees to start at a minimum of 30 cents per hour to be increased after six weeks to 35 cents; new female employees to start at a minimum of 25 cents per hour to be increased after six weeks to 30 cents. These rates to constitute the minimum rates of pay for employees in the shop.

Waiting time to be paid for at the established base hourly rate.

Seniority to be the governing factor in promotion and in reducing staff or re-engaging employees.

Vacation: employees with five years' continuous service with the company to be given one week's vacation with pay (average earnings of last four weeks).

The union to appoint a shop and grievance committee who are to discuss grievances with the management. Any dispute which cannot be settled in this way will be referred to arbitration.

SAULT STE. MARIE, ONTARIO.—ALGOMA STEEL CORPORATION LIMITED AND THE ALGOMA STEEL WORKERS' UNION.

Working agreement to be in effect from May 1, 1939, to April 30, 1940, and thereafter from year to year, subject to notice.

The terms of this agreement are similar to those of the one previously in effect and published in the LABOUR GAZETTE, October, 1936, page 864, with these exceptions:

Extra pay for overtime not to apply to shift employees working two eight hour shifts in 24 hours if 8 hours intervene between the shifts.

Employees hired on recognized labour jobs may exercise their seniority rights on any recognized labour job on a plant-wide basis if their own position is abolished permanently or for a long period. Leave of absence may be granted up to a maximum period of six months or longer in special circumstances.

Vacation: the principle of vacation with pay is recognized, the extent of such vacation to be negotiated annually.

SAULT STE. MARIE, ONTARIO.—ALGOMA STEEL CORPORATION LIMITED AND THE ALGOMA STEEL WORKERS' UNION.

Wage agreement to be in effect from April 17, 1939, subject to 20 days' notice.

The schedule of wages in effect April 17, 1939, is to remain in effect subject to notice. Upon such notice being given, a joint conference to be held to negotiate a new agreement, and if no settlement reached this agreement to terminate 20 days after giving of such notice. (The previous wage agreement was published in the LABOUR GAZETTE, February, 1937, page 132.)

VANCOUVER, B.C.—CERTAIN DRY DOCK AND SHIPBUILDING FIRMS AND THE SHIPYARD LABOURERS' FEDERAL UNION, LOCAL 126.

This agreement is summarized below under "Construction: Shipbuilding."

Construction: Buildings and Structures

TORONTO, ONTARIO.—CERTAIN BUILDING WRECKING FIRMS AND THE INTERNATIONAL HOD CARRIERS, BUILDING AND COMMON LABOURERS' UNION, LOCAL 756 (BUILDING WRECKERS).

Agreement to be in effect from March 1, 1939, to March 1, 1940.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1938, page 942, except that regular hours on Saturdays are 8, and overtime to be paid for all work over 9 hours in any one day from Monday to Friday and after 3 p.m. on Saturdays.

Wages are unchanged at 45 cents per hour for labourers and 50 cents for barmen.

(A strike to secure this agreement with one employer was noted in the LABOUR GAZETTE, July, 1939, page 660.)

TORONTO, ONTARIO.—CERTAIN TERRAZZO CONTRACTORS AND THE INTERNATIONAL ASSOCIATION OF MARBLE, STONE AND SLATE POLISHERS, RUBBERS AND SAWYERS, TILE AND MARBLE SETTERS' HELPERS AND TERRAZZO WORKERS' HELPERS, LOCAL 56 (TERRAZZO HELPERS).

Agreement to be in effect from March 1, 1939, to March 1, 1940.

This agreement is similar to the previous agreement which was summarized in the LABOUR GAZETTE, December, 1937, page 1383, with this exception:

Employers agree to select 50 per cent of the employees from the union.

Wages and hours are unchanged at rates of 55 cents per hour for labourers and 60 cents for men operating machines, with a 40 hour week.

LONDON, ONTARIO.—MASON CONTRACTORS' ASSOCIATION, MASTER MASONS AND THE BRICKLAYERS, MASONS AND PLASTERERS' INTERNATIONAL UNION, LOCAL NO. 5, ONTARIO (BRICKLAYERS AND STONE MASONS).

Agreement to be in effect from May 1, 1939, to April 30, 1940. Five months before expiration date, the board of arbitration to meet to consider its renewal.

Only union members to be employed.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one-half till midnight; thereafter and all work on Sundays and three specified holidays, double time. Where two or three shifts are worked, the first two shifts to be 7½ hours and the third shift 7 hours and shall be paid for 8 hours. Where only one shift is required after 5 p.m., this to be paid at time and one-half.

Minimum wage rate for bricklayers and stone masons, $1 per hour. No member of the union may work for any commercial company or any private individual for less than $1.15 per hour, nor for contractors who are not parties to the agreement.

Apprentices: the members of the employers' association may upon taking up the matter of being allowed an apprentice every two years have same adjusted.

A joint arbitration committee to meet when necessary.

Windsor, Ontario.—Certain Contractors, Members of the General Contractors' Section and the Masons' Section of the Builders' and Contractors' Association of Essex County and the Bricklayers', Masons' and Plasterers' International Union, Local No. 6 (Bricklayers and Stonemasons).

This agreement which came into effect May 15, 1937, and applies throughout the county of Essex, continues to March 31, 1940, and thereafter from year to year, subject to notice.

Hours: 8 per day from Monday to Friday inclusive, a 40-hour week. When two or more shifts are employed 7 hours to be a shift with pay for 8 hours.

Overtime and all work on Saturdays, Sundays and on six specified holidays, double time.

Wages for bricklayers and stonemasons: $1.15 per hour. Where three or more journeymen are employed, a foreman to be appointed who must be paid at least 10 per cent over the journeyman's rate.

Any violations of the agreement or other disputes are to be referred to a joint arbitration committee.

Regina, Saskatchewan.—Builders' Exchange of Regina and the United Brotherhood of Carpenters and Joiners (Local 1867).

Agreement to be in effect from April 30, 1939, to May 1, 1940, and then continue in effect during the pleasure of both parties or/and during the life of the schedule under the Industrial Standards Act (Labour Gazette, August, 1938, page 948).

The terms are the same as in the above Industrial Standards Act schedule, the hours being 44 per week and the wage rate for journeymen carpenters 75 cents per hour.

Regina, Saskatchewan.—Regina Master Plumbing, Heating and Sanitary Engineers and the United Association of Plumbers and Steamfitters, Local 179.

Agreement to be in effect from March 1, 1939, to March 1, 1940.

Preference in employment to be given to union members if available. Members of the union agree to work only for recognized shops and to give preference to such shops as are party to this agreement.

Men working out of town may work 50 hours per week. They will have their fare, board and travelling time up to 8 hours a day paid by the employer.

The other terms of this agreement are similar to those of the schedule under Industrial Standards Act which was summarized in the Labour Gazette, July, 1939, page 733, the minimum rate for journeymen plumbers and steamfitters being 90 cents per hour, with a 44-hour week.

Edmonton, Alberta.—Edmonton General Contractors' Association and the United Brotherhood of Carpenters and Joiners, Local 1325.

Agreement to be in effect from April 1, 1939, to March 31, 1940. Providing notice of change is given by either party by January 15, 1940, negotiations for a new agreement to be entered into during that month.

Union carpenters to be given preference of employment, when such union carpenters are available.

The other terms of this agreement are similar to those of the schedule under the Industrial Standards Act which was summarized in the Labour Gazette, April, 1939, page 436, the wage rate being 90 cents per hour, with a 44-hour week.

Edmonton, Alberta.—Edmonton Society of Domestic, Sanitary and Heating Engineers, Inc. and the United Association of Plumbers and Steamfitters, Local 488.

Agreement to be in effect from May 1, 1939, to April 30, 1940, and thereafter from year to year, subject to notice.

The contractors agree to employ members of the union and the union agrees to work only for members of the employers' association.

Members of one branch of the trade are prohibited from working at that of another.

Any grievance which cannot be adjusted by the union representative will be referred to a joint conference board for decision.

The other terms of this agreement are similar to that of the schedule under the Industrial Standards Act, which was summarized in the Labour Gazette, May, 1939, page 532, the minimum rate for journeymen from August 1, 1939, being $1.05 per hour, with a 44-hour week.

Calgary, Alberta.—Calgary General Contractors' Association and The Amalgamated Building Workers of Canada, Calgary Carpenters and Joiners Local.

Agreement to be in effect from August 1, 1938, subject to 30 days' notice from either party.

This agreement is the same as the agreement between the Calgary General Contractors' Association and the United Brotherhood of Carpenters and Joiners, Local 1779, which was summarized in the Labour Gazette, September, 1938, page 1040, the minimum rate for carpenters and joiners being 80 cents per hour, with a 44-hour week.

Construction: Shipbuilding

Vancouver, B.C.—A Certain Dry Dock and Shipbuilding Company and The Shipyard Labourers' Federal Union, Local 126.

Agreement to be in effect from May 15, 1939, to May 15, 1940, and thereafter subject to 30 days' notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, December, 1938, page 1412, with certain changes in working conditions.

Hours and wages are unchanged at a 44-hour week, a 50-cent per hour minimum wage rate for labourers, and other workers varying from 55 to 73 cents.

Transportation and Public Utilities: Street and Electric Railways

Cornwall, Ontario.—Cornwall Street Railway, Light and Power Company Limited and The Amalgamated Association of Street, Electric Railway and Motor Coach Employees, Local 946.

Agreement to be in effect from May 1, 1939, to April 30, 1940, and thereafter from year to year, subject to notice.

The Company recognizes the union, will show no discrimination against union members and will recommend to employees to become and remain union members.

Hours: shop men and line department 50 per week except nightmen in shops who work 48 hours; sub station operators 8 per day, 56 per week.

Hourly wage rates: passenger car operators—first year (spare operators) 35 cents, after first year and until assigned a regular run 37 cents, first year (regular operators) 37 cents; second year (regular operators) 42 cents, thereafter 46 cents; freight locomotive—freight motormen (first year) 47 cents, freight motormen after first year 50 to 54 cents, freight brakemen 40 to 42 cents; shop men—apprentices 20 to 29 cents, helpers 30 to 39 cents, shop mechanics 40 to 50 cents, nightmen 39 cents per hour for 8 hours, 6 days per week (Saturdays being the off night); line department—first class wire and linemen 50 to 52 cents, second class wire and linemen 37 to 42 cents; sub-station operators 50 cents; track maintenance—regular track labourers 37 cents, welders 44 cents.

Uniforms to be supplied by the Company.

Vacation: all regular employees to be entitled to one week's vacation with pay each year.

Promotions and transfers to be based upon: first—length of service, second—merit and ability. In case of laying off men, length of service to be given more consideration than in case of promotion.

A standing committee of the union to be formed to deal with the company in any case of grievances or disputes.

HAMILTON, ONTARIO.—HAMILTON STREET RAILWAY COMPANY AND THE AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES, LOCAL 107.

The agreement which came into effect April 1, 1936, to run until either party gives 30 days' notice, and which was summarized in the LABOUR GAZETTE, August, 1936, page 748, was amended March 16, 1939, as follows:—

Overtime: all overtime clauses are repealed except the provision of time and one-half pay for work on legal holidays.

Vacation: all employees who have been in the service of the company for one year or more and who have worked at least 1,800 hours during the year to be given 7 days' vacation with pay each year. Two extra days holidays with pay to be given each year to operators of cars or busses whose record during the year is clear of accidents for which the company pay damages.

WINDSOR, ONTARIO.—SANDWICH, WINDSOR AND AMHERSTBURG RAILWAY COMPANY AND THE AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES, LOCAL 616.

Agreement to be in effect from February 1, 1939, to December 31, 1939.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1938, page 1413, and May, 1937, page 576, with certain exceptions:—

Wages per hour for bus and street car operators: 55 cents during first six months, 59 cents during second six months and 63 cents after first year (increases of 3 cents per hour over previous agreement) and for checking, operators to receive 20 cents per day.

Wages per hour for shop and maintenance men: bus mechanics 65 cents; bus washers, car pitmen and oilers 60 cents; carpenters and trouble shooters 62 cents; machinists 65 cents; armature winders 70 cents; painters 75 cents; car cleaners 60 cents, blacksmith 70 cents; night watchmen 60 cents; trackmen 55 cents; truck driver 57 cents.

Vacation: employees paid on an hourly basis who have been in the service of the Company for at least a year to be given one week's vacation during the year and be paid $35 in lieu of wages for that week.

PORT ARTHUR, ONTARIO.—THE PUBLIC UTILITIES COMMISSION OF THE CITY OF PORT ARTHUR AND THE AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES, LOCAL 966, AND OTHER EMPLOYEES OF THE STREET RAILWAY DEPARTMENT.

Agreement to be in effect from May 1, 1939, to May 1, 1940, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1938, page 1413, with this exception:

Wages per hour in track department: track bonder 53 cents, regular trackmen 51 cents (an increase of 2 cents per hour in each case).

FORT WILLIAM, ONTARIO.—CITY OF FORT WILLIAM AND THE AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES, LOCAL 966, AND OTHER EMPLOYEES OF THE STREET RAILWAY DEPARTMENT.

Agreement to be in effect from May 1, 1939, to April 30, 1940, and continue until a new agreement is made.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1938, page 1414, with this exception:

Sick leave: all permanent employees to be allowed ten days' sick leave each year with pay when the employee has been absent through illness for 20 consecutive days.

Transportation and Public Utilities: Water Transportation

PUGWASH, N.S.—A CERTAIN STEVEDORING CONTRACTOR AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1531.

Agreement to be in effect from January 2, 1939, to January 3, 1940, and thereafter from year to year, subject to notice.

The employer recognizes the union as a bargaining agency for the longshoremen. Only union members to be employed, if available. Employer may select a foreman from the union membership.

Hours: regular hours from 7 a.m. to 12 noon; from 1 p.m. to 5 p.m.

Overtime: all other time to be considered overtime and to be paid at time and one-half; legal holidays time and one-half; work on Sundays and Christmas Day, double time.

Wages per hour: hatch tender and water boy 35 cents, winchmen 40 cents, all other classes of work 45 cents. (These rates are 5 cents per hour higher than in the previous agreement which was summarized in the LABOUR GAZETTE, December, 1938, page 1415.)

PARRSBORO, N.S.—CERTAIN LUMBER EXPORTERS AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1472.

Agreement to be in effect from April 6, 1939, to December 31, 1939, and thereafter subject to 30 days' notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, December, 1938, page 1416, with certain exceptions:—

For work on Sundays and legal holidays, time and one-half to be paid.

Wages per hour: for stowing lumber on board ship 45 cents; winchmen employed on board ship 45 cents; unloading of scows, alongside of ship and chain tenders 40 cents; stowage on scows 35 cents; schooners to be loaded at 45 cents per hour for stowage on board and 40 cents for handling lumber to schooners from dock.

Saint John, N.B.—Certain Coal, Lumber and Tow Boat Companies and The United Brotherhood of Carpenters and Joiners, Local 1901 (Ship Caulkers).

Agreement to be in effect from November 1, 1938, to October 31, 1939, and thereafter from year to year, subject to notice.

Preference in employment to be given to union members.

Hours: 8 per day (between 8 a.m. and 5 p.m. except on tide work). When required to work on tide work, one full tide to be a day's work.

Overtime: work between 5 p.m. and 8 a.m. (except tide work) and all work on Sundays and statutory holidays, double time.

Minimum daily wage rates: foreman caulker $5.50, journeyman caulker $5; helper or apprentice 40 cents per hour.

Montreal, Quebec.—Certain Steamship Companies (Ocean Navigation) and The Steamship Checkers and Coopers Employed by Them.

Agreement to be in effect from May 16, 1939, to December 31, 1939, and thereafter from year to year, subject to notice.

With one slight change, this agreement is similar to the one previously in effect which was summarized in the Labour Gazette, July, 1938, page 795.

Wages are unchanged at 64 cents for day work for checkers, 63 cents for day work for coopers, with 10 cents per hour extra for both classes for night work.

Montreal, Quebec.—Schedule of Wages and Working Conditions adopted by The National Harbours Board for the Montreal Harbour (Harbour Employees.)

Schedule to be in effect from May 1, 1939, to April 30, 1940.

The conditions of this schedule are similar to those previously in effect and summarized in the Labour Gazette, December, 1938, page 1416, June, 1937, page 691, July, 1936, page 659 and June, 1935, page 584, with certain exceptions:

The following classes of workers are added or changed from the wage scale: in the conveyor system of the grain elevator system, rope splicer, towerman and assistant tripperman are omitted; and relief feed tender or relief towerman at 55 cents is added; in the general maintenance forces, switchman is omitted; in the fleet branch, chief engineer on one vessel $165, second engineer $132, second steward on same and cook on one tug at $55 are omitted.

New Westminster, B.C.—Certain Dock and Stevedoring Companies and The Royal City Waterfront Workers' Association (Longshoremen).

This agreement, which covers ocean navigation longshore work to be in effect from June 22, 1938, to June 21, 1941.

There is to be one hiring hall in New Westminster, with one despatcher who is named in the agreement and his assistant to be chosen by him.

Hours and conditions are to be the same as prevailing in Vancouver (Labour Gazette, May, 1937, page 577), the basic minimum rate being 95 cents per hour for ship work and 91 cents for dock work.

For the determination of changes in wages the parties agree to consider the welfare of the men and the prosperity of the port and shipping and lumber industries.

Any disputes are to be submitted to the mayor of the city of New Westminster whose decision will be final and binding on both parties.

Port Alberni, B.C.—A Certain Stevedoring Company and the Alberni District Waterfront Workers' Association (Longshoremen).

Agreement to be in effect from June 22, 1938, to June 21, 1940. Sixty days' notice by either party to be given after June 22, 1940, to alter this agreement.

Preference in employment to be given union members.

Hours and overtime: straight time to be hours between 8 a.m. and 5 p.m., excluding meal hour except Saturday afternoons, Sundays and holidays. Overtime is all other time including Saturday afternoon, Sundays and nine specified holidays. If gangs are required and agree to work more than 12 hours in any day they will be paid for such time at double the current rate.

Wages per hour: unless otherwise specified, all labour to be paid 95 cents straight time and $1.42 for overtime; hatch tenders, side runners and double winch drivers $1.05 straight time and $1.52 overtime. For work on logs, piling submerged lumber, fish, fish eggs, fertilizer or offensive cargo, 10 cents per hour extra.

For travelling to and from outports, half pay to be given and transportation paid for.

All disputes to be brought before a committee for the union and a representative of the company.

Transportation and Public Utilities: Local and Highway Transportation

Toronto, Ontario.—Certain Taxi Cab Companies and the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, Local 488. (Taxicab Drivers).

Agreement to be in effect from July 1, 1939, to July 1, 1940, and until a new agreement is made.

Only union members to be employed. If none available, other men employed are to join the union. The employer agrees to assist the union in collecting union dues and will not keep in its

employ any union member who wilfully neglects or refuses to pay his dues. No discrimination to be shown on account of union activities.

Seniority to govern in case of lay-off of men.

Taxi drivers to be responsible for any fines or for any damage to cars caused by their own negligence, but will not have to pay more than 50 per cent of cost of such repairs nor more than $14 for any one accident.

A shop steward or shop committee may be appointed by the employees or the union. Disputes may be submitted to a board of arbitration.

Other provisions of this agreement are similar to those which were made binding under the Industrial Standards Act and are summarized on page 864 of this issue, with these exceptions:

Hours: the number of employees working split shifts not to exceed 20 per cent of the regular employees, such splits shifts to consist of 10 hours divided into not more than two periods, with pay for 11 hours.

Overtime: a driver whose weekly receipts without overtime equal $56 or more to have the option of taking 25 per cent commission on all receipts taken in by him in his overtime period instead of the hourly rate for overtime.

Transportation and Public Utilities: Electricity and Gas

SYDNEY, N.S.—EASTERN LIGHT AND POWER COMPANY LIMITED, AND THEIR EMPLOYEES, MEMBERS OF THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL "B" 1089.

This agreement was reached through the conciliation officers of the Department of Labour following application for a board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, July, 1939, page 657).

Agreement to be in effect from June 18, 1939, to June 18, 1940, and thereafter from year to year, subject to notice. It covers also the operations of the Dominion Utilities Company Limited.

The Company recognizes the union as the sole bargaining agency for the employees of the electrical department, and agrees to deduct a specified amount from the wages of all employees each month and pay this over to the union treasurer.

Hours: for line department and meter department, 8½ per day, 5½ on Saturdays, 48 per week; for troublemen 8 per day (from 3 p.m. to 11 p.m.); sub-station operators 8 per day, 48 per week, worked in revolving shifts with one day off per week.

Overtime and work on Sundays and seven specified holidays, time and one half, except in case of regular shift workers whose regular shift is on Sundays or holidays; spare operators to work a 48 hour week with Thursday off, but if required to work Thursday time and one half to be paid.

Wages per hour: linemen, troublemen and station electricians—first class 69 cents, second class 64 cents, third class 57 cents; groundmen—first class 52 cents, second class 47 cents; meter repairmen, testers and installers—first class 69 cents, second class 57 cents, third class 52 cents; substation operators 60 cents. Charge hands to receive 5 cents per hour over the regular rate.

Any employees having a grievance may present their case to an officer of the Company and if they wish may be represented by a committee. The Company officer to adjust the grievance, if possible.

Collective Labour Agreements Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Bakers, Quebec (amendment).
Plumbers and tinsmith roofers, Three Rivers (amendment).
Plumbers, Hull (amendment).
Dairy Employees, Quebec (correction).
Hairdressers, Montreal (amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

ONTARIO

Painters, Ottawa.
Carpenters, Peterborough.
Carpenters, Galt.
Plumbers, Windsor.
Taxicab drivers, Toronto.

SASKATCHEWAN

Hairdressers, etc., Moose Jaw.
Barbers, Biggar.

ALBERTA

Lumbering Industry, Rocky Mountain House.

Construction Industry Survey

In response to repeated requests by members of the construction industry for early and authoritive information, the Construction Branch of the Dominion Bureau of Statistics has prepared a preliminary survey of construction operations in Canada in 1938, compiled from reports of general trade and subcontractors received by the Bureau up to and including May 31, 1939.

In presenting this report it is pointed out that as 1938 is the first year for which the survey has been made it is impossible to make comparisons with other years. It is suggested, however, that if the report is compiled annually factual comparisons will become possible.

The total value of work reported for the period covered by the survey was $209,433,559, of which new work accounted for $151,149,579 and additions, alterations, repairs, etc., for $58,293,980. Subcontract work performed amounted to $36,976,267 with $29,641,629 new construction and $7,334,638 additions, alterations, repairs, etc. Building construction accounted for a total of $101,470,194, engineering, harbours, rivers, etc., $70,704,266, and building trades (jobbing) $37,269,099.

The average employment of wage-earners comprised 57,362 individuals and wages paid them amounted to $57,710,557.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the Labour Gazette, page 503. Amendments to the Act are noted in the Labour Gazette, June, 1939, page 576. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the amendment of four agreements and correction of another, all of which are summarized below. Requests were published in the *Quebec Official Gazette,* July 8, for the extension of new agreements affecting the retail trade, bakery and restaurant industries in Magog and bakers in Montreal. In addition, Orders in Council were published in the *Quebec Official Gazette,* July 8, approving the constitution and by-laws of certain joint committees, and in the issues of July 8 and July 22 authorizing certain joint committees to levy assessments on employers and employees, all of which are listed below.

Manufacturing: Vegetable Foods

Bakers, Quebec.—An Order in Council, approved June 30, and published in the *Quebec Official Gazette,* July 8, makes certain minor changes in the previous Orders in Council for this industry (Labour Gazette, December, 1937, page 1385, April, 1938, page 451, January, 1939, page 96 and April, 1939, page 434) which do not affect the previous summaries.

Construction: Buildings and Structures

Plumbers and Tinsmith Roofers, Three Rivers.—An Order in Council, approved June 30, and published in the *Quebec Official Gazette,* July 8, amends the previous Orders in Council for these trades (Labour Gazette, January, 1938, page 103 and June, 1938, page 693) by adding another contractor to the parties to the agreement.

PLUMBERS AND STEAMFITTERS, HULL.—An Order in Council, approved June 30, and published in the *Quebec Official Gazette,* July 8, amends the previous Orders in Council for these trades (LABOUR GAZETTE, June, 1937, page 696, April, 1936, page 371, and July, 1935, page 629) as follows:

Hours: 8 per day, 44 per week.

Apprenticeship to be for four years, after which apprentices may obtain a junior licence. One apprentice allowed for each journeyman, one apprentice for each junior journeyman, one junior journeyman for three journeymen, two junior journeymen for five journeymen and thereafter one junior journeyman to each five journeymen.

The Orders in Council for these trades are to be enforced by the building trades joint committee of Hull.

Trade

DAIRY EMPLOYEES, QUEBEC.—An Order in Council, approved June 30, and published in the *Quebec Official Gazette,* July 8, amends the previous Order in Council for these workers (LABOUR GAZETTE, July, 1939, page 729, and July, 1938, page 799) by substituting the words "general employee" for "labourer" in the wage scale, and by providing that the time of the three day vacation be at the discretion of the employer.

Service: Business and Personal

HAIRDRESSERS AND BEAUTY PARLOUR OPERATORS, MONTREAL.—An Order in Council, approved June 30, and published in the *Quebec Official Gazette,* July 8, amends the previous Orders in Council for these trades (LABOUR GAZETTE, March, 1939, page 356 and July, page 730).

L'Association des Maîtres Barbiers et Coiffeurs de Montréal et district, Inc. (The Association of Master Barbers and Hairdressers of Montreal and District, Inc.) and Le Syndicat des Coiffeurs pour Dames de Montréal, Inc. (The Union of Ladies' Hairdressers of Montreal, Inc.) are added to the parties.

The principal provisions of the agreement, as now amended, are as follows:

Hours: the maximum hours for regular employees is 48 per week except between December 15 and December 31. These hours to be worked between 9 a.m. and 7 p.m. on Mondays to Fridays inclusive and between 9 a.m. and 9 p.m. on Saturdays and between December 15 and December 31 inclusive. One hour to be allowed for noon meal on Mondays to Fridays inclusive and one hour for each of two meals on days when closing hour is 9 p.m. No work on three specified holidays.

Overtime: over 48 hours' work in a week to be paid *pro rata.*

Minimum wage rate for master hairdresser, hairdresser-operator, journeyman hairdresser and manicurist $12.50 per week. Extra employees holding a certificate of competency, who work less than 48 hours per week to be paid 35 cents per hour including the hours of waiting, with a minimum of 25 hours' pay in the week. All tips are the property of the hairdresser or operator and are not part of the wage. Handicapped employees may have their case referred to the joint committee who may set a lower wage rate.

Apprenticeship to consist of 12 months in a hairdressing school and 30 months in a beauty parlour. The hairdressing schools to operate separately from beauty parlours, and all work performed therein to be free of charge, such schools to be open between 9 a.m. and 5 p.m. Monday to Friday inclusive. Apprentices to take an examination each six months and at end of their apprenticeship period to obtain a certificate. If unsuccessful at that time and again six months later, such apprentice shall leave the trade. One apprentice allowed for each ten regular employees or fraction thereof in a beauty parlour. Apprentices, during the 30 months spent in a beauty parlour to be paid from $5 per week during first six months to $11.50 during fifth six months.

Uniforms required to be supplied and laundered at the expense of the employer.

Proprietors of beauty parlours may not rent or sublet a part of the chairs or space in the parlour.

Except with an annual permit from the joint committee, no hairdresser or operator may carry on the trade outside a licensed beauty parlour.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the July 8 issue of the *Quebec Official Gazette:*

Barbers and hairdressers, Quebec.

Ladies' Hairdressers, Montreal.

Building Trades, Montreal.

Longshoremen (inland and coastal navigation), Montreal.

Plumbers and steamfitters, Hull (amendment).

Notices were published in the *Quebec Official Gazette,* July 8 and 22, that authorization was given by Orders in Council to levy assessments at the rate of one half of one per cent of wages on employers and employees concerned to the following joint committees:

Barbers and Hairdressers, County of Missisquoi.

Barbers, Rouyn and Noranda.

Ladies' Hairdressers, Montreal.

Retail Trade, Quebec.

Men's and Boys' Hats and Caps, Province of Quebec.

Barbers, Hull.

Retail Trade, Magog.

Building Trades, Montreal.

Longshoremen (inland and coastal navigation), Montreal.

Women's and children's millinery, Province of Quebec.

Building Trades, St. John.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan, and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, May, 1938, page 501, and June, 1939, page 574; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, June, 1938, page 633, and June, 1939, page 567; Nova Scotia, in June, 1936, page 604, and July, 1939, page 671; Saskatchewan, in the issue of June, 1937, page 635, May, 1938, page 507, and June, 1939, page 581. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Construction: Buildings and Structures

PAINTERS, OTTAWA.—An Order in Council, dated July 21, and published in *The Ontario Gazette*, July 29, makes obligatory the terms of a schedule governing the painting and decorating industry in Ottawa and adjacent suburban area, from August 8, 1939, "during pleasure".

Hours: 8 per day, Mondays to Fridays, 4 on Saturdays, a 44 hour week.

Overtime: time and one-half: work on Saturday afternoon, Sundays and five specified holidays, double time. The advisory committee may, however, issue permits allowing overtime work between Saturday noon and the beginning of the next regular working day at regular rates of pay for work which cannot be done during the regular working period.

Minimum wage rate for painters and decorators: 70 cents per hour; spray painting 85 cents per hour. The minimum rate for night work to be 10 cents per hour over the regular rate. The advisory committee may, however, fix a special minimum rate for any handicapped person.

Apprentices to be governed by Apprenticeship Act.

CARPENTERS, PETERBOROUGH.—An Order in Council, dated July 21, and published in *The Ontario Gazette*, July 29, makes binding the terms of a schedule of wages and hours governing the carpentry industry in the city of Peterborough and the adjacent suburban area from August 8, 1939, "during pleasure".

Hours: 9 per day, 5 on Saturdays, a 50 hour week. Work may, however, be done on Saturday afternoon at regular rate if necessary to permit the pouring of concrete.

Overtime: for the first two hours overtime in any day and for overtime work up to 3 p.m. on Saturdays, time and one-half; all other overtime including work on Sundays and eight specified holidays, double time.

Minimum wage rate for carpenters: 60 cents per hour. The advisory committee may, however, fix a special lower minimum rate for any handicapped employee.

Apprentices to be governed by the Apprenticeship Act.

CARPENTERS, GALT.—An Order in Council, dated July 21, and published in *The Ontario Gazette*, July 29, makes binding the terms of a schedule of wages and hours governing the carpentry industry in the city of Galt and the adjacent suburban area from August 8, 1939, "during pleasure".

Hours: 9 per day, 5 on Saturdays, a 50 hour week. Work may, however, be done on Saturday afternoon at regular rate if necessary to permit the pouring of concrete.

Overtime: for first three hours overtime in any day and for overtime work up to 4 p.m. on Saturdays, time and one-half; all other overtime including work on Sundays and eight specified holidays, double time.

Minimum wage rate for carpenters: 60 cents per hour. The advisory committee may, however, fix a special lower minimum rate for any handicapped employee.

PLUMBERS AND STEAMFITTERS, WINDSOR.—An Order in Council, dated July 21 and published in *The Ontario Gazette*, July 29 makes binding the terms of a schedule governing the plumbing and heating industry in the city of Windsor and adjacent suburban area; from August 8, 1939, "during pleasure"

The terms of this schedule are similar to those of the one previously in effect and summarized in the LABOUR GAZETTE, June, 1938, page 700, with this exception:

The minimum wage rate, which had been raised from $1 to $1.15 in 1938, is again reduced to $1.

Transportation and Public Utilities: Local and Highway Transportation

TAXICAB DRIVERS, TORONTO.—An Order in Council, dated July 21, and published in *The Ontario Gazette*, July 29, makes binding the terms of a schedule governing the taxicab industry in the city of Toronto and within three miles of it, from July 1, 1939 "during pleasure".

Hours: not more than 11 per day or 66 per week, the daily hours to be divided into either one or two shifts, provided that each shift consist of at least 4 consecutive hours. On out of town trips, however, the regular daily hours need not be complied with; on such trips no deduction to be made from wages for food and lodging.

Overtime: (except time spent by a driver in completing a trip which he started during regular working hours) to be paid at 35 cents per hour in addition to any money earned by a driver during regular working hours. Overtime may not exceed 4 hours in any one day or 10 hours in any one week. Overtime for despatchers to be paid for at a minimum of 35 cents per hour.

Minimum wage rate for drivers: 25 per cent of fares earned by him, with a minimum of $14 per week. Minimum rate for despatchers $15 per week. Part time drivers at a minimum of 30 cents per hour and to be paid for at least 5 hours in each day they are called to work. Drivers sent out to drive customers' cars to be paid at least 50 cents per hour.

A driver may be charged 50 per cent of the cost of uniforms supplied by the employer.

Saskatchewan

Service: Business and Personal

BEAUTY CULTURE INDUSTRY, MOOSE JAW.—An Order in Council, approved July 19, and published in *The Saskatchewan Gazette*, July 31, makes binding the terms of a schedule governing the beauty culture industry in the city of Moose Jaw and within five miles of it, from August 10, 1939, "during pleasure."

Hours: 45 per week, which must be worked between 8 a.m. and 7 p.m. on Mondays, Tuesdays, Thursdays and Fridays, between 8 a.m. and 12.30 noon on Wednesdays, and between 8 a.m. and 9 p.m. on Saturdays. No work on statutory or civic holidays.

Overtime: experienced beautician to be paid 35 cents per hour, inexperienced beautician 25 cents per hour.

Minimum wage rates: experienced beautician (one who has had at least 18 months employment under tuition) given full time employment, $15 per week or 50 per cent of proceeds taken in by the employee, whichever is greater; experienced beautician given part time or casual employment, 35 cents per hour or 50 per cent of proceeds, whichever is greater, with a minimum of three consecutive hours of employment; an inexperienced beautician to be paid $8 per week during first four months, $10.50 during second four months, $12.50 for third four months and the experienced rate thereafter. (For experienced beauticians, this schedule's rate is $2 per week over the previous schedule's rate.)

Not more than 25 per cent of the employees of any one employer may be inexperienced, unless less than four employees, when one inexperienced one may be employed.

A schedule of minimum charges for each operation is included.

BARBERS, BIGGAR.—An Order in Council, approved July 19, and published in *The Saskatchewan Gazette*, July 31, makes binding the terms of a schedule governing the barbering industry in the town of Biggar and within five miles of it.

Hours for all employers and employees are the hours during which barber shops are permitted to be open under civic by-laws.

Minimum wage rate: for barbers given full time employment $14 per week of 49 hours, plus 30 cents per hour for all hours in excess thereof or 60 per cent of the proceeds taken in by the employee, whichever is greater; for those given part time or casual employment, 30 cents per hour or 60 per cent of proceeds taken in by the employee, whichever is greater, provided that hours of employment must be at least three consecutive hours.

A scale of minimum charges which must be made to customers for each operation is included.

Alberta

Logging

LOGGERS, SAW AND PLANING MILL WORKERS, ROCKY MOUNTAIN HOUSE ZONE.—An Order in Council, dated June 27, and published in *The Alberta Gazette*, July 15, makes binding the terms of a schedule governing employees of saw-mills, planing mills, box factories, woodworking plants, logging and railway tie contractors in the village of Rocky Mountain House, from July 25, 1939, to July 24, 1940.

Hours: 10 per day, 60 per week, except for night watchman, blacksmiths, teamsters, truck drivers and millwrights and shippers, all of whom may work the hours required for their work.

Minimum wage rates: millwrights $150 per month; machine operators, lumber graders and shippers 28 cents per hour; teamsters, truck drivers, labourers, lumber pilers, lumber loaders and yard men 25 cents per hour; night watchmen $2.50 per shift.

Manufacturing: Miscellaneous Wood Products

SAW AND PLANING MILL WORKERS, ROCKY MOUNTAIN HOUSE ZONE.—These workers are included in the schedule summarized above under "Logging."

PRICES RETAIL AND WHOLESALE IN CANADA, JULY, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

THE cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was practically unchanged while the Dominion Bureau of Statistics weekly index number of wholesale prices declined gradually week by week due in large part to lower prices for certain farm products.

The cost per week of a list of twenty-nine staple foods, entering into a budget for a family of five, in terms of average retail prices in sixty-nine cities was $8.07 at the beginning of July and $8.05 at the beginning of June as compared with $8.57 for July, 1938; $8.56 for July, 1937; $6.67 for March, 1933 (the low point in recent years); and $10.91 for July, 1930. Changes during the month were slight the most important being increases in the cost of potatoes, eggs and butter and decreases in the cost of milk, mutton and lard. The total cost of the list including the cost of fuel and rent with that of foods was $16.93 at the beginning of July and $16.92 for June as compared with $17.45 for July, 1938; $17.24 for July, 1937; $16.51 for July, 1936; $15.41 for June, 1933 (the low point during recent years); $21.26 for July, 1930; $20.67 for July, 1922; $26.92 for July, 1920 (the post war peak); and $14.17 for July, 1914. In fuel there was a slight seasonal fall in the cost of anthracite coal. Rent was unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number declined during July and was 72·1 for the week ended July 23 as compared with 73·3 for the week ended June 30 and 73·5 for the week ended June 2. The latest figures available on a monthly basis are for June when the index number was 73·3 as compared with 78·6 for July, 1938; 87·6 for July, 1937; 74·3 for July, 1936; 63·5 for February, 1933 (the low point in recent years); 97·2 for July, 1929; 98·7 for July, 1922; 164·3 for May, 1920 (the post war peak); and 64·4 for July, 1914. At the end of July this index number was at the lowest point recorded since June, 1936. The decline during the month while not large was a greater change than had occurred during the previous eight months. This period of relative stability followed a decline from July, 1937, when the index number was about 20 per cent higher than at the end of July, 1939. The decline during the month under review was due mainly to lower prices for grains, vegetables, fresh meats, livestock, silver and coal. In the classification according to chief component materials the vegetable products group declined from 61·8 to 58·3 and the animal products group from 71·8 to 71·0. Changes were slight in other groups in this classification.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of July of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the Labour Gazette, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the Labour Gazette for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market condi-

(*Continued on page 867*)

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA) OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in Other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended July 28, 1939, monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 865)

tions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion,

price per cord from price quoted. f. Petroleum coke. g. Natural gas used extensively. h. Including lignite. i. Including conveniences. r. Mining company houses in district $5-$10 per month; others, five and six rooms, $10-$35 s. Delivered

(Continued from page 867)

average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

Meat prices showed little change during the month the averages for beef and pork being about the same as in June. Mutton was down in the average from 24·7 cents per pound in June to 23·5 cents in July. Lard declined from an average price of 11·9 cents per pound to 11·6 cents. The price of fresh eggs averaged higher in most localities the Dominion average price being up from 25·5 cents per dozen to 27·1 cents. Reductions in the price of milk were reported from several localities and the Dominion average price was fractionally lower at 10·7 cents per quart. Creamery butter was higher in Ontario and in the western provinces and the Dominion average price was up from 25·5 cents per pound to 26·1 cents. Potatoes averaged $1.52 per 90 pounds in July as compared with $1.49 in June. Prices in the prairie provinces were considerably lower than in the others. Granulated sugar was again fractionally higher at 6.6 cents per pound. The price of United States anthracite coal averaged 10 cents per ton lower at $14.16 per ton. Coke was down in the average from $11.88 per ton to $11.82.

The following are the prices per ton reported for Welsh coal "cobbles" and "French nut": Halifax $15.50; Charlottetown $14; Moncton $16; Saint John $14; Quebec $13.50; Three Rivers $15 and $14; Sherbrooke $14.75; St. Hyacinthe $14.50; Thetford Mines $17.25; Montreal $14-$14.75; Ottawa $16.25; Kingston $16; Belleville $15.50; Peterborough $16.25; Oshawa $15; Toronto $14.50; St. Catharines $15; Hamilton $14.50 and $14; Galt $16-$16.50; St. Thomas $16.50; Windsor $13.25; Cobalt $19.50; Timmins $19.25; Port Arthur $17.75; Fort William $17.75; Winnipeg $20.

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18¼%; Clothing, 18¼%; Sundries, 20%.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the July issue of the Labour Gazette.

Great Britain and Northern Ireland

Wholesale prices.—The Board of Trade index number on the base 1930=100, was 98·1 for June as compared to 97·8 for May, an increase of 0·3 per cent for the month. The index of food and tobacco was unchanged at 91·9, a decrease of 4·8 per cent in the price of cereals being offset by increases of 1·5 per cent in the prices of meat, fish and eggs and 2·7 per cent in other foods and tobacco. The index of prices of industrial materials and manufactures rose from 100·8 to 101·3 or 0·5 per cent. Compared with June, 1938, the general index was lower by 2·6 per cent.

The Statist index number on the base 1867-1877=100, was 90·6 at the end of June showing no change from the figure for May 31. The index of all foodstuffs was 79·8, an increase of 0·8 per cent during the month due to increases in all of its sub-groups. The index of "all materials" declined 0·5 per cent during the month to 98·5. The general index for the end of June, 1938, was 91·4, the corresponding figure for this year being 0·9 per cent lower.

Cost of living.—The Ministry of Labour's index number on the base July, 1914=100, was 156 at the beginning of July, having been 153 for the preceding four months. The index of food prices was 139 as compared to 134 the two preceding months, the increase being mainly due to the displacement of old potatoes by the new crop at higher prices and by increases in the average prices of eggs and milk. The index of rent was unchanged but those for clothing and sundries both showed small increases.

Eire

Cost of Living.—The cost of living index number of the Department of Industry and Commerce on the base July, 1914=100, was 172 at mid-May as compared with 174 at mid-February. During the quarter the index of food prices decreased from 160 to 157 due to decreases in the prices of eggs, milk, flour, oatmeal and butter which were only partially offset by increases in the prices of beef, bacon and potatoes. The index of clothing prices was unchanged while that for fuel and lighting materials declined from 184 to 180.

France

Wholesale Prices.—The General Statistical Office index number, on the base 1914=100, was 685 for June as compared with 693 for May, a decrease of 1·2 per cent for the month. The index of food prices declined from 643 in May to 626 in June due to decreases in all its sub-groups. The index of prices of industrial materials was 736 for June as compared to 737 the preceding month, there having been increases in the minerals and metal group and in the miscellaneous group which were counteracted by a decrease in the textile group. The index based on gold currency was unchanged at 55.

Germany

Wholesale Prices.—The index number of the Federal Statistical Office on the base 1913=100, was 106·8 for June as compared to 106·5 for May. The index for agricultural products increased 0·8 per cent while that for raw materials and semi-manufactured goods was unchanged as was also that for manufactured goods.

Cost of Living.—The official index number, on the base 1913-1914=100, was 126·5 for June as compared to 126·1 for May, an increase of 0·3 per cent for the month. The index of food prices rose 0·8 per cent during the month and that for clothing rose 0·1 per cent. The indexes for rent and for sundries were unchanged while that for heating and lighting materials declined 1·0 per cent.

India

Wholesale Prices.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 100 for April as compared to 99 for March. The index of prices of foodstuffs rose from 100 to 102 while that for non-foods was unchanged at 99.

Cost of Living.—The official index number of the working class cost of living at Bombay, on the base July, 1933, to June, 1934=100 was 103 for May, showing no change from the figures for the previous two months. The indexes for all the sub-groups were unchanged with the exception of that for sundries the slight increase in which was insufficient to affect the general index.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number on the base 1926=100 was 76·2 for May, showing no change from the figures for the previous month. Of the indexes for the ten sub-groups which enter into the general index one was unchanged, four showed increases and five showed decreases. None of the changes amounted to one per cent.

COST OF LIVING.—The index number of the Industrial Conference Board on the base 1923=100, was 84·7 for June as compared with 84·8 for May. Although some reduction in costs occurred in each of the major groups of expenditures except sundries, the only substantial decline was a seasonal drop in coal prices. Living costs in June were 2·3 per cent lower than in June, 1938.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1939

THE number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the second quarter of 1939 was 219, there being 51 in April, 80 in May and 88 in June.

The report for the first quarter of 1939, showing 188 fatalities was given in the LABOUR GAZETTE, May, 1939, page 543. In the second quarter of 1938, 264 fatal accidents were recorded (LABOUR GAZETTE, August, 1938, page 961).

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contain 22 fatalities for the first quarter of 1939, and 7 fatalities for 1938.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, the Board of Transport Commissioners of Canada, and certain other official sources as well as from the correspondents of the LABOUR GAZETTE. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the second quarter of 1939 were as follows: agriculture, 34; logging, 35; fishing and trapping, 6; mining, non-ferrous smelting and quarrying, 35; manufacturing, 25; construction, 20; electric light and power, 10; transportation and public utilities, 35; trade, 3; service, 16.

Of the mining accidents, 22 were in "metalliferous mining", 11 in "coal mining", and 2 in "non-metallic mineral mining and quarrying, n.e.s."

Of the accidents in manufacturing, 1 was in "vegetable foods, drink, and tobacco" group, 2 in "animal foods," 1 in "leather, fur and products," 11 in "saw and planing mill products," 1 in "pulp, paper and paper products," 3 in "iron, steel and products," 3 in "non-metallic mineral products," and 3 in "chemical and allied products."

In construction there were 9 fatalities in the "buildings and structures" classification, 1 in "shipbuilding," 5 in "highway and bridge," and 5 in miscellaneous construction.

In transportation and public utilities there were 13 fatalities in "steam railways," 12 in "water transportation," 1 in "air transportation," 7 in "local and highway transportation," 1 in "telegraphs and telephones," and 1 in "express."

In trade there were 3 fatalities in the "retail" group.

Of the fatalities in service, 9 were in public administration, 1 in "recreational," 1 in "custom and repair," and 5 in "personal, domestic and business."

There was no serious disaster resulting in the loss of a large number of lives during the period under review. Accidents involving the loss of two or more lives were as follows:—

On May 13, three loggers were drowned in Lesser Slave Lake, Alberta, when their boat burned.

Two fishermen were drowned when a boat capsized near St. Godfrey, Quebec, on May 3.

Two miners were asphyxiated by gas fumes from blasting, on June 20, at Geraldton, Ontario.

At Red Lake, Ontario, two linemen were struck by lightning on June 4.

On June 4, when a canoe capsized, two members of a survey party were drowned in Kississing Lake, Manitoba.

Two park labourers were killed when struck by lightning, on June 15, at Kitchener, Ontario.

During the quarter two fatalities occurred in Canadian waters which are not included in the accompanying list, as the seamen killed were employed on ships registered in other countries. On June 17 a seaman on a British freighter fell from a gangplank and was drowned at Montreal; a fireman on a German steamer was drowned on June 24 when he fell from a wharf at Shediac, New Brunswick.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first quarter of 1939 has been compiled containing 22 fatalities, of which 1 was in logging, 6 in mining (non-ferrous smelting and quarrying), 10 in manufacturing, 1 in transportation and public utilities, 1 in trade, and 3 in service. Three of these accidents occurred in January, 9 in February and 10 in March.

A further supplementary list of accidents occurring in 1938 has been made. This includes 7 fatalities, of which 2 were in agriculture, 3 in mining (non-ferrous smelting and quarrying), and 2 in manufacturing. Two of these accidents occurred in May, 1 in July, 1 in September, 1 in October, 1 in November and 1 in December.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Action by Janitor for Wages under Quebec Order No. 4 Fails in Part

IN an action for wages at the rate of $50 a month as fixed by the Fair Wage Board for janitors with heated living quarters in apartment houses, Mr. Justice Curran of the Superior Court of the District of Montreal on May 9 awarded the plaintiff $21. The contract had not specified any remuneration in cash. This amount was made up of wages for nine weeks at the rate of $5 a week for part-time work and $6 for wood used for the furnace, less $15 a month for two months for living quarters. The Court held that the plaintiff was not a janitor according to the meaning of Order 4 of the Fair Wage Board which applies to janitors employed full time, but under the rules of interpretation which the Board was empowered by the Order to lay down, a minimum of $5 a week was provided for persons spending a minimum of three hours a day in janitor service and being free to take other regular employment. *Bienvenu v. Charest* (1939) 77 Rapports Judiciaires de Quebec, Cour Superieure 258.

Action by Joint Committee under Quebec Collective Agreements Act Fails owing to Faulty Procedure

An action by the Joint Committee of the Shoe Industry formed under the authority of the Quebec Collective Labour Agreements Act failed because the plaintiff had not followed the proper procedure for such a case.

The Committee claimed from a firm of shoe manufacturers the penalty provided by section 44 of the Act for every employer who refuses to permit the inspectors of the Committee to obtain at the place of work any information they consider necessary. The employer was willing to permit the inspectors to obtain information from the employees in the office of the establishment but not where the workers were engaged in their work

On November 23 it was found by Magistrate Gagnon of Quebec that the Act gave the inspectors power to require information from workers in their place of work and it stipulated that suits for the recovery of fines must be brought by the Committee, but since the Collective Labour Agreements Act makes no provision for the allocation of the amount recovered, the provisions of the Quebec Penal Actions Act on this point applied to the case. According to the latter statute if there are no express provisions for the application of a fine, one-half of it is to belong to the Crown and the other half to the private prosecutor and wherever a penalty reverts in whole or in part to the Crown, notice of the action for its recovery must be served without delay by the plaintiff upon the Attorney-General. No proceedings may be taken in the action before such notice, with a certificate of its service, has been returned to the Court with the action. The magistrate held that in the action brought by the Joint Committee of the Shoe Industry notice should have been given to the Attorney-General and no action could be maintained where such notice had not been served and a certificate of its service returned into Court at the same time as the action. The action was therefore dismissed with costs.

Two days later the plaintiff amended its claim to state that the fine it was suing to recover belonged half to the Crown and half to the plaintiff and on November 30 the plaintiff produced in court a notice of the action sent to the Attorney-General on the 26th of that month. Mr. Justice Pratte of the Superior Court of the Quebec District who heard the action in its amended form held that the law did not permit the Court to maintain an action, notice of which was given after the action was begun; that notice given after the action is of no effect in validating proceedings taken previously which were directly contrary to a prohibition in the Penal Actions Act. *Comité Conjoint de L'Industrie de la Chaussure* v. *Brown et Grenier ltée,* (1939) 77 Rapports Judiciaires de Québec, Cour Supérieure 275.

Damages Awarded in Quebec to Workman for Employer's Negligence

Mr. Justice Sévigny, Acting Chief Justice of the Superior Court of the District of Quebec on April 24 allowed a claim by a workman for damages suffered by him in an accident on January 24, 1938, when the plaintiff was removing snow and ice without help and with defective equipment from the roof of a house occupied by the main shareholders of the defendant company. The negligence of the workman in not insisting on having help and in continuing to use equipment which he knew was no longer altogether safe was taken into account by the Court in assessing the amount of the award. Since the injury reduced the worker's capacity by 22 per cent he was considered entitled to damages of $2,500 and his out-of-pocket expenses were $519. He was awarded one half of both or $1,509.50.

The plaintiff had been doing general work for the defendant since 1929, and was paid $20 a week. Each winter he had removed snow and ice from the roof of the house. When the plaintiff was first instructed to do this work, he stated to an official of the defendant that he required help. This was admitted, as the work is generally done by two men, but the official suggested that the plaintiff could remove it himself. However, in 1929 and 1930 he was aided by his brother-in-law whom he himself paid, making no claim on his employer. Since that time he had been doing the work alone but had to use a ladder placed on the roof and secured with a rope. It was through the breaking of the worn rope that the workman fell to the pavement. The employer was held negligent in not providing proper and safe equipment. *Marois v. Syndicat Cooperatif Immobilier ltée,* (1939) Rapports Judiciaires de Québec, Cour Superieure, 279.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment in Canada at the beginning of August showed further important improvement, according to statements tabulated by the Dominion Bureau of Statistics from 11,843 firms in all lines of industry except agriculture, fishing, hunting, and highly specialized business. They employed 1,144,685 workers, a number greater by 1·5 per cent than their July 1 staff of 1,127,863. The index, based on the 1926 average as 100, rose from 115·8 in the preceding month to 117·5 at August 1, when it was over five points higher than at the same date in 1938. The experience of the years since 1920 indicates that employment usually, though not invariably, gains at midsummer, there being on the average a fractional increase in the index; the expansion at the beginning of August of the present year was therefore greater-than-seasonal, so that the seasonally-adjusted index also advanced at August 1, standing at 114·3, compared with 113·6 in the preceding month.

Heightened activity was recorded at the beginning of August in manufacturing, mining, communications, building and highway construction, hotels and restaurants, and wholesale trade. On the other hand, retail trade, shipping and stevedoring and logging were quieter.

As already stated, the unadjusted index (based on the average in the calendar year 1926 as 100) stood at 117·5 at August 1, 1939, compared with 115·8 at July 1, while at August 1 of recent years, the index was as follows: 1938, 112·1; 1937, 120·0; 1936, 105·6; 1935, 101·1; 1934, 99·9; 1933, 87·1; 1932, 86·3; 1931, 105·2; 1930, 118·8; 1929, 127·8; 1928, 119·3, and 1927, 110·5.

Unemployment in Trade Unions.—At the beginning of August, 1939, the unemployment percentage reported to the Department of Labour by local trade unions throughout Canada stood at 11·1 in comparison with 11·6 per cent at the beginning of July, 1939, and 14·0 per cent at the beginning of August, 1938. The percentage for August was established from the reports forwarded by 1,902 labour organizations with an aggregate of 242,163 members.

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada showed that the volume of business transacted during July, 1939, was lower than that of the preceding month, but slightly higher than that reported during July a year ago. The industrial divisions showing the greatest declines under the first comparison were construction and maintenance, logging and services, with a marked increase recorded in farming, while in comparison with the corresponding period of last year, very pronounced gains were shown in logging, services, manufacturing and farming, which were largely offset by a heavy loss in construction and maintenance. Vacancies in July, 1939, numbered 33,151, applications 57,754, and placements in regular and casual employment 32,002.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was somewhat higher at $17.02 at the beginning of August as compared with $16.93 at the beginning of July. The increase was due to an advance in the cost of certain foods. Comparative figures for the cost of the list at certain earlier dates are $17 70 for August, 1938; $17.48 for August, 1937; $15.41 for June, 1933 (the low point during recent years); and $21.90 for August, 1929. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics continued downward until the third week in August and then advanced until the end of the month, being 72·8 for the week ended September 1 as compared with 71·9 for the week ended August 18, 72·1 for the week ended July 28, and 73·3 for the week ended June 30. Comparative figures on a monthly basis are 72·6 for July; 76·0 for August, 1938; 85·6 for August, 1937; 76·1 for August, 1936; 63·5 for February 1933 (the low point in recent years), and 98.4 for August, 1929.

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended September 1, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending August 26, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending August 12, July 15, and June 17, 1939; August 13, July 16, and June 18, 1938. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

Business Statistics.—The latest information available reflecting industrial conditions in Canada is given in the table on page 880. The index of the physical volume of business in July was slightly lower than in the previous month but about 10 per cent higher than in July, 1938. Of the principal groups used in the construction of the index number, mineral production was four per cent higher in July than in June and 24 per cent higher than in July, 1938. In this group, during the month under review, there were important increases in the exports of certain non-ferrous metals as compared with the previous month. The index of the manufacturing group indicated a slight decrease in volume in July from the level of the previous month but considerable improvement as compared with July, 1938. In this group, in the former comparison, advance was indicated in the volume of foodstuffs and textiles while forestry products, including newsprint, were at a lower level. Construction was about 10 per cent lower than in June but five per cent higher than in July, 1938. Of the other principal groups electric power output, trade employment, imports and exports were slightly lower than in the preceding month while car loadings advanced. All of these groups were considerably higher in July, 1939, than in July, 1938. Information available for August shows improvement in employment, the number of cars of revenue freight, the earnings of the Canadian National Railways, and in contracts awarded both as compared with the previous month and with August, 1938.

Strikes and Lockouts.—The number of strikes and lockouts recorded during August was 18, involving 15,031 workers with time loss of 42,110 man working days. Most of the workers involved and time loss were accounted for by eleven strikes of coal miners in Nova Scotia, and this was also the case in July, when there were 9 disputes, involving 4,170 workers with time loss of 14,960 days. In August, 1938, there were 22 disputes, involving 2,375 workers with time loss of 12,745 days, but none of the disputes involved large numbers of workers or caused great time loss. Of the 18 disputes recorded for August, 1939, seventeen were terminated during the month, four resulting in favour of the employers and two in favour of the workers involved, one being partially successful, one resulting in a compromise settlement, while the result in each of nine cases was recorded as indefinite. One dispute, involving 700 workers, was recorded as unterminated at the end of August. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions involved.

Preliminary War Measures in Canada

Over-shadowing all other matters in national and international affairs during the past month was the march of events which culminated in war.

The Parliament of Canada was convened on September 7 and until it met, any necessary emergency steps were taken by the Government under the provisions of the War Measures Act of 1914.

On Sunday, September 3, Great Britain and France declared war on Germany in accordance with the provisions of their agreement with Poland in resisting attack. Shortly after Great Britain's declaration of war (announced in the British House of Commons by the Prime Minister, Rt. Hon. Neville Chamberlain), His Majesty the King broadcast a message of hope and determination to the entire British Commonwealth.

A few hours later, the Prime Minister of Canada, Rt. Hon. W. L. MacKenzie King, spoke to the Canadian people over the Canadian Broadcasting Corporation network, his concluding words being as follows:—

"The people of Canada will, I know, face the days of stress and strain which lie ahead with calm and resolute courage. There is no home in Canada, no family, and no individual whose fortunes and freedom are not bound up in the present struggle. I appeal to my fellow Canadians to unite in a national effort to save from destruction all that makes life itself worth living, and to preserve for future generations those liberties and institutions which others have bequeathed to us."

A similar message in French was broadcast by the Rt. Hon. Ernest Lapointe, Minister of Justice.

Following the Prime Minister, the Minister of Labour, Hon. Norman McL. Rogers, stated over the radio the plans of the Government "to provide safeguards against any undue increase in prices of food, fuel, or other necessaries of life, and to ensure adequate supplies and equitable distribution through the existing organizations of wholesale and retail trade."

He announced that provision had been made for "the immediate establishment of a War-time Prices and Trade Board which will co-operate with those engaged in production, manufacture and distribution throughout Canada in any regulation deemed necessary to maintain efficient operation in the marketing of goods."

He emphasized that the formation of the Board was essentially a precautionary measure and added:—

"The co-operation of business men and of consumers in ordering no larger quantities of goods than they usually purchase for their immediate needs is urged by the Government as a means of assuring that no unnecessary loads will be placed upon channels of distribution which would tend to produce needless temporary additions to costs and selling prices."

In conclusion the Minister of Labour declared: "In this time of national emergency the Government is confident that it can rely on patriotic citizens to co-operate for the common good. At the same time it is resolved to apply whatever penalties may be necessary to curb profiteering and hoarding, and ensure a proper equality of sacrifice and opportunity for our people."

This message was repeated in French by the Minister of Pensions and National Health, Hon. C. G. Power. (The details with respect to the establishment of this Board and the first regulations issued thereunder are given elsewhere in this issue commencing on page 889).

Emergency Parliamentary Session—Speech from the Throne

When Parliament assembled on Thursday, September 7, the Speech from the Throne, read by His Excellency the Governor General, indicated the purpose of this emergency session as follows:—

Honourable Members of the Senate:
Members of the House of Commons:

As you are only too well aware, all efforts to maintain the peace of Europe have failed. The United Kingdom, in honouring pledges given as a means of avoiding hostilities, has become engaged in war with Germany. You have been summoned at the earliest moment in order that the government may seek authority for the measures necessary for the defence of Canada, and for co-operation in the determined effort which is being made to resist further aggression, and to prevent the appeal to force instead of to pacific means in the settlement of international disputes. Already the militia, the naval service and the air force have been placed on active service, and certain other provisions have been made for the defence of our coasts and our internal security under the War Measures Act and other existing authority. Proposals for further effective action by Canada will be laid before you without delay.

Members of the House of Commons:

You will be asked to consider estimates to provide for expenditure which has been or may be caused by the state of war which now exists.

Honourable Members of the Senate:
Members of the House of Commons:

I need not speak of the extreme gravity of this hour. There can have been few, if any, more critical in the history of the world. The people of Canada are facing the crisis with the same fortitude that to-day supports the peoples of the United Kingdom and other of the nations of the British commonwealth. My ministers are convinced that Canada is prepared to unite in a national effort to defend to the utmost liberties and institutions which are a common heritage.

Following the Speech, the Prime Minister tabled copies of emergency Orders in Council passed since August 25. Among these were the measures for the establishment of regulations concerning prices of food, fuel and other necessaries of life, and the appointment of the War Time Prices and Trade Board.

Canada's Declaration of War against German Reich

Following the speech from the Throne, the Prime Minister set forth the government's decision to make common cause with Great Britain and stated:

We are going to stand for the defence of Canada; we are going to stand for the co-operation of this country at the side of Great Britain; and if this house will not support us in that policy, it will have to find some other government to assume the responsibilities of the present. We are committed to that policy, and I believe when it comes to the expression of views of hon. members of this House of Commons from every side we shall find that we have this house very solidly behind us.

Subsequently, at the next sitting of the House on September 9, the Prime Minister outlined the procedure which the government had in mind in giving effect to the decision of Parliament regarding Canadian participation in the war and stated:

The adoption of the address in reply to the speech from the throne will be considered as approving not only the speech from the throne but approving the government's policy which I set out yesterday of immediate participation in the war.

If the address in reply to the speech from the throne is approved the government will therefore immediately take steps for the issue of a formal proclamation declaring the existence of a state of war between Canada and the German Reich.

In this declaration of policy the Prime Minister was supported by the Leader of the Opposition, Hon. R. J. Manion and Mr. John Blackmore, Social Credit leader. Mr. J. S. Woodsworth, leader of the Co-operative Com-

monwealth Federation was not in agreement, though he said he spoke for himself and not for his party. Three other members of the House of Commons spoke against participation by Canada. These were: Mr. Maxime Raymond (Beauharnois, Laprairie), Mr. Liguori Lacombe (Laval-Two Mountains), and Mr. Wilfrid Lacroix (Quebec-Montmorency).

Parliament indicated its support of government policy, by almost unanimously adopting the address in reply to the speech from the throne on Saturday, September 9.

At the conclusion of the House sitting on Saturday night the Cabinet convened until early Sunday morning. Following this Cabinet meeting, a Royal proclamation was issued by His Excellency the Governor General on the authority of His Majesty King George VI announcing a state of war with Germany. The significant part of the proclamation which was published in an extra edition of the Canada Gazette under date of Sunday, September 10, is contained in the following paragraph:

"Now therefore we do hereby declare and proclaim that a state of war with the German Reich exists and has existed in our Dominion of Canada as from the 10th day of September, 1939."

War measures adopted at special session of Parliament

Before parliament prorogued its special war session on September 13, Royal Assent was accorded to a number of war measures as follows:—

An act for granting to His Majesty aid for national defence and security.

An act to establish a Department of Munitions and Supply.

An act to amend the Salaries Act.

The Excess Profits Tax Act.

An act to amend the customs tariff.

An act to amend the Excise Act.

An act to amend the Special War Revenue Act.

An act to amend the Income War Tax Act.

An act to incorporate the Canadian Patriotic Fund.

An act relating to war charities.

By the first named measure an initial war budget of one hundred million dollars was voted. This amount is to be provided mainly by increased taxation through such channels as amendments to the Income War Tax Act, the Special War Revenue Act, the Excess Profits Tax Act, the Excise Act and the customs tariff.

Bill to amend the Combines Investigation Act withdrawn

A Bill providing for several changes in procedure in the conduct of investigations and prosecutions under the Combines Investigation Act was introduced by the Minister of Labour in the House of Commons on September 11, 1939. In the debate on September 11 on the motion of second reading, the Minister asked that the Bill be allowed to stand following opposition by several members to it being further considered at the current special session when powers to modify methods of procedure under the Combines Investigation Act were available under the War Measures Act. The question of whether such amendments could be made by Order in Council under the War Measures Act was submitted by the Minister to the Department of Justice. The advice of the law officers of the Crown was to the effect that while the War Measures Act was in force the changes incorporated in the Bill could be put into force by Order in Council. In view of this position the Bill was withdrawn by the Minister on September 12.

The Bill would have restored the effect of several provisions of the Act which had been in force prior to changes inserted in amending Acts in the Senate in 1935 and 1937. These changes of 1935 and 1937 which would have been removed by enactment of the Bill included provisions now preventing joint prosecutions under the Combines Investigation Act and section 498 of the Criminal Code.

Labour Bodies Pledge Co-operation in Prevention of Disputes During War

When the inevitability of war became apparent, the Minister of Labour, Hon. Norman McL. Rogers, conferred in turn with representatives of the Trades and Labour Congress of Canada, the All-Canadian Congress of Labour, the Railway Brotherhoods, the Canadian Federation of Labour, and the Confederation of Catholic Workers.

On Friday evening September 1, the Minister met the following organizations and their representatives: Trades and Labour Congress of Canada—P.M. Draper, president, and R. J. Tallon, secretary-treasurer; All-Canadian Congress of Labour—A.R. Mosher, president; Canadian Federation of Labour—A. Meikle, president, and W.T. Burford, secretary-treasurer.

On Saturday morning September 2, a similar conference was held with representatives of the Railway Brotherhoods and the Confederation of Catholic Workers. The Railway Brotherhoods were represented by:

W. L. Best, secretary of the Joint Legislative Committee of the Brotherhood of

Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen, Brotherhood of Railroad Trainmen, and Order of Railway Conductors; and Chairman of the Canadian Legislative Board, Brotherhood of Locomotive Firemen and Enginemen.

W.H. Phillips, vice-president, Order of Railroad Telegraphers.

A. J. Kelly, Dominion Legislative Representative, Brotherhood of Railroad Trainmen.

J. J. O'Grady, Vice-Chairman, Canadian Pacific System Federation, Brotherhood of Maintenance-of-Way Employees.

The Confederation of Catholic Workers was represented by Maurice Doran, organizer of the Ottawa-Hull district.

In connection with these conferences the Minister of Labour stated: "We discussed in a preliminary way the basis of effective co-operation between the Government and organized labour in the development and operation of policies adopted to meet the emergency of war. In every case the response left no doubt of the whole-hearted co-operation of those who spoke on behalf of the various organizations."

Subsequently, on September 15, the leading officers of the Trades and Labour Congress, the All-Canadian Congress of Labour, and the Canadian Federation of Labour issued statements pledging their co-operation with government and employers in the prevention of industrial disputes during the war. Similar action was taken by the Confederation of Catholic Workers at its convention, held September 10-13. (Texts of these statements appear elsewhere in this issue on page 893.)

Labour Day Message of Minister of Labour

On September 2, the Minister of Labour issued a Labour Day message to the workers of Canada. In commencing, the Minister referred to the institution of Labour Day as offering "an opportunity for the fitting recognition of the important part taken by the workers of the country in our national development."

Referring to the "notable increases" in trade union membership in Canada in recent years and to the "marked influence" of the considered views of organized workers in the development of social legislation in Canada, the Minister's concluding paragraphs were as follows:—

"Apart from consultations in respect of legislation, the Government is in constant touch with the chief officers of the labour movement in connection with administrative matters. As Minister of Labour, I wish to express the thanks of the Government for the co-operation which we have received from the trades concerned in the execution of defence contracts, including in particular those for the manufacture of military aircraft. All contracts with the Government for the manufacture of armament and military supplies are subject to labour clauses in respect to which the advice of organized labour, equally with industry, is sought in the determination of the appropriate scales of wages. It is a matter for sincere congratulation that this vital activity has not been hampered in any way during the past year through the occurrence of labour disputes.

"Since this message was first prepared our country has been confronted swiftly with the grave issues raised by the prospect of war. If war should come, provoked by wanton aggression on the part of Germany, the Canadian Government will seek the authority of Parliament to stand resolutely by the side of Britain in defence of security and freedom. A period of trial and testing may lie before us, but the final outcome of such a conflict cannot be in doubt. During the past two days I have conferred with representatives of organized labour in Canada. I have every confidence that the Government and the country can count on the ready co-operation of Canadian workers in meeting whatever demands the future may hold in store for us in these anxious times."

Labour Day Messages of Canadian Labour Leaders

The Labour Day messages of Canadian labour leaders were issued under the shadow of war and reflect the resolute purpose of labour in meeting the challenge of dictatorship.

Mr. P. M. Draper, president of the Trades and Labour Congress of Canada in referring to the rise of modern dictators declared in part: "It is to be noted that dictators have always, early in their careers, suppressed any semblance of a free trade union movement. A free trade union movement cannot be tolerated by despotic government, for the movement demands the right to look after the interests of its members, whereas dictatorship grants no rights to its citizens. . . ."

"Something that cannot be told to trade unionists too often is that democracy can only survive if properly supported. It is the plain duty of the labour movement, in its own, as well as in the country's interest, to lend undying support to democracy. Under that system, with all its faults, and under that system only may the workers hope to gain recognition for their rightful place in the economic scheme. . . .."

Mr. A. R. Mosher, president of the All-Canadian Congress of Labour, in stating that Labour Day would be observed in its tradi-

tional manner with parades and picnics, noted:—

"Yet in the background there will be a haunting recollection that what we call civilization is constantly threatened by another world-war; that the very forms of democratic government have been wiped out in some nations; that the economic system is becoming more and more unworkable, nationally and internationally, and that in a world which might be made a pleasant home for mankind, with peace and plenty, hundreds of millions are living in poverty and insecurity. . . ."

He considered that "until they become strongly organized on a national basis, the workers of Canada will not be able to exert either economic or political power. They must be able to meet employers on an equal footing, and, through their freely-chosen representatives, share in determining wages and working conditions. . . ."

Mr. W.T. Burford, secretary-treasurer of the Canadian Federation of Labour, in commencing declared:

"With the flame and smoke of war on the horizon and Canada's interests directly menaced, there seems little to say in a Labour Day message except that Canadian workers stand resolutely behind their Government and will co-operate in all measures for the safety of the Dominion and the British Commonwealth. Co-operation in such a national emergency entails a sacrifice for citizens in all walks of life. Not the least part of that sacrifice, second only to exposure to the physical dangers and misery of war itself, is the abridgement of cherished liberties, both by those who engage in active service and by those who carry on at home. But voluntary submission to temporary regimentation in some of our activities is the only alternative to permanent surrender to an alien tyranny and Canadian workers will not hesitate in their choice. They will meet whatever comes with the fortitude they showed twenty-five years ago in similar circumstances..."

He urged that since the loyalty of the workers "is without condition or reservation" they had "a right to expect in return that the restraints voluntarily accepted shall not be arbitrarily extended by those in authority, that there shall be efficiency and economy in government, that all the resources of the Dominion shall be applied to the vigorous prosecution of the war, and that the national effort shall not be impaired by an oppressive burden of bureaucracy.

Speaking at the Labour Day luncheon of the Canadian National Exhibition, R. J. Tallon, secretary-treasurer of the Trades and Labour Congress of Canada, declared that "while organized labour has no enthusiasm for war, never at any time has there been greater determination and more unanimity among its ranks than at the present time."

He also reiterated Labour's stand as follows: "The workers of this country, together with the workers of other democracies, stated a year ago their intention of resisting to the fullest possible degree further encroachments on the democratic countries."

Mr. Alfred Charpentier, president of the Confederation of Catholic Workers of Canada, quoting the dictum that "labour is not a commodity" outlined the situation resulting from what he considered the misconception of this truth in modern industry.

He exhorted that "a change of heart is necessary" and that "the present spirit of materialism and of domination must give way to brotherly love and co-operation between the social classes."

Industrial Disputes Investigation Act

During the month of August the Department received one application for the establishment of a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act. Two boards were established by the Minister of Labour, and an application for the establishment of a board was withdrawn.

Particulars concerning proceedings under the Act will be found on page 896.

Statistics of material aid recipients for July

According to preliminary figures from the National Registration, released on September 12, by the Honourable Norman McL. Rogers, Minister of Labour, the grand total of all classes of persons on urban and agricultural aid across Canada in July this year was 806,000. This is a decrease of over 4 per cent from the June figure, 3.7 per cent less than in July a year ago, but 1.6 per cent more than in July, 1937.

The Dominion total of unemployed but fully employable persons on aid in July this year was 140,500, a decrease of 5.7 per cent from the revised June total of 149,000. The figure for July this year, although it showed an increase of 6.2 per cent over July a year ago, was down by 12 per cent from July, 1937.

A total of 535,000 persons were receiving non-agricultural aid last July, a decrease of over 4 per cent from the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed

a net increase of 7.6 per cent from the figure for July, 1938, but was over 5 per cent lower than the figure for July two years ago.

The number of farmers and members of their families in receipt of agricultural aid continues to show a decline from a year ago. A total of 60,000 farmers who, together with their dependents, account for a farm population of 271,000, were reported as receiving agricultural aid for subsistence in July. Of these, 234,000 were located in the Province of Saskatchewan.

The Dominion total on agricultural aid in July showed a decrease of 4.2 per cent from the June figure, was over 20 per cent less than in July, 1938, but was 18.1 per cent greater than in July, 1937. The total of farmers and their families on aid in Saskatchewan continued to hold the improvement over a year ago, July showing a decrease of over 21 per cent in this comparison, and a decrease of 3.3 per cent from June, 1939. However, due to crop conditions in 1937 and 1938, Saskatchewan this year showed 35 per cent more on agricultural aid than in July, 1937.

Holidays with pay in Canadian industry

As a result of a survey conducted in January, 1939, by the Industrial Relations Section, School of Commerce and Administration, Queen's University, Kingston, Ontario, it is shown that out of a total of 397,099 employees covered by 303 vacation plans of reporting parent companies, 213,724, or 54 per cent received vacations with pay during 1938.

In a preface to the bulletin which is entitled *Vacations with Pay in Canadian Industry,* J. C. Cameron, head of the Industrial Relations Section, states in part:

> The past decade has witnessed significant changes which have had a marked effect upon points of view and upon attitudes and practices in the field of industrial relations. The extension of progressive social legislation and the active interest of political leaders in the improvement of standards of employment, the expansion of collective bargaining and the discovery and application of scientific principles and methods in personnel administration have resulted in a new approach to employer-employee relations and consequently to the development of new techniques and of new practices.

The total sample reported upon in the pamphlet consisted of 303 plans applying to 490 parent and subsidiary companies, while the total number of employees covered, including executives, office employees, salesmen, inside sales force, salaried and supervisory plant employees, hourly paid and piece workers, maintenance staff, etc., was about 400,000. It is pointed out that since the total wage and salary earning population at the time of the last general census in 1931 was 2,570,097, the study covers almost one-sixth of all persons in Canada who are employed by others.

Reference is made to the National Employment Commission's Report on Phases of Employment Conditions in Canadian Industry made in 1937, (LABOUR GAZETTE, January, 1938, page 20) in which details were given concerning the extent to which holidays with pay were in force in Canada. In this regard the study states that:

> Paid vacation plans, especially for wage earners, have been adopted rapidly since the National Employment Commission's survey. It is, therefore, certain that the proportion of the total wage and salary earners in Canada which is employed by companies with some form of vacation plan is greater than it was in 1937, and that the proportion of employees in companies with inclusive plans covering both salaried employees and wage earners has increased even more rapidly. The extent of this development is indicated by the fact that an analysis of the Industrial Relations Section sample shows that one-quarter of the plans which provide paid vacations for wage earners have been adopted in 1937 or 1938, or are to go into effect for the first time in 1939.

The detailed nature of the report is reflected in a brief summary of the contents of the various chapters. Chapter I outlines the paid vacation movement in countries other than Canada, while Chapters II to VI present details concerning the survey made of paid vacations now in operation in Canada. These chapters give detailed provisions of company plans. Chapter VII summarizes the provisions for vacations with pay prevailing at present in Canada and in other countries, and on the basis of experience in other countries, suggests trends in the further development of the paid vacation movement in Canada.

Commenting on the future of the paid vacation movement in Canada, the survey report states:

> As yet Canada is far behind in the paid vacation movement. It may be considered, in a sense, as in the same stage of development as Great Britain before the war or the United States before the National Industrial Recovery Act. The normal line of development in other countries seems to have been from provision through custom only to provision through company plans, then to provision through collective agreements, and finally to provision through legislation, although all four forms may be in operation in a country at the same time, and the stages may not be clearly marked.

The report then points out that in Europe the movement has, in general, reached the final stage of all-inclusive legislation, paid vacations now being provided for by law in France, the Union of Socialist Soviet Repub-

lies, Belgium, Poland, Italy, most of the Scandinavian states, the Irish Free State and a number of other industrial states in south-eastern Europe. Concluding, the report declares:

> The method of providing for paid vacations which is likely to be of more immediate relevance in Canada is provision through collective agreement. This method is still widespread in Great Britain, the Netherlands and the Scandinavian countries, and has very rapidly become predominant in the United States. With the interrelations of Canadian and United States business and labour interests, it is inevitable that United States developments will eventually have their influence on Canadian practices. It is, therefore, to be expected that company practice in regard to paid vacations in industries which are already being unionized will soon be written into collective agreements, and that unionization in other industries will, in time, lead to the incorporation into new collective contracts of provisions for paid vacations for wage earners.

The report also contains two appendices, one giving the questionnaire sent to the reporting companies and another listing the co-operating companies. An extensive bibliography is also included.

Copies of the report (price $1) may be obtained from the Industrial Relations Section, School of Commerce and Administration, Queen's University, Kingston, Ontario.

Silicosis conference in British Columbia

At the request of representatives of metaliferous miners employed in mining camps and smelters, a conference was held early in August with the British Columbia Minister of Labour, Hon. Geo. S. Pearson. During the conference several proposals were made recommending that the Workmen's Compensation Act be amended to provide full compensation for workers contracting silicosis, and also that measures be adopted to eradicate this industrial disease.

The main proposal requested that provision be made similar to that in the British Act which provides that wherever a worker is partially disabled through injury or industrial disease, provided that disability prevents him from securing work in the industry, he must be recognized as being totally disabled and receive full compensation.

A second proposal requested that a worker be paid full compensation after having contracted silicosis in British Columbia even though he had worked in mines in another province.

The delegation also urged that a sum of money be set aside as a rehabilitation fund to provide afflicted workmen with funds to establish themselves on the land or in business or to allow them to return to their homes.

A strong plea was made for the installation of ventilating systems or any other method to reduce the hazard of the disease. It was also advocated that a research organization be established by the government to study and report upon preventative methods, it being suggested that the government set aside between $25,000 and $50,000 for this purpose.

The Minister promised the delegation that their representations would be given careful consideration by the government.

War time control of employment in Great Britain

One of the first actions of the British Government in the industrial sphere upon the declaration of war was its announcement to put into effect war-time control of employment.

According to a Canadian Press report "control of employment was introduced to prevent a shortage of labour in essential industries, prohibiting workers from taking up new employment without consent of the Ministry of Labour and by other plans of control".

The press report also records the promulgation of a regulation whereby British farmers requiring help may appeal to military officers for men, these to be paid by the farmer.

Unemployment assistance in Great Britain

The total payment towards unemployment assistance in Great Britain during 1938 was £34,750,000, according to the fourth annual report of the Unemployment Assistance Board for the year ending December 31, 1938.

The outstanding matter engaging the attention of the Unemployment Assistance Board and Advisory Committees during 1938 was the enquiry into certain aspects of unemployment, their concern being with "that section of the unemployed numbering at any one time nearly 600,000 whose unemployment is chronic or prolonged and for whose maintenance and welfare the Board are immediately responsible."

The dimensions of the problem of the younger unemployed are disclosed by statistics given in the course of the report:

> The total number of male applicants of not more than 30 years of age is about 100,000. This number is not, however, evenly distributed, the problem being one of special difficulty in certain places, as, for example, Glasgow and Liverpool and some parts of the Special Areas. All but a small number of these men can be said to have suffered considerable unemployment; otherwise they would not be among the Board's applicants, but would be drawing unemployment benefit. It is estimated, on the basis of a statistical enquiry made in the autumn, that over 50,000 of these younger applicants have had either no employment at all, or less than six months' employment, during the last three years.

As a means of mitigating the problem the Board recommended the revision of the policy of granting unconditional assistance; and the

introduction of a policy of granting assistance only on acceptance of training subject to reasonable safeguards of appeal.

The report emphasizes the necessity of providing employment opportunities to the great majority seeking work but unable to get it. In the attainment of this objective the Board suggests that training facilities be increased and that in special cases preference should be given to the long term unemployed on defence works for which the Exchequer is bearing the whole or a large part of the cost.

Another proposal made by the Board invites local authorities to employ persons who have undergone a course of training for a period of three months on works that would better fit them for entry into regular employment. Such work it is suggested would be treated as a further re-conditioning course and any additional expense incurred in carrying out the scheme would be met in part by the Board.

Co-partnership and profit-sharing in Great Britain

The total number of undertakings in Great Britain and Northern Ireland with profit-sharing schemes in effect at the end of 1938 was 399 according to information published in the August issue of the British *Ministry of Labour Gazette*. Five firms each and two schemes in operation bringing the total number of plans to 404, as compared with 419 at the end of 1937.

Approximately 430,000 workpeople were employed in the 399 firms with profit-sharing schemes in operation, and of this number about 261,000 persons were entitled to participate in the benefits of the plans, compared with 265,000 who participated in benefits accruing under schemes in operation in 1937.

It is pointed out in the British *Ministry of Labour Gazette* that there has been a steady decrease in the number of schemes in operation since 1929, and that at the end of 1938 the total number of schemes known to be in operation was only about three-quarters of the number at the end of 1929.

Statistics for 1938 show that 355 schemes paid an average of £11 6s 7d per head which resulted in an average percentage addition to earnings of 5·9.

Working hours of juveniles in factories in Great Britain

In the August issue of the LABOUR GAZETTE (page 779) reference was made to the revision in Great Britain of regulations under the Factories Act governing the working hours of juveniles in factories.

At that time, inquiries had been held respecting certain industries while in others inquiries had been directed to be held. Among the industries for which public inquiries were directed to be held on the question of allowing the working hours to exceed 44 hours per week were the flax textile industry, the rope, twine and net industry and the electrical cable-making industry.

According to information appearing in the August issue of the British *Ministry of Labour Gazette*, the reports of the Commissions appointed to hold the inquiries in the case of the first two industries mentioned above have been received by the Home Secretary, while the application in the case of the electrical cable-making industry was withdrawn and the inquiry was not proceeded with.

It is reported that the Home Secretary, not being satisfied that conditions mentioned in Section 71 (2) of the Act are fulfilled in the case of the three industries mentioned, has issued orders appointing September 3 as the date on which the maximum of 44 hours per week for young persons will become operative in these industries.

Re-organization of Dominion Cabinet

Since this issue of the LABOUR GAZETTE was prepared for press, a re-alignment of the Cabinet was announced by the Prime Minister, Rt. Hon. W. L. Mackenzie King, on September 19.

The re-organization of the Dominion Cabinet results in present ministers being re-sworn to their new portfolios as follows:

Minister of National Defence—Hon. Norman McL. Rogers, (formerly Minister of Labour).

Minister of Labour—Hon. Norman McLarty (formerly Postmaster-General).

Minister of Pensions and National Health—Hon. Ian Mackenzie (formerly Minister of National Defence).

Postmaster-General—Hon. C. G. Power (formerly Minister of Pensions and National Health).

In addition to the important war measures, indicated elsewhere in this issue, the establishment of the following bodies, by Order in Council, is announced:

Voluntary Service Registration Bureau.

Committee of Public Information.

Foreign Exchange Control Board

ESTABLISHMENT OF WAR-TIME PRICES AND TRADE BOARD

Measures Immediately Adopted to Check Undue Price Increases and Hoarding—Text of New Regulations—Warning Against Profiteering

AMONG the first steps of the Dominion Government immediately prior to the outbreak of war was the action taken under the War Measures Act of 1914 to provide safeguards against any undue increase in the prices of foods, fuel and other necessaries of life.

The first domestic reaction to the outbreak of war was a "run" on wholesale and retail stocks of sugar. This was checked, however, by immediate official reassurance that there was no danger of a sugar shortage if public purchasing was restricted to normal requirements.

On September 2, following a meeting of the Cabinet, the Minister of Labour, Hon. Norman McL. Rogers, announced that the government had given consideration to reports in the press that there had been an unusual demand for sugar all over the country coupled with a fear of sharp price increases as in 1914. The Minister stated the government saw no reason for anticipating any such increase, and pointed out that the situation was entirely different from that which existed in 1914 when Great Britain was dependent on large sugar imports from Germany and Austria-Hungary which were cut off at the commencement of the war. This had resulted in a sudden demand and a shortage which led to the price increase.

However the Minister explained that the present sources of British supply in the West Indies and elsewhere are more than adequate to meet the demand, and remain accessible both to Great Britain and Canada.

"The Government are watching the situation closely" declared the Minister, "and are prepared to take whatever steps may be necessary to implement the pledge given by the Prime Minister that, in the event of war, profits could and would be rigidly controlled and profiteering suppressed."

Measures to Protect Consumer

On the same day (September 2) the Minister issued a second statement indicating that "comprehensive measures to protect the consuming public" would be taken shortly. He intimated that complaints had already been received and stated that if any cases of unjustified price increases to the detriment of the public should arise, steps would be taken immediately to deal with them under existing laws.

The Minister further stated that, so far as prices and supplies are concerned, purchases of goods by Canadian consumers should be affected very little at this stage by the European war situation. He said that price increases or the buying of unusual quantities of domestic supplies by dealers, manufacturers or consumers were decidedly not necessary under conditions prevailing here now nor even under those which might be anticipated to exist in Canada for a prolonged period. Because of the very favourable position of Canada for continuous and increased production it is unnecessary for the public to buy goods in excess of normal needs, as determined by past experience. In this way local or temporary price increases or delays and inconveniences can be avoided.

On Sunday, September 3, in his radio broadcast, the Minister of Labour gave the public the first intimation of the "immediate establishment of a War-Time Prices and Trade Board", and briefly outlined its functions (a summary of the radio message is given elsewhere in this issue on page 881).

Situation in 1914-1918

In order to draw the parallel with the situation in 1914-1918, it is necessary to refer briefly in the next few paragraphs to the action taken during the last war.

On the outbreak of war in 1914 authority was given by the War Measures Act to the Dominion Government to make regulations for the control of production, manufacture, exportation and importation, trading, prices, etc. The Deputy Minister of Trade and Commerce and the Chief Statistician of the Department of Labour were appointed to secure all possible information required for action in the event of opportunity being taken by dealers and others to unduly enhance the prices of the necessaries of life. Arrangements were made for the collection and compilation of data as to wholesale and retail prices, the regular work in this connection being considerably enlarged. (Labour Gazette, September, 1914, p. 336.)

The retail prices of staple foods rose only nine and one-half per cent between July, 1914, and December, 1915, but thereafter the increase was rapid, there being very unfavourable crop conditions throughout the world.

On November 10, 1916, an Order in Council was passed under the authority of the War Measures Act making it illegal to limit the facilities of transporting, producing, manufacturing, supplying, storing or dealing in the necessaries of life, or to enhance prices or to

prevent or lessen competition in the production or distribution of such necessaries. In these provisions the word "unduly" (which restricted the scope of the otherwise similar offences set out in Section 498 of the Criminal Code, dealing with conspiracies in restraint of trade, enhancement of prices, etc.) was omitted.

The Minister of Labour was empowered to require detailed information as to stocks, costs of production and distribution, prices and length of time stored. Penalties for the contravention of these provisions were provided, a fine not exceeding five thousand dollars or imprisonment for any term not exceeding two years, or to both fine and imprisonment. A Commissioner was appointed to act for the Minister of Labour in the enforcement of these regulations, which as from time to time were in force until 1919. (LABOUR GAZETTE, December, 1916, page 1848). Later a Fuel Controller, a Food Controller (later replaced by the Canada Food Board) a Paper Controller, etc. were appointed to regulate production, distribution, trade and prices in the various commodities.

Establishment and Purpose of New War-time Board

Returning again to the present situation, a press release by the Minister of Labour on September 3, gave detailed information as to the purpose and objectives of the new War-time Prices and Trade Board and announced its personnel. It was stated that in order to provide machinery to deal with conditions of immediate concern the Government has taken over for this work, for the present and immediate future, the services of three senior officers of the Government Service. The members of the Board are H. B. McKinnon, Commissioner of Tariff, who will be Chairman, David Sim, Commissioner of Excise, and F. A. McGregor, Commissioner of the Combines Investigation Act. (On September 11, two additional members were appointed. These are: A. M. Shaw, Director of Marketing Services, Department of Agriculture; and Charles P. Hebert, member of the Tariff Board.)

The wide powers available to the Board are indicated to be largely reserve powers which will be promptly invoked if there should be any necessity to check unjustifiable trade demands in connection with any classes of necessary goods. The new Board, if it should deem it necessary for the prevention of excessive demand or excessive prices in regard to any necessary of life, may license manufacturers or dealers, fix maximum prices, or take steps to require equitable allocation of quantities of goods among distributors and regular distribution to consumers. Such powers would not be exercised, however, without the specific approval of the Governor in Council. It is not anticipated that there would be any early necessity for the employment of measures of this type.

With the passing of this Order in Council it is an indictable offence for any person to unduly prevent or lessen the manufacture, supply or distribution of any necessary of life, or to sell or offer for sale any necessary of life at a price higher than is reasonable. The provisions against the offences of charging excessive prices or hoarding include the following:

"No person shall sell or offer for sale any necessary of life at a price that is higher than is reasonable and just, and if a maximum price has been fixed by the Board for the sale of such necessary of life, that price shall be conclusively deemed to be reasonable and just."

"No person shall unduly prevent, limit or lessen the manufacture, production, transportation, sale, supply or distribution of any necessary of life."

While the Government has taken these immediate steps to provide against any eventuality, Mr. Rogers pointed out that there are ample stocks of foods, fuel and other necessaries now available in Canada, and adequate sources for further supplies. Consequently, it is considered that any necessity for invocation of the wider powers which are provided in the Order in Council will be extremely limited.

Maintenance of normal business practices by those engaged in producing and supplying necessaries of life deliberately directed to assuring normal regularity of supply, adequate distribution, and to avoidance of any price increases, also is expected to minimize the need for direct government control of trade.

Where regulations by the Board may be found to be required to assist in maintaining efficient distribution of any commodity, the co-operation of manufacturers and distributors will be sought in the establishment and execution of these regulations. Mr. Rogers emphasized that in all fields of trade and industry, whether subject to special war-time regulations or otherwise, reasonable business conduct in the public interest will be expected. If profiteering is attempted by any few, penalties are available for its severe suppression.

The Board's powers will not be applied to commodities which are regulated as to supply or price by other existing government agencies. Farmers and gardeners are exempted from the provisions of the Order in Council in respect to their own production of any agricultural

product. The Minister made it clear also that there was no intention of having this Board take over the functions of any existing agencies such as the Wheat Board and the Salt Fish Board. Its best results could be obtained if it effected the fullest co-operation with such bodies, and in general made use of existing government facilities rather than set up new machinery to displace or duplicate them.

One of the duties of the Board will be to confer with manufacturers, wholesalers and retailers with a view to enlisting their co-operation in ensuring reasonable prices, adequate supplies and equitable distribution of the necessaries of life. Another will be to arrange, wherever possible through existing agencies, for the assembling of statistical data regarding prices, costs, stocks of goods, volume of production, productive capacity and related matters.

Text of Regulations

The Board was established by Order in Council (P.C. No. 2516) on September 3, "pursuant to the powers conferred by Section 6 of the War Measures Act, 1914, or otherwise vested in the Governor in Council," and the text of the Regulations is as follows:

REGULATIONS RESPECTING NECESSARIES OF LIFE

Title

1. These regulations and any amendment or additions thereto may be cited as The War-time Prices and Trade Board Regulations.

Interpretation

2. For the purposes of these regulations, unless the context otherwise requires,—

(*a*) "Board" means the War-time Prices and Trade Board;
(*b*) "Member" means a member of the Board;
(*c*) "Licence means a licence granted by the Board under these regulations;
(*d*) "Minister" means the Minister of Labour;
(*e*) "necessary of life" means a staple or other ordinary article of food, fuel and clothing, including the products and materials from or of which any thereof are in whole or in part manufactured, produced, prepared or made and such other articles of any description as the Board may from time to time prescribe,
(*f*) "order" means an order of the Board made pursuant to these regulations;
(*g*) "regulation" means any of these regulations and any amendment or addition thereto.

War-Time Prices and Trade Board

3. (1) There shall be a Board to be called the War-time Prices and Trade Board consisting of *three members of whom one shall be the Chairman appointed by the Governor in Council to hold office during pleasure.

(2) The Board may establish at any place or places in Canada such office or offices as are required for the discharge of the duties of the Board, and may provide therefor the necessary accommodation, stationery and equipment.

(3) The Board may, subject to the approval of the Governor in Council, appoint such officers, clerks and other persons as may be deemed necessary to assist the Board in the performance of its duties, and such person shall receive such remuneration as the Board shall, with the approval of the Governor in Council, determine.

Powers of the Board

4. The Board shall have power,—

(*a*) to investigate, of its own motion or on complaint, costs, prices, profits and stocks of goods and materials of any person engaged in the manufacture, production, storage, transportation or sale of any necessary of life or any alleged or apparent unreasonable enhancement of price of any necessary of life, and for the purpose of any such investigation the Board shall have all the powers of a commissioner appointed under the provisions of the Inquiries Act;

(*b*) to require manufacturers, producers, jobbers, wholesalers or retailers of a necessary of life to obtain licences from the Board and to fix the fees payable on account of such licences;

(*c*) to suspend or cancel a licence in any case where in the opinion of the Board the licencee has been guilty of a violation of any regulation or orders;

(*d*) to fix maximum prices or margins of profits at which any necessary of life may be sold or offered for sale by manufacturers, producers, jobbers, wholesalers or retailers;

(*e*) to fix and limit the quantities of any necessary of life which may be sold or distributed to persons within prescribed periods of time;

(*f*) to fix and limit the maximum amounts of any necessary of life that may be bought or sold by any person within prescribed periods of time;

(*g*) to buy and sell any necessary of life through agencies designated by the Board;

(*h*) if the Board are of opinion that a necessary of life is being unreasonably withheld from the market, to take possession of any supplies of such necessary of life paying to the owners thereof such price as may, in default of agreement, be decided to be reasonable by the arbitration of a superior court judge of the province in which possession was taken;

(*i*) to refer to the Attorney-General of any province information respecting any alleged offence against the regulations or any order of the Board made thereunder;

(*j*) to require from time to time any person who manufactures, produces, stores or sells any necessary of life to furnish in such form and within such time as the Board may prescribe written returns under oath or affirmation showing such information as the Board may consider necessary with respect to such necessary of life;

(*k*) to make public their finding or report in the case of any investigation or to withhold such publication if they consider the public interest would be better served by such withholding.

(2) The powers vested in the Board by paragraph (*b*) (*d*) and (*h*) of the next preceding subsection shall be exercised only, subject to the approval of the Governor in Council.

---

*The above regulations were amended on September 9 to provide for the establishment of a Board of five members instead of three.

5. Any two members of the Board shall constitute a quorum, provided, however, that the powers of investigation vested in the Board by Paragraph (*a*) of subsection 1 of the next preceding section may be exercised by any one member of the Board, and provided further that the Board may appoint local or other committees to conduct investigations, and every such committee duly appointed shall be vested with all the powers of the Board necessary to conduct an investigation.

6. The Board shall, in exercising any of the power vested in them by these regulations, take into consideration the amount of a necessary of life required for the use or consumption of any person in his household or for the ordinary purposes of his business and at what price a necessary of life may be sold to return to the seller a reasonable and fair profit.

7. It shall be the duty of the Board,—

(*a*) to arrange, wherever possible through existing government agencies, for the assembling of required statistical data in relation to any part of any trade or industry regarding prices, costs, stocks of goods, volume of production, productive capacities, and related matters;

(*b*) to refer to the Commissioner of the Combines Investigation Act any matter coming to the attention of the Board which may appear to involve or relate to possible violations of the Combines Investigation Act or of Section 498 of the Criminal Code;

(*c*) to confer with manufacturers, wholesalers and retailers as and when it is considered desirable by the Board with a view to enlisting their co-operation in ensuring reasonable prices, adequate supplies and equitable distribution of the necessaries of life;

(*d*) to recommend to the Governor in Council any additional measures it may deem necessary for the protection of the public with respect to necessaries of life.

8. All expenses lawfully incurred under these orders, including travelling expenses of the members of the Board, shall be payable out of the moneys provided by Parliament.

Offences

9. (1) No person shall sell or offer for sale any necessary of life at a price that is higher than is reasonable and just, and if a maximum price has been fixed by the Board for the sale of such necessary of life, that price shall be conclusively deemed to be reasonable and just.

(2) No person shall accumulate or withhold from sale any necessary of life beyond an amount thereof reasonably required for the use or consumption of his household or for the ordinary purposes of his business.

(3) No person shall unduly prevent, limit or lessen the manufacture, production, transportation, sale, supply or distribution of any necessary of life.

(4) No person shall in any manner impede or prevent or attempt to impede or prevent any investigation or examination instituted by the Board;

(5) No manufacturer, producer, wholesaler, jobber or retailer shall sell or offer for sale a necessary of life in respect of which a licence is required unless he has first obtained a licence from the Board.

Penalties

10. Any person who contravenes or fails to observe any of the provisions of these regulations or of any order made thereunder shall be guilty of an indictable offence and liable upon indictment or upon summary conviction under Part XV of the Criminal Code to a penalty not exceeding five thousand dollars, or to imprisonment for any term not exceeding two years, or to both fine and imprisonment; and any director or officer of any company or corporation who assents to or acquiesces in the contravention or non-observance by such company or corporation of any of the provisions of these regulations or of any order shall be guilty personally and cumulatively with his company or corporation and with his co-directors or associate officers.

11. Every order made by the Board shall take effect from a date to be stated therein not earlier than the date of publication in the *Canada Gazette*.

12. These regulations and any order made thereunder shall not apply to any farmer or gardener in respect of any necessary of life produced upon any land cultivated by him.

13. The Board shall report to the Minister as and when required to do so by the Minister.

Prime Minister on Profiteering

During his address in the House of Commons on September 8 dealing with the government's war policy, the Prime Minister promised drastic action against profiteering as follows:

"I come to profiteering. I believe I have already stated in this house that I know of nothing in the world more contemptible than that any man should seek to profit from the sacrifices which others are making. And if the laws and other measures which this government may introduce and seek to enforce are not sufficiently strong to destroy anything in the nature of profiteering, I hope hon. members of this house will bring to our attention, in a way that will also bring it to the attention of this country, what we ought to do to achieve that all important end.

"There are some things that are very difficult of accomplishment. Unfortunately human nature has its weak and its bad sides as well as its good side, and sometimes it is very difficult to cope effectively with the underworld and its methods.

"But let me say this: I care not who the individual may be, how respectable in his own eyes or in the eyes of others he may appear, or what position he may hold; if he seeks to profiteer in this crisis he belongs to the underworld and should be treated as one of those who menace all that is sacred in human relations."

Conference with Refiners

One of the first actions of the new Board was to call (on September 6) representative refiners into an emergency conference regarding the matter of the supply of sugar to Canadian consumers. In a press release, the Board stated:

"The refiners confirm that there has been no increase in their selling price, and that the

present price is the same as that prevailing at the end of April, 1939. They have no intention of raising prices unless and until the cost of raw sugars compels such an increase. The action of a few retailers who are reported to have raised their prices appears to be wholly unjustified."

It was also pointed out that retailers, wholesalers and refiners themselves had been caught unprepared by the "run" on sugar which developed during the first few days; that consumers themselves were responsible for the resulting confusion; and that any person who bought "in excess of legitimate current needs has done a disservice to the country in time of war."

"The refiners state that since August 1 they have distributed about 20 per cent more sugar than in the corresponding period last year. The Board has received from these refiners full assurance that this policy will be continued, and that, in view of the special demands of the fall canning season, they contemplate that shipments to the distributing trade will be not less than 25 per cent in excess of the average shipments during the corresponding season in the past three years. This will mean that nearly 50,000,000 pounds of sugar, over and above the normal August and September requirements, will be available to the Canadian consumer.

"The attention of housewives and other consumers is directed to the fact that sudden abnormal demands can only cause serious, if temporary, confusion. There is ample sugar for all usual requirements. Consumers are urged to buy normally, and to proceed as usual with their seasonal canning operations.

"The Board calls the attention of consumers, as well as dealers, to the regulation against hoarding which states that 'no person shall accumulate or withhold from sale any necessary of life beyond an amount thereof reasonably required for the use or consumption of his household or for the ordinary purposes of his business.'

"The Board is proceeding with its inquiries, and will continue to keep a most careful watch on the situation, and any attempts at restriction or accumulation of supplies, or at enhancement of prices will be met with prompt action."

Sugar and Butter Situation

In a press release issued on September 13, the Wartime Prices and Trade Board stated that "While complaints are still coming in from various localities, it is evident that the buyers' panic, which has created chaotic conditions in connection with the supply of sugar, is now subsiding."

The Board further announced that "deliveries by Canadian refiners to all classes of customers in Canada during the six weeks ending September 11, were over 192,000,000 pounds as contrasted with less than 150,000,000 pounds during the same period in 1938. This increase of almost 30 per cent indicates that the refining industry as a whole is carrying out its undertaking to the Board to make deliveries to the trade up to 25 per cent in excess of the three year average for this period."

On September 15 the Board announced "that persons or companies not in the produce business and, therefore, not normally engaged in the buying and selling of butter, who have been speculating in butter, may have laid themselves open to prosecution under Section 9, subsection 2 of the Regulations respecting the necessaries of life."

Steps have already been taken by the Board to secure information with regard to the names, addresses and occupations of persons or companies which have engaged in this form of speculation.

CANADIAN LABOUR ORGANIZATIONS PLEDGE WAR-TIME CO-OPERATION

Labour Leaders' Declarations of Co-operation in the Prevention of Industrial Disputes

CO-OPERATION with the government of Canada and with employers to prevent the outbreak of industrial disputes during the war was pledged by four Canadian labour organizations—Trades and Labour Congress of Canada, All-Canadian Congress of Labour, Canadian Federation of Labour and Confederation of Catholic Workers of Canada.

The first three named organizations indicated their policy in statements to the Canadian Press on September 15, and the Confederation of Catholic Workers by a resolution at its convention held at Quebec, September 10-13. The texts of these statements of war policy are given below.

Trades and Labour Congress

Mr. R. J. Tallon, secretary-treasurer of the Trades and Labour Congress, gave out the following statement:—

"Canada's war effort demands the loyal support of all patriotic citizens. Recognizing this, the Trades and Labour Congress of Canada made known to the government its willingness to co-operate immediately after the German attack was launched against Poland and it stands to-day ready to implement this promise by every means at its command.

"Last September when war seemed imminent the congress convention, meeting at Niagara Falls, pledged its support, and in fact urged that the government should join with other peace-loving countries, in whatever steps were deemed essential to destroy the reign of terror being imposed by the Nazi dictator and to remove the menace of international lawlessness and so bring a lasting peace to mankind.

"Of paramount need now is the establishment of proper industrial relations so as to ensure an uninterrupted flow of the sinews of war and of home requirements. In this labour is ready and anxious to do its part.

"This can only be achieved, however, if government and employers are equally ready to co-operate. A necessary step toward true co-operation is that the trade union movement shall be considered as an equal partner in fulfilling these grave responsibilities and be accorded the opportunity to participate on an equal basis with employers in deciding on the many issues which are bound to arise from time to time.

"This was the policy which was followed in the last two years of the previous war and which proved so effective in maintaining industrial harmony.

"Coupled with this, profiteering of all kinds must be rigorously suppressed and greed or personal aggrandizement eliminated.

"It is only in this way that confidence can be established that the nation's requirements are to be the first consideration at all times."

All-Canadian Congress of Labour

The statement of Mr. A. R. Mosher, president of the All-Canadian Congress of Labour is as follows:—

"The policy of the Congress is to endeavour at all times to promote industrial harmony, and to make every effort to prevent the outbreak of industrial conflicts during the present crisis.

"The government of Canada has already been assured of the co-operation of the congress to the fullest extent, but it is anticipated that a similar policy of co-operation will be adopted by employers, and that there will be no attempt to take advantage of the war situation in such a way as will be detrimental to the interests of the workers and the public generally.

"At this time national unity and complete co-ordination of all activities in a common cause are of the utmost importance, but there must also be equality of service and sacrifice on the part of every citizen, irrespective of occupation. The workers will take their full share of the war effort, and will expect every other group of citizens to follow their example."

Canadian Federation of Labour

Mr. W. T. Burford, secretary-treasurer of the Canadian Federation of Labour, declared as follows:—

"Canada's war effort is not likely to be hampered by any disturbance of relations between workers and employers. The majority of the organized workers realize their responsibility to maintain production. It is not necessary to suggest that there shall be a truce in industry.

"In the interest of all concerned it will be better for formality to be dispensed with and to rely upon patriotism and good will to settle such disputes as may occur and to prevent them from leading to interruptions of work.

"The unions affiliated with the Canadian Federation of Labour have always preferred to negotiate on wages and working conditions directly, without intervention of third parties.

At this time when the nation stands in arms against National Socialist aggression, it is incumbent upon the participants in industry to seek to avoid regimentation on the home front, through measures requiring a burdensome bureaucracy for their administration.

"The Canadian Federation of Labour has already assured the minister of labour, the Hon. Norman McL. Rogers, that it will co-operate wholeheartedly with the government until victory is gained. It is confident that the restraint which its members cheerfully undertake to exercise will be voluntarily shared by the controllers of industry, and that neither strike nor lockout will stop the machinery for a moment until the war is won.

"The only elements of discord are the agents of Russia and Prussia in this country—the Communists and their Nationalist Socialist associates—and the barring of these public enemies from access to the vital industries would seem to be a necessary precaution."

Confederation of Catholic Workers

The convention of the Confederation of Catholic Workers held at Quebec, September 10-13 adopted a resolution as follows:—

"We also appreciate our duty, especially in the present circumstances, to co-operate with the Canadian Government in preventing interruption of industrial activity by industrial disputes. As far as we are concerned, we agree to the request to this effect made by the Dominion Minister of Labour to the representatives of the whole Organized Labour Movement in Canada at a recent conference held in Ottawa.

"The Government, however, must also appreciate that the employers' co-operation is needed to secure the desired results. The safest means to this end is the generalization of collective agreements. Under present exceptional circumstances, it should be easy for the Dominion Government to come to some understanding with the provincial governments making it legally compulsory for the duration of any eventual war, for employers and workers in such industries where labour is sufficiently organized to meet jointly for the signing of collective labour agreements and, in the event of impossibility of agreement between employers and workers in this respect, to compel them to arbitrate their dispute before boards created for this purpose.

"The second condition to insure normal operation of industry would be for the Dominion and provincial governments to also agree to guarantee the workers' right to revise their rates of wages in accordance with the changes in the cost of living. The fully tariff-protected industries are evidently the very first in which such conditions should be applied. We believe that should such a plan become generalized to any extent industrial peace would be assured in the country during the especially trying period just beginning for Canada."

International Directory of Co-operative Organizations

The 10th edition of the *International Directory of Co-operative Organizations* has just been published by the International Labour Office.

The Directory appears in a new form which is slightly smaller in size but contains more details and is easier to consult.

It consists of two parts. The first part, which constitutes of the directory proper, contains a list of international co-operative organizations followed by separate lists, for sixty-one countries, of the central organizations in which are combined the different classes of co-operative societies or which may represent the different tendencies of the movement. The title of each organization is given with a translation in French, English and German. As far as possible the following data are given also: address, date of foundation, executive officers, publication, and national and international affiliations. This first part is not, however, a mere repertory limited to the provision of information on the identity of each organization. The details whenever possible are immediately followed by figures showing the extent of the activity of the central organization and its affiliated societies. This innovation has the advantage that it shows, at the same time as the name of each organization, all the numerical data concerning it such as turnover, production, loans, insurance premiums collected, claims paid, total assets, capital and reserves, etc., without the reader having to refer to tables in another part of the volume as was the case in previous editions. This first part thus gives a numerical survey of the co-operative movement in each country.

The object of the second part is to provide certain general views on the principal economic activities of the movement through the central co-operative organizations, etc. These services are presented in fourteen tables, in which the central organizations are classified in relatively homogeneous groups, and in which the principal statistics are given by organizations, by countries and for the world as a whole. These tables thus constitute a general body of statistics as complete as possoible of the central co-operative organizations carrying on some economic activity or engaged in banking, credit or insurance.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

AN application for the establishment by the Minister of Labour of a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act was received in the Department of Labour during August from employees of the Hull Electric Company being members of Division No. 591, Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America. The employees' request for cancellation of wage deductions made in 1932 and 1933 is stated to be the cause of the dispute. Thirty-two men are directly affected and 57 indirectly.

Boards Established

A Board of Conciliation and Investigation was established by the Minister of Labour on August 24 to deal with differences between the Corporation of the City of Winnipeg and various classes of its employees from whom applications had been received during June (LABOUR GAZETTE, July, 1939, page 655), namely:—

(1) Clerical forces and meter readers of the Hydro Electric System and Water Works System of the City of Winnipeg, members of the Federation of Civic Employees Clerical Branch;

(2) High pressure pump employees, pumphouse employees, electrical maintenance men, engineers, boiler operators, fuel plant operators, trimmers and helpers, chauffeurs and helpers, storekeepers, baths and Park Board employees, municipal hospital employees and machine-shop employees, members of the Electrical Mechanical Workers' Unit, Federation of Civic Employees;

(3) Diggers, air-compressor men and joint makers, members of the Water Workers' (Diggers) Unit, One Big Union;

(4) Meter repairmen, hydrant repairmen, turnkeys, service-testers, valve-repairmen, truck drivers, main repairmen, their helpers and apprentices and clerical workers, members of the Water Workers Operators' Union; and

(5) Foremen linemen, linemen, troublemen, underground cable splicers, pitmen and labourers, journeymen electricians, repairmen, station maintenance men, journeymen and helpers, station and sub-station operators, assistant operators and floormen, metermen, journeymen class A, B and C and apprentices, and tramwaymen, members of Local Unions B964, 1037 and B1129, International Brotherhood of Electrical Workers.

Members of the board were appointed as follows: Honourable Mr. Justice W. J. Donovan of the Court of King's Bench, Winnipeg, chairman, appointed on the joint recommendation of the other board members; Mr. C. V. McArthur, K.C., Winnipeg, nominated by the civic authorities; and Mr. R. B. Russell, Winnipeg, nominated by the employees. The board as above constituted will deal with the four applications first mentioned. When dealing with the fifth application, however, that received from members of the International Brotherhood of Electrical Workers, Mr. Russell will be replaced on the board by the electrical workers' nominee, Mr. Clive K. Tallin, Winnipeg.

A board was also established by the Minister of Labour during August to deal with a dispute between Mr. F. W. Nicholas, of Port McNicoll, Ontario, and the checkers, porters, coopers, etc., in his employ being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (LABOUR GAZETTE, June, 1939, page 550). Board members have been appointed as follows: on the employees' recommendation, Arthur W. Roebuck, K.C., of Toronto; on the company's recommendation, Mr. V. A. Sinclair, K.C., of Toronto. Messrs. Roebuck and Sinclair will confer looking to a joint recommendation for third member who will be chairman.

Application Withdrawn

The truck drivers, van men and helpers in the employ of the Saskatoon Cartage and Warehouse Company on August 15 withdrew their application (LABOUR GAZETTE, May, 1939, page 426) for a Board of Conciliation and Investigation, an amicable adjustment of the dispute having been effected as the result of mediation by an officer of the Department of Labour.

SUMMARY OF PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

THE tables presented below summarize proceedings under the Industrial Disputes Investigation Act for the fiscal year ending March 31, 1939, and from March 22, 1907, to March 31, 1939.

I.—TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM APRIL 1, 1938, TO MARCH 31, 1939

Industries affected	Number of applications for boards	Number of boards established	Number of strikes not averted or ended
I. Disputes affecting mines, transportation and communication, and other public utilities:—			
(1) Mining—			
Coal	7	4	0
(2) Transportation and Communication—			
Steam Railways	7	2	0
Street and Electric Railways	1	1	0
Motor Transportation	12	4	0
Shipping	6	2	0
Telegraphs	2	1	0
(3) Miscellaneous—			
Light and power and waterworks	8	1	0
II. Disputes not falling clearly within the direct scope of the Act	2	0	0
	45	15*	0

*Two boards dealt with two applications each.

The proceedings under the Act during the fiscal year 1938-39 include fourteen cases in which proceedings had taken place during the preceding year. On March 31, 1939, results were still pending in connection with two applications.

II.—TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM MARCH 22, 1907, TO MARCH 31, 1939

Industries affected	Number of applications for boards	Number of strikes not averted or ended
I. Disputes affecting mines, transportation and communication, other public utilities and war work:—		
(1) Mining and Smelting—

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1939

THE following table shows the number of disputes, workers involved and time loss for August, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Numbers of employees involved	Time loss in man working days
* Aug., 1939	18	15,031	42,110
* July, 1939	9	4,170	14,960
Aug. 1938	22	2,375	12,745

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of strikes and lockouts and the number of workers involved as well as the time loss for August show considerable increases over the figures for July, due chiefly to eleven strikes of coal miners in Nova Scotia, involving approximately 14,000 workers and time loss of over 38,000 days. In July there were 4,000 miners in Nova Scotia on strike, causing a time loss of 12,000 days. In August, 1938, none of the disputes involved large numbers of workers or caused great time loss.

Two disputes, involving 1,450 workers were carried over from July, one of which, commencing July 31 and involving 250 highway labourers at Ste. Agathe, P.Q., was reported to the Department too late for inclusion in the August issue of the LABOUR GAZETTE. Sixteen disputes commenced during August. Of these eighteen disputes, seventeen were terminated during the month, four resulting in favour of the employers and two in favour of the workers involved, while a compromise settlement was reached in one case, one was partially successful and the results of nine were recorded as indefinite. At the end of the month, therefore, there was only one strike or lockout recorded as in progress, namely: coal miners, Florence, N.S.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to seven such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938, one employer; dressmakers, Montreal, P.Q., January 20, 1939, one employer; and stationary engineers, Toronto, Ont., March 2, 1939, one employer. The dispute involving lime plant workers employed by one firm at Blubber Bay, B.C., commencing June 2, 1938, and carried in this paragraph for some time, was called off by the union during August, and has consequently been removed from the above list.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowance for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

Employees on highway construction at St. Roch des Aulniers, east of Levis, P.Q., were reported to have ceased work at the end of July in protest against the use of mechanical shovels. Work was resumed on August 5 after negotiations. Particulars of the dispute have not been reported.

A dispute, reported too late to be included in the statistical table, involved 85 workers in a men's clothing factory in Montreal, P.Q., in a cessation of work on August 7. The union claimed the agreement with the Amalgamated Clothing Workers of America had been violated by the dismissal of certain employees in whose places the employer refused to employ union members. The employer objected to the union naming such employees. The factory was reported to be closed for a time and reopened later, some of the strikers having returned and many of the others replaced. At the end of the month the establishment was being picketed.

Another dispute reported too late for inclusion in the statistical table involved 100 coal miners in the employ of a mine operator at Minto, N.B., on August 31, in a demand for a change in the wage payment system for certain workers moving coal. Work was

resumed the next day as the result of provincial conciliation, the matter in dispute to be investigated by a committee.

A stoppage of work on August 29 at Toronto, Ont., by ballet dancers employed by an entertainer at an exhibition, to secure an increase in wages from $2.00 to $2.50 per day was reported. The information secured by the Department is that four local girls not regular members of the show or of the American Federation of Actors gave up their jobs although offered some concessions.

A cessation of work on August 11 by nine labourers on a tobacco farm at Langton, Ont., has been reported. It appears that they demanded an increase in wages from $3.50 per day with free lodging to $4.00. This was refused and they were paid off and replaced. The local constable was called when a worker who did not strike was threatened. The strikers left the vicinity.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress prior to August

Coal Miners, Stellarton, N.S.—This strike in all the collieries of one company which commenced on July 26, there being a brief resumption of work on July 30, was terminated on August 5 when the union members voted to resume work pending negotiations and investigation. The company had removed one worker from his job for alleged inefficiency and carelessness and had later given him another job at lower wages in another mine. The management refused to negotiate while the men were on strike as the agreement provides for no stoppage until a dispute has been negotiated. The miners voted to withdraw maintenance men on August 2 but, on advice from the district president that this was contrary to the constitution of the union as well as the agreement and that work should be resumed, reversed the decision and later resumed work. It is understood that the negotiations resulted in confirmation of the change in position for the man involved.

Highway Construction Labourers, Ste. Agathe, P.Q.—A number of employees ceased work on July 31 in protest against the employment of workers who were not residents of the district. As a result of conciliation by the parish priests in the locality the contractor agreed to employ local residents except in positions for which special experience, etc., was required, steam shovel operators, compressor men, form builders, etc. Work was resumed after two days. It was reported that one or two men were injured in fist fights and that some dynamite was exploded but it was stated that this occurred in an open field to make a demonstration and that no damage was caused.

Disputes Commencing During August

Coal Miners, Glace Bay, N.S.—Employees in a recently opened section of a mine were involved in a stoppage on August 4 when the local union ordered drivers and brakemen not to open the ventilation doors for the passage of coal cars as trappers should be employed. The company stated that the work did not yet require the employment of trappers and a district union official advised continuing work pending the outcome of negotiations. Work was resumed the next day.

Coal Miners, Glace Bay, N.S.—A number of men in one section of a mine ceased work on August 7 to continue the payment of extra wages for "boring" for explosive. The company had shotfirers do the work. About one hundred other men were reported to be indirectly involved but the rest of the mine continued to work. On August 14 work was resumed pending negotiations.

Coal Miners, Drumheller, Alta.—A small number of miners in one colliery, being paid day rates during the summer until the autumn season opened on September 1, ceased work on August 7 demanding the payment of the rates per ton under the agreement. The company stated that the datal rate was customary for summer work and the mine was closed until August 30 when the autumn season was about to begin.

Coal Miners, Sydney Mines, N.S.—Miners in three sections of a mine ceased work on August 9; in one section refusing to work with an employee involved in a fight with another; in another mine because two men had been taken off the work and placed elsewhere; and in a third to have deficient earnings made up to the full rate. Both miners in the fight were suspended and work was resumed pending negotiations after two days.

Coal Miners, Florence, N.S.—Employees in one mine ceased work on August 9 against the suspension of five miners for faulty work on a wall. The union voted to protest against the suspension of men prior to investigation and negotiations but decided to resume work in August 14 pending negotiations. No miners, however, would take the places of the suspended men to rebuild the wall and the mine was again tied up for two days. The union voted to resume work pending negotiations, (the suspended men to be replaced, but the union to place a levy on the members to support them while suspended) and that stoppages should not occur prior to negotia-

tions. It was reported that the officers of the union and committee members rebuilt the wall so that operations could be resumed.

COAL MINERS, FLORENCE, N.S.—The strike on August 15 and August 16, following that from August 9 to August 12, is outlined in the previous paragraph.

COAL MINERS, GLACE BAY, N.S.—Employees in one mine ceased work on August 21 against the refusal of the company to pay one man at contract rates instead of the day rate. It was stated that the case had been under negotiation for a year and been finally decided against the miner by the general manager. The man ceased work and the others joined him. Work was resumed on August 31 when sympathetic strikes in other mines were terminated pending negotiations.

COAL MINERS AND SHIPPING PIER WORKERS, GLACE BAY DISTRICT, N.S.—Employees in six collieries and on the shipping piers of one coal company ceased work on August 29 in sympathy with strikes in two collieries of the same company on August 21 and August 23. The shops and two other collieries of the company were not involved. The union district officers declared that the strikes were unauthorized and that the miners had been advised to resume work pending negotiations. On August 31 work was resumed pending an investigation by the provincial authorities, the union and the company.

COAL MINERS, FLORENCE, N.S.—The miners in one colliery ceased work on August 31, owing to dissatisfaction with the negotiations following the return of workers terminating a stoppage on August 15, which in turn was the result of the strike on August 9. Early in September a resumption of work had not been reported.

STEEL MILL WORKERS, TRENTON, N.S.—Employees in nearly all of the departments of a steel mill became involved in a stoppage on August 1 when the boys in the nut and

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1939*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to August, 1939				
MINING—				
Coal miners, Stellarton, N.S.	1	1,200	6,000	Commenced July 26, 1939; against discharge of worker; terminated Aug. 5, 1939; return of workers; in favour of employer.
CONSTRUCTION—				
Highway—				
Labourers, Ste. Agathe, P.Q.	1	250	250	Commenced July 31, 1939; for employment of local labour only; terminated Aug. 1, 1939; conciliation, local; compromise.
(b) Strikes and Lockouts commencing during August, 1939				
MINING—				
Coal miners, Glace Bay, N.S.	1	150	150	Commenced Aug. 4; for employment of trappers to open ventilation doors in one place; terminated Aug. 4; return of workers; indefinite.
Coal miners, Glace Bay, N.S.	1	100	400	Commenced Aug. 7; *re* special pay for borers; terminated Aug. 14; return of workers pending negotiations; indefinite.
Coal miners, Drumheller, Alta.	1	23	450	Commenced Aug. 7; alleged lockout *re* contract instead of datal rates; terminated Aug. 29; negotiations; indefinite.
Coal miners, Sydney Mines, N.S.	1	860	800	Commenced Aug. 9; for suspension of one miner, against change of work for two miners and for certain wage adjustments; terminated Aug. 10; negotiations; partially successful.
Coal miners, Florence, N.S.	1	700	2,800	Commenced Aug. 9; against suspension of five miners for unsatisfactory work; terminated Aug. 12; return of workers; indefinite.

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1939*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during August, 1939—*Concluded*				
Coal miners, Florence, N.S.	1	700	700	Commenced Aug. 15; dissatisfaction at negotiations following resumption of work after strike Aug. 9-12; terminated Aug. 16; return of workers; in favour of employer.
Coal miners, Glace Bay, N.S.	1	600	5,000	Commenced Aug. 21; for contract instead of datal wage for one miner; terminated Aug. 30; return of workers pending investigation; indefinite.
Coal miners, Glace Bay, N.S.	1	850	5,900	Commenced Aug. 23; *re* employment of certain worker; terminated Aug. 30; return of workers; indefinite.
Coal miners, Florence, N.S.	1	800	800	Commenced Aug. 24; complaint *re* insufficient preparation of mine; terminated Aug. 24; return of workers pending negotiations; indefinite.
Coal miners and shipping pier workers, Glace Bay, etc., N.S.	6	7,500	15,000	Commenced Aug. 29; in sympathy with strikes in certain collieries; terminated Aug. 30; return of workers pending negotiations and conciliation of provincia authorities; indefinite.
Coal miners, Florence, N.S.	1	700	700	Commenced Aug. 31; for reinstatement of five miners; unterminated.
MANUFACTURING—				
Metal Products—				
Steel mill workers, Trenton, N.S.	1	400	1,800	Commenced Aug. 1; against discharge of worker and for increased wages for boys at end of two year period; terminated Aug. 5; return of workers; in favour of employer.
CONSTRUCTION—				
Highway—				
Truck drivers, etc., Antigonish District, N.S.	1	25	150	Commenced Aug. 14; for contract instead of hourly rates; terminated Aug. 20; replacement and return of workers; in favour of employer.
TRADE—				
Automobile service station employees, Sydney, N.S.	24	150	1,000	Commenced Aug. 22; for union agreement with increased wages and reduced hours, etc.; terminated Aug. 29; negotiations; in favour of workers.
SERVICE—				
Custom and Repair—				
Cleaners and pressers, etc., Windsor, Ont.	1	11	90	Commenced Aug. 2; for union recognition and agreement; terminated Aug. 23; negotiations; in favour of workers.
Business—				
Restaurant employees, Toronto, Ont.	1	12	120	Commenced Aug. 12; alleged violation of agreement; terminated Aug. 24; conciliation (provincial); indefinite.

*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

bolt department ceased work, followed later by the others in the department and shortly afterwards by the employees in other departments. On the previous day a committee had discussed certain grievances with the management, who it appears refused to reinstate a boy who had violated the rule against smoking, there having been several fires previously. The union reported that the principal grievance was the failure of the management to adhere to seniority rules as to boys, and to increase their wages from 21 cents per hour to 25 cents after twenty-two months' experience. Negotiations on these matters had not been completed. The management refused to negotiate while a strike was in progress and on August 3 the union members voted to resume work on Monday, August 7, pending negotiations.

TRUCK DRIVERS, ETC., ANTIGONISH, N.S.—A number of men operating their own trucks for a road contractor ceased work on August 14 demanding payment by the ton mile instead of $1.70 per hour, the rate set by the provincial government. The contractor's trucks continued in operation and the strikers were replaced. Police were called to prevent blocking of the road by the strikers' trucks.

AUTOMOBILE SERVICE STATION EMPLOYEES, SYDNEY, N.S.—Employees in gasoline service stations ceased work on August 22 to secure an agreement with the Union of Automotive Workers (Garage and Service Station Employees) Local 964. The stations were operated by the managers and other help and some of the strikers were replaced, but from day to day various stations signed the agreement and on August 29 it was reported that all had signed. The agreement provides for a minimum rate of $15.00 per week for gas station attendants, $12.00 for mechanic's helpers, 48 hours per week, with time and one-half rates for overtime. The stations were picketed but no disorders occurred. The agreement is outlined elsewhere in this issue. Some garages were involved in the dispute and several were reported to have signed the agreement.

CLEANERS, PRESSERS, ETC., WINDSOR, ONT.—Employees of one cleaning and dyeing firm ceased work on August 2 to secure a union agreement. It was stated that one firm had recently signed such an agreement and that others were willing to sign it if the firm involved would do so as it did work for five other establishments. The drivers for these firms were indirectly involved. Work was resumed on August 23 when an agreement was signed providing for union conditions but also that it would be null and void in sixty days if all other firms had not also signed it.

RESTAURANT EMPLOYEES, TORONTO, ONT.—Employees in one establishment, members of the Cafeteria and Restaurant Employees Union, Local 168 of the Hotel and Restaurant Employees' International Alliance and Bartenders' International League, ceased work on August 12 owing to a dispute as to the interpretation of an agreement with the union as to the hours and wages of the chef. Negotiations for some weeks had not resulted in a settlement. The establishment was picketed but the employer secured an interim injunction against picketing which was amended in court on August 22 to permit picketing provided no libellous signs were used, intimidatory tactics followed and there was no interference with customers, etc. As a result of conciliation by the Ontario Department of Labour it was agreed to refer the dispute to arbitration and work was resumed on August 25.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1939, issue in the review of Strikes and Lockouts in Canada and Other Countries, 1938. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details of the more important ones. These details which are published after investigation do not always agree with the information given earlier in the press.

The number of strikes which began during July was 74 and 13 were unterminated at the end of June, making a total of 87 in progress during the month, involving 34,000 workers with a resultant time loss of 134,000 man working days.

Of the 74 disputes which began during July, 14 arose out of demands for increases in wages, four were due to proposed wage reductions and 20 were over other questions affecting wages. Three strikes arose over questions of working hours, 15 were the result of questions respecting the employment of particular classes or persons, eight were over other questions respecting working conditions and 10 were over questions of trade union principle.

Final settlements reached during July numbered 62. Of these 18 were settled in favour of the workers, 24 were settled in favour of the employers and 20 resulted in compromises. In the case of three other disputes work was resumed pending negotiations.

The strike which involved the largest number of workers during July, occurred at Blandford, Dorset, where 5,400 building trade workers employed by several firms went on strike on July 13, demanding an increase of 2d. per hour in lieu of subsistence allowance recently withdrawn in respect of workers within daily travelling distance of their homes. Work was resumed on July 18 under the same conditions as had prevailed prior to the strike.

The alleged victimization of a trade union official who was sent to another contract led to a strike of 3,500 building trade workers near Abergele, Denbighshire, on July 20. The employee in question was allowed to remain at his original job and work was resumed the following day.

At Farnborough in Hants, 3,050 building trade workers employed by one firm went on strike against a scheme of reorganization of work, and for the reinstatement of two foremen who had been forced to resign because they supported the objection. The strike began on July 24 and terminated two days later when the foremen concerned were given other work without a reduction in wages.

At Chester, Cheshire, 1,102 carpenters, bricklayers, and other building trade workers employed by one firm, ceased work in the afternoon of July 11 demanding payment of a subsistence allowance to all employees. Work was resumed at noon the next day, when it was agreed to observe the terms of a national agreement in respect to subsistence and travelling allowances.

On July 13, 1,000 workers engaged in the manufacture of aircraft at Failsworth, Lancashire, went on strike because the employer withheld the bonus of two workers on account of faulty piecework cards. Work was resumed on July 17 on the advice of trade union officials.

Refusal to accept the employer's proposal for alteration in "dirt agreement", led to a strike of 931 workers at one colliery near Pontefract, Yorkshire, on July 24. As a result 1,183 workers were indirectly involved. Work was resumed on August 5 after a new agreement had been reached.

At a colliery near Sheffield, the alleged nonpayment of a minimum wage to certain workers, led to a strike of 276 employees on July 10. About 1,200 workers were indirectly affected. Work was resumed the following day on the advice of trade union officials.

During the early part of August the National Union of Railwaymen with a membership of about 400,000 and the Society of Locomotive Engineers and Firemen with about 55,000 members had been negotiating for increases in minimum wages. On August 22 the members of the latter union decided to call a strike for midnight August 24. On that day, however, union delegates conferred with the Minister of Labour and it was decided to call off the strike in the interest of public safety and the national need and as evidence of national unity in time of crisis. Further conferences between the union officials and the employers were to be arranged.

United States

Preliminary estimates of strikes in June, 1939, which as the Bureau of Labour Statistics points out, are based on "scattered information from newspapers and other sources and are subject to revision as more definite reports are received" show 220 strikes as beginning during the month, which with 140 unterminated at the end of May made a total of 360 in progress during the month. The number of workers involved in these disputes was 113,000 with a resultant time loss of 915,000 man working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 354 strikes in progress, involving about 425,000 workers with a resultant time loss of 3,400,000 man working days.

The number of accidents reported to the Ontario Workmen's Compensation Board during the month of August was 5,645, being the largest number reported during any one month this year to date, and compares with 5,242 reported during July, and 5,728 during August last year, which showed the largest number during any month of 1938. The benefits awarded amounted to $454,965.17, of which $362,380.58 was for compensation and $92,584.59 for medical aid.

CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

Summary of Recent Decisions

REPORTS have been received of six cases settled recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the LABOUR GAZETTE, March, 1939, page 286, and in previous issues, and the sixth report of the proceedings of the Board covering the period from October 1, 1933, to September 30, 1936, was issued as a supplement to the February, 1937, issue of the LABOUR GAZETTE.

The Board was established under a voluntary agreement concluded in 1918, between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the following Railway Brotherhoods: The Brotherhood of Locomotive Engineers; the Brotherhood of Railway Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

Case No. 472—The Temiskaming and Northern Ontario Railway and the Brotherhood of Railroad Trainmen.—This case concerned the claim of yardmen for pay for days on which assignments had been annulled. One claim was from employees in the Cochrane yard for one day's pay on December 26, 1938, and another was from employees in the Englehart yard for one day's pay on December 25, 1938.

The employees contended that a rule in the schedule requiring forty-eight hours' advance notice of a change in assignment had not been observed and further that extra yard shifts were used to do the work usually performed by the annulled shift. The employees also stated that "bulletins issued covering assignments are in effect until cancelled and that assignments were made under a bulletin which sets out the number of days each week each crew should work and that the crews in question were not permitted to work in accordance with the bulletin under which they were assigned, and therefore should be paid for the days on which assignments were cancelled."

The railway contended that when assignments in yard switching service are advertised as "six days per week" as at Cochrane, and "daily" as in the particular assignment at Englehart, that this is merely a form of expression to identify preference jobs and in no respect does it carry with it any weekly or daily guarantee. The railway referred to a somewhat similar case in which the Board had decided that "While bulletins were intended to indicate the amount of work or earnings in the particular assignments mentioned, they did not constitute guarantees over schedule provisions." The railway submitted that in both instances the guarantee of "not less than twenty-six days in any one month" had been fully complied with.

Representatives of both parties appeared before the Board and presented additional evidence and the Board in rendering its decision pointed out that the schedule provides for a monthly, not a daily guarantee and denied the claim of the employees.

Case No. 473—The Canadian National Railways (Atlantic Region) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.—Prior to January 1, 1939, a train crew was assigned to certain mixed trains operating between Fredericton and Saint John on four days a week and another crew was assigned to other trains operating between Fredericton and McGiveney Junction six days per week. From January 1, 1939, these assignments were cancelled and new assignments set up posting the Fredericton-Saint John crews to the Fredericton-McGiveney Junction run on Monday while the Fredericton-McGiveney Junction crew was assigned to operate these trains from Tuesday to Saturdays inclusive.

The employees submitted that the new assignment was in violation of the spirit and intent of the rules of the current schedule "inasmuch as it requires this crew assigned in mixed train service to perform extra service to make up the guarantee on a section of line not covered by the original assignment."

The railway contended that the assignments were proper ones and that there is no schedule rule to prevent the assignment of train crews on the trains concerned.

The Board heard additional oral evidence from the representatives of both parties to the dispute and denied the claim of the employees.

Case No. 474—The Canadian National Railways (Atlantic Region) and the Order of Railroad Telegraphers.—This dispute

concerned the claim for time of a spare operator in the Island Division and an operator in the Halifax Division.

In the case of the spare operator, the Canadian National Railways (Atlantic Region) Agents' Association held a meeting at Halifax in February, 1938, and the agent was granted permission to attend, being absent for three days during which time he was allowed his pay and his work was carried on by the balance of the staff. Regarding the other claim it was stated that on August 2, 1938, the terminal agent at Truro, N.S., was granted two weeks' vacation with pay and during his absence his work was carried on by the Assistant Superintendent, Chief Clerk (freight office), Senior Yard Office Clerk and Yardmaster.

The employees contended that as both of these positions are included in the wage scale of their agreement, the pertinent clause should have applied and the senior qualified unemployed telegrapher on the spare list should have been used to relieve the agents. The employees further contended that the senior qualified unemployed telegrapher on the spare list who was forced to lose time while the agent at Charlottetown was absent from his position, should be paid for time lost. A similar claim was made in respect of the senior qualified unemployed telegrapher at Truro.

The railways maintained that "it is not compulsory to employ any one to relieve a telegrapher when it is considered the interests of the service will not suffer through the employee's absence, and in these particular cases no one relieved the agent at Charlottetown or the terminal agent at Truro during their absence on full salary."

Representatives of both parties to the dispute presented additional oral evidence to the Board. The Board's decision denied the claim of the employees as it pertained to the relief at Charlottetown, but sustained their claim pertaining to the relief of the agent at Truro during his annual holidays, adding that "as to the individual under the telegraphers' schedule who should have been placed as agent for the time in question, that matter should be determined by the parties to the dispute."

Case No. 475—The Canadian National Railways (Central Region) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.—This case dealt with the claim of a conductor and a brakeman for compensation for deadhead movement from Detroit to Toronto in April, 1938.

The employees contended that prior to the spring change of time card, 1938, the claimants were assigned to trains operating between Toronto and Detroit with home terminal in Toronto. Effective with the spring change of time card their home terminal was changed to Detroit and on this account the conductor and brakeman elected to bid in other assignments. Returning to Toronto deadhead from Detroit on their last trip before the new time table became effective, the employees concerned claimed mileage at passenger rates covering the deadhead movement from Detroit, the claim being denied by the railways which stated that the deadhead movement was the result of the men exercising their seniority.

The Board in rendering its decision stated that "Although the Board holds the view that in changing assignments efforts should be made when possible to enable men on assignments previously in effect to return in service to their home terminal, this action in the case in question, either was not possible or unfortunately, was not taken." The Board also referred to an article under the schedule covering conductors and trainmen which specifically provides that trainmen, when deadheading to exercise their seniority rights, or returning after having done so, are not entitled to compensation.

The claim of the employees was not sustained by the Board.

Case No. 476—The Temiskaming and Northern Ontario Railway and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.—This case dealt with a controversy regarding the application of Rule "H" concerning the guarantee in assigned service of not less than 100 miles or eight hours for each calendar working day exclusive of overtime, and including legal holidays.

The instanee giving rise to the controversy concerned a conductor and two brakemen who were assigned to freight service on a train travelling from Englehart to Timmins on one day and returning to Englehart the following day, the distance between the two points being 118 miles, the scheduled time for leaving Englehart being 1.20 a.m. and 4.00 a.m. for departure from Timmins. On November 28, 1938, the crew arrived at Englehart at 7.00 p.m. and the two brakemen booked eight hours' rest with 1.30 "call", thereby being available for duty at 4.30 a.m. Their train was ordered for 1.20 a.m. with a spare crew in a spare van, the regular van being tied up on account of the two brakemen having booked rest. The two brakemen and the conductor were not used in any other service on November 29 and 30, and submitted a claim for regular mileage under Rule "H" which was denied by the railway.

The employees contended that the trainmen booked rest in accordance with the schedule provision, that they did not lay off

and that they were ready for duty as soon as the rest period provided in the schedule was up. It was therefore claimed that the employees concerned were entitled to the guarantee provided in the rule.

The railways' contention was that the crew booked rest and as a result were not available for duty when the train to which they were assigned was required to leave the terminal and that the guarantee under Rule "H" applied to men "who are ready for service the entire month."

The Board decided that under the circumstances the claimants should be paid on the basis of the scheduled daily guarantee for the round trip lost. In rendering this decision the Board stated that "It is apparent to the Board that by a slight adjustment in the leaving time of the train from Englehart the crew in question could have been used on that train."

Case No. 477—The Temiskaming and Northern Ontario Railway and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.—This case concerned a controversy as to the method of calculating earnings of passenger conductors and trainmen when required to place their trains at the station before the commencement of a trip and when required to place their trains away upon the completion of a trip.

The employees maintained that Rule No. 46 of the current schedule definitely sets out the method of payment for certain work of crews prior to their departure and after their arrival at terminals and not at the terminus of the passenger run. Pointing out that Kirkland Lake has been established as the home terminal for the passenger crews on the Kirkland Lake sub-division, the employees further contended that the train movement between Kirkland Lake and Swastika is definitely a train movement operating under train orders, and that mileage and allowances should be paid therefor.

The railway maintained that the request of the employees would, if granted, involve duplication of payment for the same time on duty and in some instances triplicate payment would result.

The Board decided that as the movements between Kirkland Lake and Swastika with empty equipment are solely for the purpose of reaching the terminal facilities available, the claim of the employees could not be sustained.

RECENT REGULATIONS UNDER DOMINION AND PROVINCIAL LEGISLATION

Pilots—Mines in Alberta—British Columbia Minimum Wages—Operation of Steam Boilers in New Brunswick—Electricians in Quebec—Quebec Fair Wage Act

RECENT regulations pertaining to labour include an order in council under the Canada Shipping Act approving by-laws for the District of Louisburg; regulations under the Alberta Bureau of Public Welfare Act and the Maternal Welfare Act, provision for boards of examiners for electricians in several cities and a revision of the regulations relating to mines. In British Columbia, Minimum Wage Orders governing the construction industry and sawmills were amended and a new order was issued for carpenters on Vancouver Island. Regulations in New Brunswick under the Factories Act deal with the licensing of stationary boilermen and stationary pumping or hoisting engineers. Licensing regulations for electricians in Quebec were completely revised and new orders under the Quebec Fair Wage Act amend the order providing for an assessment on employers, extend the time in which claims for wages must be made in certain industries and amend wage orders relating to the hotel and catering industry, the milk industry and the manufacture of wooden building supplies.

Canada Shipping Act

By-laws for the Pilotage District of Louisburg were approved on August 2. All ships not exempt by the Act or the by-laws must pay pilotage dues whether using a pilot or not. Pilots must be licensed and the number in the district is limited to eight. A person passing the required tests is given an apprentice licence and after completing satisfactorily a term of apprenticeship, to be determined by the Pilotage Authority, is awarded a permanent pilot's licence. Such licence is valid until the pilot is 65 after which it may be renewed annually for five years on medical examination.

The money collected as pilotage dues is to be divided equally among the pilots as their remuneration after 4 per cent is paid as salary to the Secretary-Treasurer. The latter, who is appointed by the Pilotage Authority subject to the approval of the Governor-in-Council, is charged with the collection of dues, the payment of wages and other duties. He has power to suspend a pilot's licence for not more than 48 hours for misbehaviour, neglect of duty, in-

subordination or drunkenness. Such suspension must be followed by an inquiry by the Pilotage Authority who may continue the suspension or dismiss the pilot if the charges are proved.

Alberta Bureau of Public Welfare Act

The first regulations under this Act issued June 7 provide that any person making application for or receiving material aid under the Act may be required by the Bureau or any municipality concerned to make a statutory declaration setting forth all facts pertaining to his residence, income or resources.

Alberta Maternal Welfare Act

Regulations under this statute which was passed only this year (Labour Gazette, June, 1939, p. 568) were gazetted on June 30. The Act provides for a grant not exceeding $15 to expectant mothers in poor financial circumstances. The regulations state that the grant is payable in respect of any child born after April 1, 1939, if the mother has resided in Alberta on lands not controlled by the Federal Government for at least 12 consecutive months prior to the birth of the child. Payment may be made at any time within a year after the birth of the infant.

Alberta Mines Act

All regulations issued under the Coal Mines Regulation Act, 1930, and the Mines Act, 1913, were revised on July 28 to bring them in line with the new Mines Act passed at the last session of the Legislature (Labour Gazette, June, 1939, p. 564). The new regulations, which are generally similar to those under the 1930 Act (Labour Gazette, 1931, p. 314, apply to all mines within the scope of the 1939 Act which includes, as well as coal mines, those of salt, stratified ironstone, shale, clay and fire clay.

The regulations deal with the ventilation of mines, equipment of wash-houses, use of the method known as "Cardox" in breaking down coal, installation and use of electrical appliances, control of inflammable rock-dust in coal mines and the conducting of examinations for certificates of competency. The use of certain types of shot-firing devices, safety lamps, gas detectors and explosives is approved. Some of the more important safety provisions are summarized below. All regulations must be posted in a conspicuous place and replaced when defaced or destroyed.

If the ventilating fan stops, all persons must come out of the mine and not be permitted to re-enter, except to examine and repair the fan, until the fan is again in operation or some other artificial means of ventilation is provided. In either case the underground workings must be examined by a person holding a first, second or third-class certificate under the Mines Act and be reported in writing as safe. Ventilating fans erected after November 4, 1918, on the surface at any mine must not be in a direct line with the passage through which the air current travels leaving or entering the mine.

An automatic recording pressure gauge must be provided and used constantly in connection with all regularly-used fans. Where less than 10 men are employed, however, the gauge need not be automatic and recording. Readings must be taken at least every two hours by a qualified person and must be recorded in a book kept for the purpose, signed and dated by the person taking the readings and kept for a year.

In all mines where mechanical ventilation is used, adequate means for immediately reversing the air current must be provided. Where safety lamps are used the air current must not be reversed while persons are underground, except in emergencies. A new provision stipulates that where a mine is empty at night and the ventilating fan is stopped, the fan must be run continuously for at least two hours before any person enters the mine.

Only persons working under the direct supervision of a person holding a first, second or third-class certificate of competency may remove standing gas in a mine and only persons authorized by the manager, overman or examiner may pass beyond any fence or danger signal. Fire may not be used below ground for any purpose.

Workmen must report the time of their going underground and returning to the person appointed by the owner, agent or manager to keep a record of all persons underground on each shift. No hoisting rope which has been spliced may be used for raising or lowering persons and rivetted cappings are entirely prohibited. All cars are to be so constructed and maintained as to prevent, as far as practicable, coal dust escaping through the sides, ends or floor.

Where shots are fired electrically, a cable not less than 60 feet long must be used and the person firing the shot must be at least that distance away or be able to take refuge in a man hole or other safe place. The use of delay action fuses, gasoline engines and internal combustion engines are permitted only on authorization in writing by the Chief Inspector and only for certain kinds of work. In no case may delay action fuses for firing coal or gasoline-driven engines be used underground.

As before, adequate wash-house accommodation must be provided at the principal entrance to the mine or at a place reasonably near where the workmen enter and leave the

mine. The Chief Inspector must approve the plans for any proposed wash-house which must be of sufficient size, constructed of approved material, efficiently lighted, heated and ventilated and provided with hot and cold showers or sprays. Efficient means must be provided for drying clothes when in lockers or on hangers which must be so arranged that the clothes of one person are entirely separate from those of any other person and sufficient locks must be provided to keep them reasonably safe.

Employees may be required to contribute from time to time certain sums necessary for the upkeep of the wash-houses as may be agreed upon between the workers and those in charge. In all mines where more than 10 men are ordinarily employed underground, all overmen, examiners and driver bosses, when on duty, must carry first-aid pocket kits to be supplied and equipped by the operators. Where first-aid stations have been established underground, exemption from this provision may be granted by the Chief Inspector on written application of the manager.

All tipples, cleaning plants or buildings above ground must be kept clear of fine coal dust, as far as is reasonably practicable, and all dust must be cleaned off at least once daily. Where, in the District Inspector's opinion, the coal dust held in suspension in the atmosphere is of such quality and fineness as to be dangerous, he may order all smoking stopped and impose such other conditions as he may deem necessary in the interest of safety.

A worker opening a carbide container or drum must not have a lamp on his head or be smoking and he must keep all open lights at least four feet away from the container.

Notices showing the signals used are to be posted at the terminals, at all intermediate points or landing places on rope haulage systems, on the pit bank, in the engine room and at the shaft bottom if men or materials are hoisted through a shaft.

Except where natural conditions make it unnecessary or where the dust mixture is at least 30 per cent water, the floor, roof and sides of all roads in coal mines must be treated with incombustible dust in such manner and at such intervals as to ensure that the dust mixture on such surfaces consists throughout of a mixture containing not less than 50 per cent of incombustible material.

All electricians in mines must be over 21 years of age and holders of certificates of competency issued under the Act.

Alberta Tradesmen's Qualifications Act

An order in council of July 4 provides for the appointment of boards of examiners for electricians in the cities of Edmonton, Calgary, Lethbridge, Medicine Hat and Drumheller. By an earlier order such boards have been provided for in the first three of these cities since September 1, 1937.

British Columbia Male Minimum Wage Act

Two orders of the Board of Industrial Relations, effective July 20, amend existing orders applying to employees in the construction industry and in sawmills. A third order, effective August 21, fixes a new minimum wage for carpenters in the southern part of Vancouver Island.

Order 50 of August 3, 1937, governing sawmills is amended to establish a daily minimum of $2.75 for cook and bunkhouse employees and to raise the hourly minimum for workers under 21 years of age from 30 to 40 cents, the minimum rate provided for those over 21. Handicapped workers, who may not exceed 10 per cent of the total number employed, may still be paid as low as 30 cents an hour with the permission of the Board.

Order 12 of September 28, 1934, applying to the construction industry is amended to stipulate that wages must be paid at least semi-monthly and each payment must cover the wages due up to a day not more than seven days prior to the date of payment.

Order 66 relating to carpenters on Vancouver Island replaces Order 40 of December 1, 1936, (LABOUR GAZETTE, 1937, p. 24) and fixes a minimum of 75 cents an hour instead of 70 cents as in Order 40. Order 66 applies, like the former Order, to all carpenters, except indentured apprentices, in that part of the Island included in the Districts of Victoria, Lake, North and South Saanich, Esquimalt, Highland, Metchosin, Goldstream, Sooke, Otter, Malahat and Renfrew. The new Order does not cover persons in the carpentry trade permanently employed at maintenance work in industrial or manufacturing establishments or in private or public buildings. Wages must be paid semi-monthly on the same basis as required for employees in the construction industry by the amending order noted above.

British Columbia Municipal Superannuation Act, 1938

Tables were published on August 3 showing the commuted values of Single Life Pensions of $10 per month with the equivalent values of allowances on the Joint Life and Last Survivor Plan and Guaranteed Plans under this Act.

New Brunswick Factories Act

In line with the recent amendment in the Act which brought under the jurisdiction of the Workmen's Compensation Board, stationary boilermen, as well as stationary, pumping

or hoisting engineers, new regulations were issued on May 27 dealing with all these classes and superseding the regulations governing stationary engineers in force since August 31, 1920. The new regulations also apply to boiler inspectors.

The requirements laid down for a candidate for examination as a stationary boilerman or as a stationary pumping or hoisting engineer are generally similar to those formerly prescribed for the latter. He must be 18 years of age and of good character. He must furnish references, and a new provision requires him to complete and file with the Board such form of application as it may from time to time prescribe. As before, examinations are to be held at St. John four times a year and examinations may now be held at any other time and place convenient for candidates. Licences continue to be renewable annually but a new provision requires that if a licence is not renewed the licensee may be required to be examined as if he were an original applicant. In all cases licences must be exposed to view in the room where the licensee works. The fee of $10 a day with expenses continues to be allowed for examiners and the other fees fixed by the former regulations remain unchanged, i.e., for examination and including a licence if granted $5, for re-examination $2, renewal of licence $1.50 and for a special permit $2. All the reasons formerly accepted by the Board for cancellation of a licence may now be advanced for its suspension or revocation. These include obtaining a licence through misrepresentation or fraud, addiction to liquor or narcotic drugs, physical or mental incapacity, incompetency or gross negligence in the discharge of duties and permitting another to use his licence. A new cause for suspension or revocation of the licence is the engaging during working hours in any labour or pursuit not immediately connected with the boiler or engine while the latter is in operation.

The new regulations allow an appeal to the Workmen's Compensation Board by interested parties from the fees and expenses charged by boiler inspectors. An inspector's certificate may be suspended or revoked for any cause duly sworn to and determined by the Board as being against the public interest, and in particular for making charges for inspection which the Board considers unreasonable.

Ontario Dairy Products Act

Regulations of September 10, 1938, requiring butter and cheese makers employed in factories to have certificates of qualification were amended on June 30 to make it necessary for a candidate for a beginners permit to have a dairy school diploma as well as the recommendation of a first-class certificate holder and the approval of the dairy instructor, in the case of a cheesemaker, and the dairy inspector, in the case of a buttermaker. As before, such a certificate may be granted to any former certificate or permit holder who has not been in charge of a cheese factory or creamery for five years or over but who has acted as an assistant for at least five months within the two years previous to his application.

Quebec Electricians and Electrical Installation Act

All regulations under this Act were revised by an order in council effective July 1, 1939. The new regulations are, for the most part, a consolidation of earlier ones and require the owners of public buildings employing electricians to have annual permits, electrical installation contractors and electricians to be licensed and provide that the Canadian Electrical Code is to serve as a basis for examination of candidates for such licences. Rules for apprentices and for the selection of the board of advisers and the fees to be charged for the inspection of electrical apparatus are also set out.

The Act specifies six classes of licences, lettered from A to F, issued, respectively, to electrical contractors who have passed the examination for journeymen electricians, to companies doing an electrical contracting business, one of whose members holds a journeyman's licence, to journeymen electricians, moving-picture operators, repair and maintenance electricians in particular establishments and machine operators in charge of particular machines declared by the board of examiners to be dangerous to the operators, workmen or the public.

The regulations provide for two other classes of licence. Any electrician hired by the owner of a public building must have an A-2 licence which is issued only to a person qualified for an "A" licence. An A-2 licence is issued in the name of the electrician but must bear the name of the employer.

Licence B-2 is granted to any company operating or intending to operate as an electrical contractor if such company employs a licensed journeyman electrician. Such a person must have had four years' experience, pass a prescribed examination and pay a prescribed fee.

A candidate for a journeyman's licence must have served four years' apprenticeship and for a motion-picture operator's licence at least one year. Such candidates are to register within 30 days of beginning their apprenticeship with the board of examiners from whom they are to receive an apprentice

permit. The dates of commencing and leaving work must be entered in the apprentice's apprenticeship book by the employer or employers, as the case may be. This information, together with each employer's name, must be forwarded to the board by the apprentice. The apprenticeship book itself is to be deposited with the board when the apprenticeship is completed.

The Act provides for the appointment, by the Lieutenant-Governor in Council, of a board of advisers representing the corporations and associations interested in the electrical industry to collaborate with the board of examiners in licensing electricians. The regulations provide, as before, that such an advisory board is to consist of the Director of Technical Instruction of the Province or his delegate, one representative of the Public Service Corporations (Electricity) of the province, of the Professional Engineers, the Association of Architects, the employers and the workmen.

Electrical apparatus, which formerly had to be approved by the Hydro-Electric Power Commission of Ontario or the Underwriters' Laboratory of Chicago, may now be approved by either of these bodies or any authority acknowledged by the Board of Examiners.

Quebec Fair Wage Act

Levy on Employers.—By-law B-1 of the Fair Wage Board (LABOUR GAZETTE, July, 1939, p. 677), approved by order in council on June 2 was amended on June 30 to extend the levy of one-third of 1 per cent on the payroll of certain employers in cities and towns of a population of 20,000 or more to employers in all smaller places employing more than 100 persons during at least three months a year. Only employers whose workmen are within the scope of an order of the Fair Wage Board are liable to pay the assessment.

Actions for Wages.—An order of August 9 provides that in the case of claims for wages against owners of licensed clubs and hotel keepers, as to clubs and hotels operated in the cities of Montreal and Quebec and of claims against any employers in the electoral district of Rimouski, the time limit within which actions resulting from any ordinance enacted before March 1, 1939, may be brought is to be 12 months instead of the usual six which the Act provides. Power to extend this period was given to the Fair Wage Board by a 1939 amendment in the Act.

Several wage orders were gazetted on July 26.

General Order 4.—Order 4 (LABOUR GAZETTE, 1938, p. 512) has been amended in certain particulars. The changes relate to persons employed in hotels, restaurants, hospitals, boarding houses and other places where lodgings or meals are provided. The Order divides the province into four zones: Zone I, the Island of Montreal and cities or towns within a radius of five miles from the Island; Zone II, Quebec City and municipalities with a population of 10,000 or more; Zone III, cities or towns with a population from 2,000 to 10,000 and Zone IV, all other cities and towns. The Order does not apply to rural districts. One effect of the amendment is to distinguish between persons employed in boarding houses and hospitals and those employed in hotels, restaurants, clubs, places furnishing "curb service" and other places of the kind. No change is made in the minimum rates applying to the latter class of establishment. But special rates, somewhat lower than those previously applicable, are fixed for lodging houses, boarding houses or institutions of hospitalization. In these places the new minimum rates are in Zone I, 15 cents an hour or $9 a week, in Zone II, 13 cents an hour or $7.50 a week, in Zone III, 12½ cents or $7 and in Zone IV, 10 cents or $6 a week. Establishments with less than five rooms are exempt from the Order.

Another change is the omission of the minimum weekly, monthly and yearly rates formerly applying to persons employed in different capacities in hotels, restaurants and other public places of lodging or refreshment. The revision makes payable to chief cooks the same hourly rates as were fixed for cooks, namely 30 cents, 25 cents, 15 cents and 12 cents in Zones I, II, III and IV, respectively, the weekly, monthly and yearly rates being dropped from the Order.

The minimum hourly rates in all cases apply now to a 60 instead of a 54-hour week and overtime is to be paid at the regular hourly rate instead of at the rate of time and a half as originally required. Hotels in Zones III and IV with more than 50 rooms to rent must pay the rates for Zone II during the season when the rooms are rented.

Milk Industry.—Some changes have been made in Order 10 (LABOUR GAZETTE, 1938, p. 1097) governing establishments engaged in the pasteurization and distribution of milk in Montreal and district. A new section provides that persons employed as helpers to truck drivers and carters are to belong to the category to which the driver or carter belongs but boys employed to watch vehicles and to help in the distribution of milk are to be considered as messengers and paid the rates fixed for the latter by General Order 4 with the normal six-day week of 72 hours.

There is no change in the number of hours in the regular six-day week to which the minimum rates apply, it being 60 in Categories I and II and 72 in Category III. However,

the limits of 65 and 78 hours for these two groups respectively for the seven-day week are now allowed only when the longer week has been authorized. Overtime is now defined as all hours of work or fraction of hours of work required from a wage-earner by his employer over the specified number of hours during a week and, except for wage-earners in Category III (outside sales workers) over 12 hours in one day. Overtime is to be paid at the rate of time and a half subject to the exceptions provided by Order 4. Maximum weekly hours for male workers are fixed at 72 as in Order 4 but outside sales workers and watchmen governed by Order 10 who work seven days a week have a maximum of 84 hours a week.

Building Products.—Order 24 (LABOUR GAZETTE, February, 1939, p. 158) which covers the manufacture of doors, sashes and wood building products which was suspended on May 8 for two months (LABOUR GAZETTE, July, 1939, p. 677) is now declared suspended for two months from July 3 or until a decision to the contrary is made before that date.

PROCEEDINGS OF CONVENTION OF QUEBEC PROVINCIAL FEDERATION OF LABOUR

THE second annual convention of the Quebec Provincial Federation of Labour, held in Sherbrooke on July 22 and 23, was attended by approximately 150 delegates from all the industrial centres of the Province.

Over 60 resolutions were submitted and many of these concerned important problems in the sphere of labour and industrial relations.

The first resolution on the agenda was one which called upon the Federation to place itself on record in favour of the adoption by parliament "of a Workers'-Creditors Arrangement Act similar in principle and purpose to the Farmers' Creditors Arrangement Act and administered by the officials presently charged with the administration of the Act relative to farmers."

The Trades and Labour Congress was requested to endorse and support this resolution, which was adopted.

In speaking to the resolution, Mr. Gus Francq, its sponsor, pointed out the situation of the wage-earners "who, due to unemployment, sickness or other cause unavoidable, have indebted themselves sometimes for life and it is one of the reasons that contribute to increase the number of those who are on direct relief."

Another resolution requested the provincial government to clarify the meaning of the word "association" in the Fair Wage Act, the Collective Labour Agreements Act and the Professional Syndicates Act. It was declared in the resolution that the vagueness of the definition of "association" permits "intolerable abuses in the granting of collective labour agreements, juridical extension, Ordinances from the Fair Wage Office, or Incorporations of plant councils or company's unions."

Accordingly, it was requested that amendments be made to clarify definitely the word "association" in these three laws so that "any agency, committee, employees' association or employee representation plan, which exists for the purpose, in whole or in part, of dealing with an employer or employers concerning grievances or terms or conditions of employment, which the employer 'creates, dominates, controls or maintains' be very explicitly declared illegal, and that the Ministry of Labour be bound to refuse to consider any request from such associations for the obtainment of collective agreements recognition, Ordinances or charter of incorporation."

An amendment to the Industrial Disputes Act of Quebec (R.S.Q. 1925, Chap. 98 and amendments) was urged in an adopted resolution which requested the provincial Minister of Labour to introduce a measure similar to the British Columbia legislation of 1937 making it "compulsory for the employer to discuss the possibilities of coming to an understanding with his employees with the preponderant group or pay a fine."

Repeal of Bills 19 and 20, which contained amendments to the Fair Wage Act and Collective Labour Agreements Act, was sought in a resolution which declared that these Bills "interfered with the legitimate object of organized labour."

Among the recommendations contained in other adopted resolutions were:—

Urging municipalities to take immediate advantage of the Dominion Housing Act.

Adoption of measures to aid employment by

(*a*) reducing working hours with no reduction in pay.

(*b*) inaugurating a large scale public works program "financed without charge by the Bank of Canada."

Establishment of state hospitalization and medical care.

Inquiry into survey of exportation of raw materials (particularly pulpwood) and its effect on unemployment.

Federal and provincial subsidies to trade schools to permit the admission of a certain number of students to day courses free of charge.

Establishment of contributory unemployment insurance on a national scale.

Substitution of labour tribunals for the Fair Wage Board.

Opposition to Order No. 4 of the Fair Wage Board in so far as it affects office employment.

Repeal of the Order governing laundry workers.

Elimination of exemptions or amendments to any negotiated collective agreements without the majority consent of the interested parties.

Nationalization of all social and labour legislation.

Enactment by the provincial legislature of legislation in conformity with the Criminal Code amendment in regard to the right of organization.

Right of appeal to the Workmen's Compensation Board.

Recognition of silicosis as an occupational disease.

Opposition to the employment of female help after midnight in food establishments.

PRODUCERS' AND CONSUMERS' CO-OPERATION IN CANADA IN 1938

Annual Report of National Executive of the Co-operative Union of Canada

IN previous references in the LABOUR GAZETTE, information has been published indicating the position and progress of producers' and consumers' co-operation in Canada (LABOUR GAZETTE, December, 1938, page 1356; October, 1937, page 1098; November, 1936, page 990, etc.). Each year the annual report published by the Co-operative Union of Canada is reviewed as one source of information concerning the development and status of the co-operative movement in the Dominion.

The annual report of the Co-operative Union of Canada which was presented to the Annual Congress held in Regina in June, appeared in the June issue of *The Canadian Co-operator* and referred specifically to the operations of the retail societies, buying clubs, wholesale societies, and other affiliated organizations which responded to the Union's request for statistical data for the year 1938.

Retail Societies.—Forty-seven retail societies operating stores or warehouses reported their 1938 business activities to the Union, an increase of two societies over the number reporting in 1937.

The aggregate sales for 1938 of forty-six of the retail societies as reported to the Union (one society failed to report its sales) amounted to $5,480,806.07. Thirty societies reported increases in sales during 1938 amounting to $699,577.72 compared with twenty-eight and one buying club with total increases of $619,360.22 for 1937. Ten retail societies, compared with thirteen for the previous year, reported reduced sales of $116,212.37. The net increase in sales of retail societies during 1938 was therefore $583,365.35. Sales of the two buying clubs amounted to $8,083.63.

The forty-seven retail societies reported a combined membership of 17,428 or 1,064 more than was reported by forty-five societies in 1937. Share capital of the forty-seven societies in 1938 amounted to $605,736.34, loan capital $280,934.10—the combined investments in share and loan capital being $886,670.44, an increase of $77,202.06 over 1937.

The total amount of purchase dividends declared in 1938 by retail societies was $199,201.36, an increase of $16,411.62 compared with $182,789.74 declared in 1937. The purchase dividends of the two buying clubs amounted to $148.

The net surplus for the retail societies for the year was $264,367.93 compared with a net surplus of $229,270.30 in 1937, an increase of $35,097.63.

Dairy and Wholesale Societies.—In addition to the ordinary distributive societies, three dairy societies reported aggregate sales of $1,422,505.18 compared with $1,270,191.08 in 1937. Two of these dairy societies sell to consumers and the third to the retail dairy trade.

Including the turnover of the dairy societies ($1,422,505.18) the buying clubs $8,083.63 and the retail societies ($5,480,806.07) the total volume of sales of the distributive societies amounted to $6,911,394.88, an aggregate increase of $595,034.72 compared with the 1937 sales volumes.

The aggregate sales of the three provincial wholesale societies affiliated with the Union —Alberta, Saskatchewan, and Manitoba— amounted to $1,771,511.09 made up as follows: Alberta, $258,423.68; Saskatchewan, $1,032,087.41; and Manitoba, $481,000.00. It is pointed out in the report that the trade volume for Saskatchewan is for a fifteen

months' period instead of twelve. The Alberta Co-operative Wholesale Society reported a net surplus of $8,130.60, while those of Saskatchewan and Manitoba reported $33,183.12 and $23,640.34 respectively.

In addition to the foregoing wholesale societies, the Consumers' Co-operative Refineries of Regina, Saskatchewan, reported a sales turnover during 1938 of $632,386.00, an increase of $219,437.00, and a net profit of $126,629.00. For statistical purposes the sales of this organization are regarded in the report as of a wholesale character, and therefore adding its sales to those of the wholesale societies, the aggregate sales are increased to $2,403,897.09.

Total Sales.—The total distributive turnover for 1938 of both wholesale and retail societies, was therefore $9,315,291.97. If the sales volume of the Canadian Livestock Co-operative (Maritimes) amounting to $359,276.61, and the room and board accommodation provided by the Student Co-operative Residence, Toronto, $3,529.41 are added, a total volume for these societies affiliated with the Co-operative Union aggregates $9,678,097.99. It is further explained in the report that this total is exclusive of the business transacted by two large grain marketing associations—Manitoba Pool Elevators, Ltd., and Saskatchewan Co-operative Wheat Producers, Ltd., Saskatchewan Co-operative Livestock Producers, Ltd., and Canadian Livestock Co-operative (Maritimes) and a Transportation society. Some of these societies failed to report their sales for 1938 to the Union. However the total of reported sales for this group amounted to $4,694,411.07.

In a statistical table given in the report the grand total of sales for all types of co-operative societies affiliated with the Union is given as $14,013,232.45. Total sales for all societies in 1937 amounted to $13,171,019.24.

Membership, Share Capital, etc.—During 1938 all types of co-operative societies affiliated with the Canadian Co-operative Union reported a total membership of 178,832; share capital amounted to $1,008,919.70; loan capital, $298,128.88; value of stock in trade, $1,120,967.59; other assets $38,903,635.56, and reserve funds amounted to $1,002,421.79. The total amount of purchase dividend declared by all societies in 1938 was $608,599.83 and net surpluses aggregated $484,834.54.

Employment, Salaries and Wages in Co-operatives.—In 1938, co-operative societies affiliated with the Union afforded employment to 1,008 persons to whom $1,346,878.99 was paid in salaries and wages.

Canadian Co-operative Congress

Among the resolutions adopted by the Congress of the Co-operative Union at its annual meeting held in Regina in the latter part of June was one "urging the Federal Government to introduce a government bill for the incorporation and regulation of co-operative societies, including co-operative credit societies or unions, under the supervision of a Department of State preferably the Department of Labour or of Agriculture."

Immigration to Canada January-June, 1939

The Immigration Branch of the Department of Mines and Resources reports that during the first six months of 1939 ending June 30, a total of 9,193 immigrants entered Canada compared with 8,135 for the same period in 1938, an increase of 13 per cent.

Of the total entering the Dominion during the period of 1939 covered by the report, 1,742 were from the British Isles; 2,520 from the United States; 1,345 from Northern European countries; while "other races" numbered 3,586. In each classification increases in the number entering Canada were recorded in comparison with the same period in 1938 with the exception of persons coming from the United States, a decrease of 12·8 per cent being registered in that group. The largest increase of 100·7 per cent was in Northern European races, followed by an increase of 19·5 in the number of persons listed in the "other races" classification, and an increase of 10·7 in the number of immigrants coming from the British Isles.

Adult males entering Canada during the first six months of 1939 numbered 2,628; adult females, 3,572; and children under eighteen made up 2,993 of the total of all immigrants.

Occupationally, 1,303 males, 799 females and 1,222 children were listed in the farming class. The labouring class comprised 162 males, 33 females, and 49 children; mechanics, 268 males, 121 females, and 71 children; trading class, 354 males, 208 females, 102 children; the mining class, 18 males, 5 females, and 1 child; while female domestic servants eighteen years and over numbered 337 and those under eighteen 58; and "other classes" accounted for the remainder of the total, there being 523 males, 2,069 females, and 1,490 children in this classification.

The destination of the largest number (3,218) of the immigrants to Canada during the period was given as Ontario; 1,717 went to Quebec; 1,292 to British Columbia; 891 to Alberta; 808 to Saskatchewan; 729 to Manitoba; 340 to Nova Scotia; 151 to New Brunswick; 31 to Prince Edward Island; 9 to the North West Territories and 7 to the Yukon Territory.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, JULY 1939

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on August 1 was 11,843, the employees on their payrolls numbering 1,144,685 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for July was 1,902, having an aggregate membership of 242,163 persons, 11·1 per cent of whom were without employment on August 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of August, 1939, as Reported by Employers

There was a further improvement in industrial employment at the beginning of August, according to statements tabulated by the Dominion Bureau of Statistics from 11,843 firms, whose payrolls aggregated 1,144,685 persons, as compared with 1,127,863 at July 1. The experience of the years, 1921-1938, shows that employment has usually, though not invariably, gained at the beginning of August, there being, on the average, a fractional increase in the index. The advance at the latest date was therefore seasonal, but was considerably greater than the average gain recorded at midsummer in the last eighteen years. The crude index number, based on the 1926 average as 100, rose from 115·8 in the preceding month to 117·5 at August 1, 1939, when it was several points higher than that of 112·1 at the beginning of August of last summer. While the latest figure was lower than the August 1, 1937, index of 120·0, it was higher than at the same date in any other year since 1930.

Since the reported increase in employment exceeded the average at midsummer in preceding years of the record, the seasonally-adjusted index advanced, rising from 113·6 at July 1, to 114·3 at the beginning of August, 1939.

Generally heightened activity was noted at the date under review in manufacturing, mining communications, building and highway construction, hotels and restaurants and wholesale trade. On the other hand, retail trade, shipping and stevedoring and logging were slacker; the losses in trade and logging were seasonal, but exceeded the average contraction at midsummer in preceding years of the record. In manufacturing, there was curtailment of a seasonal character in iron and steel, while improvement was indicated in the food, leather and many other groups.

As already stated, the unadjusted employment index, calculated on the 1926 average as 100, stood at 117·5 at the beginning of August, 1939, compared with 115·8 at July 1, while at August 1, in recent years, the crude index has been as follows: 1938, 112·1; 1937, 120·0; 1936, 105·6; 1935, 101·1; 1934, 99·9; 1933, 87·1; 1932, 86·3; 1931, 105·2; 1930, 118·8; 1929, 127·8; 1928, 119·3 and 1927, 110·5.

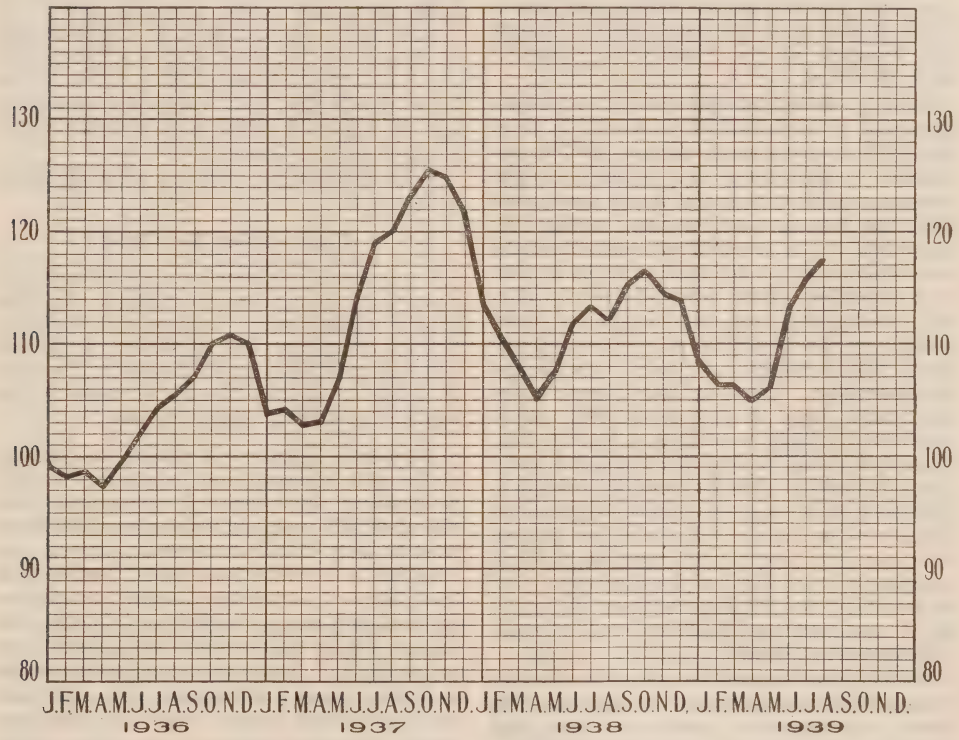
For August 1, 1938, 10,829 firms had reported an aggregate payroll of 1,073,302 persons, or 13,964 fewer than in the preceding month. The loss then had occurred mainly in manufacturing and logging.

Employment in Financial Organizations

For some months, statistics of their employment have been collected from banks, trust companies and stock market operators. For August 1, 413 firms and branches in these lines of business reported staffs aggregating 33,148 persons, compared with 33,107 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, construction, service and trade industries brings the total number of employees included in the August 1 survey of

employment to 1,177,833 in 12,256 establishments, and slightly lowers the index of 117·5 in the industries above enumerated, to 117·2; when the statistics of the co-operating financial organizations are included in the general figures for July 1, the index was lowered from 115·8 to 115·6. Comparable data for 1938 are not available.

Employment by Economic Areas



Activity increased in Prince Edward Island, New Brunswick, Quebec, Manitoba, Saskatchewan, Alberta and British Columbia, while there were reductions in personnel in Nova Scotia and Ontario. The largest numbers were added to the payrolls in Saskatchewan, British Columbia and Quebec. The situation generally was more favourable than at the same date of last summer. In Quebec and the Prairie Provinces as a unit, the index number was also higher than at August 1, 1937; in British Columbia it was practically the same, while elsewhere employment was not so active. The volume of employment at the latest date was generally greater than at midsummer in any of the five or six years immediately preceding.

Maritime Provinces.—Statements were tabulated from 839 firms in the Maritime Provinces employing 85,329 persons, 227 fewer than in the preceding month. The reduction took place in Nova Scotia, the movement in Prince Edward Island and New Brunswick being favourable. Mining, logging and manufacturing showed curtailment, while construction reported improvement. Within the manufacturing group, the largest decline occurred in the iron and steel, lumber and fish-canning divisions; fruit and vegetable canneries, on the other hand, were busier. The general index, at 115.6, was three points higher than at the same date in 1938, when a much greater contraction had been indicated; the index for the Maritimes as a unit was lower than at August 1, 1937, but was higher than at midsummer in any other year since 1930.

The 786 employers in the Maritime Provinces whose returns were included in the employment survey for August 1, 1938, had

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

reported 82,391 workers, as compared with 85,362 in the preceding month.

Quebec.—Further marked improvement was reported in Quebec, according to returns from 2,935 establishments with 360,469 employees, as against 353,549 at July 1. The level of industrial activity was higher than at August 1, 1938, when curtailment had been noted; the index then stood at 117·8, as compared with 126·4 at the latest date. Logging, shipping and stevedoring and retail trade recorded lowered employment at the beginning of August. On the other hand, manufacturing generally gained, the advances in leather, food, tobacco and electric light and power plants being most pronounced. Building and railway construction and maintenance, hotels and restaurants and wholesale trade also afforded more employment; the increase in building was largest.

For August 1 of last year, 2,672 employers had reported 331,407 workers, as compared with 337,223 at July 1.

Ontario.—Industrial employment in Ontario showed a slight falling-off at August 1, when the 5,173 co-operating firms had 453,709 employees, or 2,068 fewer than at July 1. The average change at August 1 in the years since 1920 has been a small decline, so that the shrinkage at the latest date is seasonal, the percentage reduction approximating the average at midsummer. There was expansion in mining, transportation and construction and maintenance at the beginning of August, but the trend was downward in trade, logging and manufacturing. The only large losses in the last-named were in iron and steel, while heightened activity was noted in leather, clay, glass and stone, mineral products and some other industries. Employment at August 1, 1938, had shown a much greater decline from the preceding month, and the index number then was three points lower, standing at 111·2, as compared with 114·2 at the latest date. The returns tabulated for the beginning of August of last year numbered 4,720, and reported staffs had aggregated 434,305.

Prairie Provinces.—The situation in the Prairie Provinces continued to improve; the 1,669 establishments furnishing data had 142,555 workers, as compared with 135,596 at the beginning of July. Saskatchewan recorded the greatest expansion. There were gains in services, mining, manufacturing and building and highway construction, those on roadwork being most extensive. Within the factory group, there was general recovery, that in iron and steel plants being most marked. On the other hand, railway operation and railway construction and maintenance released workers. The index of employment was several points higher than at August 1 of last year, standing at 109·4, compared with 104·9 at the same date in 1938, when a total of 1,523 firms had reported 133,557 persons in their employ, compared with 127,131 at July 1, 1938.

British Columbia.—The tendency in British Columbia at August 1 was decidedly favourable, continuing the upward movement in evidence since February. Manufacturing, mining, transportation and construction showed heightened activity; logging operations were considerably curtailed, partly owing to the fire hazard, while the changes in other industries were slight. Within the manufacturing division, the greatest gains were those of a seasonal nature in fish and fruit and vegetable canneries. Lumber and other classes were also busier. Returns were compiled from 1,227 firms employing 102,623 men and women, 5,238 more than in the preceding month. A decline had been indicated at the beginning of August of last year, and the index then stood at 107·1, compared wtih 117·0 at the latest date. The 1,127 employers co-operating at August 1, 1938, had reported 91,547 workers on their payrolls.

Index numbers by economic areas are given in Table 1.

Employment by Cities

Employment increased in Winnipeg and Vancouver; in Quebec City there was little general change, while in Montreal, Toronto, Ottawa, Hamilton and Windsor curtailment was indicated. Except in Hamilton, the level of industrial activity in each of these centres was higher than at August 1, 1938.

Montreal.—There was a decline in Montreal at the date under review, for which the 1,707 co-operating firms reported a combined payroll of 166,710 men and women, or 1,020 fewer than at July 1. Transportation, street construction and maintenance work, services and trade showed contractions, while manufacturing and building were brisker. Within the former, textile and iron and steel plants were seasonally dull, but improvement was recorded in leather, musical instrument, food, beverage, clay, glass and stone, electrical apparatus, electric light and power and some other plants. The index of employment was rather higher than at August 1, 1938, when a much larger decrease had been indicated by the 1,545 establishments furnishing data, whose staffs aggregated 159,629.

Quebec.—A slight falling-off was reported in Quebec City, mainly in construction; services and manufacturing, however, afforded more employment. Statements were received from 213 concerns having 17,795 workers on their payrolls, compared with 17,862 in the

preceding month. A moderate increase had been made at August 1 of a year ago, according to information which had been tabulated from 185 employers of 14,903 workers; the index was then several points lower than at the latest date.

Toronto.—There was a curtailment in Toronto, according to data from 1,756 firms employing 139,451 persons, or 1,141 fewer than at the beginning of July. The decline was largely seasonal, employment having been reduced at August 1 in fourteen of the seventeen preceding years for which statistics for that city are available; the contraction this year was decidedly smaller than at the same date in 1938, but approximated the average loss at August 1 in the period, 1922-1938. The index was three points higher than at midsummer of 1938, and was also above the figure for the beginning of August in any other year since 1931. Manufacturing showed little change as compared with July 1, 1939, reductions in printing and publishing, electrical apparatus and some other factories being just about offset by gains in food, clay, glass and stone and other classes. Trade was affected by midsummer dullness, and the services division also released help, while construction showed some improvement. For August 1, 1938, 1,612 concerns had reported a combined working force of 132,292 men and women.

Ottawa.—Employment in Ottawa declined, 215 persons being released from the staffs of the 230 co-operating employers, who had 14,925 workers at August 1. There were moderate gains in manufacturing, but trade, services and construction were quieter. Although there was an advance at the beginning of August, 1938, a generally lower level of employment had then been reflected in the information furnished by 201 establishments, whose payrolls had included 14,200 employees.

Hamilton.—Curtailment was shown in Hamilton, where 329 firms reported 33,243 men and women on their pay lists, as against 34,410 in their last return. Manufacturing operations considerably decreased, mainly in the iron and steel division, while electrical apparatus works were somewhat busier. Employment was not so active as at the same date of last year, when a smaller loss had been recorded by the 298 co-operating employers, whose staffs had aggregated 34,677.

Windsor.—The trend of employment in Windsor was seasonally downward; statistics were received from 197 firms employing 15,500 workers, or 353 fewer than at July 1. Automobile and other iron and steel works afforded less employment, while construction showed rather greater activity. A large decline had been indicated at August 1, 1938, from the preceding month, and the index then was several points lower than at the date under review. A combined payroll of 14,367 men and women was reported by the 188 employers furnishing information for August 1 of last year.

Winnipeg.—Further improvement was recorded in Winnipeg, according to 524 firms who had 42,078 employees, as compared with 41,123 at the beginning of July. An upward movement was noted in manufacturing, (mainly in the iron and steel division), and transportation and construction were also somewhat busier. No general change had been indicated at the same date of last year, when 496 establishments had reported 40,923 workers. Employment was then at a slightly lower level than at the date under review.

Vancouver.—In Vancouver, manufacturing, transportation and construction afforded more employment, while retail trade was rather quieter. Returns were compiled from 520 employers with 38,403 persons on their staffs, as compared with 37,603 in the preceding month. A much smaller gain had been indicated at August 1, 1938, by the 469 co-operating firms, whose payrolls aggregated 36,544; the index number then, at 112·2, was slightly below that of 115·1 at the latest date.

Employment by Industries

Manufacturing.—Heightened activity was indicated in manufacturing establishments, 6,460 of which reported 577,746 operatives on their payrolls, as compared with 570,430 at July 1. The crude index of employment stood at 112·8 at August 1, compared with 111·3 in the preceding month, and with 110·0 at August 1, 1938; while the latest figure was lower than at the same date in 1937, (118·1), it was higher than at midsummer in other years since 1929.

On the average, employment in manufacturing at August 1 in the last eighteen years has shown a small fractional decrease. After correction for seasonal movement, the index therefore advanced, rising from 109·0 at July 1, 1939, to 110·3 at the beginning of August.

The following shows the unadjusted index numbers at August 1 in recent years: 1939, 112·8; 1938, 110·0; 1937, 118·1; 1936, 104·9; 1935, 99·8; 1934, 94·2; 1933, 85·2; 1932, 82·6; 1931, 94·7; 1930, 110·2; 1929, 121·6; 1928, 115·2 and 1927, 107·0.

Increased activity was indicated at the date under review in the leather, lumber, animal and vegetable food, textile, beverage, clay, glass and stone, electric light and power, mineral product and other industries. The seasonal gains in food canning were most

extensive. On the other hand, a considerable contraction took place in iron and steel plants, notably in automobile factories; the decline in the group as a whole was seasonal in character, approximating the average loss recorded at August 1 in the years since 1920. There was, in addition, a small reduction in rubber manufacturing.

For August 1, 1938, returns had been compiled from 6,194 manufacturers with 560,564 employees; in the preceding month, they had reported 569,630 persons on their payrolls.

Animal Products.—Fish canneries registered gains, which greatly exceeded those recorded at August 1, 1938; meat-packing plants also showed improvement. The index in the animal food industries was much higher at the latest date than at midsummer of last year. Statistics were received from 334 firms employing 31,494 workers at August 1, 1939, as compared with 27,824 in the preceding month. The trend at August 1 in other years for which data are available has frequently been downward.

Leather and Products.—Marked recovery was indicated in employment in the leather group, 1,122 persons being added to the staffs of the 331 co-operating manufacturers, who employed 23,494 at August 1. Much of the betterment occurred in shoe factories in Quebec. A somewhat greater gain had been reported by the firms making returns for the same date a year ago, but the index of employment was then nearly five points lower.

Lumber and Products.—Rough and dressed lumber mills were busier, and there were moderate increases in wooden vehicle factories, while the miscellaneous wood-using divisions reported contractions. The lumber manufacturing industry as a whole registered its fourth consecutive advance since March; the payrolls of the 953 establishments furnishing data aggregated 50,615 operatives, as against 50,241 in their last report. There was expansion in Quebec and the Western Provinces, that in British Columbia being most pronounced. Activity in the group as a whole was higher than at August 1, 1938, although a rather larger gain had then been recorded.

Musical Instruments.—Employment in musical instrument factories was brisker than at July 1, but the index was a little lower than in the corresponding month of last year. Statements were received from 36 manufacturers who had enlarged their personnel by 171 men and women, to 1,632 at August 1, 1939.

Plant Products, Edible.—Important additions to staffs were registered in fruit and vegetable canneries, while the bread and bakery and other divisions were also busier; 535 vegetable food manufacturers reported 38,520 workers, or 2,287 more than at the beginning of July. The increase took place mainly in Quebec and British Columbia. Employment was not quite so active as at August 1, 1938, when a somewhat greater advance had been indicated.

Pulp and Paper Products.—Pulp and paper mills reported slightly heightened activity, while there was a downward movement in paper products and in printing and publishing. Statistics were received from 709 manufacturers whose payrolls were increased by 77 employees to 68,597 at August 1. The changes in the various economic areas were relatively small. A larger gain, on the whole, had been noted in the corresponding month last summer; the index then, however, was lower, standing at 107·3, as compared with 110·5 at August 1, 1939.

Rubber Products.—There was a falling-off in employment in rubber works, 54 of which had 13,452 persons on their payrolls, compared with 13,561 at July 1. Slight curtailment was reported in Quebec and Ontario. The tendency had also been unfavourable at the beginning of August of a year ago, when the level of employment was decidedly lower.

Textile Products.—The production of garments and personal furnishings showed a seasonal contraction, but considerable improvement was reported in cotton, woollen and silk factories. The 1,167 co-operating textile manufacturers employed 100,804 men and women, as compared with 100,487 at July 1. Most of the moderate gain in the industry as a whole was in Quebec, Ontario and Manitoba. A large decrease had been noted at the beginning of August, 1938, and the index then stood at 113·7, compared with 115·8 at the date under review; the latter figure, however, was lower than at August 1, 1937.

Tobacco.—Data were received from 46 establishments in this industry, whose payrolls, aggregating 8,079 at August 1, showed an increase of 91 over July 1. Employment at the same date last summer was in slightly greater volume than at midsummer of the present year, the improvement then recorded having been rather more marked.

Beverages.—The tendency was favourable in the beverage industries at the beginning of August, according to statistics from 147 manufacturers employing 9,687 persons compared with 9,356 in the month before. The index was higher than at August 1, 1938, when a decline had been recorded.

Chemicals and Allied Products.—Practically no general change took place in chemical plants at the date under review, eight persons

having been released from the staffs of the co-operating plants since July 1; they reported 18,509 employees. The index was slightly higher than at August 1, 1938, although an increase had then been indicated.

Clay, Glass and Stone Products.—An advance was recorded in the building material industries, according to 222 employers with 11,209 workers, or 276 more than in their last report. Employment was brisker than at the same date last summer, a moderate loss having then been recorded.

Electric Light and Power.—Improvement was noted in electric light and power plants, 100 of which reported 17,537 employees, compared with 16,960 at July 1. The index number at the date under review was some four points higher than at August 1, 1938, when a smaller increase had been indicated.

Electrical Apparatus.—Activity in electrical apparatus works slightly declined; at the beginning of August, 125 of these employed 17,705 operatives, or 36 fewer than in the preceding month. Employment was somewhat quieter than at August 1 of last year, although the trend had then been downward.

Iron and Steel Products.—Crude, rolled and forged, machinery, vehicle and agricultural implement shops showed reductions, those in automobile factories being most pronounced. On the other hand, heating appliances and many other classes were rather busier. A combined labour force of 120,548 persons was indicated by the 922 co-operating manufacturers, who had 122,666 at July 1. Firms in Ontario recorded the largest losses, while the movement was decidedly favourable in Manitoba and Alberta. A much larger decline, on the whole, had been noted at the beginning of August in 1938, and the index then was slightly lower.

Non-ferrous Metal Products.—There was a small advance in this group, according to the 190 firms furnishing data, who employed 24,695 workers at August 1, compared with 24,614 in the preceding month. Most of the gain occurred in the base metal divisions. Employment was in much the same volume as at August 1 of a year ago.

Mineral Products.—Statistics tabulated from 100 manufacturers of mineral products showed that they employed 12,931 men and women, or 143 more than in their last report. The index was practically the same as at the same date in 1938, when the movement had also been upward.

Logging

Seasonal dullness generally affected the logging industry, while the fire hazard in British Columbia also resulted in lowered employment. The reductions in staff throughout the Dominion were therefore larger than usual at the time of year, although they were considerably smaller than those recorded at August 1, 1938. Statements were tabulated from 359 firms employing 21,519 men, or 6,381 fewer than in the preceding month. The index stood at 73·5, as compared with 59·6 at the beginning of August of last year.

Mining

Coal.—There was an increase of 263 in the staffs of the 101 operators furnishing returns, bringing them to 22,787 at August 1, 1939. Curtailment was indicated in the Maritime coal fields, while gains were reported in Alberta and British Columbia. A contraction had been registered at the same date of last year, when the index was fractionally higher.

Metallic Ores.—A further advance was recorded in metallic ore mines, in which employment was brisker than at the beginning of August of last year. Returns were received from 249 firms with 43,958 men, as compared with 43,579 in their last report. An upward trend was indicated in Ontario, Manitoba and British Columbia, but elsewhere the situation showed little general change.

Non-Metallic Minerals (Other than Coal).—Slight improvement was noted in this division, in which 102 employers reported 10,099 persons on their payrolls at the beginning of August. Employment was at a higher level than in the same month last summer, when a falling-off had been shown.

Communications

There was an increase in the personnel of telephone and telegraph companies at August 1; the communication companies co-operating with the Dominion Bureau of Statistics had 23,361 employees, as against 22,985 in the preceding month. The number engaged in this group was not so large as at August 1 of a year ago, although the additions to the payrolls then reported were on a smaller scale.

Transportation

Street Railway and Cartage.—Continued gains were registered in this division, according to data received from 282 employers with 29,392 workers, as against 28,943 at July 1. A contraction had been recorded at August 1, 1938, when the index was below its level at the time of writing.

Steam Railway Operation.—The trend of employment in steam railway operation was favourable in Quebec, Ontario and British Columbia, while in Manitoba a reduction was indicated; the 100 companies and divisional superintendents furnishing data throughout the Dominion had 59,601 employees, compared with 59,668 in their last report. An ad-

vance had occurred at the same date in 1938, but the index then was fractionally lower than that of 74·9 at the latest date.

Shipping and Stevedoring.—Statements were tabulated from 124 companies in this group, employing 17,086 workers, or 454 fewer than at July 1, 1939. The largest loss was in Quebec. A gain, on the whole, had been noted at the beginning of August a year ago, when employment in shipping was more active.

Construction and Maintenance

Building.—Considerable increases were again reported in building construction, 864 contractors adding 5,776 persons to their staffs, bringing them to 32,269 at the beginning of August. The largest advances were in Quebec. Employment was brisker than in the same month of 1938, when the improvement indicated was on a much smaller scale.

Highway.—The number engaged on highway construction and maintenance increased in New Brunswick, Ontario, Saskatchewan, Alberta and British Columbia, the expansion in Ontario and Saskatchewan being most pronounced; on the other hand, there were losses in this industry in Prince Edward Island, Nova Scotia, Quebec and Manitoba. Data were received from 421 employers with 113,695 men on their payrolls, as compared with 103,594 at the beginning of July. A smaller advance had been noted at August 1, 1938, and employment on road work was then in rather less volume.

Railway.—Slight improvement on the whole, was recorded in this group at August 1, 1939 when 34 companies and divisional superintendents reported that they had 30,592 workers on their staffs, compared with 30,495 in the preceding month. Gains were shown in New Brunswick, Quebec, Ontario and Alberta, while elsewhere there were losses. The index number was many points higher than at the beginning of August of a year ago, a large contraction having then been noted.

Services

The trend of employment was upward in hotels and restaurants, but there were reductions in laundries and dry-cleaning establishments; 594 firms in the service group employed 33,018 persons, compared with 32,534 at the beginning of July. Curtailment had been recorded at August 1, 1938, and the level of employment was then rather lower.

Trade

Retail stores showed a seasonal falling-off in employment, while wholesale houses were more active, according to 2,067 trading establishments which employed 129,562 men and women, as compared with 131,134 at July 1. Ontario reported most of the decline in the trade group as a whole. Seasonal losses had also occurred at the beginning of August last year, when the index was very slightly lower than at the date under review.

Tables

Index numbers of employment by economic areas and industries are given in the accompanying tables, in which the columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS
(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Aug. 1, 1927	110·5	113·2	109·8	109·2	114·0	110·0
Aug. 1, 1928	119·3	117·0	114·1	118·9	132·5	116·4

(2) Unemployment in Trade Unions at the Close of July, 1939

Unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons who are occupied in work outside their own trades or who are idle through illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

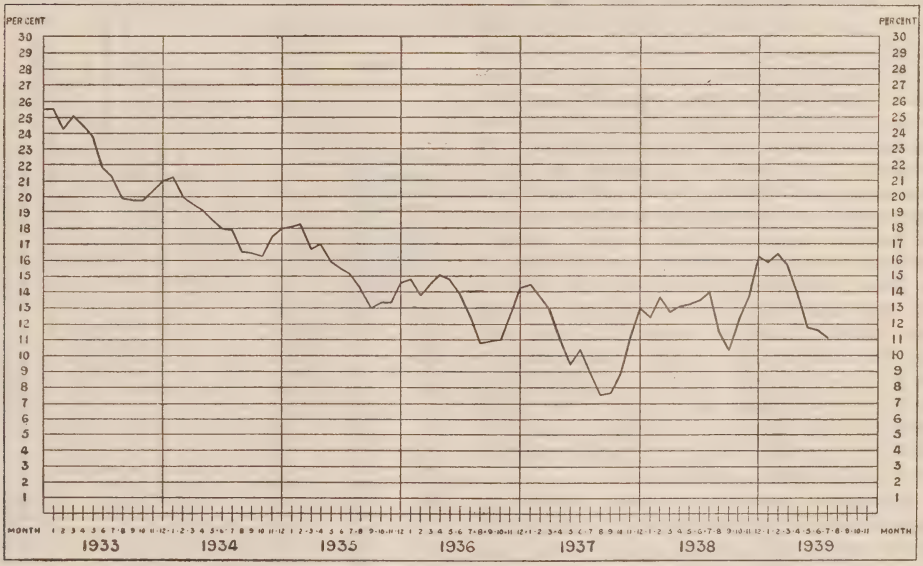
Industrial activity among local trade union members at the close of July was very slightly in advance of that recorded in the preceding

month, the 1,902 labour organizations from which reports were tabulated, with 242,163 members, showing that 26,955 or 11·1 per cent were idle, in contrast with 11·6 per cent in June. Manitoba unions, with an increase in available employment of nearly 5 per cent, showed the greatest change in conditions of any of the provinces, the garment and iron and steel trades especially indicating expansion. The situation also tended upward in Alberta, British Columbia, Saskatchewan, Nova Scotia and New Brunswick, though the variations from June were small. In Quebec the same volume of unemployment was maintained as in June. Losses in activity of less than one per cent, however, were recorded from Ontario. Compared with the returns for July, 1938, when 14·0 per cent of the members reported were without work, New Brunswick and Quebec unions showed a noteworthy rise in employment afforded and moderate improvement was manifest by British Columbia, Manitoba, Ontario and Saskatchewan unions. On the other hand, in Nova Scotia and Alberta the trend of activity was slightly unfavourable.

A separate compilation is made monthly of unemployment in the largest city in each province, excluding Prince Edward Island. All the cities used in the comparison showed an upward movement of employment during July from the preceding month, Winnipeg unions reflecting the most marked advances, while in Regina and Vancouver employment increased moderately. Slight gains only were apparent among Saint John, Montreal, Halifax, Toronto and Edmonton members. When contrasting with the returns for July, 1938, considerable improvement was evident among Montreal, Vancouver and Toronto members during the month under review and more favourable conditions prevailed among Winnipeg, Regina and Halifax unions. The situation for Saint John and Edmonton members, on the other hand, declined slightly.

The chart which accompanies this article shows the trend of unemployment by months from January, 1933, to date. During July the curve traced a slightly downward course from that of the preceding month, denoting improved conditions. Activity as represented by the curve was also in greater volume than in July a year ago when the level of the curve was above that of the month surveyed.

The manufacturing industries showed a more favourable trend of employment during July from the previous month, the 566 unions from which reports were compiled, involving a membership of 94,961 persons, indicating that 11,855 or a percentage of 12·5 were unemployed in comparison with 13·5 per cent in June. Substantially improved conditions, however, were noted from July a year ago, when 19·6 per cent of the members reported were without work. A considerably higher level of activity than in June was evident among general labourers, meat cutters and butchers, garment and fur workers during the period surveyed, and gains on a more moderate scale were reflected by textile and carpet, and jewellery workers. Employment for bakers and confectioners, iron and steel workers and metal polishers advanced slightly. Wood and hat, cap and glove workers, on the contrary, registered pronounced increases in slackness from June and among leather workers the recessions indicated were noteworthy. Some slowing up in available work was manifest also by glass, cigar and tobacco, and brewery workers, printing tradesmen and papermakers. The majority of trades participated in the better movement noted in the manufacturing industries from July a year ago, the garment trades particularly showing decided employment recovery during the month reviewed. Meat cutters and butchers, and fur workers, who, however, formed but a small proportion of the total membership in the manufacturing industries, reported large percentage increases in employment. Advances of considerable importance were noted also by iron and steel, and wood workers and papermakers. Bakers and confectioners, and textile and carpet workers showed improvement of noteworthy degree and lesser gains were indicated by cigar and tobacco, brewery, hat, cap and glove, and jewellery workers. Glass and leather workers, on the other hand, were decidedly less active than in July a year ago and the situation declined for general labourers and printing tradesmen.



Conditions in the coal mining industry changed but slightly during July from the previous month, the tendency, however, being toward lessened employment. For July reports were received from 58 unions of coal miners including 21,725 members, 3,228 or a percentage of 14·9 of whom were out of work, in contrast with an unemployment percentage of 14·6 in June. The situation was also less favourable than in July last year, when 11·0 per cent of unemployment was recorded. In Nova Scotia nominal gains in activity were apparent from June, while in Alberta and British Columbia employment subsided slightly. When contrasted with the returns for July, 1938, British Columbia unions recorded important losses in work afforded during the month reviewed and noteworthy curtailment was registered by Alberta members. In Nova Scotia minor contractions occurred. Short time work was also prevalent among the miners during July.

Unemployment in the building and construction trades, as a whole, was maintained

in exactly the same volume during July as in the preceding month, the percentage of idleness in each month standing at 24·7. Reporting for July were 203 associations of building tradesmen, with an aggregate membership of 26,160 persons, 6,457 of whom were out of work on the last day of the month. Fluctuations occurred in the various groups of trades, tile layers, lathers and roofers, bridge and structural iron workers, and hod carriers and building labourers especially showing pronounced improvement in conditions, while among granite and stone cutters, and steam shovelmen noteworthy gains were reported. Heightened activity of lesser degree was evident among bricklayers, masons and plasterers, and plumbers and steamfitters. Considerable slowing up in employment, however, was apparent among painters, decorators and paperhangers, and minor contractions were indicated by carpenters and joiners, and electrical workers. Some improvement in the situation was apparent in the building and construction trades during July from the corresponding month last year when 29·2 per cent of inactivity was recorded. Responsibility for this advancement rested chiefly with bricklayers, masons and plasterers, carpenters and joiners, and tile layers, lathers and roofers, who reported much better conditions during the month reviewed, though contributing gains, on a smaller scale, were noted by granite and stonecutters, and plumbers and steamfitters. On the other hand, steam shovelmen, bridge and structural iron workers, and painters, decorators and paperhangers were decidedly less active than in July, 1938, and employment for hod carriers and building labourers was considerably curtailed. Electrical workers showed but a slight drop in work afforded.

Returns were tabulated from 813 unions of transportation workers at the close of July, combining a membership of 64,788 persons, 3,771 or 5·8 per cent of whom were reported idle, contrasted with 6·3 per cent in June. Steam railway employees, whose returns constituted nearly 79 per cent of the entire group membership reported, and teamsters and chauffeurs registered slight gains in activity during July. Among navigation workers, however, considerable slowing up in work afforded was manifest. Street and electric railway employees were quite busily engaged, as in June, the same level of activity being shown in each month. Heightened employment was reflected also in the transportation industries, as a whole, from July last year, when 7·1 per cent of idleness was recorded. In this comparison steam, and street and electric railway employees showed slight betterment in conditions. Navigation workers suffered substantial losses in work available and among teamsters and chauffeurs there was some employment cessation.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Retail shop clerks showed little variation in conditions in the three months used for comparative purposes, the 6 associations making returns, with 1,794 members indicating an unemployment percentage of only 0·2, in comparison with 0·1 per cent of idleness in June and with a fully employed situation in July last year.

There was a nominal rise in activity for civic employees during July from the previous month according to the returns tabulated from 80 associations with a total of 9,578 members. Of these, 81 or 0·8 per cent were without work on the last day of the month, contrasted with 1·5 per cent in June. In July a year ago only 0·4 per cent of idleness was recorded.

During July employment in the miscellaneous group of trades showed a slight falling off from the previous month, is manifest by the reports tabulated from 137 local unions with 10,940 members. Of these, 689 or a percentage of 6·3 were idle at the end of the month, compared with 5·3 per cent in June. The situation, however, showed some improvement from July last year, when 8·0 per cent in inactivity was reported. Theatre and stage employees indicated a moderate gain in work available from June, while among stationary engineers and firemen, hotel and restaurant employees, and unclassified workers the level of activity was somewhat reduced. Barbers reported the same percentage of idleness as in June. When contrasting with the returns for July last year a greater volume of work was afforded hotel and restaurant employees, and unclassified workers during the month reviewed, the changes being rather noteworthy, and fractional gains only were recorded by barbers and theatre and stage employees. Stationary engineers and firemen alone showed some employment curtailment.

Fishermen were considerably better engaged during July than in the previous month, the 6 unions from which reports were compiled, with 2,593 members, showing that 1·6 per cent were unemployed at the end of the month, compared with a percentage of 7·3 in June. Little change was apparent from July last year, though the tendency was toward lessened employment, the percentage of idleness for that month standing at only 0·3.

Lumber workers and loggers indicated a less favourable situation during July from both the preceding month and July a year ago as manifest by the reports tabulated from 5 local unions, comprising a membership of 2,393 persons. Of these, 349 or a percentage of 14·6 were out of work on the last day of the month, in contrast with percentages of 10·1 in June and 8·1 in July last year.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1929 to 1938, inclusive, and also the percentages of unemployment by provinces for July of each year from 1929 to 1936, inclusive, and for each month from July, 1937, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

(3) Employment Office Reports for July, 1939

The volume of business transacted by the offices of the Employment Service of Canada during July, 1939, showed a decline of nearly 8 per cent in the average daily placements when compared with those of June, 1939, but a gain of about one per cent in comparison with the work effected during the corresponding period a year ago. Heavy declines from last month were reported in construction and maintenance, logging and services with moderate losses shown in mining, transportation and trade; however, a very substantial gain was registered in farming and one, not so pronounced, in manufacturing. When compared with July a year ago, all industrial divisions, except construction and maintenance, trade and transportation, recorded increased placements in fairly substantial volume, but this expansion was largely offset by the marked decline in the first named group.

The accompanying chart shows the trend of employment since January, 1937, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be noted from the graph that the curves of vacancies and placements in relation to applications showed little variation throughout the month, the trend being slightly upward during the first half of July and downward during the latter half. At its close, however, the levels reached were about one per cent below those attained at the end of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 57·9 during the first half and 57·0 during the second half of July, 1939, in contrast with ratios of 52·5 and 58·3 during the corresponding periods of 1938. The ratios of placements to each 100 applications during the periods under review were 55·8 and 55·0, as compared with 50·0 and 56·2 during the corresponding month of 1938.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during July, 1939, was 1,327, as compared with the daily average of 1,330 during the corresponding month a year ago and with 1,441 recorded daily in June, 1939.

The average number of applications for employment received daily by the offices of the Service during the month under review was 2,311, in comparison with 2,400 in July, 1938. Applications for work during the preceding month of 1939 averaged 2,612 daily.

The average number of placements made daily by offices of the Service during July, 1939, was 1,281, of which 888 were in regular employment and 393 in work of one week's duration or less, as compared with a total daily average of 1,386 during the preceding month. Placements in July a year ago averaged 1,275 daily, consisting of 820 in regular and 455 in casual employment.

During the month of July, 1939, the offices of the Service referred 33,034 persons to vacancies and effected a total of 32,002 placements. Of these the placements in regular employment were 22,195, of which 17,177 were of men and 5,018 of women, while placements in casual work totalled 9,807. The number of vacancies reported by employers was 23,318 for men and 9,833 for women, a total of 33,151, while applications for work numbered 57,754, of which 42,533 were from men and 15,221 from women. Reports for June, 1939, showed 36,013 positions available, 65,291 applications made and 34,634 placements effected, while in July, 1938 there were recorded 33,246 vacancies, 59,987 applications for work and 31,867 placements in regular and casual employment.

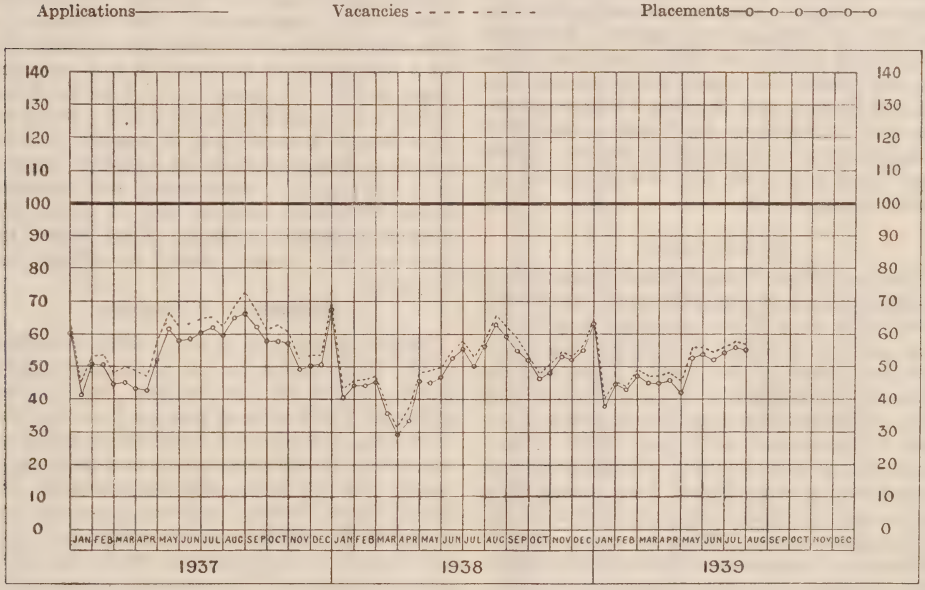
The following table gives the placements effected by the offices of the Employment Service of Canada each year, from January, 1929, to date:

Year	Placements		
	Regular	Casual	Totals
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939 (7 months)	126,274	87,772	214,046

NOVA SCOTIA

During July, vacancies reported to Employment Offices in Nova Scotia were nearly 19 per cent less than in the preceding month and over 14 per cent below the corresponding month of last year. There was a decrease also in placements of over 17 per cent when compared with June and of nearly 13 per cent in comparison with July, 1938. The decrease in placements from July of last year was due to a substantial reduction under construction and maintenance. This loss was partly offset by a gain in logging and small increases in manufacturing and services. There was a small decline in trade and nominal changes, only, in all other groups. Placements by industrial divisions included: logging, 143; farm-

ing, 62; construction and maintenance, 429; and services, 478, of which 393 were of household workers. During the month 516 men and 135 women were placed in regular employment.



NEW BRUNSWICK

Orders received at Employment Offices in New Brunswick during July called for nearly 9 per cent fewer workers than in the preceding month, but over 44 per cent more than during the corresponding month of last year. There was a decrease of nearly 10 per cent in placements when compared with June, but an increase of nearly 45 per cent in comparison with July, 1938. The increase in placements over July of last year was made up of a fairly substantial gain in construction and maintenance and a moderate advance in logging. Minor changes only were reported in all other groups. Industrial divisions in which most of the placements were effected during the month were: logging, 141, construction and maintenance, 392, and services, 533, of which 403 were of household workers. Placements in regular employment numbered 169 of men and 90 of women.

QUEBEC

The demand for workers, as indicated by orders received at Employment Offices in the Province of Quebec during July, was over 19 per cent less than in the preceding month and nearly 9 per cent below the corresponding month of last year. Placements also showed a decrease of 18 per cent when compared with June and of 9 per cent in comparison with July, 1938. There was a large decrease in placements under construction and maintenance when compared with July last year and moderate declines in transportation and trade. These losses were partly offset by gains in all other groups, the largest being in services, manufacturing, logging and farming. Placements by industrial divisions included: manufacturing, 290; logging, 232; farming, 279; construction maintenance, 2,495, and services, 2,736, of which 2,357 were of household workers. During the month 3,402 men and 1,642 women were placed in regular employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

ONTARIO

There was a decrease of over 8 per cent in the number of positions offered through Employment Offices in Ontario during July, when compared with the preceding month, but an increase of nearly 8 per cent in comparison with the corresponding month of last year. Approximately the same percentages of change were reported in placements under both comparisons. Except for a small decline in trade, there were increases in placements in all industrial divisions when compared with July of last year, the most important gains being in manufacturing, services and farming.

Placements by industrial divisions included: manufacturing, 766; logging, 283; farming, 2,726; mining, 113; transportation, 86; construction and maintenance, 4,527; trade, 238, and services, 3,392, of which 2,220 were of household workers. There were 5,681 men and 1,570 women placed in regular employment.

MANITOBA

Positions offered through Employment Offices in Manitoba during July were over 38 per cent higher than in the preceding month and nearly 47 per cent above the corresponding month of last year. There was an increase also in placements of nearly 37 per cent when compared with June and of over 49 per cent in comparison with July, 1938. With the exception of a nominal decline in trade, all industrial divisions participated in the increase in placements over July of last year, the most important being in construction and maintenance, while moderate improvement was reported in farming and logging. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 82; logging, 175; farming, 1,909; construction and maintenance, 1,402 and services, 678, of which 579 were of household workers. There were 3,444 men and 380 women placed in regular employment.

SASKATCHEWAN

Positions offered through Employment Offices in Saskatchewan during July were over 27 per cent higher than in the preceding month, but over one per cent less than during the corresponding month of last year. There was an increase in placements of over 21 per cent when compared with June and of nearly 2 per cent in comparison with July, 1938. Placements in construction and maintenance and manufacturing were higher than during July a year ago, but there were declines in farming, logging and mining. None of these changes, however, was important. Placements by industrial divisions included: manufacturing, 59; farming, 993; construction and maintenance, 230 and services, 775, of which 397 were of household workers. Placements in regular employment numbered 1,320 of men and 420 of women.

ALBERTA

Employment opportunities, as indicated by orders received at Employment Offices in Alberta during July, were nearly 25 per cent better than in the preceding month, but over 4 per cent below the corresponding month of last year. There was an increase of nearly 26 per cent in placements when compared with June, but a decrease of nearly 4 per cent in comparison with July, 1938. A fairly substantial placement gain in logging and a moderate increase in services over July of last year were more than offset by declines in all other groups. The largest decreases were in construction and maintenance, farming and manufacturing. Industrial divisions in which most of the placements were effected during the month were: logging, 241; farming, 796; construction and maintenance, 184 and services, 633, of which 481 were of household workers. Regular placements numbered 1,212 of men and 434 of women.

BRITISH COLUMBIA

There was a decrease of over 37 per cent in the number of positions offered through Employment Offices in British Columbia during July when compared with the preceding month and of nearly 36 per cent in comparison with the corresponding month of last year. Similar percentages of loss were reported in placements under both comparisons. The decrease in placements from July, 1938, was entirely due to a decline under construction and maintenance, as with the exception of a nominal loss in trade, all other groups showed improvement. The largest increase was in logging. Placements by industrial divisions included: logging, 624; farming, 277; construction and maintenance, 1,234 and services, 768, of which 534 were of household workers. There were 1,433 men and 347 women placed in regular employment.

Movement of Labour

During the month of July, 1939, the offices of the Employment Service of Canada affected 22,195 placements in regular employment, 12,812 of which were of persons for whom the employment located was outside the immediate district of the offices at which they were registered. Of the latter, 208 were granted the Employment Service reduced transportation rate, 193 travelling to points within the same province as the despatching office and 15 to other provinces. The reduced transportation rate which is 2·5 cents per mile with a minimum fare of $4 is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Offices in Ontario during July issued 142 certificates for reduced transportation, all for provincial centres. For employment within their respective zones, the Port Arthur Office transferred 84 bush workers, 15 construction workers, 3 mine employees, 2 hotel workers, one restaurant cook, one choreman and one cookee; the Fort William Office, 22 bush workers, one clerk and one waitress and the

* 1 Placement by offices since closed.

Sudbury Office, one labourer. Travelling from North Bay, 4 carpenters went to Timmins and one edgerman, one cook and one cookee to Sudbury. The Brantford and Hamilton Offices each sent one metal pattern maker to Ottawa. Bound for the Timmins zone, one plumber was conveyed at the reduced rate from Ottawa. In Manitoba during July, 18 persons took advantage of the Employment Service reduced transportation rate, 4 of whom went to provincial employment and 14 outside the province. All of these travelled on certificates secured at Winnipeg. Within the province the transfers were of 3 farm hands and one bushman going to centres in the Winnipeg zone. The movement to other provinces consisted of the despatch of 8 bush workers, 2 miners, one cook and one creosote worker to Port Arthur and of one farm hand and one farm domestic to Yorkton. Transfers at the reduced rate effected in Alberta during July were 42 in number, 41 of which were provincial and one interprovincial. The latter was of a highway construction cook proceeding to North Battleford on a certificate received at Edmonton. Provincially from Edmonton one farm hand was destined to Drumheller and 10 oil refinery workers, 7 highway construction workers, 10 mine employees, 4 transportation employees, 2 cooks, 2 farm hands, one diesel operator, one saw mill worker, one housemaid and one store clerk to various sections of the Edmonton zone. The Calgary Office despatched one farm hand to a point within its own zone. Workers benefiting by the Employment Service reduced rate in British Columbia during July numbered 6, these going to provincial situations. All travelled from Vancouver, from which centre one plasterer, one waitress and one cook went to Penticton; one mine labourer to Kamloops and one radio operator and one hotel cook to employment within the Vancouver zone.

Of the 208 persons who profited by the Employment Service reduced transportation rate during July, 112 journeyed over the Canadian National Railways, 89 over the Canadian Pacific Railway, 4 over the Temiskaming and Northern Ontario Railway, 2 over the Pacific Great Eastern Railway and one over the Northern Alberta Railway.

(4) Building Permits Issued in Canada During July, 1939

The value of the building represented by the permits taken out in 58 cities during July stood at $6,535,813, a seasonal decline of $1,296,429, or 16·6 per cent as compared with the revised total of $7,832,242 for June, 1939. However, there was an increase of $420,970, or 6·9 per cent in the more significant comparison with the July, 1938, aggregate of $6,114,843.

The building authorized in the first seven months of the present year was estimated to cost $33,647,625; this was 4·9 per cent higher than the aggregate of $32,067,412 reported in the period January-July, 1938, and was also higher than in the first seven months of any other year since 1931. The cumulative total for the January-July period in each of the last eight years has been very much lower than in earlier years of the record, being also considerably less than the nineteen-year average of $67,390,114. The wholesale prices of building materials have recently been lower than in the same months of either 1937 or 1938; while they have been rather higher than in January-July of the six years immediately preceding, they continue below the average for this period in the years since 1919.

Some 50 cities furnished detailed statistics for July, 1939, showing that they had issued more than 700 permits for dwellings valued at over $2,250,000, and about 2,400 permits for other buildings estimated at some $3,395,000. In June, authority was given for the erection of about 800 dwellings and 3,000 other buildings, estimated to cost approximately $2,200,000 and $4,700,000, respectively.

As compared with June, 1939, there was an increase of $25,250, or 279 per cent, in Prince Edward Island, and of $146,050, or 97·8 per cent, in Saskatchewan. The remaining provinces recorded declines, of which those of $348,091, or 81·7 per cent, in New Brunswick and $534,285, or 66·8 per cent, in Manitoba, were most pronounced.

Increases over July, 1938, were reported in Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario, Saskatchewan and Alberta. The largest gain was that of $917,876, or 87·1 per cent, in Quebec, while the greatest reduction was that of $789,853, or 45·5 per cent, in British Columbia.

Of the four largest cities, Montreal and Toronto showed improvement in July, 1939, as compared with either June, 1939, or July, 1938, but in Winnipeg and Vancouver, there were declines in both comparisons.

Of the other centres, Charlottetown, Halifax, Fredericton, Quebec, Westmount, Belleville,

Guelph, London, Oshawa, Stratford, St. Catharines, St. Thomas, Windsor, Brandon, Moose Jaw, Regina and Medicine Hat showed gains over the preceding month and also as compared with the same month of last year.

Table I gives the value of the building authorized by 58 cities during July, and in the first seven months of each year since 1926, as well as index numbers for the latter, based upon the January-July total in 1926 as 100. The average index numbers of wholesale prices of building materials in the first seven months of the years since 1926 are also given (1926 average = 100).

TABLE I

Year	Value of permits issued in July	Value of permits issued in first seven months	Indexes of value of permits issued in first seven months (1926=100)	Average indexes of wholesale prices of building materials in first seven months (1926=100)
	$	$		
1939	6,535,813	33,647,625	34·5	87·5
1938	6,114,843	32,067,412	32·9	90·2
1937	5,529,295	33,586,237	34·5	95·9
1936	5,029,802	23,352,686	24·0	84·5
1935	4,396,402	29,036,913	29·8	81·8
1934	3,257,470	13,668,847	14·0	82·8
1933	2,180,403	12,496,302	12·7	76·5
1932	4,412,169	28,753,213	29·5	78·1
1931	11,042,609	69,993,717	71·8	83·3
1930	15,824,781	101,238,766	103·9	94·2
1929	22,702,584	147,311,851	151·2	99·2
1928	25,761,956	127,798,943	131·2	96·2
1927	16,369,195	97,211,914	99·8	96·1
1926	18,683,415	97,443,834	100·0	100·8

The aggregate for the first seven months of this year, as already mentioned, was 4·9 per cent higher than the corresponding figure for 1938, and was also slightly greater than in 1937, when the building authorized was higher in value than in any preceding year since 1931. The average index number of wholesale prices of building materials was rather lower than in the same months of 1937 or 1938; it was also below the average for the last nineteen years, although it exceeded the January-July figure in any of the years 1931-1936.

Table II gives the value of the building permits issued by 58 cities during July, 1939, and July, 1938; the 35 cities for which records are available since 1910 are marked thus "*".

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF AUGUST, 1939

Reports of the Superintendents of the Employment Service of Canada

THE employment situation at the end of August was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritimes were busy harvesting their crops, but scarcity of rain had retarded the growth of vegetables. Logging was confined chiefly to pulp-wood cutting and on the whole was very quiet. In some districts forestry officials had ordered all men out of the woods in order to prevent forest fires. Cod, haddock, salmon and lobsters were plentiful, other catches of fish, fair. Mines in the New Glasgow area operated from one to six days per week, while those in Cape Breton and vicinity worked from two and one-half to six days. Manufacturing plants were operating satisfactorily and no idleness was reported by the iron and steel group. All building construction was progressing steadily and the Department of Highways had many men engaged on road construction. Passenger and freight traffic was heavy and wholesale and retail trade better, with some improvement, likewise, shown in collections. In the Women's Division many requests were received for regular household help and for charwomen, with placements made accordingly.

The demand for farm help in the Province of Quebec was heavy and many young men obtained employment of this kind. A certain amount of logging was in progress, but the greater volume of bush work had not yet started. In Hull, manufacturing industries were fairly active and at Chicoutimi, plants were producing at eighty per cent of their capacity. Montreal reported sugar refineries working full time, and boot and shoe concerns busier, while clothing there was steady and textiles fair. At La Tuque and Val d'Or conditions were normal, but at Sherbrooke the production of some industries had been curtailed. Considerable improvement was noted in building construction and many skilled workers were thus employed. Road construction and maintenance had given work to a number of men; however, in some parts of the province this was about finished. Transportation and services were very active, but trade rather slow.

Harvesting in Ontario was nearing completion; nevertheless the call for farm help continued fair and all requirements met. Casual work for fruit pickers in the Niagara-St. Catharines district was increasing, with a surplus of workers on hand. Tobacco priming and curing also was well under way. Logging was quiet and mining likewise, except at Timmins, where some activity in this line was reported. No marked change in the general industrial situation was noted. Fruit and vegetable canneries were working overtime; textiles, boots and shoes, planing mills and foundries also were busy, but some other concerns, including motor plants, still remained slack. A number of boys and girls had been placed as apprentices in various industries under the Dominion-Provincial Youth Training Plan. Building construction throughout the province was progressing steadily and in many cities the volume of work exceeded that of the corresponding period a year ago. Highway construction, likewise, continued and while some of the roads were gradually nearing completion, other projects of like nature were just starting. Railway crews and navigation remained much the same. The steady demand in the Women's Division for experienced domestics continued, with a definite shortage reported of fully qualified workers. Day work was fair and some placements of women and girls had been made in paper, textile, drug, metal, rubber and canning factories.

Threshing in the Prairie Provinces was in full swing, with wages averaging $2.50 per day. An increasing number of combines had cut down considerably the demand for stookers and threshers, but experienced combine men were easily placed. Applicants for field work, however, were plentiful and each district seemed to have its quota of men seeking work. Logging and mining were quiet and manufacturing only fairly active. Building construction was brisk and highway construction absorbed much surplus labour. Railways also were busy handling the present crop. Trade was fair. Many orders were listed for farm housekeepers and housemaids, but these were difficult to fill; city positions, however, were more readily accepted, although not quite so much work was available for charwomen.

There were few calls for farm help in British Columbia, which was partly accounted for by the fact that farmers were retaining the men they already had, owing to a temporary shortage of experienced hands. A number of transients was applying daily for fruit picking, but hop picking had not yet started. Owing to fire hazard and by order of the Forestry Branch nearly all logging operations were suspended. Sawmills located near timber stands were likewise affected; otherwise the mills were very busy, nevertheless there was little

movement of labour. Mining was slack. All building lines continued active, with tradesmen fairly well employed and highway construction was progressing favourably. Drydocks and shipyards were quiet at Prince Rupert, but were engaged in small repair jobs at Victoria. All waterfronts were active. Business was steady and transportation recorded improvement. Placements of women were made in household service, trade and in hotels, although a shortage of trained domestics was still noticeable.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, August, 1939, summarized the employment situation as follows:—

Employment showed a further improvement between 12th June and 10th July. The improvement was most marked in the distributive trades, the cotton and wool industries, textile bleaching, dyeing and finishing, engineering, ship building and repairing, the iron and steel industries and metal goods manufacture, hotel and boarding house service, the transport industries, printing and bookbinding, bread, biscuit, cake, etc. making and certain other food industries, agriculture and horticulture, and furniture manufacture. On the other hand, employment declined in the tailoring and dressmaking and millinery industries.

It is provisionally estimated that at July 10, 1939, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,912,000. This was 102,000 more than at June 12, 1939, and 656,000 more than at July 18, 1938.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at July 10, 1939, was 8·8 compared with 9·4 at June 12, 1939, and 12·5 at July 18, 1938. For persons insured under the general scheme the corresponding percentages were 9·1 at July 10, 1939, 9·7 at June 12, 1939, and 12·9 at July 18, 1938. For persons within the agricultural scheme the percentages were 3·9, 4·2 and 4·3 respectively.

At July 10, 1939, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,013,636 wholly unemployed, 190,364 temporarily stopped, and 52,424 normally in casual employment, making a total of 1,256,424. This was 93,155 less than at June 12, 1939, and 516,692 less than at July 18, 1938.

The total of 1,256,424 persons on the registers in Great Britain, at July 10, 1939, included 634,151 persons with claims admitted for insurance benefit, 462,474 with applications authorized for unemployment allowances, 28,015 persons with applications for insurance benefit or unemployment allowances under consideration, and 131,784 other persons, of whom 27,449 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at July 10, 1939, was 1,326,134, as compared with 1,417,239 at June 12, 1939, and 1,875,083 at July 18, 1938.

United States

In a press release issued on August 25, Miss Frances Perkins, United States Secretary of Labour announced that employment in non-agricultural industries in July showed but little change from the June level. The decline in total non-agricultural employment was due, it was stated, in large measure to the seasonal midsummer curtailment in retail trade employment. While more than 100,000 workers were released from jobs in retail establishments in July, the current decline in retail employment is less than the average decrease for the preceding 10 years. Anthracite and metal mines also reported decreased employment and several of the service industries reported seasonal recessions. These losses were offset to a large extent by employment gains in construction, transportation, and public utilities with the result that the net employment decline was 30,000.

The following paragraphs taken from the official press release indicate the employment situation in the United States to be as follows:—

Factory employment remained virtually unchanged over the month interval, the preliminary indexes indicating a decrease of 0·1 per cent, or 5,000 workers. This loss was slightly less than the usual June-July decrease in factory employment. Employment in wholesale trade establishments also showed but slight change from the preceding month's level, a decline of less than one-tenth of 1 per cent. Small gains were reported in bituminous coal mining, laundries, and insurance. Class I steam railroads, according to a preliminary report of the Interstate Commerce Commission, showed a gain of 8,700 workers from June to July.

Compared with July, 1938, there were approximately 1,200,000 more workers em-

ployed in non-agricultural occupations in July, 1939, than a year ago. These figures do not include employees on Works Progress Administration and National Youth Administration projects nor enrollees in the Civilian Conservation Corps.

Factory Employment.—Factory employment declined 0·1 per cent, or 5,000 wage earners in July and weekly pay rolls decreased 2·4 per cent, or $4,000,000. The usual changes in July are —0·2 per cent for employment and —3·7 per cent for pay rolls. Employment gains were reported for 50 of the 87 industries covered and pay-roll increases were shown by 34 industries. The July, 1939, employment level for all manufacturing industries combined was 10·5 per cent above that of July, 1938, and the pay-roll level was 18·7 per cent higher. Taking the 3-year average 1923-25 as 100, the current indexes were 90·5 for employment and 83·8 for pay rolls.

Employment in the durable goods group of industries was 2·1 per cent lower than in the preceding month, but 16·8 per cent higher than in July of last year. The corresponding changes for the non-durable goods group were gains of 1·5 per cent and 6·0 per cent. Pay rolls in the durable goods group were off 6·1 per cent in comparison with last month, and up 30·4 per cent as compared with July of last year. For the non-durable goods group there were pay-roll gains of 1·2 per cent and 9·5 per cent, respectively, over the month and year intervals.

Firms manufacturing rubber footwear reported a contra-seasonal decline of 19·4 per cent, or 2,800 workers. Larger than seasonal declines were reported by establishments manufacturing automobiles, bodies, and parts (17·5 per cent, or 64,500 workers), agricultural implements (4·9 per cent, or 2,500 workers), wirework (8·6 per cent, or 2,300 workers), and electric- and steam-railroad cars (8·5 per cent, or 1,700 workers).

The employment gain of 7·3 per cent in aircraft factories continued the unbroken series of monthly increases which began in October of last year. The July employment index stood nearly two and a half times above the 1929 level. Employment in the shipbuilding industry, in which a succession of monthly increases has been reported since August of last year, showed a slight recession from the June level while the July employment index for the machine-tool industry (139·6 per cent of the 1923-25 average) reached the highest level since February, 1938.

Non-manufacturing Industries.—In retail trade the employment decline of 3·5 per cent since June was slightly less than the average mid-summer loss shown in the last 10 years. Employment in retail trade in July was 2·8 per cent above the level of a year ago.

Employment in wholesale trade in July remained at virtually the same level as in the preceding month. The decrease of less than one-tenth of 1 per cent in employment over the month interval was coupled with a gain of 0·2 per cent in pay rolls. Compared with July, 1938, employment was 1·5 per cent higher in July, 1939, and pay rolls have increased 3·2 per cent.

A contra-seasonal employment increase of 2·6 per cent was reported in bituminous coal mines. Pay rolls, however, declined by 4·6 per cent, reflecting decreased production and shut-downs for the July 4 holiday. Anthracite mines curtailed the number of their workers by 12·7 per cent, a slightly greater-than-seasonal loss. Pay rolls in this industry declined 30·2 per cent. Employment in metal mines decreased 4·1 per cent and pay rolls were reduced 15 per cent.

Employment in Private Construction.—Employment in private building construction showed an increase of 4·6 per cent from June to July, according to reports from 13,317 builders and contractors employing 131,773 wage earners in July. Corresponding pay rolls increased 4·8 per cent.

Employment on Public Works.—Largely because of the discharge of workers employed for a period of 18 months or more on work relief projects, employment on projects operated by the Work Projects Administration declined 294,000 from June leaving 2,144,000 employed in July. Employment on these projects was 823,000 less than in July, 1938. Pay-roll disbursements of $122,000,000 in July were $11,241,000 less than in June and $29,394,000 less than in July, 1938. There were also decreases in employment on Federal projects under the Work Projects Administration and on work projects of the National Youth Administration. There was no employment on Student Aid projects during the month of July.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the Labour Gazette for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages Scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreement with the provinces which are also assisted by grant of public funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the

custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

NATIONAL HARBOURS BOARD

Dredging work in Sand Point Basin, Saint John Harbour, N.B. Name of contractors, St. John Dry Dock and Shipbuilding Co., Ltd., Saint John, N. B. Date of contract August 9, 1939. Amount of contract, $48,229.50 approximately. A fair wages schedule was included in the contract as follows:—

	Per month with bd. & lodging
Dredge Crew (Dipper, Clam or Bucket ladder).	
Engineer Master	$175 00
Mate	100 00
Chief Engineer	150 00
Second Engineer	125 00
Ladderman	75 00
Oiler	65 00
Fireman	65 00
Deckhands	50 00
Cook-first	75 00
Cook-second	50 00
Tug Crew:	
Captain	150 00
Mate	100 00
Engineer	125 00
Fireman	65 00
Deckhands	50 00
Cook	70 00
Navigable Barge or Scow:	
Captain	150 00
Mate	100 00
Engineer	125 00
Fireman	65 00
Deckhands	50 00
Cook	70 00
Scowman	50 00

	Per month with bd. & lodging
Derrick Scow:	
Operating Engineer	115 00
Fireman	65 00
Deckhands	50 00
Current hours for all above mentioned crews.	

NOTE.—$10.00 per month to be allowed for sleeping accommodation ashore if sleeping accommodation is not provided on floating equipment.

	Per hour
Boatmen (rowboats)	$0 40
Electricians	0 65
Labourers	0 40
Motor boat operators	0 45
Motor truck driver	0 45
Motor truck driver and truck	1 45
Machinist	0 65
Machinist's helpers	0 45
Pipe fitters (surface, temporary work)	0 55
Plumbers and steamfitter	0 70
Welders and burners (acetylene or elec.)	0 65
Watchmen	0 35

Reconstruction of the timber deck of No. 1 Jetty Vancouver Harbour, B.C. Name of contractors, Carter-Halls-Aldinger Co., Ltd., Vancouver, B.C. Date of contract, August 17, 1939. Amount of contract, approximately $46,000.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 75
Blacksmith's helpers	0 50
Boatmen	0 45
Carpenter and joiner	0 90
Compressor operator (gas. or elec.)	0 60
	Per day
Diver (full day's pay to be allowed whether employed full or part time)	20 00
Diver's tender (full day's pay to be allowed whether employed full or part time)	7 00
	Per hour
Driver, horse and cart	0 60
Driver, team and wagon	1 00
Driver	0 45
Electrician (inside wiremen)	1 00
Engineers, operating, steam	0 90
Fireman, stationary	0 50
Hoist runner—tower (gas. or elec.)	0 60
Jack hammer operator	0 55
Labourers	0 45
Engineers, crane (steam, gas., elec.)	0 90
Millwright	0 90
Motor truck driver	0 50
Motor truck driver and truck	1 50
Pipefitter (surface—temporary work)	0 65
Plumbers and steamfitters	1 00
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Pile driver boommen	1 00
Pile driver and derrick foreman	1 25
Pile driver and derrick engineer	1 12½
Pile driver and derrick man	1 00
Pile driver bridgeman	1 00
Pile driver and derrick fireman	0 68¾
Rigger (general)	0 65
Tractor operator	0 75
Welder and burner (acetylene or elec.)	0 75
Wharf and dock builders	1 00
Watchman	0 45

	Per month
Class A: Tugs of Class No. 4 upward	
Captain	$200 00
Engineer	190 00
Class B: Tugs of Class No. 5 and No. 6	
Captain	190 00
Engineer	180 00
Class C: Tugs of Class No. 7 and under	
Captain	180 00
Engineer	170 00
	Per hour
Tug fireman	0 56¼
Tug Deckhand	0 54
Scowman	0 54

DEPARTMENT OF NATIONAL DEFENCE

Construction of an extension to the R. C. R. Garage at Wellington Barracks, Halifax, N. S. Name of contractor, Mr. Bianco, 74 Russell St., Halifax, N. S. Date of contract, August 22, 1939. Amount of contract, $3,144.70. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$ 1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers: Walls	0 80
Cement finishers: Floors	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gas. or Elec.	0 50
Compressor operators (gas. or elec.)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 85
Engineers, operating, steam (single or double drum)	0 65
Engineers on steel erection	0 75
Engineers, crane (steam, gas. or elec.)	0 70
Firemen, stationary	0 45
Hoist operators—tower (gas. or elec.)	0 50
Labourers	0 40
Machinists	0 70
Machinists' helpers	0 45
Motor truck driver	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 60
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 85
Roofers, felt and gravel: patent	0 45
Rodmen, reinforced steel	0 50
Sheet metal workers	0 70
Shovel operators (gas.)	0 85
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Structural steel workers	0 75
Welders and burners on steel erection	0 75
Watchmen	0 35

Construction of a lecture hut at Connaught Rifle Ranges, South March, Ont. Name of contractor, Mr. James A. Tapp, 40 Clarendon Ave., Ottawa, Ont. Date of contract, August

25th. Amount of contract $3,333.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters	$0 85
Cement finishers	0 60
Cement and concrete mixer operators:	
Gas or electric	0 55
Driver	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 80
Electricians (inside wiremen)	0 80
Labourers	0 45
Motor truck drivers	0 50
Motor truck driver and truck	1 45
Painter and glazier	0 65
Plumbers and steamfitters	0 95
Roofers—composition shingle	0 85
Sheet metal workers	0 85
Watchman	0 40

Construction of a float and landing at the Royal Canadian Air Force Station, Trenton, Ont. Name of contractors, Frontenac Construction Co. Ltd., Toronto, Ont. Date of contract, August 16, 1939. Amount of contract, $4,550.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	0 60
Blacksmith's helper	0 45
Compressor operators (gas. or elec.)	0 50
Cement and concrete mixer operators:	
Steam	0 65
Gas. or elec.	0 50
Carpenters and joiners	0 70
Drill runners	0 50
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Labourers	0 40
Motor truck driver	0 45
Motor truck driver and truck	1 45
Powdermen	0 50
Pile driver and derrick foreman	0 75
Pile driver and derrick engineer	0 65
Pile driver and derrick firemen	0 45
Pile driver and derrick labourers	0 45
Pile driver and derrick men (rigging, setting and signalling)	0 55
Tractor operator	0 50
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 50
Watchman	0 35

DEPARTMENT OF PUBLIC WORKS

Construction of alterations and repairs to the R. C. N. V. R. Armoury at Edmonton, Alta. Name of contractor, Mr. Ernest Litchfield, Edmonton, Alta. Date of contract, July 26, 1939. Amount of contract, $13,897.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 90
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 70
Gas. or elec.	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 85
Labourers	0 45
*Lathers, metal	0 80
Lathers, wood	0 80
Mastic floor layers	0 85
Mastic floor rubbers and finishers	0 60
Mastic floor kettlemen	0 60
Mastic floor labourers	0 50
Motor truck drivers	0 50
Motor truck driver and truck	1 50
Ornamental iron workers	0 95
Painters and glaziers	0 75
Painters (spray)	0 85
Plasterers	1 05
Plasterers' helpers (mixing and tempering material)	0 55
Plumbers and steamfitters	1 00
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Roofers, felt and gravel (patent)	0 50
Sheet metal workers	0 90
Structural steel workers	0 95
Terrazzo layers	1 10
Terrazzo finishers and helpers	0 65
Watchman	0 40
*Metal furring, tied-on lath work and attached ceilings	0 90

Construction of an extension to the wharf at Iona, Victoria Co., N.S. Name of contractor, Mr. Ralph M. Hall, Halifax, N.S. Date of contract, July 27, 1939. Amount of contract, approximately $12,625.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboat)	0 35
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Hoist operators (gas. or elec.)	0 45
Labourers	0 35
Motor boat operators	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of two retaining walls and dredging work for channel protection at Pefferlaw River, York Co., Ont. Name of contractors, McNamara Construction Co., Ltd., Leaside, Ont. Date of contract, July 26, 1939. Amount of contract, approximately $16,521.00. The contract for the dredging work contained the General Fair Wages

Clause and the contract for the retaining walls contained a fair wages schedule as follows:—

	Per hour
Boatmen (rowboats)	$0 35
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	14 00
Diver's tender (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Labourers	0 35
Motor boat operators	0 40
Pile driver and derrick engineers	0 65
Pile driver and derrick firemen	0 40
Pile driver and foremen	0 75
Pile driver and derrick labourers	0 40
Pile driver and derrick men (rigging, setting and signalling)	0 50
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Reconstruction of harbour works at Meaford, Ont. Name of contractors, W. G. Campbell Engineering and Construction Co., Ltd., Toronto, Ont. Date of contract, August 12, 1939. Amount of contract, approximately $20,172.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters	$0 60
Cement and concrete mixer operator (gas.)	0 45
Cement finishers	0 55
	Per day
Diver (full day's pay to be allowed whether employed full or part time)	$14 00
Diver's tender (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Driver	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Pile driver and derrick foreman	0 75
Pile driver and derrick engineer	0 65
Pile driver and derrick men (rigging, setting and signalling)	0 50
Pile driver and derrick fireman	0 40
Pile driver and derrick labourers	0 40
Fireman, stationary	0 40
Labourers	0 35
Motor truck driver	0 40
Motor truck driver and truck	1 40
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchman	0 30

Construction of an additional story and enlargement to the lower floor of main barrack building, R. C. M. P., at Rockcliffe, Ont. Name of contractor, Mr. H. Dagenais, Ottawa, Ont. Date of contract, August 16, 1939. Amount of contract, $59,870.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 85
Cement finishers	0 60
Cement and concrete mixer operators:	Per hour
Steam	0 70
Elec	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 80
Electricians (inside wiremen)	0 80
Labourers	0 45
Lathers, metal	0 70
Linoleum layers	0 60
Marble setters	1 00
Marble setters' helpers (all men assigned to help tradesmen)	0 50
Motor truck drivers	0 50
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 65
Plasterers	0 85
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Roofers felt and gravel	0 50
Sheet metal workers	0 85
Stonecutters	0 80
Stonemasons	1 00
Stonemason's helpers (mixing and tempering mortar)	0 50
Structural steel workers	0 80
Terrazzo layers	0 75
Terrazzo finishers and helpers	0 60
Tile setters (ceramic)	1 00
Tile setters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 40
Waxers and polishers (floor)	0 50
Welders on steel erection	0 80

Construction of a float and approach at Marchant Road, Brentwood, B. C. Name of contractor, Mr. R. Bumstead, Vancouver, B.C. Date of contract, August 15, 1939. Amount of contract, approximately $3,749.75. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver foreman	$1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45

Construction of protection work at Pictou Lodge, Pictou Co., N. S. Name of contractors, Donald F. Cantley and Charles Sproull, New Glasgow and Pictou Landing, N. S., respectively. Date of contract, August 10, 1939. Amount of contract, approximately $9,103.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Hoist operators—tower (gas. or elec.)	0 45
Labourers	0 35
Motor truck drivers	0 40
Motor truck drivers and trucks	1 35
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of repairs to breakwater at Shippigan Gully, Gloucester Co., N. B. Name of contractors, LaFlamme and LaFlamme Ltd., Montreal, P. Q. Date of contract, August 11, 1939. Amount of contract, approximately $40,840. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 55
Blacksmith's helpers	0 40
Boatman (rowboat)	0 35
Cement and concrete mixer operator:	
Gas	0 45
Steam	0 60
Compressor operator (gas. or elec.)	0 45
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Driver	0 35
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00
Engineer, operating, steam:	Per hour
Single or double drum	0 60
Three or more drums	0 70
Fireman, stationary	0 40
Labourers	0 35
Motor boat operator	0 40
Machinist	0 60
Machinist's helper	0 40
Pile driver and derrick engineer	0 60
Pile driver and derrick firemen	0 40
Pile driver and derrick labourers	0 40
Pile driver and derrick men (rigging, setting and signalling)	0 50
Pile driver and derrick foreman	0 70
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Welders and burners (acetylene)	0 55
Watchmen	0 30

Wharf replacement work at Port Hood, N. S. Name of contractor, Mr. A. J. Campbell, Inverness, N. S. Date of contract, August 2, 1939. Amount of contract, approximately $15,070.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 55
Blacksmith's helper	0 40
Boatmen (rowboat)	0 35
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Hoist operator (gas.)	0 45
Labourers	0 35
Motor truck driver	0 40
Motor truck driver and truck	1 35
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Reconstruction of wharf at Port St. Francois, Nicolet Co., P. Q. Name of contractor, Mr. Armand Turcotte, Three Rivers, P. Q. Date of contract, August 3rd, 1939. Amount of contract, approximately $41,439.25. A fair wages schedule was included in the contract as follows:—

	Per hour
Boatmen (rowboats)	$0 35
Blacksmith	0 55
Blacksmiths' helpers	0 40
Carpenters and joiners	0 55
Cement and concrete mixer operator:

Construction of a wharf at Goldfields, Sask. Name of contractor, Mr. William C. Wells, Wilkie, Sask. Date of contract, August 4, 1939. Amount of contract, approximately $7,173.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 70
Blacksmith's helper	0 50
Driver, horse and cart	0 60
Driver, team and wagon	0 75
Drivers	0 45
Labourer	0 45
Timbermen and cribmen (measuring, scribing and by use of axe, adze, cutting and fitting timber)	0 60

NOTE: Workmen hired locally are to receive 10 per cent, in excess of the rates specified in this schedule. The contractor shall provide free transportation, sleeping accommodation and meals for all persons taken to the work from outside points, and the full hourly rate of their classification shall be paid while travelling to the work. The same condition shall apply to the outward trip provided, however, that the workman does not voluntarily leave the work before its completion. The contractor shall provide board and lodging and may make a deduction of 80 cents per day for this service in each instance where the workman receives a full day's pay. When work is not available due to circumstances over which the workman has no control no deduction for board and lodging shall be made. The same condition shall apply to teams taken in from outside points, except that no deduction shall be made for board. Should any person taken to the work from an outside point at the expense of the contractor leave the work of his own accord within a period of 30 days the contractor may deduct from wages due such person the actual expense of the inbound trip, provided, however, that the supervising Government Engineer agrees that such person is attempting to take an unfair advantage of the contractor.

DEPARTMENT OF TRANSPORT

Further field development at Intermediate Aerodrome, Stanley, N. S. Name of contractors, Municipal Spraying & Contracting Ltd., Halifax, N. S. Date of contract, July 28, 1939. Amount of contract, $25,392.20. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40

GROUP "A" CONTRACTS

(2) *Dredging Work.*

NOTE.—The labour conditions of each of the contracts referred to under this heading contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour, and also empower the Minister of Labour to deal with any dispute which may arise thereon.

Department of Public Works

Dredging work at Caraquet, N.B. Name of contractors, The Federal Dredging Co., Ltd., Ottawa, Ont. Date of contract, August 11, 1939. Amount of contract, approximately $6,720.

Dredging channel at mouth of River Mattawasaga, Ont. Name of contractor, Mr. Wm. L. Forest, Goderich, Ont. Date of contract, August 10, 1939. Amount of contract, approximately $12,852.

Dredging at the mouth of the Capilano River, Vancouver, B.C. Name of contractor, North Western Dredging Co., Ltd., Vancouver, B.C. Date of contract, August 4, 1939. Amount of contract, approximately $48,186.87.

Dredging Buscomb River, near St. Joachim, Ont. Name of contractors, Chatham Dredging & General Construction Co., Ltd., Chatham, Ont., and Peltier Dredging Co. of Windsor, Ont. Date of contract, August 1, 1939. Amount of contract, approximately $8,380.

Dredging at mouth of the Little River, Essex Co., Ont. Name of contractors, The Chatham Dredging & General Contracting Co., Ltd., and Peltier Dredging Co., Chatham and Windsor, Ont., respectively. Date of contract, August 8, 1939. Amount of contract, $6,960.

Dredging work at Port Rowan, Ont. Name of contractors, The Chatham Dredging & General Contracting Co., Ltd., Chatham, Ont. Date of contract, July 29, 1939. Amount of contract, approximately $11,410.

Dredging at the public wharf at Hudson, P.Q. Name of contractors, Southern Working Ltd., Montreal, P.Q. Date of contract, July 27, 1939. Amount of contract, $8,850.

Dredging work in Fraser River (North Arm), B.C. Name of contractors, British Columbia Bridge and Dredging Co., Ltd., Vancouver, B.C. Date of contract, July 27, 1939. Amount of contract, $95,823.

Dredging work at Kingston, Ont. Name of contractors, Russell Construction Co., Ltd., Toronto, Ont. Date of contract, July 28, 1939. Amount of contract, approximately $16,261.53.

Dredging work at Riverport, N.S. Name of contractors, Beacon Dredging Co., Ltd., Halifax, N.S. Date of contract, July 28, 1939. Amount of contract, approximately $27,980.64.

Dredging work at Oshawa and Port Hope, Ont. Name of contractors, The C. S. Boone Dredging & Construction Co., Ltd., Toronto, Ont. Date of contract, July 21, 1939. Amount of contract, approximately $24,885.

Dredging work at South Baymouth, Ont. Name of contractors, Canadian Dredge & Dock Co., Ltd., Toronto, Ont. Date of contract, July 28, 1939. Amount of contract, approximately $17,645.

Dredging work at Parry Sound, Ont. Name of contractors, Canadian Dredge & Dock Co., Ltd., Toronto, Ont. Date of contract, July 26, 1939. Amount of contract, approximately $7,909.75.

Dredging the lake approach to the eastern channel at Toronto, Ont. Name of contractor, Mr. Wm. L. Forest, Goderich, Ont. Date of contract, July 24, 1939. Amount of contract, approximately $14,280.

Dredging work at Fort William and Port Arthur, Ont. Name of contractors, Consolidated Dredging Ltd., Toronto, Ont. Date of contract, July 22, 1939. Amount of contract, approximately $69,984.

Dredging in canal at Port Sandfield, Ont. Name of contractors, McNamara Construction Co., Ltd. Date of contract, July 22, 1939. Amount of contract, approximately $4,268.

GROUP "B" CONTRACTS

Manufacture and Repair of Equipment, Supplies, Interior Fittings, etc.

Note.—Each of the contracts noted under this heading contains the "B" Labour Conditions referred to in the introduction to this article.

Department of National Defence

DEPARTMENT OF PUBLIC WORKS

Installation of interior fittings in the public building at St. Scholastique, P.Q. Name of contractors, H. Lemelin and Jos. Lacroix, St. Romuald, P.Q. Date of contract, August 14, 1939. Amount of contract, $697.85.

Installation of interior fittings in the public building at Armstrong, B.C. Name of contractors, A. B. Cushing Mills, Ltd., Calgary, Alta. Date of contract, August 11, 1939. Amount of contract, $1,000.

International Survey of Legal Decisions on Labour Law

The International Labour Office, Geneva, has published recently its thirteenth international annual survey of Legal Decisions on Labour Law.

As stated in the preface to the volume, from 1920 onwards the International Labour Office has published in its *Legislative Series* the labour legislation adopted in the different countries. But mere knowledge of the clauses of a law gives no adequate idea of its actual effects, and the wish has repeatedly been expressed that information might also be published concerning the application of these laws by the competent authorities, and particularly by the Courts which deal with labour matters. To meet this wish the International Labour Office has, since 1926, supplemented the *Legislative Series* by an *International Survey of Legal Decisions on Labour Law.*

Indicating the limitations imposed in a survey of labour legislation it is stated: "In the first place, the *Survey* cannot cover the legal decisions of all countries, but must be limited to those countries which, in fact, represent the most important legal systems. Until 1927, the *Survey* contained decisions given on labour law in England, France, Germany and Italy, and since then it has also included the legal decisions of the United States of America. This year, however, the publication of Italian decisions has had to be abandoned.

In its main outline, the classification of the *Survey* is arranged as follows:

- International Labour Law.
- General Principles of Labour Law.
  - Sources of labour law.
    - persons.
  - Application of general legal principles to labour law.
- Occupational Organization.
  - Trade associations.
  - Collective agreements.
  - Collective labour and economic disputes.
  - Procedure for the settlement of collective labour disputes (conciliation and arbitration).
- Organization of Industrial Undertakings.
- Conditions of Employment and Protection of the Individual Worker.
  - Contracts of employment.
  - Conditions of employment of special groups of workers.
  - Wages and salaries.
  - Hours of work.
  - Special protection (women, children, young persons, disabled persons, etc.).
  - Labour inspection, protection of health, safety.
  - Procedure in individual labour disputes and in disputes arising out of the application of protective measures.
- Social Welfare and Insurance.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing—Animal Foods

HAMILTON, ONTARIO.—A CERTAIN DAIRY AND THE INTERNATIONAL UNION OF OPERATING ENGINEERS, LOCAL 700.

This agreement which came into effect July 15, 1938, remains in effect to July 15, 1940.

All engineers employed to be union members.

Hours: 48 per week.

Overtime to be paid at 75 cents per hour.

Wages for engineers: $29 per week from July 15, 1938, to January 15, 1939; $30.50 thereafter for the duration of the agreement.

Vacation: one week's vacation with pay to be given each year to all engineers who have been in the employ of the dairy for more than one year.

Manufacturing—Printing and Publishing

TORONTO, ONTARIO.—DAILY NEWSPAPERS AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL NO. 1, TORONTO.

Agreement to be in effect from June 1, 1938 to May 31, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, April, 1938, page 449, with these exceptions:

Hours: 8 per day, 5 days, a 40 hour week for day work (formerly a 48 hour week); 7½ per night, 5 nights, a 37½ hour week for night work (formerly a 42 hour week). If a man required to work on the sixth day or night because no substitute is available, such work to be done at straight time.

Wages per week for day work: from June 1, 1938 to May 31, 1939, $44 (an increase of 9 cents per hour over the previous rate); from June 1, 1939 to May 31, 1940, $45.50; from June 1, 1940 to May 31, 1941, $47. Wages for night work, $1.50 per week over the day scale. Wages for any foreman or assistant to be negotiated between the employer and the individual but in any case must be higher than the journeymen's scale.

One apprentice allowed to every ten journeymen regularly employed, with a maximum of four apprentices in any one office. All apprentices regularly employed at June 1, 1938 to work 6 days a week and serve at least 5 years. All apprentices employed after June 1, 1938 to work 5 days a week and serve an apprenticeship of 6 years.

Wages per week for apprentices: for those working the 5 day week, from $12 during first year to $32 during sixth year; for those working the 6 day week, from $14.50 during first year to $31 during second half of fifth year.

Service: Custom and Repair

SYDNEY, N.S.—CERTAIN GARAGE AND SERVICE STATION PROPRIETORS AND THE UNION OF AUTOMOTIVE WORKERS (GARAGE AND SERVICE STATION EMPLOYEES), LOCAL INDUSTRIAL UNION NO. 964 OF THE CONGRESS OF INDUSTRIAL ORGANIZATIONS.

Agreement reached following strike which was reported on page 902 of this issue. Agreement to be in effect from August 31, 1939, to August 31, 1941. In case of increases in the cost of living, negotiations will take place for the rearrangement of rates.

Employers recognize the union as a collective bargaining agency for their employees.

Hours (standard): 8 per day, 48 per week.

Overtime: time and one half; double time for work on Sundays and holidays.

Minimum wage rate for helpers: $12 per week for beginners to be adjusted upward according to ability and experience and length of service; for service station employees, $15 per week of 56 hours for beginners, to be adjusted upward for men with experience and ability. During rush periods boys can be hired as apprentices in filling stations at $10 per week for three months, $12 for next three months and then increased to $15 per week.

In case of lay-off due to lack of work, length of service and ability to be the deciding factor.

Collective Labour Agreements Act, Quebec

The following amendments to agreements and repeal of agreement have recently been made obligatory by Orders in Council and are summarized in the next article:

Paper Box (Uncorrugated Paper) Manufacturing Industry, Province of Quebec (amendment).

Building Materials, Province of Quebec (amendment).

Building Trades, Three Rivers (amendment).

Building Trades, Joliette, Montcalm and Berthier Counties (amendment).

Building Trades, Montreal (amendment).

Garage and Service Station Employees, Montreal (amendment).

Shoe Repairers, Montreal (repeal).

Barbers and Hairdressers, Farnham, Cowansville, Bedford and Sweetsburg (amendment).

Barbers, Montreal (amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

ONTARIO

Carpenters, Peterborough (correction).

Barbers, Campbellford.

ALBERTA

Structural Steel Workers, Edmonton.

Taxi Drivers, Edmonton.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the LABOUR GAZETTE, page 503. Amendments to the Act are noted in the LABOUR GAZETTE, June, 1939, page 576. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the amendment of eight agreements, as summarized below and the repeal of one agreement. Requests for the extension of new agreements affecting checkers and longshoremen engaged by steamship companies in the Quebec City harbour were published in the *Quebec Official Gazette,* August 19, and a correction to the request for the extension of the agreement affecting bakers in Montreal was published in the August 5 issue. In addition, Orders in Council were published in the *Quebec Official Gazette,* August 5, amending the constitution and by-laws of certain joint committees, and another Order in Council in the August 19 issue authorizing the levying of assessments by a joint committee, all of which are listed below.

Mining, Non-ferrous Smelting and Quarrying

BUILDING MATERIALS, PROVINCE OF QUEBEC.—See below under: "Manufacturing: Non-Metallic Minerals, etc."

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (UNCORRUGATED PAPER) MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved July 28, and published in the *Quebec Official Gazette,* August 12, amends the previous Order in Council for this industry (LABOUR GAZETTE, May, 1939, page 528) as follows:

Wages: In the wage rates for female employees, wherever the rates "22 to 26 cents" were indicated in zone I, this is changed to "22 to 30 cents"; and wherever the rates "20 to

24 cents" are indicated in zone II, this is changed to "20 to 28 cents"; the words "other help" are substituted for "helpers, apprentices"; foreladies are added at 26 to 35 cents per hour in zone I and at 24 to 33 cents in zone II. In the wage rates for male employees, foremen are added at "45 to 60 cents" per hour in zone I and "40 to 55 cents" in zone II; the words "other help" are substituted for "helpers, apprentices, etc."

It is now provided that where certain operations are not provided for in the wage scale, the joint committee may determine such wage rates.

Manufacturing: Non-metallic Minerals, etc.

Building Materials, Province of Quebec.—An Order in Council, approved July 28, and published in the *Quebec Official Gazette,* August 5, amends the previous Order in Council for this industry (Labour Gazette, June, 1939, page 628), as follows:

In the granite industry, the following two classes are added to the wage scale: journeymen granite cutters working on surfacing machines 70 cents per hour in cities and 60 cents in rural districts; watchmen to be paid $15 per week, with no daily or weekly limitation of hours.

Construction: Buildings and Structures

Building Trades, Three Rivers.—An Order in Council, approved July 28 and published in the *Quebec Official Gazette,* August 5, amends the previous Orders in Council for these trades (Labour Gazette, August, 1938, page 944, May, 1939, page 528 and July, page 728) by adding an additional employer to the parties to the agreement.

Building Trades, Joliette, Montcalm and Berthier Counties.—An Order in Council, approved July 28, and published in the *Quebec Official Gazette,* August 5, amends the previous Orders in Council for these trades (Labour Gazette, June, 1938, page 694 and November, page 1299), but does not affect the summaries as previously given.

Building Trades, Montreal.—An Order in Council, approved July 28, and published in the *Quebec Official Gazette,* August 5, amends the previous Orders in Council for these trades (Labour Gazette, July, 1939, page 729), with this exception:

Sprinkler fitters to be paid 20 cents per hour over their regular rate of 85 cents per hour for all work done beyond a radius of 10 miles from the town in which they are domiciled.

Service: Custom and Repair

Garage and Service Station Employees, Montreal.—An Order in Council, approved July 28, and published in the *Quebec Official Gazette,* August 5, amends the previous Order in Council for these trades (Labour Gazette, June, 1938, page 697), by changing the duration of the agreement to be to September 1, 1939, and thereafter from year to year, subject to notice.

Shoe Repairers, Montreal.—An Order in Council, approved August 9, and published in the *Quebec Official Gazette,* August 19, repeals from August 1, 1939, the Order in Council making this agreement obligatory (Labour Gazette, June, 1938, page 697) and repeals the approval of the constitution and by-laws of the joint committee set up for this industry and the authorization of this committee to levy assessments.

Service: Business and Personal

Barbers and Hairdressers, Farnham, Cowansville, Bedford and Sweetsburg.—An Order in Council, approved July 28, and published in the *Quebec Official Gazette,* August 5, amends the previous Orders in Council for these trades (Labour Gazette, June, 1938, page 698 and July, page 801) by defining the territorial jurisdiction as the municipalities of Farnham, Cowansville, Bedford and Sweetsburg and within one mile of their limits.

Barbers, Montreal.—An Order in Council, approved July 28, and published in the *Quebec Official Gazette,* August 5, amends the previous Order in Council for this trade (Labour Gazette, September, 1938, page 1045, November, page 1301, December, page 1424 and April, 1939, page 435), as follows:

Extra employees to be paid 27 cents per hour plus a commission of 10 per cent on gross receipts up to $25 made by such employee in each working week; but if gross receipts exceed $25, he shall be paid the regular journeyman's rate. Manicurists to be paid $7 per week plus 50 per cent commission on all gross receipts over $12 made by such manicurist during the week.

Joint Committees

Amendments to the constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the August 5 issue of the *Quebec Official Gazette:*

Barbers, Montreal (amendment).

Garage and Service Station Employees, Montreal (amendment).

Building trades, Montreal (Amendment).

A notice was published in the *Quebec Official Gazette,* August 19, that authorization was given by Order in Council for the joint committee to levy assessments to an amount not exceeding $6,000, in the following agreement:

Barbers, Montreal.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, May, 1938, page 501, and June, 1939, page 574; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, June, 1938, page 633, and June, 1939, page 567; Nova Scotia, in June, 1936, page 604, and July, 1939, page 671; Saskatchewan, in the issue of June, 1937, page 635, May, 1938, page 507, and June, 1939, page 581. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Similar legislation is in effect in Part II of the Fair Wage Act of Manitoba for certain industries (LABOUR GAZETTE, May, 1938, page 499, and June, 1939, page 570) and in the Industrial Standards Act of New Brunswick, 1939, (for the construction industry), in effect since August 10. Up to the end of August, however, no schedules had yet been made obligatory in these two provinces.

Ontario

Construction: Buildings and Structures

CARPENTERS, PETERBOROUGH.—The Order in Council which was summarized in the LABOUR GAZETTE, August, page 863, was corrected in the issue of August 19, this correction not affecting the summary as given in the LABOUR GAZETTE.

Service: Business and Personal

BARBERS, CAMPBELLFORD.—An Order in Council, dated August 18, and summarized in *The Ontario Gazette*, August 26, (corrected in the September 2 issue) makes binding the terms of a schedule of wages and hours for barbers in the town of Campbellford, from September 5, 1939 "during pleasure".

Hours: to be the hours during which barber shops are permitted to be open by municipal by-law. No work on Sundays, on eight specified holidays, nor after 12.30 p.m. on Wednesdays from May to October inclusive, except the Wednesday of a week in which one of the holidays occurs.

Minimum wage rates: for those given full time employment on a straight salary, $18 per week; those given full time employment on a percentage or commission basis, $12.50 per week plus 65 per cent of proceeds in excess of $20 from the work of the employee; those working four hours per day or less from Monday to Friday inclusive and all day or less on Saturday, $7.50 per week, plus 65 per cent of the proceeds in excess of $12.50 from the work of the employee; those working on Saturdays or the day before a holiday and on the previous evening only, $5 per week plus 65 per cent of the proceeds in excess of $7.50 from the work of the employee; those working only on Saturday or the day before a holiday, $4 per day or part thereof plus 65 per cent of proceeds in excess of $6 from the work of the employee; those working on days other than Saturdays or the day before a holiday $2.50 per day or part thereof plus 65 per cent of proceeds in excess of $4 from the work of the employee.

No deduction may be made from wages for materials supplied, laundry service or operating expenses of any kind.

A scale of minimum charges for each operation is included in the schedule.

Alberta

Construction: Buildings and Structures

Structural Steel Workers, Edmonton.—An Order in Council, dated August 16, and published in *The Alberta Gazette,* August 31, makes binding the terms of a schedule governing the structural steel industry in the city of Edmonton and within 25 miles of its main post office, from September 10, 1939, to September 9, 1940, or "during pleasure".

Hours: 8 per day, 4 on Saturdays, a 44 hour week. For work on night shifts, 8 hours' pay for 7 hours' work.

Overtime: time and one half. Work on Sundays and statutory holidays, double time.

Minimum wage rate for structural steel workers: 95 cents per hour.

One apprentice allowed to each five steel workers on the erection of steel; one apprentice to two journeymen on ornamental work and/or one apprentice to each riveting crew.

Wage for apprentices: 60 cents per hour.

Transportation and Public Utilities: Local Transportation

Taxi Drivers, Edmonton.—An Order in Council, dated August 16, and published in *The Alberta Gazette,* August 31, makes binding the terms of a schedule governing the taxi livery industry in the city of Edmonton and within ten miles of its main post office, from September 10, 1939, to September 9, 1940, or "during pleasure",

Hours: 11 per day, 6 days per week, a 66 hour week, the daily hours to be worked during 12 consecutive hours with one hour rest period each day. Temporary chauffeurs to be permittted to work on 7 days of any one week provided the total hours worked in such week do not exceed 40 hours.

Wages: from date schedule went into effect to September 30, 1939, and also from April 1, 1940 to September 30, 1940, $12.50 per week plus 25 per cent commission on all receipts in excess of $50 per week; from October 1, 1939, to March 31, 1940, $15 per week plus 25 per cent commission on all receipts in excess of $60 per week. Temporary chauffeurs if called for a half day or less to be paid a minimum of $1.25; if called for one day or less but more than one half day, to be paid a minimum of $2.25. If employed for longer than one day, to be paid pro rata of the regular rates.

The number of spare or part time chauffeurs in any one business may not exceed 20 per cent of the number of regularly employed chauffeurs, unless less than five employed, when one part time chauffeur may still be employed.

All employers paying a higher rate of wages than the above may not reduce such wage rates, and all employers working their employees less than 66 hours per week may not increase such lesser hours.

Company Plans for Employee Promotions is the title of a report published recently by the Industrial Relations Section, Department of Economics and Social Institutions, Princeton University, New Jersey.

The report gives a brief analysis of promotional programs in representative companies "as a means," it is stated, "of assisting those concerned in the formulation of industrial relation policies."

In a foreword to the report it is stated that "It is probable that in many companies, the depression of the 1930's will leave a gap in the upward flow of supervisory and executive material for many years to come. The filling of this gap will in any case be difficult, since seasoned supervision cannot be produced by hot-house methods. However, carefully determined lines of promotion which will afford the maximum of experience in the minimum of time will serve to reduce the gap materially. Sound use of college material may likewise expedite readjustment.

"Regardless of the extent or pace of business recovery, present-day problems require a degree of versatility and understanding in management which past promotional procedures have not always assured. The qualifications for foremanship or supervision have become more exacting with the increasing importance of group relations and labour legislation. To develop men who can meet these qualifications, requires a carefully planned co-ordination of selection, training, rating, and promotional methods."

The report is divided into five main sections under the following headings: Introduction, General Procedures in Promotional Programs, Training for Promotion, Publicity on Promotional Policies, Opportunities and Evaluation. In appendices to the report the promotional programs of three companies are given.

PRICES RETAIL AND WHOLESALE IN CANADA, AUGUST, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight, the cost per week of a list of a staple foods, fuel and rent entering into a family budget being somewhat higher than in the previous month due to an increase in the cost of foods while the Dominion Bureau of Statistics weekly index number of wholesale prices continued downward during the first part of the month and then advanced and was slightly higher at the end of the month than at the beginning due mainly to advances in the prices of certain farm products and non-ferrous metals.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.16 at the beginning of August as compared with $8.07 for July. Eleven commodities in the list were higher than in the previous month, nine were lower and nine showed no change. Such changes as occurred were slight, the most important being increases in the cost of eggs and mutton and in potatoes with the marketing of the new crop while beef, lard, butter and evaporated apples declined. Comparative figures for the cost of this list of foods for certain other dates are $8.81 for August, 1938; $8.80 for August, 1937; $8.17 for August, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.63 for August, 1929. Including the cost of fuel and rent with that of foods the total cost of the list was $17.02 at the beginning of August as compared with $16.93 for July; $17.70 for August, 1938; $17.48 for August, 1937; $16.72 for August, 1936; $15.41 for June, 1933 (the low point in recent years); $21.90 for August, 1929; $20.88 for August, 1922; $26.92 for July, 1920 (the post war peak); and $14.41 for August, 1914. In fuel anthracite coal was slightly lower while no changes were reported in rent.

In wholesale prices the Dominion Bureau of Statistics weekly index number for the week ended August 18 was 71·9 the lowest point recorded since May, 1936. Some advance occurred before the end of the month the index being 72·8 for the week ended September 1 as compared with 72·1 for the week ended July 28 and 73·3 for the week ended June 30. The latest figures available on a monthly basis are for July when the index number was 72·6 as compared with 76·0 for August, 1938; 85·6 for August, 1937; 76·1 for August, 1936; 63·5 for February, 1933 (the low point during recent years); 98·4 for August, 1929; 97·1 for August, 1922; 164·3 for May, 1920 (the post war peak); and 66·1 for August, 1914. The slight decline during the first half of the month under review was due mainly to lower prices for grains, livestock, eggs, vegetables and coal and the later advance was due to higher prices for grains, flour, milk, eggs, raw cotton, raw wool and copper. In the grouping according to chief component materials the Vegetable Products group, the Textile Products group, the Wood Products group and the Non-Ferrous Metals Products group were all higher at the end of August than at the end of July while the Animal Products group and the Non-Metallic Mineral Products group were somewhat lower.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of August of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine

(*Continued on page 962*)

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA) OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantitie of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended September 1, 1939; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(*Continued from page 954*)

staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is cal-

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18¼%; Clothing, 18¼%; Sundries, 20%.

culated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion, average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

Beef prices changed little during the month but in the main moved slightly downward. Sirloin steak averaged 28 cents per pound in August as compared with 28·3 cents in July and 25·7 cents in January. Mutton was higher in many localities the Dominion average price being up from 23·5 cents per pound in July to 24·6 cents in August. Breakfast bacon averaged 29·9 cents per pound in August, 30·2 cents in July and 36·3 cents in August, 1938. The price of lard continued gradually downward the Dominion average price being 11·3 cents per pound as compared with 11·6 cents in July and 15·3 cents in August, 1938. The price of eggs advanced in most localities fresh grades being up in the average from 27·1 cents per dozen in July to 30·3 cents in August. Prices of this commodity were considerably lower in the Prairie provinces than elsewhere in the Dominion. No increases were recorded in the price of milk. The price of creamery butter also was unchanged from the level of the previous month at 26·1 cents per pound as compared with 29·8 cents in August, 1938. The price of flour has been unchanged in the average for the last four months at 2·9 cents per pound. Onions declined 1 cent per pound the Dominion average price being 4·9 cents per pound. Potatoes averaged $1.88 per hundred pounds as compared with $1.69 in July. The average price of United States anthracite coal declined from $14.17 per ton to $14.10. No changes are reported in rent.

The following are the prices per ton reported for Welsh coal "cobbles" and "French nut": Halifax, $15.50; Charlottetown, $13.50-$14; Moncton, $16; Saint John, $14; Quebec, $13.50; Three Rivers, $15 and $14; Sherbrooke, $14.75; St. Hyacinthe, $14.50; Thetford Mines, $17.25; Montreal, $14-$14.50 and $14.25-$14.75; Ottawa, $16.25; Kingston, $16; Belleville, $14.50 and $15; Peterborough, $16.25; Oshawa, $15; Toronto, $14.50; St. Catharines, $15; Hamilton, $14.50 and $14; Galt, $16-$16.50; St. Thomas, $16.50; Cobalt, $19.50; Timmins, $19.25; Port Arthur, $17.75; Fort William, $17.75; Winnipeg, $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the July issue of the LABOUR GAZETTE.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number on the base 1930=100, was 98·1 for July showing no change from the figure for the previous month. The index of prices of food and tobacco was 91·2, a decline of 0·8 per cent from the figure for the previous month, a decline of 4·5 per cent in the prices of cereals being only partially offset by increases in the other sub-groups. The index of prices of industrial materials and manufactured goods was 101·7 or 0·4 per cent higher than in June. Compared with the figure for July, 1938, the general index was lower by 2·5 per cent.

The *Statist* index number on the base 1867-1877=100, was 88·7 at the end of July as compared to 90·6 at the end of June, a decline of 2·1 per cent for the month. The foodstuffs index declined 4·8 per cent during the month due to decreases in all its sub-groups. The index of prices of materials declined 0·6 per cent, the most important decrease in a sub-group being one of 2·1 per cent in the prices of textiles. The general index at the end of July, 1938, was 88·7, the corresponding figure for this year being 2·6 per cent lower.

COST OF LIVING.—The Ministry of Labour's index number on the base July, 1914=100, was 155 at the beginning of August, as compared to 106 at the beginning of July. The index of food prices was 137 as compared to 139 the previous month, the fall being due to decreases in the prices of potatoes, flour and bread which were only partially offset by increases in the price of butter, bacon and milk in some districts. The other groups making up the index were unchanged.

France

WHOLESALE PRICES.—The General Statistical Office index number, on the base 1914 = 100, was 677 for July as compared with 685 for June, a decrease of 1·2 per cent for the month. The index of food prices declined from 626 to 613 during the month due to a decrease in the price of vegetable foods which was only partially offset by increases in the other food groups. The index of prices of industrial materials decreased 0·2 per cent, an increase in the minerals and metal group being offset by decreases in the textiles and miscellaneous groups. The index based on gold currency was unchanged at 55.

COST OF LIVING.—The General Statistical Office has compiled a new index of the cost of living in France on the base 1930 = 100, instead of the previous base which was 1914 = 100. A recapitulation of this index for certain dates since 1930 is printed below.

—	Food	Heat and Light	Rent	Clothing	Miscellaneous	General Index
1930—Year	100	100	100	100	100	100
1931—May	102·7	98	102	94·7	99	100·9

India

Wholesale Prices.—The index number of the Labour Office Government of Bombay, on the base July, 1914 = 100, was 101 for May as compared with 100 for April. During the month the index for all foods rose from 102 to 103 while that for non-foods rose from 99 to 100.

Cost of Living.—The official index number of the working class cost of living at Bombay, on the base July, 1933, to June, 1934 = 100, was 104 as compared to 103 the preceding month. The increase was due to a rise in the prices of foodstuffs, the index of which, increased from 110 to 112, the indexes of the other groups being unchanged.

United States

Wholesale Prices.—The Bureau of Labour Statistics index number on the base 1926 = 100 was 75·6 for June as compared to 76·2 for May, a decrease of 0·8 per cent. Decreases were recorded in seven of the ten groups making up the general index, two groups showed increases and one was unchanged. The index of farm prices declined 2·0 per cent while that for fuel and lighting materials declined 1·2 per cent. Changes in the other groups amounted to less than one per cent. The general index was down 3·4 per cent from the corresponding index in 1938.

Cost of Living.—The index number of the Industrial Conference Board on the base 1923 = 100, was 84·9 for July as compared with 84·7 for June. Increases in costs occurred in each of the major groups of expenditures except clothing. The general index for July was 1·8 per cent lower than the corresponding figure in 1938.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Action for Wages under Quebec Minimum Wage Laws

An action for the payment of wages alleged due for time worked in a retail store in Montreal in excess of 48 hours a week was allowed by Mr. Justice Boyer of the Superior Court only for the period from September 15, 1938, to March 16, 1939, when the action was begun. The plaintiff claimed $1,177.94 for the period from April 20, 1936, to November 19, 1938. The wage rate claimed was fixed under the Women's Minimum Wage Act until its repeal on September 1, 1937, and under the Fair Wage Act after that date.

The first statute did not specify any period after which claims of wages could not be made and, in the absence of such provision, the point is governed by Article 2262 of the Civil Code requiring actions for wages due to persons employed in retail stores to be brought within one year. According to a judgment of the Court of King's Bench (*Grover Knitting Mills Ltd. v. Tremblay,* Labour Gazette, 1936, p. 564) the period of prescription begins only at the termination of the engagement since the Women's Minimum Wage Act was repealed from September 1, 1937, any actions for wages due under its authority would be prescribed after September 1, 1938. It was, therefore, held that the plaintiff could not claim wages under the Women's Minimum Wage Act.

As to the validity of the claim by virtue of an order under the Fair Wage Act, 1937, it was pointed out that this statute requires actions to be brought within six months. No claim could, therefore, be made with respect to wages payable prior to September 15, 1938, since the action was entered on March 16, 1939. The claim of wages for a 54-hour week instead of a 48-hour week after September 15, 1938, was allowed and the plaintiff was awarded interest and costs. *Mlle Leclerc v. Lavallee* (1939) Rapports Judiciaires de Québec, Cour Supérieure, 299.

Quebec Court may hear Complaint as to Petition for Decree under Collective Labour Agreements Act

In connection with the petition to the Minister of Labour of Quebec for an order in council making binding on the Island of Montreal an agreement arrived at between boot blacks and their employers, action was taken by seven workers in the Superior Court of Montreal to have the agreement set aside on the ground that the names of the petitioners and of others affixed to the agreement were forged. The joint committee set up to enforce the agreement, in defending the action, moved for its dismissal on the ground that the Collective Labour Agreements Act stipulates that the publication in the Quebec Official Gazette of an order in council making an agreement legally binding bars any contestation as to the incapacity of the parties to an agreement, its invalidity, the insufficiency of notices and any other matters leading up to the adoption of the agreement. Counsel for the committee argued that the proper procedure, if the plaintiffs wished to attack the order in council, was through direct

application to the Lieutenant-Governor in Council who could cancel it if he considered it advisable.

Mr. Justice Surveyer on July 12 dismissed the motion of the joint committee, holding that although the courts have no power to annul a decree of the Lieutenant-Governor in Council they have power to declare the false nature of the petition asking for the order in council. *Sandantonio v. Le Comité Paritaire des Cireurs de Chaussures de l'Ile de Montreal,* Superior Court, Montreal, July 12, 1939.

Action for Wages under Collective Agreements Act dismissed in Superior Court of Montreal

On July 21 Mr. Justice Forest of the Superior Court of Montreal dismissed with costs an action for wages claimed under a collective agreement made obligatory under the Collective Labour Agreements Act for the building trades in the district of Montreal. The action was brought by the Joint Committee for the construction industry on behalf of two painters and the amount claimed, $583.39, was alleged to be the difference between the wages provided for by the collective agreement and the $290 which the painters received as payment for the work of painting two cottages for the defendant.

The defence claimed that the painters in question were not entitled to the wages provided by the agreement because they were contractors not employees and had agreed to do the work for a fixed price. In this connection the judge pointed out that the painters had received the contract for painting after they had submitted a written tender and that while the work was in progress they were quite free to carry on as they willed, not taking orders from anyone and paying their apprentice a rate determined by them.

Further, the section of the agreement which makes invalid contracts for job or piecework was held not to apply in this case since that provision was made only on July 9, 1938, after notice of the action had been given the defendant and after the contract for the work in question had been agreed to. The contract had been agreed to on October 4, 1937 and notice of the action was given on March 24, 1938. There was no proof that there had been any intention of evading the provisions of the agreement and notwithstanding the special provision made under the authority of the Collective Labour Agreements Act, contracts for stated prices entered into by competent persons may be legal.

On the question of the right of the Joint Committee to bring an action on behalf of the workmen, it was pointed out by the Court that in principle acting for an employee and for his benefit is to act as his agent in a way contrary to Article 81 of the Code of Civil Procedure which prohibits any person from acting for a third person. Further, although the Act enables the Joint Committee to bring an action without proving an assignment of claim, it is necessary to have the consent of the persons concerned and the matter must be within the scope of the law invoked. In this case the painters in whose interest the case was brought appeared satisfied with the contract in question. They had accepted the price without protest and in giving evidence had failed to co-operate with counsel for the plaintiff even to the extent of refusing to answer direct questions. The common law, allowing the workman right of action against an employer for wages due does not compel him to bring such action and the Collective Labour Agreements Act does not affect this principle. The ordinary rules relating to mandates must apply and the right of action is optional. The committee cannot take action against the will and without the consent of the workmen. For these reasons, the action was dismissed with costs. *Comité Conjoint des Métiers de la Construction vs. A. Deschamps,* Cour Supériere, Montreal, July 29, 1939.

English Court directs conviction where Accident occurs during Cleaning of Machinery in Motion

On March 28 the High Court of Justice (Divisional Court) allowed the appeal of a factory inspector, by way of a stated case, against the dismissal of an information preferred against the occupier of a steel rolling mill under the Factory and Workshop Act. The prosecution arose from an accident to a workman when he was standing upon a plate in front of the couplings in order to remove grease from the water sump. The workman's arm was caught between the couplings when the steel bar he was holding slipped. Usually, there was a bar in front of the couplings but this had to be removed to permit the cleaning to be done.

The Factory and Workshop Act provides that all dangerous parts of machinery "must either be securely fenced or be in such position or of such construction as to be equally safe to every person employed or working in the factory as it would be if it were securely fenced... All fencing must be constantly maintained in an efficient state while the parts required to be fenced are in motion or use, except where they are under repair or under examination in connection with repair or are necessarily exposed for the purpose of cleaning or lubricating or for

altering the gearing or arrangements of the parts of the machine". The defence claimed that the couplings had been "necessarily exposed" for cleaning in accordance with the exception provided for in the Act and the lower Court upheld this contention and dismissed the information. It was held that clearing grease from the outflow of the water-trough was cleaning "an arrangement of part of the machine".

On appeal it was held that the case did not come within the exception provided in the Act. The lower Court had found that the work could have been performed equally well when the mill was stopped and that it should have been stopped but that it was no part of the workman's duty to do so. Further, the Act requires machinery to be kept securely fenced while the parts are in motion or use. The Lord Chief Justice pointed out, "it was not even suggested that the absence of the guard or fence, such as it was, was due to the fact that there was cleaning going on, or that there was lubricating to be done, or that the gearing or arrangements of the parts of the machine needed attention". *Crutchlow v. Guest, Keen and Nettlefold, Limited,* High Court of Justice (Divisional Court), March 28, 1939. (Ministry of Labour Gazette, August, 1939, p. 316).

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 39] OCTOBER, 1939 [NUMBER 10

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

THERE was a substantial increase in employment at the beginning of September, according to returns received by the Dominion Bureau of Statistics from 11,856 firms, each with a minimum of 15 employees, representing practically all industries except agriculture, fishing, hunting and highly specialized business operations. The establishments employed 1,165,631 persons, or 20,247 more than in the preceding month; this gain of 1·8 per cent considerably exceeded the average increase between August 1 and September 1 in the last eighteen years, although it was not equal to that indicated at September 1 of either 1937 or 1938. The employment index number (with the average for the calendar year 1926 as the base equal to 100) stood at 119·6, as compared with 115·1 at September 1, 1938, and with 123·2 at September 1, 1937. At the same date in recent years of the record the index was as follows:—1936, 107·1; 1935, 102·7; 1934, 98·8; 1933, 88·5; 1932, 86·0; 1931, 107·1; 1930, 116·6; 1929, 126·8; 1928, 119·1 and 1927, 111·0.

Reflecting the greater-than-average increase in industrial employment at the beginning of September, the seasonally-adjusted index rose from 114·3 at August 1 to 114·9 at the date under review, when it was higher than the seasonally-corrected index for any other month since the opening of 1938.

Unemployment in Trade Unions.—At the beginning of September, 1939, reports were forwarded to the Department of Labour by 1,924 local trade unions embracing a membership of 241,824 persons. Of these, 26,287 or a percentage of 10·9 were unemployed as contrasted with percentages of 11·1 at the beginning of August and 11·6 at the beginning of September, 1938.

Employment Office Reports.—Reports received by the Department of Labour from offices of the Employment Service of Canada during August, 1939, showed that the volume of business, as indicated by the average daily placements effected, was higher than that of the preceding month, as well as that of the corresponding period a year ago. All groups, except logging, shared in the increased placements over those of the preceding month, while farming, trade and construction and maintenance were the only divisions to record declines from August last year. Vacancies in August, 1939, numbered 44,549, applications 67,901, and placements in regular and casual employment 42,470.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was $16.93 at the beginning of September as compared with $17.02 for August. Comparative figures for certain earlier dates are $17.41 for both September, 1938, and for September, 1937; $16.84 for September, 1936; $15.41 for June, 1933 (the low point during recent years); $21.90 for September, 1929; $26.92 for July 1920 (the post war peak); and $14.33 for September, 1914. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics advanced substantially during the first half of the month but was steady for the last two weeks. The figures are 77·9 for the weeks ended September 22 and 29 as compared with 72·8 for the week ended September 1 and 72·3 for the first week in August. Comparative figures on a monthly basis are 72·4 for August, 74·5 for September, 1938; 85·0 for September, 1937; 76·4 for September, 1936; 63·5 for February, 1933 (the low point in recent years); and 97·8 for September, 1929.

Business Statistics.—The table on page 970 gives the latest information available reflecting industrial conditions in Canada. The index of the physical volume of business in August was at the highest point recorded since November, 1937. The advance as compared with July was about four per cent and compared with August, 1938, about 13 per cent. Of the principal groups used in the construction of the index the only decline as compared with the previous month was in mineral production which was about 2 per cent lower. The index of manufacturing production was higher both

MONTHLY STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA*

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended September 29, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending September 30, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending September 9, August 12 and July 15, 1939; September 10, August 13 and July 16, 1938. (7) MacLean's Building Review. (8) Index numbers aredjusted when necessary for seasonal variation.

as compared with the previous month and with August, 1938. In the former comparison the increase was due mainly to the greater volume indicated in the manufacture of foodstuffs, tobacco and forestry products. The other principal groups to record advances in August as compared with July and also with August, 1938, were construction, electric power output, and distribution. The index for the latter group, is based upon trade employment, car loadings, and external trade. The first of these sub groups was lower in August than in July but higher than in August, 1938, while the other two showed substantial advance in both comparisons. Information available for September shows advance in wholesale prices, employment, the number of cars of revenue freight, and in the earnings of the Canadian National Railways both as compared with the previous month and with September, 1938. Contracts awarded were considerably lower than in August.

Strikes and Lockouts.—The number of strikes and lockouts recorded for September was 17, involving 8,804 workers with time loss of 23,652 man working days, as compared with 18 disputes in August involving 15,,031 workers and causing time loss of 42,110 days. Most of the time loss in each of these months was due to strikes of coal miners in Nova Scotia, those in August being due to disputes as to wages and working conditions. In September these strikes were chiefly in protest against working with miners of alien enemy origin, work being resumed pending investigation, which resulted in small numbers of these miners being laid off. It was found that there was nothing of a serious nature against most of them and many had been naturalized. In August, 1938, there were 15 disputes, involving 2,132 workers with time loss of 16,268 days, the most important being strikes of salmon fishermen in British Columbia, automobile parts factory workers at Windsor, Ont., and lime plant workers at Blubber Bay, B.C. Of the seventeen disputes recorded for September, 1939, fifteen were terminated during the month, two resulting in favour of the employers and six in favour of the workers involved, while compromise settlements were reached in five cases and the results of two disputes were recorded as indefinite. Two disputes, involving approximately 113 workers, were recorded as unterminated at the end of September. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions involved.

Restriction on enlistment of certain classes of skilled workers

The Minister of National Defence, Hon. Norman McL. Rogers, has issued a statement on the non-enlistment of "reserve occupations" in order that munitions and other key industries might not be "deprived unduly of skilled engineers, mechanics and other trained workers on whom rapid expansion of production depends."

Following is the text of the Minister's statement, released on September 21:

"Under a system of voluntary service in the Armed Forces there is a probability, having regard to the character of the Canadian people, that many men with the highest qualifications of all sorts will seek active service. The problem is thus presented of ensuring that industry is not deprived unduly of the skilled engineers, mechanics and other trained workers, on whom rapid expansion of production depends, by reason of their enlistment in or appointment to commissions in the Armed Forces.

"The Department of National Defence, anticipating this problem, has placed restrictions on the enlistment of certain classes of workers, who will be required in large numbers for the prosecution of Canada's war effort, in the production of munitions and other industrial supplies. These restrictions apply to those who are skilled in particular trades or crafts or who have other qualifications, such as university training in medicine, engineering, agriculture and other sciences that can be used to advantage in the national interest.

"It is becoming more clearly understood that, in addition to the material requirements of Canada's Forces, very large supplies will also be needed from Canada to supplement production in Great Britain and other parts of the Empire. It is in recognition of these anticipated requirements for skilled workers in industry that the Department of National Defence has issued instructions to recruiting officers providing that skilled tradesmen are not to be enlisted in a military unit except in the classes and then only in the numbers required by the particular unit establishment. It is provided that every effort must be made to place men in those corps for which they are best adapted by their civil vocations.

"As regards eligibility of recruits the Department has also ruled that graduates of Canadian or other universities or colleges in the medical, engineering or other scientific or technical professions are not to be enlisted. The same provision applies also to ex-cadets of the Royal Military College and to ex-cadets who hold certificates from the Canadian

Officers Training Corps; bankers and chartered and other accountants are also included.

"While the foregoing statements apply to recruiting for the Army, similar regulations apply to enlistments in the Navy and Air Force.

"In cases where heads of factories or other industries feel that key members of their staffs have been taken by the military authorities unnecessarily, they should communicate at once with the recruiting officer in charge of the unit in which their men have been placed. Should their representations to him not result in a satisfactory solution of their problem, the matter should then be taken up by the factory head with the local Army, Navy or Air authorities concerned."

Administrative organizations established for prosecution of war effort

Under the emergency powers of the War Measures Act, 1914, several Boards and Commissions have been established to administer the nation's war effort. The administrative functions of several of these organizations are summarized in the following paragraphs:

Wartime Prices and Trade Board.—Among the first steps taken by the Dominion government was the establishment of the Wartime Prices and Trade Board with wide powers to provide safeguards against any undue increases in the prices of the necessaries of life and to ensure adequate distribution. (A detailed review of the action leading to the formation of this Board, its powers, and the comprehensive regulations issued thereunder, was given in the LABOUR GAZETTE, for September on pages 889-893).

War Supply Board.—This Board was created by Order in Council on September 15, and was assigned "the responsibility of surveying, organizing, and mobilizing the resources and industries available to Canada for the prosecution of the war." The War Supply Board also assumes the work of the former Defence Purchasing Board (LABOUR GAZETTE, August, 1939, page 778). Heading the new Board is Mr. Wallace R. Campbell, president of the Ford Motor Company of Canada, while the vice-chairman is Mr. R. C. Vaughan, vice-president of the Canadian National Railways, in charge of purchasing.

Foreign Exchange Control Board.—Endowed with wide powers to regulate and control foreign exchange transactions, this Board was established on September 15 under the chairmanship of Mr. Graham Towers, Governor of the Bank of Canada. Its other officers include: W. C. Clark, Deputy Minister of Finance; H. D. Scully, Commissioner of Customs; L. D. Wilgress, Director of the Commercial Intelligence Service; and N. A. Robertson, First Secretary, Department of External Affairs.

Voluntary Registration Bureau.—This Bureau was established on September 15 " to direct and have general control of the tabulation, organization and co-ordination of all voluntary offers of services from persons or organizations possessing technical or other special qualifications in relation to the state of war now existing as distinguished from active service in the defence forces of Canada."

The officers of this body are: Chairman, E. H. Coleman, Under Secretary of State; Vice-Chairman, Major J. F. Cummins, Department of National Defence; Joint Secretaries, J. F. Delaute, Chief Clerk, Correspondence Branch, Department of the Secretary of State, and Major G. W. Ross, Assistant Chief Superintendent, Railway Mail Service.

Industrial Disputes Investigation Act

During the month of September the Department of Labour received the findings of the Board of Conciliation and Investigation which dealt with a dispute between SMT (Eastern) Limited and its motor coach and freight truck drivers. Applications for boards were received in the case of three disputes, and the personnel of a Board established during the preceding month was completed. A full account of recent proceedings under the Act will be found on page 978.

Retirement of P. M. Draper after long career in cause of Labour.

The recent retirement, due to ill health, of Mr. P. M. Draper from the presidency of the Trades and Labour Congress of Canada is something more than a change of officers: it marks the definite severance of a leader from a movement to which he had contributed much in practical achievement—an achievement that is reflected not only in the present status of labour but also in the social structure of the nation.

Because there is probably no better yardstick to measure labour and social progress in this country during the past half century than the career and personal contribution of Mr. Draper, the LABOUR GAZETTE is departing somewhat from its usual course in emphasizing his service and leadership in the workers' cause.

He was nurtured in the Gompers' tradition, which held tenaciously to fixed objectives, using its economic strength but rigourously opposing disruptive elements either within or without the labour movement.

Indicative of the definite development of a social consciousness as reflected in social legislation, are the changes in social-economic concepts which have resulted in the fifty-two year span of Mr. Draper's labour career.

In 1887 when first he became identified with organized labour as a junior member of an Ottawa local of printers, labour was generally regarded as a commodity: now it is recognized as a component part of industry within the larger framework of national life.

In 1887 the Canadian labour movement was fighting for its existence in a country but recently emerged from the pioneering period. It had but a limited scope of action confined to isolated struggles for wages. To-day labour bargains collectively and secures collective agreements affecting wide industrial areas.

In 1887 labour's right to organize was something scarcely designated as a right: now it is definitely a right guaranteed by legislative enactment.

In 1887 social and labour legislation as it is known to-day in this country was practically non-existent: now there has been established an impressive code of labour laws, Dominion and provincial, which guarantee the worker many benefits, ranging from protection in his occupation and compensation for injury to freedom in improving his position by organization. From this has stemmed the wider adoption of social measures, such as old-age and blind pensions and government annuities, which bring social security for all classes nearer to realization.

In the ultimate accomplishment of these things, Mr. Draper has materially assisted by his persistent advocacy in the forum of labour and before successive Canadian governments. Always he has urged progress by constitutional methods, and has strongly opposed any other way.

As already stated, his first identity with organized labour was as a member of the Ottawa local of the International Typographical Union. On several occasions he was president of his union local, and at present is its chief officer—his remaining link with labour.

From this apprenticeship he graduated into the larger sphere of national and international labour. In 1897, under his direction, there was founded the Ottawa Trades and Labour Association. In 1900 he was elected secretary-treasurer of the Trades and Labour Congress of Canada, which position he occupied practically uncontested until 1935 when he succeeded Mr. Tom Moore as president upon the latter's appointment to the Employment and Social Insurance Commission. During that period he has witnessed a remarkable growth in organized labour. In 1900 the membership of the Trades and Labour Congress numbered 9,000 workers, and before his resignation the paid-up membership of this organization reached a total of approximately 150,000.

With the advent of the war of 1914-1918 and the concluding of the peace, organized labour in Canada achieved a new status. Frequently the labour leaders were consulted by the heads of government on war measures. The then war premier, Sir Robert Borden, included Mr. Draper in the Canadian delegation to Paris, and in the peace negotiations he was the labour confidant of Canada's Prime Minister.

Out of Versailles emerged the International Labour Organization and Mr. Draper was the Workers' Delegate from Canada at the first I.L.O. Conference at Washington in 1919 where he was elected to the Governing Body of the I.L.O.

In his occupational career at the Dominion Government Printing Bureau—where he served since its formation in 1888 to 1933, earning successive promotions to the responsible post of Director and Superintendent of Printing—the Labour Gazette has enjoyed a unique relationship with Mr. Draper. In fact, Mr. Draper assisted at the founding of this publication, the first manuscript copy of which was entrusted to his care by the present Prime Minister, Rt. Hon. W. L. Mackenzie King, who, as its first editor, personally "put it to press" on a day in September, 1900.

Since then the young printing foreman and the young graduate of the University of Toronto and Harvard, have carved careers of distinguished service in their respective spheres.

Return of Mr. Tom Moore to leadership of Trades and Labour Congress.

Succeeding Mr. Draper as president of the Trades and Labour Congress of Canada is Mr. Tom Moore whose career in the labour movement has also been paralleled by his outstanding career of national service to which he has been summoned in various capacities by successive governments in Canada.

During his first presidency of the Trades and Labour Congress from 1918 to 1935, he was prominently before the public notably through his activity in developing public relations. Pursuing this objective, he was the representative of labour on a number of national organizations and public bodies. In fact, the spheres of service in which he participated constitutes a cross-section of Canadian national life. The diversity of his public contribution is indicated by the following bodies on which he has served: The Dominion Fire Prevention Association, the Canadian

Welfare Council, the National and Ontario Safety Leagues, the National Research Council (two terms), and the Dominion Health Council. In addition, he served as labour's representative on the directorate of the Canadian National Railways from 1923 through all its successive re-organizations until 1933 when it was abolished.

During the last war his talents were utilized in a number of important channels directly related either to the national war effort or in national rehabilitation. At the request of the Canadian and Imperial Munitions Board, he devoted a large measure of his time to maintaining industrial stability in the construction of plants for the production of munitions and the provision of airplane bases. Though not then an officer of the Congress he acted as secretary for the group of labour representatives in the series of conferences called by the government to reach agreement on labour requirements in war-time activities.

On the termination of the war he became a member of the Labour Sub-Committee of the Reconstruction and Development Committee of the Cabinet which directed the re-establishing of returned soldiers into industrial life.

In 1919 and 1920 there developed as an aftermath of the war a period of insurgency in the countries which had been geared to supreme war effort. In this respect Canada did not emerge unscathed. In an effort to alleviate this post war condition, there was appointed a Royal Commission (known as the Mathers Commission). Mr. Moore was one of two labour representatives to serve on this Commission and to advise on methods of coping with industrial unrest. Resulting from the report of this Commission was the National Industrial Conference. As president of the Trades and Labour Congress, Mr. Moore headed labour's representation in the Conference.

He participated in the new orientation of labour in the international sphere when, as Workers' Adviser for Canada, he attended the first Conference of the International Labour Organization at Washington in 1919. Then, in 1920, he went as substitute member for his Labour colleague, Mr. P. M. Draper, to the first meeting of the Governing Body of the I.L.O. in Paris, and remained to attend the second meeting in London. In 1922 he became one of the members of the Governing Body, being re-elected by the Workers' Group every three years until he resigned in 1936 owing to being no longer an officer in the trade union movement. When the League of Nations Society in Canada was organized Mr. Moore was a member of the original executive and still is serving on its directorate.

In 1935 he resigned as president of the Congress to become one of three members of the Employment and Social Insurance Commission. This body having ceased to function in 1936, the present government appointed him a member and subsequently vice-chairman of the National Employment Commission. When this Commission completed its work and was disbanded in January, 1938 he returned to the office of the Congress, acting as assistant to President Draper.

One of Mr. Moore's first acts as president again of the Congress was to lead a delegation of the officers of affiliated organizations which met the Prime Minister, Rt. Hon. W. L. Mackenzie King, the Minister of Labour, Hon. Norman A. McLarty, and other members of the Cabinet for the purpose of conveying to them the decisions of the Congress in pledging unwavering support in Canada's war effort, and to discuss practical means whereby co-operation between the government and the Congress could be developed most effectively.

Statistics of material aid recipients for August

The grand total of all classes of persons on urban and agricultural aid across Canada in August this year was 800,000, according to preliminary figures from the national registration of persons on direct relief. Due to a change in relief policy on the part of the Government of the Province of Quebec, where works to relieve unemployment are being replaced by direct relief, that province showed an increase of 23 and a half per cent in the total on material aid in August compared with the previous month, and this factor nearly offset the drop from July into August in the other provinces. Consequently, the decrease in the Dominion total in August, compared with the July figure, was only 1 per cent, while August, 1939, compared with August the year before showed an increase of 5 per cent (with Quebec alone showing an increase of 33 per cent in the same comparison). Compared with August two years before the Dominion figure showed an increase of 7 and a half per cent, the prominent feature again being the increase in Quebec. It is to be noted that the increases in numbers on aid in Quebec do not follow from less favourable employment conditions, but from the change of policy indicated.

Unemployed but fully employable persons on aid in August this year numbered 139,000, a decrease of 1·1 per cent from the revised July total of 140,500. The figure for August this year, although it showed an increase of 11·8 per cent over August a year ago, Quebec again being the largest factor in the increase,

was down by almost 3 per cent from August, 1937.

A total of 533,000 persons were receiving non-agricultural aid last August, a decrease of 0·3 per cent from the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of 13·1 per cent from the figure for August, 1938, and was over 4 per cent more than the figure for August two years ago. As mentioned in the case of the grand total, the increase of 28 per cent in Quebec from August, 1938, to August, 1939, was an important influence in raising the 1939 figure.

The number of farmers and members of their families in receipt of agricultural aid continues to show a decline from a year ago. A total of 59,000 farmers who, together with their dependents, account for a farm population of 267,000, were reported as receiving agricultural aid for subsistence in August. Of these, 224,500 were located in the Province of Saskatchewan.

The Dominion total on agricultural aid in August showed a decrease of 1·5 per cent from the July figure and was almost 7 per cent less than in August, 1938, but was 14·7 per cent greater than in August, 1937. The total of farmers and their families on aid in Saskatchewan continued to hold the improvement over a year ago, August showing a decrease of almost 10 per cent in this comparison, and a decrease of over 4 per cent from July, 1939. However, due to the situation which arose from crop conditions in 1937 and 1938, Saskatchewan this year showed 21·8 per cent more on agricultural aid than in August, 1937.

Labour legislation in Canada in 1938

The annual report of the Department of Labour on Labour Legislation in Canada, 1938, has just been published. The report is the first supplement to the consolidated report *Labour Legislation in Canada as existing on December 31 1937*.

The supplementary report contains the text of the labour laws enacted by the Parliament of Canada and by the provincial legislatures during 1938. Where regulations have been made under the authority of any labour law, their effect is indicated either in the body of the report or in footnotes.

Legislation of 1938 reviewed in the report relates to regulations approved by Order in Council under the Canada Shipping Act giving effect to the draft convention of the International Labour Conference of 1929 and revised convention of 1932; labour organization and collective bargaining; conciliation and investigation; wages and hours of labour; workmen's compensation; safety and health; licensing of workmen; vocational education and apprenticeship; pensions and insurance; unemployment relief; and housing.

The main volume of the series may be obtained from the Department of Labour for one dollar, and the supplements for twenty-five cents each.

Alberta Board fixes prices of sugar and butter

Orders establishing maximum wholesale and retail price bases for sugar and butter in Alberta were announced on October 7 by the Alberta Price Spreads Board, according to a statement appearing in the Canadian Press.

The board's order regarding butter prices selects the Vancouver export price as a basis. Alberta price for butter, solids, will be the export prices less two cents per pound freight charges, plus three cents to cover converting the butter into prints and plus three cents to cover retailing costs.

The minimum price which may be paid for butter fat shall be the prevailing export price at Vancouver less two cents for freight and another three cents for creamery costs.

Maximum price at which granulated beet sugar may be sold in the province by any refiner to a wholesaler is fixed at the price in effect September 1. The price charged by the wholesaler also is regulated as well as the retail price.

A subsequent Canadian press report under date of October 11 indicated that retail merchants were expected to protest against the order that sugar prices revert to the September 1 basis.

Canadian Construction Industry offers plan of co-operation

The president of the National Construction Council, E. P. Muntz, announced recently that the services of the Council had been offered to the government for the purposes of working out a plan "to co-ordinate the nation's man-power by expediting the huge volume of emergency construction which is believed inevitable because of the war."

Affiliated with the National Construction Council are various organizations directly concerned in building and construction such as the Trades and Labour Congress of Canada, the Engineering Institute of Canada, the Royal Architectural Society, the construction sections of the Canadian Manufacturers' Association, the Canadian Construction Association, and others. These affiliated bodies have approved the action of the National Construction Council in offering its services to the government.

According to the announcement the use of established civilian facilities to supplement

the work of the Department of National Defence staff and the recently formed War Purchasing Board is one of the chief features of the scheme. Those responsible for the proposal, claim that it would relieve military engineering services from added burden at the present time and leave them free to turn their tasks to more essential matters.

It is considered that the adoption of the proposed plan would free men for military service while retaining in the building industry that part of the personnel best adapted to it. Included in the plan are recommendations for the adoption of adequate provisions against profiteering and the setting up of safeguards to ensure the maintenance of proper building specifications.

In addition to the policy of co-operation advanced by the National Construction Council, the Canadian Construction Association at an executive meeting held in Toronto recently, placed the services of its officers and members at the disposition of the government in either an advisory or active capacity.

Canada Year Book, 1939

The 1939 edition of the *Canada Year Book* published by the authorization of the Hon. W. D. Euler, Minister of Trade and Commerce, is now available for distribution.

The *Canada Year Book,* compiled by the Dominion Bureau of Statistics, is the official statistical annual of the country and contains an up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, demography, the different branches of production, trade, transportation, finance, education, etc.—in brief as comprehensive a study as possible within the limits of a single volume of social and economic conditions in the Dominion.

Attention is called to some of the more important features of the present volume.

In Chapter II, an article is presented on the Relationship of the Department of Public Archives to the Historical Records of Canada, followed by a Bibliography of Canadian History. In the introduction to Chapter VIII —Agriculture—an article is given on the Historical Background of Canadian Agriculture. A special article on Noxious Forest Insects and Their Control, is an added feature of Chapter IX—Forestry. The secretary of the Canadian Wheat Board, Winnipeg, has contributed an article on the Origin, Development, and Operations of the Canadian Wheat Board. An extended article on the Development of the Press in Canada, together with statistics for all the daily and the principal weekly newspapers and magazines, supplements Chapter XVIII.

All parts of the volume have been carefully revised and brought up to date; the latest information appearing to the date when each section was sent to press is included. Chapter XX—Prices—has been revised, especially in relation to the subsection dealing with Retail Prices and Cost of Living, under which heading a new subsection summarizes the latest results of a special study on family living expenditures, now being undertaken by the Bureau as a phase of the Nutrition Survey. (LABOUR GAZETTE, April, 1939, page 366 and July, 1939, page 652).

In commemoration of the royal visit to Canada, May 17 to June 15, 1939, colour plates of Their Majesties King George VI and Queen Elizabeth, together with official pictures of incidents connected with the unveiling of the National Memorial and of the Royal Assent to legislation of the 1939 Session of Parliament, appear as frontispiece. A short account of the royal tour across Canada together with a condensed itinerary is also given.

Persons requiring the year book may obtain it from the King's Printer, Ottawa, as long as the supply lasts, at the price of $1.50, which covers merely the cost of paper, printing and binding. By a special concession, a limited number of paper-bound copies have been set aside for ministers of religion, bona fide students and school teachers, who may obtain copies at 50 cents each.

National registration in Great Britain

On September 5, Royal Assent was given in Great Britain to a National Registration Act.

The Act, according to information appearing in the September issue of the British *Ministry of Labour Gazette,* provides for the compilation and maintenance of a National Register of all persons in the United Kingdom. The register is to include particulars as to each person's name, sex, age, occupation, profession, trade or employment, residence and marital state.

For the purpose of the initial compilation of the register a duty is placed upon prescribed persons to make returns at the appointed time. On the collection of the returns an identity card will be issued in respect of each person included in the return. This card must be produced by the person responsible for its custody whenever required to do so by a constable in uniform or any other authorized person.

The Act authorizes the making of regulations to provide for keeping the register up-to-date, by requiring information to be supplied as to any change affecting the accuracy of the original registration of any registered person

(e.g. removal from one locality to another) and by collecting particulars with respect to registered persons dying or leaving the United Kingdom, in addition to obtaining returns in respect of persons, entering or born in the United Kingdom, after the date of the original register. Local and central registers recording such changes are to be established.

It was stated in an explanatory memorandum on the Bill that the register is to be compiled for the purposes of (1) supporting and facilitating any national service arrangements which may be instituted; (2) providing up-to-date man-power and other general population statistics to take the place of the 1931 Census statistics; and (3) other incidental services such as the preservation of contact between members of families dispersed by evacuation and facilitating proof of identity for the purpose of claims to any special payments or allowances, or otherwise.

War policy of International Labour Organization

In view of the present difficulties of communication, the meeting of the Governing Body of the International Labour Office which was to have been held at Oslo on October 4 did not take place. Instead, a meeting was held in Geneva of the Emergency Committee, which was set up some months ago and to which the Governing Body delegated full powers in case of war.

On the other hand, the Second Regional Labour Conference of American States which are Members of the International Labour Organization, which is to continue the work of the Conference held at Santiago, Chile, in 1936 and to which the countries of the whole Continent of America attach the greatest importance, will meet at Havana in November, 1939, as previously arranged.

The policy of the International Labour Organization in present circumstances is based on the fundamental principle, which was laid down by a decision of the Governing Body on February 4, 1939, that the International Labour Organization should attempt to function as completely and efficiently as possible if an international crisis should intervene and even if such a crisis should unfortunately develop into war.

This principle was adopted with the full concurrence of all three groups on the Governing Body: Governments, Employers and Workers, and was subsequently submitted to the States Members. Twenty-seven States have replied so far; all are in favour of the principle.

It was on June 13, 1939, during the International Labour Conference, that the Governing Body laid down the main lines of a program of work adapted to the requirements of the present situation. The I.L.O. is taking all the necessary steps to give effect to this decision.

Survey of National Nutrition Policies

The League of Nations has published a report entitled *Survey of National Nutrition Policies, 1937-38*. The report was prepared in accordance with a resolution adopted by the Assembly of the League of Nations in 1937.

The Assembly invited the Council to arrange for annual meetings of National Nutrition Committees and requested Governments "to furnish to the League of Nations annual reports on the action taken by them to study the state of national nutrition and to improve nutritional standards." At the same time, it decided that the Secretariat should publish "an annual summary, in a brief and convenient form, of these statements and of the proceedings of the meetings of the representatives of the National Committees."

A meeting of representatives of National Nutrition Committees was accordingly held in Geneva in October last, at which sixteen countries were represented.

This first annual summary of events has been based on the reports furnished by Governments and on the discussions which took place at the meeting in October, 1938, and other readily available sources of information. No attempt has been made, however, to make a general survey of action taken by all Governments, including those from which no information was received. The facts assembled in the report therefore do not constitute an exhaustive survey of the whole field of Government action for the promotion of improved nutrition.

The following chapter headings indicate the extent of the survey made: Chapter I—Progress of the Work of the League in regard to Nutrition Problems; Chapter II—National Nutrition Committees; Chapter III—Nutrition Surveys; Chapter IV—Surveys and Their Results in Certain Countries; Chapter V—Special Research; Chapter VI—Action taken with a view to improving Nutrition Standards; Chapter VII—Some Economic Aspects of the Nutrition Problem; Chapter VIII—Education and Publicity.

Three annexes to the report give: I—List of Countries from which Replies regarding the Progress of Nutrition Work have been received in the Secretariat of the League; II—Note regarding the Composition, Procedure and the Terms of Reference of National Nutrition Committees; III—Nutrition Reports relating to the British Colonial Empire.

86789—2½

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

APPLICATIONS for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour during the month of September as follows:—

(1) From the employees of each of the following grain elevator companies at the Head of the Great Lakes:—Bawlf Terminal Elevator Company, Ltd., Canadian Consolidated Grain Company, Ltd., Eastern Terminal Elevator Company, Ltd., Saskatchewan Pool Terminals, Ltd., McCabe Bros. Grain Company, Ltd., and the United Grain Growers Terminal, Ltd., at Port Arthur, Ontario; and Federal Grain, Ltd., Fort William Elevator Company, Manitoba Pool Elevators, Ltd., N. M. Paterson and Company, Ltd., Ogilvie Flour Mills Company, Ltd., and Western Grain Company, Ltd., at Fort William, Ontario. Three hundred and seventy employees are affected by the dispute. They request improved working conditions and increases in rates of pay. One Board has been established by the Minister to deal with the 12 applications, and members thereof have been appointed as follows:—Hon. W. F. A. Turgeon, Chief Justice of the Saskatchewan Court of Appeal, Regina, Saskatchewan, Chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members, Mr. M. A. MacPherson, K.C., of Regina, Sask., nominated by the companies, and Mr. Alexander Gibson, of Port Arthur, Ont., nominated by the employees.

(2) From 67 "Red Cap" messengers employed at the Toronto railway terminal, being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The dispute grows out of the request of the "Red Cap" messengers to negotiate an agreement with the Toronto Terminals Railway Company respecting wages and working conditions. The department is in touch with the parties concerned in regard to this dispute.

(3) From 107 employees of the Malagash Salt Company Limited, being members of the United Salt Mine Workers, Local Industrial Union (C.I.O.) No. 323. The employees request free camps for underground workers, an eight hour day, a general wage increase of 25 per cent, with a minimum wage of $3.75 per day, and special wage adjustments in certain individual cases. The Minister of Labour has established a Board of Conciliation and Investigation to deal with this dispute and has appointed members thereof as follows: on the employees' recommendation, Mr. Foreman Waye, of Sydney, N.S.; on the company's recommendation, Mr. George D. MacDougall, New Glasgow, N.S. Messrs. Waye and MacDougall will confer looking to a joint nomination for a third member, who will be chairman of the board.

Chairman Appointed

On September 29 Hon. Mr. Justice C. P. McTague of the Supreme Court of Ontario, Toronto, was appointed Chairman of the Board of Conciliation and Investigation established during August to deal with a dispute between Mr. F. W. Nicholas, of Port McNicoll, Ontario, and the checkers, porters, coopers, etc., in his employ being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. This appointment was made by the Minister on the joint recommendation of the other Board members, Messrs. Arthur W. Roebuck, K.C., of Toronto, the employees' nominee, and V. A. Sinclair, K.C., also of Toronto, the employer's nominee (LABOUR GAZETTE, September, 1939, page 896).

Report of Board in dispute between SMT (Eastern) Limited and its Motor Coach and Freight Truck Drivers

The Board of Conciliation and Investigation established by the Minister of Labour in July of this year to deal with a dispute between the SMT (Eastern) Limited and its motor coach and freight truck drivers, members of Division 1182, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, submitted its findings to the Minister of Labour early in September. The Board included in its investigation the Saint John Motor Line, Limited, which is under the same management as SMT (Eastern) Limited.

The report of the Board is signed by the Chairman, Rev. Herbert E. Thomas, D.D., and the Board member nominated by the employees, Mr. James A. Whitebone. The member of the Board appointed on the Company's nomination, Mr. Louis McC. Ritchie, presented a minority report.

The texts of the two reports follow:—

Report of Board

In the matter of a dispute between SMT (Eastern), Limited, also Saint John Motor Line, Limited, (Employers), and their motor coach and freight truck drivers, members of Division 1182, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, (Employees).

Majority Report of Board of Conciliation and Investigation

In the case of SMT (Eastern), Limited, also Saint John Motor Line, and their Motor Coach and Freight Truck Drivers, members of Division 1182, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America.

To the Honourable,
Norman McL. Rogers,
Minister of Labour,
Ottawa, Ontario.

Sir,—The Board of Conciliation and Investigation to which the above dispute was referred having completed its work respectfully submits its report.

The Board was granted on the ninteenth day of July, 1939, and was composed of:—

James A. Whitebone, Councillor, of the City of Saint John, nominated by the Employees;

Louis McC. Ritchie, B.C.L., nominated by the company (Employers);

Rev. Herbert E. Thomas, D.D., Chairman, nominated by the Minister in the absence of a joint recommendation from the other members.

The members were sworn in on August 5, 1939. Sessions of the Board were held in the County Council Chambers, of the Court House, City of Saint John, N.B.

The Company was represented by Wendell W. Rogers, the Manager of SMT (Eastern), Limited.

The Employees were represented by:—

(1) Magnus Sinclair, Member of General Executive Board of Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America;

(2) William T. Cooper, President of Local Division 1182 of the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America; and

(3) James C. Cole, bus operator on the SMT (Eastern), Limited.

Evidence was submitted by eighteen witnesses, there being eight by the employees and ten by the employers. The Board also heard Provincial Fair Wage Officer H. R. Pettigrove, and Chartered Accountant A. Gray Burnham.

There was also placed in evidence a number of documents, among which were:—

Employees:

"A" Schedule of the rate of pay being paid in the United States for bus drivers.
"B" Rate of pay for bus and electric railway conductors.
"C" Greyhound's pilots agreement.
"D" Union Transit wages.
"E" Table of wages—Trades and Labour Organization of Canada.
"F" Table of vacations.
"G" Steam railway rates—city bus wage.
"H" Car and bus operations.
"I" Table of the cost of living throughout Canada for the family of five.
"J" Tables of the prices being paid for foodstuffs, coal, etc., in the various provinces.

Employers:

1. Wages of inter-city and suburban drivers for the month of July, 1939.
2. Statement showing the wages earned by the truck drivers.
3. The Saint John Motor Lines' detailed financial statement for the year ending November 30, 1938.
4. SMT (Eastern), Limited—Analysis of the Freight Department's operating expenses, from January to June, 1939.
5. Balance sheet of SMT (Eastern), Limited.
6. Analysis of operating expenses, December 31, 1938.
7. A statement of the driving hours in the Fredericton-Devon-Marysville Division.
8. Constable Merryfield's report on illegal taxi operation in Fredericton.
9. Fredericton-Devon-Marysville, comparison of revenue.
10. Licence cost comparison between New Brunswick and Ontario.
11. Signed statement of Woodley concerning the Hammond River accident.
12. Comparison of the cost of licences for cars and trucks, secured by the Board from the Dominion Bureau of Statistics.

SMT (Eastern), Limited, is an incorporated company organized in June, 1937, taking over some six companies then operating, and is engaged in passenger and freight, local and intercity, in the Provinces of New Brunswick and Prince Edward Island. Its operations embrace a fleet of forty-two busses and thirteen trucks, over fifty drivers being employed. It employs one hundred and twenty-six persons, with a pay-roll of $90,000 per year. Last year the System carried approximately one million

passengers. Although young in years, the company, under the present management, has attained to a high degree of efficiency, reflecting great credit both on the men and on the management.

Saint John Motor Line was incorporated in 1926, and is engaged solely in suburban service. It is under the same management as SMT (Eastern) Limited. It operates four busses. Its yearly wage and salary roll is about $7,500.

Application:

In the formal application for a Board, it is set forth by the employees that they had failed to secure an agreement with the employers concerning union recognition, wages, hours, and working conditions for its members as coach and freight truck drivers. It was also claimed that there was suspicion of discrimination by the management against certain members of the union because of their union activities. The employees represented that several efforts were made to secure a peaceful settlement, but the conferences broke down when the management refused to negotiate on the basis of the agreement, a copy of which was included in their application for a Board.

In its response, the company denied discrimination against any employee on account of union activities. It claimed that Local Division 1182 did not include a majority of the employees of the company; that the application did not purport to represent drivers who were not members of the union; that the proposed agreement had not been presented to the company, which had always been ready to discuss matters of mutual concern. The response of the company also referred to the matter of wages, financial conditions and other items.

Discrimination:

The Board gave facility to both parties in the dispute to present witnesses and to adduce evidence. After weighing this evidence, it is the Board's unanimous judgment that the suspicion of discrimination on the part of the management has no justification. In cases brought to the attention of the Board where an employee claimed to have a grievance, it would appear that the situation is quite similar to that which occasionally arises in all branches of industry in relationships between manager and employee where certain employees do not readily adjust themselves to the advanced organization of which they form a part. In the present case, the Manager seems to enjoy the confidence of the employees quite generally, and, apart from union recognition, the wage question, and some points included in the proposed agreement, the men appear quite satisfied.

Failure to Negotiate:

In reference to any refusal to meet with the men in conference, the explanation on the part of the manager is that at no time did he attempt to disguise his own attitude of opposition to the union. He did not believe that the movement towards union recognition represented the great body of his employees. It is worth recording that all the hearings of the Board were held in an atmosphere devoid of strife; and, when manager and employee were brought face to face, a high degree of mutual good will was manifest.

Union Recognition:

In making a recommendation that an agreement be entered into by the company recognizing the men in their association, the Board is influenced by a number of considerations which may be enumerated:—

1. The present day tendency is quite evidently towards such a recognition. Social welfare organizations and church bodies which have surveyed the situation have quite generally expressed approval of collective bargaining by employees.

2. A majority of provinces in the Dominion of Canada have passed legislation which contains provisions with respect to the right of union organization; and heavy penalties are provided in cases of interference with such association. In one province, at least, Nova Scotia, recognition of association of employees is made mandatory upon an employer. It provides that "every employer shall recognize and bargain collectively with the members of a trade union representing the majority choice of his employees."

3. Within the constituency in which the drivers are employed, the New Brunswick Legislature has enacted that, "the right of employers and employees to organize in associations, trade unions, or other groups for any lawful purpose is hereby recognized."

4. In the City of Saint John, where the company has its headquarters and where most of the men reside, trade and labour unions are quite generally recognized.

5. It is believed by the Board that in cases where labour has been unionized and recognized it has resulted in a more peaceful relationship between employer and employee than could possibly exist under any other arrangement. A striking illustration of this is the unionization of the dock and water front workers in Saint John City, where some 2,000 men represent five different trade unions. Comparisons show that since unions have been recognized that many differences have been peacefully adjusted where before there was endless strife.

6. The Amalgamated Association of Street, Electric Railway and Motor Coach Employees

of America is a well established union with a very high record of achievement, and it makes a strong appeal as compared with some more recent organizations whose activities are not to be commended, and yet with which workers might feel free to unite.

7. Psychologically there is an effect of union recognition which is not to be lightly weighed, for its effect may be felt by the company as well as by the workers. Were it publicly known that workers were recognized as union members, that fact would make a special appeal to certain classes and possibly would lead to a greater degree of good-will for the company and to the enhancement of its popularity.

8. With rare exceptions, employees who were heard as witnesses by the Board expressed the belief that the recognition of the union by the company would result in a better feeling generally among the workmen.

9. A majority of the employees of the company are in favour of union recognition. The claims for a majority made by the employees were vigorously challenged by the company, and, although the Board did not feel that what a vote reveals is the determining factor, yet it closely examined all the facts made available in reference to the vote taken by the men. It was revealed that, when application was made to the Department of Labour for a Board, the matter of a strike vote was given consideration, and the record revealed there were sufficient grounds to warrant the establishment of a Board. In an endeavour to obtain the exact facts in the case, the Board requested its chartered accountant to examine the list of members of the union with the list of employees furnished by the company. His report is, "I have checked the list of drivers with the records of the members of the Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America and find that a majority of drivers are members of the union."

Upon these grounds recommendation is made for company recognition of the union.

Mr. Ritchie, member of the Board, disagrees with this recommendation and will make a minority report.

Discussion of Questions:

Recommendation of Section 2 of agreement proposed by the drivers, dealing with meetings of company and representatives of employees to discuss questions which from time to time arise, consistently follows from recognition of the union, and the section is approved by the majority of the Board. With this section, Mr. Ritchie, disagrees.

Seniority:

The Board finds that seniority as a basis in promotion and choice of runs has not been ignored by the company, but it is recommended that it be made a matter of agreement, on condition that all things are to be equal.

Uniforms:

It was found by the Board that uniforms for drivers are now provided by the company and paid for on a basis of twenty per cent by the company and eighty per cent by the drivers. The Board recommends that payment be made on a "fifty-fifty" per cent basis.

Listing of Tickets—Baggage—Transfer of Coaches:

The Employees ask for an agreement on the matter of clerical work done in listing and valuing tickets, assistance to drivers in storing baggage in cars, requiring a written order from the Manager before turning over a coach to anyone. The Board feels that these and several other matters which are included in the agreement proposed by the Employees are of a character to be dealt with by negotiation between the two parties concerned and not by a written agreement, and it so recommends.

Investigation of Accidents:

In reference to investigation of accidents, the Board finds that it is now a practice of the company to hold investigations in which opportunity is given for any defence to be made, but it believes the matter is of such importance as to be included in an agreement, and it so recommends, changing somewhat the clause concerning this matter as proposed by the union.

Bad Driving Conditions:

The employees request an agreement in regard to extremely bad driving conditions, suggesting that two drivers should be assigned to each car whose opinion whether to drive or to tie up is to be accepted by the company. The Board finds it very difficult to determine what is the proper course in such a situation and believes it is a matter where by negotiation a satisfactory solution can be found. It so recommends.

Road Failures:

In the case of road failure, the employees make request for an agreement by which a driver shall be paid for his run in full. After an examination of the facts in the case, the Board feels there is justice in such demand and makes recommendation accordingly. The Board changes somewhat the clause concerning the matter as proposed by the employees.

Holidays:

The Board gave considerable attention to the proposal for an agreement on vacations with pay. No such practice now obtains within the company's system, although evidently the drivers have no great difficulty in obtaining short holidays at their own expense when so desired. The Board appreciates the justice of this claim, and cannot ignore the fact that a general tendency towards paid holidays in industry is everywhere in evidence. This tendency is observable especially in the United States, Great Britain, and Canada. Reports of Local Divisions of the Amalgamated Association for 1938 show, in comparison with the previous year, that thirty-five more Local Divisions obtained contractural agreements providing for holidays with pay. These Divisions represent 2,313 members. In this Association, there were, at the end of 1938, some 155 divisions, containing a total of 68,217 members, enjoying contract provisions for vacations of from one to three weeks annually. In Great Britain, legislation is gradually covering all branches of industry with this paid holiday privilege.

In recommending that one week's holiday with pay to each permanent employee be made a matter of agreement, the Board expresses its conviction that the principle involved should be recognized, and believes that since many of the employees are only seasonally employed the inroads on the financial resources of the company will not be excessive. From this action, Mr. Ritchie, Board Member, dissents.

Wages:

The matter of increases in wages and regulations concerning hours of work included in the agreement proposed by the Union was very carefully investigated by the Board, and every available source of information was explored. An arrival at the actual wages paid is very difficult for a number of reasons:

(*a*) Wage payment, in most cases, is on a mileage basis of varying lengths;
(*b*) Drivers, in some cases, are engaged in service longer than the hours of their actual run;
(*c*) Drivers change frequently from a run of one length to that of another;
(*d*) In certain classes of operation, payment is on a flat, weekly basis, and in others it is on a mileage basis;
(*e*) And again there are different rates of pay for different classes of work.

These, and other considerations, constitute difficulties to be met in an endeavour to make calculation of the actual earnings.

There are some facts of a general character, however, which are very clear:

(*a*) In the *Freight Department,* in 1938, some men were paid on an average of from $16 to $18 per week for an average of 13 hours per day. In some cases the wages were as low as $10 per week. In March, 1939, the average wage was slightly over $17, and in July of the same year it was $15. In 1938, six men in this Department drew an average of $13.28 per week. In June, nine truck drivers had an average of $15.98.
(*b*) On the Fredericton-Devon-Marysville run, for the present year, there is paid a flat weekly wage of $15 for a week of more than sixty hours.
(*c*) On the Saint John Motor Line division, the average pay of two drivers was $21.85 per week in 1938. The average weekly pay here for July and March of 1939 was $20.50.
(*d*) Eliminating Fredericton, the average weekly wage of inter city drivers was $18.20 in March, and $22.60 in July, 1939. The average pay per week for 55 drivers in 1938 was an amount of $18.12. These wages varied from as low as $14 to as high as $27. Upon an hourly basis the average rate was 47 cents per actual driving hour in March, 1939, and 48 cents in July of the same year. Some wages were as low as 40 cents per running hour and others as high as 50 cents. Where comparison is made with twenty-five Canadian cities, it is found that some rates are over 75 cents per hour, none are under 45 cents, and the average is 60 cents, giving a $32.40 per week average.

These facts force the Board to the conclusion that the scale of wages paid by the SMT (Eastern), Limited, is low and especially so in some branches of its operations. The company, for some classifications of its drivers, admits this fact, but, on its part, brings forward a number of considerations:—

(*a*) It points to the fact that, compared with other systems, the territory in which it operates is more sparsely settled, with little pick-up business.
(*b*) In the case of the Fredericton-Devon-Marysville division, as well as in the freight business throughout the Province, the complaint is made that operations are conducted at a loss largely because of the competition which comes through illegal passenger and freight traffic. Conclusive evidence was given to the Board that such illegal traffic is carried on.

To its members it appears a strange state of affairs that the authorities, who demand a high price for the privilege of carrying on a legitimate bus and truck business, should not protect to the limit those who pay the price for the privilege from the attacks of those who, by underhand and illegal methods, interfere with their earnings, which in the end reacts upon the wage earners.

(c) Another consideration to which the Company points is the very heavy taxation with which it is burdened. By a table furnished to the Board by the Bureau of Statistics it is learned that for a motor coach such as is used by the SMT, the total gasoline, registration, and service fees are higher in New Brunswick than in any Province in Canada, except Quebec; and for trucks of a like classification there is no exception, New Brunswick standing on the highest level.

In dealing with the defence of the company that the revenue does not warrant any advance in the wage scale, the Board thought it wise to call in a chartered accountant, which was done with the consent of the Minister of Labour. It is fair to record that the company did not hesitate to produce any form of evidence which it was suggested might reveal its actual financial position, and it willingly opened its records to the utmost scrutiny. The expert engaged by the Board is a chartered accountant of high standing, and his report, after a close examination of all items, satisfies the Board that the financial statements placed in evidence show nothing other than the exact record on the books. In answer to a question raised by the employees as to whether a reduction made in wages early in the present year was justified, the accountant's answer is quite definite, "it was important that the Company endeavour to increase Gross Revenue considerably and to keep expenses as low as possible."

Wage Recommendations:

The Board accepts the company's defence of inability to increase wages, but also makes its finding that some wages are on too low a scale. It recognizes that the SMT system is a young organization with a financial structure erected by the issuance of Preferred Stock in possession of some 410 shareholders, none of whom hold a very large block. Saint John Motor Line, with its 121 shareholders, is in a like financial position. To take any action which would violently disturb the financial standing of the Company causes the Board to hesitate. On the other hand, there are workmen who, while paid a low wage, yet are engaged in a very responsible position. It has occurred to some members of the Board that to safely guide a bus with a large passenger list through the perils of highway traffic may be as great, if not greater, responsibility than is assumed by the engineer on the railway locomotive.

Recognizing these different viewpoints, the Board makes recommendation of increases as contained in the agreement which forms part of this report. In making this increase a first charge on earnings after payment of preferred share dividends, no disturbance is brought to the present financial standing of the Company, while assurance is given to the Employees that there can be no evasion of their right to receive consideration as soon as financial conditions permit. Thus, the employes are encouraged to act as partners in the enterprise in which they are employed and may know that any contribution they make towards the prosperity of the Company is one in the profits of which they share.

Rest Rooms:

The Employees ask for agreement on the provision of rest rooms for drivers at the end of their runs. From facts presented, the Board believes that the Company is doing fairly well in this respect and that the matter is one for negotiation, not agreement.

Brakes:

There was request from the drivers that busses be equipped with efficient brakes and mirrors. Regarding the efficiency of the brakes now in use the evidence presented was rather conflicting. The Board feels that the company is now endeavouring to improve the present brake system, and believes that the matter is one of mechanical efficiency and not of a character to require a written agreement.

Emergency Drivers:

The Board is proposing a new section in its recommended agreement which accomplishes the same objective as the Employees sought in Section 16 of their proposed agreement in regard to drivers who are called out in an emergency and may have been otherwise employed.

Reopening of Cases:

The Board believes that cases of discipline which arose during the present year which Employees request should be reopened and reviewed have already had due consideration and should not be reopened.

Availability for Service:

The Board feels that it is without sufficient evidence to show any great case of injustice from drivers being on call for service and do not recommend an agreement giving guarantee

of a stated monthly wage. The Board believes that the matter is one for negotiation

Student Operators' Rate of Pay:

The number involved in the payment for student operations is not great, and the Board believes that the amount to be paid such a class of drivers should be made a matter of negotiation, not agreement, and so recommends.

Missing of Regular Runs and Detours:

The payment of drivers who miss their regular runs when called out in an emergency is believed by the Board to be a matter for negotiation, and so recommends. The Board considers the matter of payment for detours in the same light, and makes a similar recommendation.

Mileage Logs:

Any evidence before the Board seemed to indicate that the present mileage logs upon which drivers' wages are based are not below the Provincial Highway Department's present survey; and, because a change would necessitate much disturbance of the present tariff schedules, no change is recommended.

Court Attendance:

The Board believes there is justice in the claim of payment of drivers for Court attendance in company cases and recommends adoption of the proposal made by the Union.

Badges:

Permission to wear Association Badges and to post Association notices on bulletin boards seem to be things which naturally follow from a recognition of the Union; and the Board recommends such an agreement. From this recommendation, Mr. Ritchie dissents.

Passes:

The matter of the Company providing passes for Union members to travel to Union meetings is felt by the Board to be one which should be left to the discretion of the Company, and no action is recommended by the Board.

Inspectors:

The employees seek by agreement to have nothing but facts presented by inspectors in making their report, and suggest the administration of a penalty for failure in such reports. The Board feels that this is a matter of internal administration and that specific cases should be dealt with by negotiation as they arise. It so recommends.

Drivers' Defence:

The Board believes that in all cases drivers should not be disciplined or dismissed without a fair chance to make out a defence, and it recommends that this section be included in the agreement.

Written Complaints:

To recognize all complaints against drivers to be in writing appears to the Board to present insurmountable difficulties in carrying out fully, and the Board recommends its deletion from the agreement proposed by the Employees.

Classification of Drivers:

The Employees seek by agreement to establish four classes of Drivers; but the Board is of the opinion that such classification, where ability is involved, must be rather of an artificial character, and is to be largely determined by seniority. Deletion of this section is recommended.

Student Operators:

The matter of superintending student drivers during their probation is a matter of internal economy, and it is felt by the Board not to require an agreement.

Junior Drivers:

Regulations regarding Junior runs are felt by the Board to be matters involved in recognition of Seniority and not to require special agreement.

During the hearings attempts were made to bring the parties concerned together and to remove differences; but such attempts failed. Before the end of the hearings, the representatives of the Employees intimated their willingness to abide by the findings of the Board, and their formal commitment to so act is attached to this report.

In witness whereof of the above report we hereunto subscribe our names, this 7th day of September, 1939.

Agreement Proposed by the Board of Conciliation

This agreement entered into between the SMT (Eastern), Limited, also Saint John Motor Line, hereinafter referred to as the Company, and their employees, members of Division 1182 of the Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America, hereinafter referred to as the Association.

Section 1—

The Company recognizes the men in their Association and gives its full consent for all employees to belong to and to remain in good standing in the Association.

Section 2—

The Company hereby agrees to meet with duly elected representatives and committees of the Association to discuss such questions as may arise from time to time which are of importance to either party or to both.

Section 3—

All things being equal seniority shall prevail in promotion assignment of runs and holiday periods.

Section 4—

The Company shall assume half the cost of uniforms to be used by the men when on duty.

Section 5—

In the event of an accident, the driver will be immediately suspended until the case is investigated: and, if found clear of blame, will receive full pay for time lost; and, if at fault, will be disciplined by the management. In all cases the driver shall be informed of the reasons for his being held responsible for any accident.

Section 6—

In the case of a mechanical road failure for which the driver is not responsible, he shall be paid for his run in full, regardless of where the accident occurs.

Section 7—

Each permanent employee of the Company shall be entitled to one week's holiday each year with pay. Seasonal employees shall not be entitled to such a holiday.

Section 8—

Wage scale: Fredericton-Devon-Marysville Drivers are to receive $18 per week to go into effect at once. In this Division an immediate endeavour is to be made to reduce the working hours to nine hours a day.

The following increases in wages shall be made should financial conditions permit, it being agreed that these increases are a first charge on the earnings of the Company after payment of preferred dividends:—

Suburban Drivers—

Regular drivers are to be paid at the rate of $4 per day. Seasonal drivers are to be paid at the rate of $3.75 per day.

Inter City Drivers—

Seniors are to receive 2·3 cents per mile Juniors (less than two years) are to receive 2 cents per mile.

Freight and Truck Drivers—

These are to be paid $22.00 per week. Helpers are to be paid $15 for a week. City "Pick-up" Freight Drivers are to receive $16 per week.

The hours of work in the Freight Department are to be immediately adjusted to a maximum of ten hours per day.

All these increases are to be considered minimum increases. When this scale of wages is reached, there is to be a general increase of all classes of drivers of a further 15 per cent. If funds in hand are not sufficient to meet the above increases whatever funds are available shall be paid to all classes of drivers on an equal percentage, based on the funds in hand.

Section 9—

At least two times a year, documents revealing the actual financial showing of the Company are to be made available to a Committee of the Association for examination. If thought necessary, the employees may call in an expert to examine the financial records. Expenses of such examination are to be paid in full by the Company.

Section 10—

Persons otherwise employed by the Company shall not be used as drivers unless in cases of great emergency.

Section 11—

Drivers attending court, inquests, or any other investigations, at the instructions of the Company, shall be paid the same as they would have earned on regular runs, plus expenses. Extra drivers so used will be paid $3.50 a day, plus expenses. In such cases, court fees will be returned to the Company.

Section 12—

The company will not object to the wearing of Association Badges on uniforms nor to the posting of Association notices on the bulletin board.

Section 13—

Drivers shall not be disciplined, dismissed, or any entries made against their records unless given a fair chance to defend themselves.

This contract shall be in effect from January 1, 1940, up to and including January 1, 1941, and each year after, unless one of the parties wishes to terminate the agreement, and in such case there must be sixty days' notice given by the party desiring to make the change.

(Signed) SMT (Eastern) Limited, and Associated Companies.

Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America.

Employees Undertaking Re Board Award

Saint John, N.B.,
August 16, 1939.

To the Chairman
and Members of the Board.

Re Dispute between Division 1182, Amalgamated Association, and SMT Eastern Co.

Having regard to the question put by your Board to the parties in dispute and with reference to Sect. 63 of the Act, we the Employees of the SMT Company, members of Division 1182, hereby agree with, and through our Representatives to abide by such decision or award as a majority of the members of the said Board shall make in the matters now before it.

(Signed) Magnus Sinclair.
(Signed) Wm. T. Cooper.
(Signed) J. C. Cole.

Representing the Amalgamated Association.

Minority Report

In the matter of the Industrial Disputes Investigation Act and in the matter of differences between S.M.T. (Eastern) Limited and their Employees being members of Division Number 1182, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America.

Participation in the proceedings of this Conciliation Board has been a most valuable

experience and I feel it a privilege to have been associated on it with the Reverend Dr. Thomas and Mr. J. A. Whitebone; but, with regret, I find myself compelled to differ with the report submitted by them.

I have had the opportunity of reading that report and have examined with particular care the reasons listed for the recommendation that the company grant union recognition and enter into an agreement with their employees through the medium of the local division of the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America. I find nothing in these reasons or in the evidence presented to the Board to justify such a recommendation.

The company is emphatic in its attitude that, while willing to deal with its employees individually or in groups, it is not willing to deal with an international union, either through a local unit or otherwise. There is no legal obligation on the part of the company to grant union recognition and it is my belief this board should not attempt to interfere with the right of the company to deal with the question as it sees fit.

The union representatives argued it would be to the advantage of the company to grant recognition but, when pressed to particularize, they could not go further than suggest the company might benefit through the goodwill of organized labour which they claimed would accrue to the company after recognition. This suggestion appealed to me as more theoretical than practical. At any rate it is not of sufficient weight to influence the company's executives.

I am not impressed by the representations made regarding the achievements and reliability of the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America. Mr. Magnus Sinclair, international executive of this organization, presented the case of the employees. He spent several months in Saint John assisting the members of the union in connection with the dispute but in that time failed to approach the company to attempt an amicable settlement. His only explanation for not doing so was that he did not wish to expose himself to the humiliation of being refused an interview.

Great stress was laid on the point that through affiliation with an international union, the local unit was able to secure the benefit of the experience of the parent organization, but the proposed agreement in this case was not submitted to the parent organization for approval. On the contrary it was presented to the company by a local street car operator with little experience in negotiating labour agreements.

At the first sitting of the Board the representatives of the employees made it clear they expected Saint John Motor Line, Limited, to be included in the scope of the investigation. I pointed out that company was not included in the order granting the Board of Conciliation, was not a subsidiary of S.M.T. (Eastern) Limited and no notifications regarding the application for, or appointment of, the Conciliation Board has been addressed to it as required by the Industrial Disputes Investigation Act. On the question being referred to Ottawa the Department of Labour ruled that, as the two companies were under the same management and made a practice of exchanging drivers, Saint John Motor Line, Limited, should be included in the investigation and that it was felt the objections to it being so included were technical only. Later the company asked that the investigation include Island Motor Transport, Limited, a wholly owned subsidiary operating in Prince Edward Island. When this request was referred to the department it evaded the question and left the decision to the Board with the result that the other two members ruled the scope of the investigation should not be extended. I can understand the viewpoint of my confreres but not the change of attitude by the department.

The advantage to the company in having Island Motor Transport, Limited, included was to increase the number of driver employees, of which it argued the union did not have a majority. The reasons advanced for including Saint John Motor Line, Limited, in the investigation applied with far more force to the inclusion of Island Motor Transport, Limited. I believe the drivers employed by that company should be considered in deciding the question as to whether the union represents a majority.

I cannot leave this phase of my report without a further reference to the attitude adopted by the Department of Labour. It seems to me the wording of the Industrial Disputes Investigation Act, as adopted by Parliament, should govern the proceedings of all conciliation boards rather than the viewpoint of any departmental official, even a Deputy Minister. The attitude of the Department of Labour in this instance savours of bureaucratic rule.

The company clung to its contention that the union did not include in its paid-up membership a majority of the drivers, while the representatives of the union insisted that the drivers, with very few exceptions, were all union members. A list was filed showing fifty-five drivers employed by S. M. T. (Eastern), Limited, and Saint John Motor Line, Limited. Six additional drivers are employed by Island Motor Transport, Limited. When Mr. A. G.

Burnham made his investigation he found thirty drivers only listed on the membership rolls of the union whereas evidence was adduced to the Board that the votes in favour of a strike numbered more than forty employees, or thirty-three per cent more than appeared on the membership roll. The Burnham report shook my confidence on the reliance which could be placed on the representations made by the union representatives.

It follows from the foregoing that I do not believe the company should execute the suggested agreement which forms part of the majority report.

While recognizing that some of the employees work long hours I cannot see how it is practical to put a ten hour daily schedule in effect in the freight department if it is to include lay-over time. The nature of the operation must be considered. The volume of freight carried will vary from day to day with a consequent variation in the time required to complete a round trip. A driver must make the round trip with his truck. That the employees recognize special considerations apply to the freight department is evident by their suggesting a maximum twelve-hour day. If the illegal competition, referred to in the majority report, were eliminated the company might be in a position to put additional trucks on each route and so reduce working hours.

I was willing to join in a recommendation which, in effect, would restore the January pay when the financial position of the company would justify doing so, but I cannot join in the recommendation as phrased in the majority report. To ask the company to grant an immediate increase on the Fredericton-Devon-Marysville route, where it is suffering a financial loss due to the failure of the Provincial Government to grant it franchise protection, is requesting the company to increase its present loss.

The majority report recommends wage increases that ultimately will amount to from thirty to forty per cent of the wage scale now in effect. There was no evidence presented indicating any hope of the company obtaining sufficient revenue from operations in New Brunswick to justify the adoption of such a wage level. There was conclusive evidence that the current position of the company was not good and that it had heavy bank loans, accounts and bills payable. I can understand the desire to find a wage scale that will make everybody happy but in this instance we have a business problem that must be regarded with some degree of realism and with the realization that the creditors have some interest in how a debtor company expends its revenue.

Dated the seventh day of September, A.D. 1939.

(Signed) L. McC. Ritchie.

CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM JULY 1, 1939, TO SEPTEMBER 30, 1939

CONCILIATION proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation Officer are at Ottawa.

The following statement covers the more important conciliation matters dealt with during the period July 1, 1939, to September 30, 1939. (An article covering the period April 1 to June 30, 1939, appeared in the Labour Gazette, July, 1939, page 654).

Stevedores, Checkers, Coopers, Etc., Port Arthur and Fort William, Ont.—As a result of mediation by departmental officers over a protracted period a settlement was secured in the dispute between the Canadian National Railways and the Canadian Pacific Railway Company and their stevedores, coopers, porters, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes, employed respectively at Port Arthur and Fort William, Ontario. The applications for Boards of Conciliation and Investigation which had been made, were consequently withdrawn. A reference to this dispute appeared on page 656

of the July issue of the Labour Gazette. The dispute had to do with the employees' request for general wage increases, changes in working conditions, and the inclusion in the agreement of monthly rated positions.

Motor Coach and Truck Drivers, Saint John, N.B.—Mediation by officials of the Department of Labour in a dispute between the SMT Eastern Limited, Saint John, N.B., and its motor coach and freight truck drivers, members of Division No. 1182, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, as referred to on page 658 of the July issue of the Labour Gazette, having been unsuccessful, a Board of Conciliation and Investigation was established early in July to deal with the matter. The report of this Board will be found elsewhere in this publication.

Checkers, Porters, Coopers, Etc., Port McNicoll, Ont.—During the past several weeks officers of the Department of Labour continued their efforts to bring about a settlement of the dispute regarding wages and working conditions between Mr. F. W. Nicholas, contractor for the Canadian Pacific Railway Company, and checkers, porters, coopers, coal handlers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, employed at the Railway Company's wharf at Port McNicoll, Ontario, as mentioned in the July issue of the Labour Gazette at page 658. Agreement was secured on all points with the exception of the payment of penalty overtime for work performed on Sundays. This the employer refused to concede, but offered overtime rates for the seventh day to men who were not allowed one day off in seven. The employees declined this on the ground that it was inconsistent with other agreements in effect on the Great Lakes covering similar classes of employees. Early in September, when it became apparent that no agreement could be reached, it was decided to proceed with the establishment of a Board of Conciliation and Investigation, particulars of which will be found on page 896 of the September issue of the Labour Gazette.

Grain Elevator Employees, Port Arthur and Fort William, Ont.—On July 18, 1939, the assistance of the Department of Labour was requested in a dispute involving twelve terminal grain elevator companies and their employees, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, employed at Port Arthur and Fort William, Ontario. The existing agreement was to expire on July 31, and the companies had refused to accept the revised contract submitted by the Brotherhood, which included provision for increased wages, the institution of an 8-hour day, penalty overtime rates, holidays with pay, the inclusion of monthly paid employees in the agreement and, as well, a clause to the effect that the Brotherhood be recognized as the sole bargaining agency for all employees below the rank of General Foreman. A conciliation officer of the Department conferred separately with representatives of the employers and with officers of the union, and a joint conference followed. The employers contended that, due to the seasonal nature of operations, regular working hours were impracticable, that as the companies were then operating at a loss increased wages could not be considered and, though quite willing to continue the agreement with the Brotherhood, they were definitely opposed to the principle of a closed shop. No basis of settlement could be reached, and subsequently the employees made application for the establishment of Boards of Conciliation and Investigation. One Board was established to deal with the dispute, as reported elsewhere in this issue. It was stated that 1,060 employees were directly affected.

Truck Drivers, Van Men and Helpers, Saskatoon, Sask.—A dispute existing between the Saskatoon Cartage and Warehouse Company, Saskatoon, and its truck drivers, van men and helpers, members of Division No. 200, Automotive Transport Section, Canadian Brotherhood of Railway Employees, was terminated in August as a result of intervention by a conciliation officer of the Department. The employees had made application for the establishment of a Board of Conciliation and Investigation, but this was withdrawn following meetings held by the conciliator at which an agreement was reached providing for certain adjustments in working conditions. The application stated that 26 employees were directly affected by the dispute.

The accidents reported to the Workmen's Compensation Board of Ontario during September numbered 5,395, as compared with 5,645 during August, and 5,121 during September a year ago. The total benefits awarded during September amounted to $531,990.40, of which $447,179.65 was for compensation and $84,810.75 for medical aid.

This year's record to date shows a total of 42,946 accidents reported, as compared with 45,084 during the same period last year, and total benefits of $4,505,375.32, as compared with $4,683,173.13 during the corresponding period of 1938.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1939

THE following table shows the number of disputes, workers involved and time loss for September, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Numbers of employees involved	Time loss in man working days
*Sept. 1939	17	8,804	23,652
*Aug. 1939	18	15,031	42,110
Sept. 1938	15	2,132	16,268

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Although the number of strikes and lockouts recorded for September was slightly less than in August, the figures as to workers involved and time loss were considerably lower. Approximately 38,000 out of 42,110 man working days lost in August were due to strikes of coal miners in Nova Scotia, and in September approximately 17,250 days were lost in strikes of coal miners in the same province against working with miners of alien origin. None of the other disputes in August or September involved a large number of workers or caused considerable time loss. In August, 1938, most of the time loss was due to seven disputes, each of which caused time loss of over one thousand days, the most important being a strike of salmon fishermen in British Columbia.

Three disputes, involving 791 workers, were carried over from August, including two which had been reported to the Department too late for inclusion in the statistical table in the September Labour Gazette, namely: clothing workers (sportswear), Montreal, P.Q., and restaurant workers at London, Ont. Fourteen disputes commenced during September. Of these seventeen disputes, fifteen were terminated during the month, two resulting in favour of the employers and six in favour of the workers involved, while compromise settlements were reached in five cases and the results of two disputes were recorded as indefinite. At the end of the month, therefore, there were two strikes or lockouts recorded as in progress, namely: clothing factory workers (sportswear), Montreal, P.Q., and automobile parts factory workers, Windsor, Ont.

There were seven strikes of coal miners in Nova Scotia against working with certain miners of alien enemy origin. It was claimed that some of these had expressed hostile sentiments and that some might be a cause of danger. In some cases the miners requested the exclusion of all foreign born workers. The Royal Canadian Mounted Police investigated and it was found that many of the foreign born had become naturalized and in most cases there appeared to be no reason to fear trouble. Certain miners, however, were instructed to remain off work for a time. Work was resumed pending the results of these investigations. In some cases some of the miners objected to resuming work unless the miners of foreign origin were allowed to work until something had been found against them.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to seven such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938, one employer; dressmakers, Montreal, P.Q., January 20, 1939, one employer; and stationary engineers, Toronto, Ont., March 2, 1939, one employer.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A cessation of work by ten to fifteen caddies at a golf club at Winnipeg, Man., on August 29 for part of one day was reported in September. It appears that one of the caddies was demoted by the manager and a number of the others ceased work but their demand for his reinstatement in the higher class was not granted.

A cessation of work by 32 longshoremen at Goderich, Ont., on September 29 to secure an increase in wages from 35 cents per hour

to 50 cents has been reported in the press. It was stated that the crews of the ship involved and another ship in port completed the loading of the vessel. At the end of the month a settlement had not been reported.

A cessation of work by coal miners on one shift in one mine at Stellarton, N.S., on September 27 has been reported in the press. The cause was reported to be the layoff of one miner for unsatisfactory work.

A stoppage of work by 22 employees in a spinning mill at Listowel, Ont., on September 25 has been reported in the press. The cause was not stated.

A dispute at Regina, Sask., is reported to have involved about 75 men in a stoppage of work for a short time on September 14. It appears that the men were digging a ditch for sewer and waterworks construction for the city and a misunderstanding arose as to payment by the cubic foot instead of at 45 cents per hour. On being assured by the Mayor that payment by the hour would be made, work was resumed.

A stoppage of work by 70 men on a civic paving job at Stellarton, N.S., on September 25 has been reported in the press. It was stated that they objected to certain deductions from pay for taxes and work was resumed when a satisfactory arrangement was reached with the authorities after one day.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to September

Restaurant Employees, London, Ont.—A number of employees in one restaurant ceased work on August 17 to secure an agreement between the employer and the Hotel and Restaurant Employees' International Alliance and the Bartenders' International League. The employer reported that the only condition in the draft agreement not conceded was the employment of union members only while the union reported there was a difference over a reduction in hours from 65 per week to 60. It was reported that the employer secured an interim injunction in connection with picketing. As a result of conciliation by an official of the Ontario Department of Labour a settlement was reached at the end of September providing for six day's work per week instead of seven without a reduction in pay. Work was resumed at the beginning of October. The dispute was not reported to the Department in time for inclusion in the September issue of the Labour Gazette.

Disputes Commencing During September

Coal Miners, Florence, N.S.—The miners employed in one colliery of one company ceased work on September 28 to secure the reinstatement of five miners suspended early in August for unsatisfactory work. It was reported that the provincial mine inspector and the union officials considered that the work was unsatisfactory but the miners held that the suspension should have been cancelled in a short time. The miners had, therefore, ceased work in August, on the tenth, sixteenth, twenty-fourth and thirty-first as reported in the Labour Gazette for September, the dates given being slightly different. In each case work was resumed after a few days, pending negotiations. The miners made a levy on the

(a) Strikes and Lockouts in progress prior to September, 1939				
Mining, Etc.—				
Coal miners, Florence, N.S.	1	700	1,400	Commenced Aug. 31, 1939; for reinstatement of five miners; terminated Sept. 4, 1939; return of workers; indefinite.
Manufacturing—				
Textiles, Clothing, Etc.—				
Men's clothing factory workers, Montreal, P.Q.	1	85	1,600	Commenced Aug. 7, 1939; alleged violation of agreement *re* replacement of dismissed workers; unterminated.
Service—				
Business, Etc.—				
Restaurant employees, London, Ont.	1	6	132	Commenced Aug. 17, 1939; for union agreement with reduced hours, closed shop, etc.; terminated Sept. 27; conciliation (provincial); compromise.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1939*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during September, 1939				
MINING, ETC.—				
Coal miners, Springhill, N.S.	1	1,500	1,500	Commenced Sept. 5; against working with miners of alien enemy origin; terminated Sept. 5; negotiations; in favour of employer.
Coal miners, Reserve, N.S.	1	350	350	Commenced Sept. 5; against working with miners of alien enemy origin; terminated Sept. 5; negotiations; in favour of workers.
Coal miners, New Waterford, N.S.	1	1,950	1,950	Commenced Sept. 5; against working with miners of alien enemy origin; terminated Sept. 5; negotiations; in favour of workers.
Coal miners, New Waterford, N.S.	1	1,100	8,000	Commenced Sept. 11; against working with miners of alien enemy origin; terminated Sept. 16; negotiations; in favour of workers.
Coal miners, Sydney Mines, N.S.	1	800	2,400	Commenced Sept. 11; against working with miners of alien enemy origin; terminated Sept. 13; return of workers pending investigation; in favour of employer.
Coal miners, New Waterford, N.S.	1	850	1,700	Commenced Sept. 13; against working with miners of alien enemy origin; terminated Sept. 14; negotiations; in favour of workers.
Coal miners, Glace Bay, N.S.	1	450	1,350	Commenced Sept. 21; against working with miners of alien enemy origin; terminated Sept. 26; return of workers pending investigation; in favour of workers.
Coal miners, Florence, N.S.	1	700	2,100	Commenced Sept. 28; against suspension of five workers; terminated Sept. 30; negotiations; indefinite.
MANUFACTURING—				
Textiles, Clothing, Etc.—				
Cotton factory workers, Milltown, N.S.	1	24	130	Commenced Sept. 11; for increase in wage rates; terminated Sept. 16; conciliation (provincial); compromise.
Clothing factory workers (sportswear, etc.), Winnipeg, Man.	1	20	60	Commenced Sept. 12; *re* application of union rates on new line of operations; terminated Sept. 16; negotiations; in favour of workers.
Miscellaneous Wood Products—				
Wood factory workers, Fenelon Falls, Ont.	1	41	205	Commenced Sept. 12; for increased wages; terminated Sept. 16; conciliation (provincial); compromise.
Metal Products—				
Automobile parts factory workers, Windsor, Ont.	1	28	600	Commenced Sept. 7; for reinstatement of workers, increased wages, recognition of union, etc.; unterminated.
Miscellaneous—				
Window shade factory workers, Toronto, Ont.	1	100	100	Commenced Sept. 19; for increase in wages and adjustments of minor grievances; terminated Sept. 19; negotiations; compromise.
TRANSPORTATION—				
Water—				
Longshoremen, Charlottetown, P.E.I.	1	100	75	Commenced Sept. 23; for increased wage rates; terminated Sept. 23; negotiations; compromise.

*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

wages of all to reimburse the suspended men for the wages lost but the union voted against stoppage of work.

COTTON FACTORY WORKERS, MILLTOWN, N.B.—A number of weavers in two out of three shifts in a cotton mill ceased work on September 11 to secure an increase in wages to the rate for experienced workers, 25½ cents per hour, from the beginners' rates at 14 cents to 21 cents per hour during the first year and one half. The management offered to pay the rate requested if more looms were run. As a result of conciliation by the provincial Fair Wage Officer this was agreed upon but extra workers were to be provided to change the cloth for the weavers.

CLOTHING FACTORY WORKERS (SPORTSWEAR, ETC.), WINNIPEG, MAN.—Employees in one establishment ceased work on September 12 owing to a dispute as to the piece rates to be paid on a new line of work under the agreement with the United Garment Workers of America. A new scale of piece rates was agreed to in a short time but a resumption of work was delayed owing to Jewish holidays.

WOOD FACTORY WORKERS, FENELON FALLS, ONT.—The male employees in one establishment ceased work on September 12 to secure an increase in wages of five cents per hour. As a result of conciliation by an official of the Ontario Department of Labour work was resumed on September 17, under an arrangement that wages would be increased two cents per hour until the end of the year when a further increase of three cents will be made if production costs have been lowered through the co-operation of employees in eliminating waste, etc. A committee of employees is to be chosen to discuss production methods, etc., with the management and there is to be no stoppage of work until the end of the year nor thereafter if the agreement is continued. The strikers joined a local of the United Carpenters and Joiners of America.

AUTOMOBILE PARTS FACTORY WORKERS, WINDSOR, ONT.—A number of employees in one establishment ceased work on September 7 to secure the reinstatement of certain workers discharged on the previous day alleged to have been dismissed for union activity, and to secure a union agreement with increased wages, reduced hours, etc. The workers had joined the United Automobile Workers of America. At the end of the month the dispute was unterminated but early in October as a result of conciliation by an official of the Ontario Department of Labour a settlement was reached providing for the re-employment of the men discharged, one at different work and one on probation, with improvements in wages and working conditions, the management agreeing to discuss grievances with employees, not more than three at one time.

WINDOW SHADE FACTORY WORKERS, TORONTO, ONT.—Employees in one establishment manufacturing upholstery goods, window shades, etc., ceased work on September 19 to secure an increase in wages of five cents per hour and certain improvements in working conditions. As a result of negotiations between the management and representatives of the Toronto District Labour Council it was reported to have been arranged that certain improvements would be made, that the management would meet a committee of employees and that on the return of the manager there would be negotiations as to an increase in wages. Work was resumed on the next day.

LONGSHOREMEN, CHARLOTTETOWN, P.E.I.—Men engaged to unload coal from a ship ceased work on September 23 demanding an increase in wages of twenty per cent. Work was resumed next day when the rate was increased from 70 cents per hour to 80 cents.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1939, issue in the review of Strikes and Lockouts in Canada and Other Countries, 1938. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details of the more

important ones. These details which are published after investigation do not always agree with the information given earlier in the press.

The number of disputes which began during August was 85 and 21 were unterminated at the end of July, making a total of 106 in progress during the month, involving 37,200 workers with a resultant time loss of 118,000 man working days.

Of the 85 disputes which began during August, 23 arose out of demands for increases in wages, five were against proposed wage reductions and 29 were over other wage questions. Questions respecting the employment of particular classes or persons led to 15 strikes, five were over questions of working conditions and seven were over questions of trade union principle. One small dispute was due to sympathetic action.

Final settlements reached during August numbered 94. Of these 24 were settled in favour of the workers, 53 were settled in favour of the employers and 17 resulted in compromises. In the case of three disputes work was resumed pending negotiations.

The strike which involved the largest number of workers during August occurred at Wrexham, Wales, on August 22 when 5,000 colliery workers employed by four firms ceased work for advances in wages. By August 28 work had been resumed in these four collieries under conditions similar to those prior to the strike.

On August 22, 2,200 colliery workers at Bargoed, Glamorganshire, refused to work with non-unionists. Work was resumed the same day when the non-unionists joined the union.

At Abertridwr, Glamorganshire, 1,250 colliery workers, employed by one firm ceased work on August 22, refusing to work with non-unionists. The latter joined the union and work was resumed on August 26.

On August 10, at Hereford a demand for payment of four hours travelling time on completion of contract led to a strike of 1,772 building trade operatives; 311 others were indirectly involved. Work was resumed the same day when the workers demands were granted.

At Devizes, Wiltshire, 1,350 building trade operatives struck for an increase in wages of 3d per hour. No changes were made in the wage rates, but by August 15 the majority of the workers had resumed work.

Refusal to work with non-unionists led to a strike of 1,100 colliery workers at Hirwaun, Glamorganshire, on August 28, which was settled two days later when the workers in question joined the union.

At Pontypool, Monmouthshire, 1,000 colliery workers ceased work on August 17, as the result of a dispute respecting bonus payment to work people who were absent from work on the day preceding a holiday. Work was resumed two days later and the dispute was referred to arbitrators who subsequently decided in favour of the workers.

New Zealand

The Dominion of New Zealand has recently published statistics dealing with industrial disputes during the first half of 1939. During that period there were 43 disputes which involved 11,193 employees of 607 firms and which resulted in a time loss of 29,097 man working days. The estimated loss in wages was £33,409. During the first half of 1938 there were 39 disputes which involved 5,078 workers with a resulting time loss of 12,796 man working days.

United States

Preliminary estimates of strikes in July, 1939, which as the Bureau of Labour Statistics points out, are based on "scattered information from newspapers and other sources and are subject to revision as more definite reports are received" show 210 strikes as beginning during the month, which with 135 unterminated at the end of June made a total of 345 in progress during the month. The number of workers involved in these disputes was 200,000 with a resultant time loss of 1,000,000 man working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 338 strikes in progress, involving about 110,000 workers with a resultant time loss of 925,000 man working days.

War risks led to strikes of seamen on American ships scheduled to sail for European and Mediterranean ports during September. These strikes were most serious at New York about the middle of the month when nine liners were reported as being held there. In most cases the seamen were members of the National Maritime Union affiliated with the Congress of Industrial Organizations, and demanded an increase in wages, a bonus for entering the war zone and individual insurance. Negotiations between representatives of the union and shipowners led to a settlement on or about September 20 under the terms of which the seamen were granted 25 per cent increases in wage rates, guaranteed transportation back to the United States, payment of wages in event of internment in a foreign port and insurance against the loss of personal effects. Legal proceedings against certain of the striking seamen were dropped by the terms of the settlement.

APPOINTMENT OF ADMINISTRATORS FOR "KEY" COMMODITIES

War-Time Prices and Trade Board Assisted By Experts in Wool, Sugar and Leather—Review of Sugar Situation

ESTABLISHED on the outbreak of war as a protective measure against undue price increases or hoarding in the necessities of life, and to permit a maximum diversion of goods to war needs, the War-Time Prices and Trade Board (LABOUR GAZETTE, September, pages 889-893), has expanded its activities during the past month by the appointment of administration experts to survey and direct the distribution of certain "key" commodities.

In addition to its five Commissioners—H. B. McKinnon, Commissioner of Tariff; David Sim, Commissioner of Excise; F. A. McGregor, Commissioner of the Combines Investigation Act; A. M. Shaw, Director of Marketing Services, Department of Agriculture; and Charles P. Hebert, member of the Tariff Board—the Board personnel has been increased by the appointment of the following officials:

Economist—Professor H. R. Kemp, University of Toronto.

Secretary—Professor K. W. Taylor, McMaster University, Hamilton.

Wool Administrator—David C. Dick, Cobourg, who shall "be responsible, in co-operation with the industries concerned and under the direction of the Board, for the conduct of negotiations with the United Kingdom Wool Controller, for the organization of any necessary arrangements for the securing of supplies of wool, both domestic and imported, required by Canadian manufacturers, for the supervision of the purchase, shipment, delivery, and allocation of such supplies, for the investigation of applications for licences to export wool or its products, for the determination of prices for wool, tops, rags, waste or yarns, export licences for which may have been withheld, and for such other duties as may be assigned to him by the Board."

Sugar Administrator—S. R. Noble, Montreal, who shall "be responsible, in co-operation with the industries concerned and under the direction of the Board, for the conduct of negotiations with the United Kingdom Sugar Controller, for arranging for supplies of sugar to be imported into Canada, for the supervision of the purchase, shipment, delivery and where necessary the diversion and allocation of sugar, and for such other duties as may be assigned to him by the Board."

Technical Adviser to Sugar Administrator—H. J. Hobbins, Montreal.

Hides and Leather Administrator—Maurice Samson, Quebec, who shall "be responsible, in co-operation with the industries concerned and under the direction of the Board, for the conduct of negotiations with the United Kingdom Leather Controller, for arranging for supplies of hides and leather to be imported into Canada, for supervision of the purchase, shipment, delivery and allocation of hides and leather, whether domestic or imported, and for such other duties as may be assigned to him by the Board."

Publicity—Rielle Thomson.

In addition to the above officials the following officers from various government departments have been seconded for service (as required) to the Board:

Herbert Marshall, Dominion Bureau of Statistics.
Oliver Master, Department of Trade and Commerce.
Charles W. Bolton, Department of Labour.
Mrs. P. G. Turner, Tariff Board.
E. S. Martindale, Department of Mines and Resources.
E. D. Lawrence, Department of National Revenue.
C. R. Morphy, Department of National Revenue.
Miss L. C. Craig, Department of Finance.

The appointment of a Canadian Sugar Administrator followed four weeks' intensive effort and study of the sugar situation by the War-Time Prices and Trade Board. In addition to arranging that the refineries will purchase their raw sugar requirements at cost until August 31 next from the United Kingdom Sugar Controller, the Board has secured the voluntary co-operation of the refiners and industrial users of sugar.

Sugar Situation During September

An appraisal of the sugar situation as at the end of September, released by the Board on October 2, indicated that:

(1) Distribution of refined sugar to the trade in September was some forty million pounds in excess of deliveries in September of last year;
(2) Stocks on hand in Canadian refineries on the last day of September totalled about fifty million pounds;
(3) Ample supplies of raw sugar for melting during the coming year are assured.

Reviewing the results of the September "run" on sugar and its depletion of normal stocks, the Board's press release of October 2 revealed the emergency measures taken to assure adequate consumer distribution, chiefly due to the co-operation of large industrial firms. The September developments were thus outlined:

"Despite unusually large deliveries in August, culminating in unrestricted selling by retailers on the Friday and Saturday preceding Labour Day, the refiners made exceptional efforts to meet the abnormal demands of September. Hundreds of requests and complaints received by the Board were turned over to the refiners for attention resulting in an unprecedented distribution of refined sugar throughout Canada. In spite of the fact, however, that consumers were being given a great deal more sugar than they normally could consume, scarcity persisted in many centres, right to the end of the month. Refining stocks running low, the War-time Prices Board requested certain large industrial users of sugar—many of whom had bought and stored their supplies long before the outbreak of war—to release to the refiners stated quantities for diversion to the distributing trade. In little more than a week the Board thus secured, without coercion and without promise of replacement, close upon six million pounds, all of which was turned over for consumer use. Canadian firms which co-operated with the Board in meeting its first call upon industrial stocks included the following: The Coca-Cola Company; Charles Gurd and Company; Kik Company; Canada Dry Ginger Ale Limited; Pepsi-Cola Company of Canada, Limited; Willards Chocolates Limited; Christie-Brown and Company, Limited; Fry Cadbury Limited; Rowntree Company Limited; Laura Secord Candy Shops; Wm. Neilson Limited; Beech-Nut Company of Canada; Borden Company Limited; William Wrigley Junior Company; Canadian Chewing Gum Company, Limited; and Pure Gold Manufacturing Company.

It is of interest to consumers that the abnormal distribution during the month of September was at the price which had been prevailing since April last."

The Immediate Future

Emphasizing the necessity for consumer restraint in sugar purchasing during the next few weeks, the Board surveyed the immediate future as follows:

"The results achieved during the weeks when canning and preserving were on a greater-than-normal basis were secured at a very definite cost, namely, drastic diminution of reserve stocks in refiners' hands. These stand to-day at about fifty million pounds, or about enough to meet normal requirements for about fifteen days. These must suffice for Canada's needs until raws now afloat arrive and until the first sugar resulting from the fall crops in the beet areas begins to flow into the storage bins in Ontario and Alberta refineries. And they will suffice if consumers throughout Canada have the patriotism and the common sense to be content with a sugar supply that is definitely on a day-to-day basis. A buying panic of the Labour Day week-end kind or a continuance of the undoubted present tendency to hoard may very easily result in an acute (even if temporary) shortage which will be as real as that of recent weeks was unreal and unwarranted.

Prospects for 1939-1940

"By arrangement between the governments of the United Kingdom and Canada, the Canadian refining industry is now assured of its normal requirements of raws until August 31 next. Thus the spectre of 'no raws' is laid. Refining will proceed on a normal basis; distribution will be without serious delay or dislocation; it remains only to hope that purchasing by consumers will follow its wonted peace-time course and that the inclination to 'tuck away' against a fancied period of famine will in the national interest be resisted."

It was also pointed out that if individuals continue to buy in excess of their needs, or in short, if hoarding—now a prison offence—continues, it is possible that there may be some restrictions on the supplies (sales) until the raw sugar now en route reaches the Dominion and until beet sugar operations begin in Alberta and Ontario. In the meantime, prosecutions are underway in several centres where evidence of sugar hoarding by individuals and firms has been obtained.

The Board chairman, H. B. McKinnon, urged patriotic action in restricting purchases of sugar to normal, or preferably slightly less than normal requirements until adequate supplies reach the Dominion.

Removal of Dumping Duty

On October 6 the Honourable J. L. Ilsley, Minister of National Revenue, on the recommendation of the War-time Prices and Trade Board, authorized the temporary removal of the dumping duty applicable to refined sugar imported into Canada. In view of the shortage of refined sugar in Canada, entries covering importations of refined sugar will be accepted until the 15th of November, 1939, without the application of dumping duties.

LABOUR LEGISLATION IN NEW BRUNSWICK, ONTARIO (SECOND SESSION) AND THE NORTHWEST TERRITORIES IN 1939

New Brunswick

THE New Brunswick Legislature which sat from February 26 to April 6 enacted an Industrial Standards Act and new laws providing for early closing of retail establishments and marketing of natural products and giving effect within the Province to the provisions of the Municipal Improvements Assistance Act, passed by the Dominion Parliament in 1938. Statutes governing factories, mines and co-operative associations were amended.

Industrial Standards Act

The Industrial Standards Act, which came into force on August 10, 1939, is generally similar to the statutes of like title in other provinces but applies only to the construction industry. It does not extend to persons employed by the Government of the Province or any of its departments or by any board or commission created by an Act of the Legislature or by a municipal corporation. Also excluded are domestic servants and any persons engaged in temporary employment where the total cost of the services performed for, together with the material supplied by, the employer does not exceed $100.

The Minister of Health and Labour is authorized to define zones for purposes of the Act and, upon petition of representatives of employers or employees in any industry covered by the Act in a designated zone or zones, he may convene a conference of employers and employees in such industry for the purpose of investigating or considering the condition of labour and for negotiating standard or uniform rates of wages and hours. The employers and employees in conference may agree in writing upon a schedule of wages and hours and days of labour for any class or for all classes of employees in the industry and if the Minister deems it to have been agreed upon by a proper and sufficient representation of employers and employees, he may recommend that the Lieutenant-Governor in Council declare such schedule to be in force during pleasure or for the period not exceeding 12 months stipulated in the agreement, in the designated zone or zones and to be binding upon the employers and employees in the industry. Schedules are not to become effective until the tenth day after publication of the order in council in the Royal Gazette unless the order in council itself provides otherwise. Every employer must keep a copy of a schedule affecting him posted in a conspicuous place in his place of business.

The Lieutenant-Governor in Council may appoint one or more inspectors to assist in carrying out the provisions of the Act and any regulations made under its authority and the parties to an agreement are to assist in maintaining the standards provided by the schedule affecting them. An inspector may require any employer affected by a schedule to furnish the names, addresses and ages of his employees, together with information respecting wages, hours and conditions of labour and to produce records, payrolls, contracts of employment and other documents for inspection. The Minister may inquire into any partnership or association and if he considers that it is being used to defeat the Act or the regulations made under its authority, he may declare any or every member of such partnership to be an employee for purposes of the Act and regulations. In every zone or group of zones employers and employees in an industry to which a schedule applies may set up an advisory committee of not more than five members to hear complaints and to assist in enforcing the schedule.

An employer who contravenes the provisions of any schedule applicable to him is liable to a fine of from $25 to $100 and in default of payment to imprisonment for not more than three months. In addition he is to be ordered upon conviction to pay to the inspector, on behalf of the provincial secretary-treasurer, or of the employee in the discretion of the magistrate, the full amount of the wages found to be unpaid, the said amount being recoverable by distress at the instance of the inspector. An employee contravening the provisions of any schedule applicable to him is liable to a fine of not more than $25 and in default of payment to 10 days' imprisonment. Any person violating the Act or regulations is liable to a fine not exceeding $100 and in default of payment to imprisonment for a term not exceeding 30 days, the penalty to be recoverable or enforced under the Summary Convictions Act.

The Lieutenant-Governor in Council may make regulations for carrying out the provisions of the Act, including the defining of any trade or occupation. Such regulations when published in the Royal Gazette are to have the force of law.

Early Closing of Shops

The Early Closing Act, which came into force on May 1, repeals the Early Closing

Act, 1917, but continues in force, until suspended, cancelled, varied or revised, all by-laws made under the repealed statute which are in effect at the time of the commencement of the new Act. Under the 1917 Act a municipal council could pass a by-law fixing the hour at which shops must close only if a petition signed by three-fourths of the persons engaged in the particular classes of shops concerned by the petition was presented to the council. The new Act was based on a recommendation of the provincial Fair Wage Officer after an investigation of working hours in shops. It enables the council of any city, town, village or municipality to make by-laws requiring that during the whole or any part or parts of the year retail establishments and barber shops shall be closed and remain closed on each or any day of the week between the hours specified in the by-law. By-laws may also be passed requiring such establishments to close during the whole or part of any holiday as specified in the by-law. A council may make such by-laws of its own motion or on petition of such proportion of the persons engaged in any class or classes of retail trade or in the trade of barbering as appear to the council to be representative of such class or classes. Nothing in the Act or in any by-law is to render unlawful the continuance in a retail establishment after the closing hour of any customers who were there immediately before that hour or the serving of such customers.

Any by-law made under the Act may classify retail establishments according to the merchandise sold and provide that any regulation in such by-law shall apply to one or more of such classes or provide different regulations for different classes. If more than one class of goods is sold or more than one trade or business carried on in a retail establishment and if a by-law passed under the Act does not apply to one or more of such classes of goods or to any one or more of such trades, such establishment may be kept open after the specified hour on the terms laid down in the by-law, for the purposes of the sale of such goods or of such trades or businesses only.

A by-law made under the Act by a municipal council is to apply only to the municipal district or division over which the council has jurisdiction. A by-law made by a county council may provide that any regulations contained in it shall apply only to a certain district or to certain districts defined in the by-law or may provide different regulations for different districts in the county.

Any person violating the provisions of a by-law made under the Act is liable to a fine not exceeding $40 and in default of payment to imprisonment for a term not exceeding two months. Penalties are to be recovered or enforced under the Summary Convictions Act and to be paid to the treasurer of the municipality.

Closed Shop—Conciliation and Investigation

The Labour and Industrial Relations Act, 1938, was amended to provide that nothing in the Act shall be construed to restrict, limit or interfere with the right of an organization of employees to maintain an existing agreement or to enter into a new agreement whereby all employees of the employer or organization of employers are required to be members of a specified organization of employees.

A further amendment provides that where in a labour dispute the employees affected are members of the same organization but are employed by more than one employer and it is desired to make application for the appointment of a conciliation committee, the application and required statutory declaration may be signed by any two of the officers of such organization provided the application has been authorized by a majority of the employees in writing or by a majority vote of all such employees taken on a secret ballot.

Mines

Amendments in the Mining Act include a change in the section dealing with overtime in case of accident or emergency or of exceptional work which requires to be dealt with without interruption in order to avoid serious interference with the ordinary work of the mine. The Minister may now "by regulation define conditions to which such emergency or exceptional work shall apply and fix the rate of wage to be paid to workmen who are required to remain below ground or work longer than eight hours in any consecutive twenty-four hours." The Bill as introduced, provided that a workman required to remain below ground for emergency work for a longer period than the maximum of eight hours fixed by the Act was to be paid for such period at the rate ordinarily paid for work done by the hour or day, in addition to any other amount payable to him for work done by measurement or for material gotten out.

A section of the Bill which was struck out by the Legislature would have reworded the section dealing with hours of labour to provide that a workman shall not be "kept or allowed to remain," instead of as at present, "employed," at his working place below ground for the purpose of his work for more than eight hours during any consecutive 24 hours. The Bill would also have declared guilty of an offence, the owner, agent or manager of a mine, instead of as at present the operator,

where a workman was employed below ground in contravention of the Act.

The following provisions were added to the Act. The Minister may, by regulation, establish the length and depth of the cut under the long-wall or short-wall mining system and provide for working conditions thereunder. The provincial factory inspector or any officer appointed by the Workmen's Compensation Board to inspect mechanical equipment connected with mining, whether above or below the surface, particularly where danger to life or personal injuries are involved, is to have the same access to mines and mining property as the inspector of mines. All accidents to men or accidents involving equipment, timbering or any other thing which has to do directly or indirectly with the operation of the mine, either above or below ground, and which might be a source of danger to men must be reported by the operator of the mine in the most expeditious way to the inspector of mines or to the deputy inspector.

A section added to the Mechanics' Lien Act provides that any person who performs work or service upon or in respect of any mine for the purpose of producing mineral for the holder of the mining licence or lease under the provisions of the Mining Act or for any contractor or sub-contractor, shall have a lien for the price of such work or service upon the estate or interest of the holder of the licence or lease to the same extent, and subject to the same limitations, as other liens provided for in the Act.

Factories

The Factories Act was amended to require uninsured boilers to be inspected before being used and annually thereafter. Formerly all boilers were required to be insured and inspected within one year by a competent inspector. The Workmen's Compensation Board, which administers the Act, is given power to make regulations for the inspection and licensing of pressure vessels other than boilers. The board of examiners which formerly was required to have three members is now to have not less than three or more than five members. The Board is to prescribe subjects for, and conduct, examination of applicants for stationary boilermen's certificates, as well as for those of stationary pumping or hoisting engineers which were already under its jurisdiction. The section forbidding an unlicensed person to operate or have charge of a steam plant was amended to prohibit such person being employed to operate or have charge of a steam boiler or engine. As before, the inspector may issue temporary permits in emergencies. The provision was repealed which exempted from the operation of the Act boilers and engines in apartment houses, schools, churches or other public buildings used for hot water heating only or when used for steam heating carrying a pressure of not more than 15 pounds.

Health of Employees

The Health Act was amended to enable the Minister of Health and Labour, with the approval of the Lieutenant-Governor in Council, to make regulations governing the use of hydrocyanic acid or its compounds or other lethal gas as an insecticide and for the licensing and regulation of persons engaged in the business of vermin destroying. Any person wilfully violating the Act or regulations is now liable, in default of payment of the fine not exceeding $200 for which the Act provides, to imprisonment for a term not exceeding three months.

Municipal Improvements

The Municipal Improvements Assistance Enabling Act, which is retroactive to July 1, 1938, empowers the municipalities to take advantage of the Dominion Municipal Improvements Assistance Act. The latter statute authorizes the Dominion Minister of Finance to make loans, not exceeding in the aggregate $30,000,000 for constructing or making extensions or improvements to municipal projects, provided that the work will assist in the relief of unemployment.

Co-operation and Marketing

The section of the New Brunswick Co-operative Associations Act, which provided that notice of incorporation should be published by the Registrar at the expense of the association in two successive issues of the *Royal Gazette,* was replaced by a provision that such notice shall be published by the Registrar in one issue of the *Royal Gazette.* A new section authorizes the Minister in charge of carrying out the provisions of the Act, on application of an association incorporated under the Act Respecting Cheese and Butter Manufacturing Associations, to order that the New Brunswick Co-operative Associations Act shall apply to such association.

An Act to Assist in The Marketing of Natural Products enables the Lieutenant-Governor in Council to give effect within the Province, in so far as it is within the jurisdiction of the Province to do so, to any Dominion law for regulating the marketing of any natural products of Canada. By Order in Council also such laws as may be deemed necessary or desirable for the purpose of regulating the marketing of the natural products of New Brunswick may be enacted and are to have the same effect as if enacted by the Legislature.

Ontario (Special Session)

During the Special Session of the Ontario Legislature which met on September 19 and was prorogued on September 22, the Mining Act was amended with respect to those sections requiring every person employed underground for more than 50 hours per month to have a certificate, renewed annually, of freedom from diseases of the respiratory organs and, during the first two years of employment, of general fitness. The amendment provides that where the holder of a certificate under these provisions enlists or enrols for active service, his certificate shall not expire during his period of service and he may, upon being discharged from active service, obtain a miner's certificate or renewal thereof if the medical officer finds him free from tuberculosis of the respiratory organs.

Northwest Territories

The Local Administrative District Ordinance, enacted by the Council of the Northwest Territories and proclaimed in force September 1, 1939, provides for the establishment of local administrative districts in the Northwest Territories and stipulates that the Local Trustee Boards, charged with the administration of such districts, may pass by-laws for the enforcement of closing at any specified hour of all wholesale and retail shops, stores or other places where any mercantile business is carried on, provided that the Board is requested to do so by a petition signed by three-quarters of the ratepayers of the district who are engaged in any such line of business. The Ordinance further provides that any person contravening the provisions of any by-law shall be liable to a fine not exceeding $100 and in default of payment to imprisonment for not more than one month. Similar provision was made in an Ordinance of 1894 which is revised by the present Ordinance.

RECENT REGULATIONS UNDER PROVINCIAL LABOUR LEGISLATION

Alberta Trade and Industry Act—Minimum Wages in British Columbia—Manitoba Teachers—New Brunswick Workmen's Compensation Act—Farm Rehabilitation in Ontario—Trade Schools in Nova Scotia—Quebec Fair Wage Act.

REGULATIONS have recently been issued prohibiting the employment of barbers and apprentices in Alberta who are not licensed under the Tradesmen's Qualification Act, fixing minimum wages for women employed in places of amusement in British Columbia and for men engaged in the Christmas tree industry. There is a new by-law concerning the retirement fund of Manitoba teachers, an amendment in the list of industrial diseases under the Workmen's Compensation Act in New Brunswick, and regulations concerning the Farm Rehabilitation Plan in Ontario and trade schools in Nova Scotia. The Order under the Quebec Fair Wage Act governing the manufacture of doors, sashes and wooden building products is further suspended, and also the one dealing with the manufacture of brick, tile, building blocks and similar products. New orders govern taxicabs in Montreal, Quebec and Levis and laundries, dyeworks, etc., in Quebec City. Resolutions of the Fair Wage Board extend the definition of "seasonal industries" in Order 4.

Alberta Department of Trade and Industry Act

The code of fair competition governing the barbering trade which was approved by order in council on February 4, 1937, was amended on August 21 to provide that employers may employ only journeymen barbers and apprentices who hold certificates of proficiency or apprentices' certificates issued under the Tradesmen's Qualification Act.

British Columbia Minimum Wage Acts

Two orders of the Board of Industrial Relations, effective September 11, relate to females employed in public places of amusement and to the Christmas tree industry, respectively.

Order 67 under the Female Minimum Wage Act applies to all females employed as attendants in any theatre, music hall, concert room, lecture hall, shooting gallery, bowling alley, swimming pool, bathing pavilion or other similar place where a charge for admission or service is made to the public. It replaces an order of September 15, 1919, fixing a minimum wage for women employed in theatres, shooting galleries and other places of amusement, as well as for female workers in garages and gasoline service stations and drivers of motor cars and other vehicles. The latter occupations now being held only by male workers are covered by orders under the Male

Minimum Wage Act. The order of 1919 also applied to beauty parlour operators but a special minimum wage was fixed for these workers on August 29, 1935, (Labour Gazette, 1935, p. 902).

The order of 1919 distinguished between employees under and over 18 years of age except in the case of ushers in theatres. It provided for a weekly minimum of $14.25 for those over 18 and for ushers working more than 36 hours a week. Ushers employed from 18 to 36 hours a week had a minimum of $10.80 and those employed after 6 p.m. on legal holidays or for special matinees had to be paid at least 30 cents an hour for 2½ hours. Girls under 18, not employed as ushers, had weekly minima ranging from $10 to $13 according to experience.

The new order fixes a weekly minimum of $14.25 for all females within its scope who are employed for a week of 40 hours or more. As before, no worker covered by the order may work more than eight hours a day or 48 hours a week unless a permit in writing is obtained from the Board. Persons hired for less than 40 hours a week must be paid at least 35 cents an hour with a daily guarantee of 75 cents. All waiting time must be paid for. Uniforms or special articles of apparel required by the employer must be supplied, repaired and laundered at his expense.

Order 68 under the Male Minimum Wage Act, which provides a 40-cent hourly minimum for male employees engaged in operations in or incidental to the cutting, gathering, hauling and shipping of evergreens to be used for decorative purposes, is similar to an order in effect from November 24 to December 31, 1938. (Labour Gazette, 1938, p. 1349). The new order, however, requires only 85 per cent of the employees to be paid this minimum. The remaining 15 per cent, which must include all handicapped workers, part-time employees and apprentices, may be paid as low as 30 cents an hour. Another new provision stipulates that wages must be paid semi-monthly and must include all wages due up to not more than seven days prior to the date of payment.

Manitoba Teachers' Retirement Fund Act

In line with the 1939 amendment to this Act, by-law No. 4 passed by the Board of Administrators on July 17 repeals from September 1 by-law No. 3 which was passed on June 19, 1935. From July 1 the contribution to be made by teachers to the Retirement Fund is raised from 2 per cent to 4 per cent of the salary.

The amount of pension payable depends on the length of service and the average yearly salary on account of which contributions have been made, but the age of the teacher is no longer taken into account. A person is eligible for pension on retirement after 30 years' service but the minimum period of service for retirement in the future on account of disability is raised from 15 to 20 years. A claim must be made within two years of retirement.

The pension payable after 30 years' service is an annual sum equal to a percentage of one-sixtieth of one-half of the average yearly salary for the last 10 years multiplied by the figure representing the total of the number of years of employment after June 30, 1939, eight-tenths of the preceding 10 years, six-tenths of the years from 1925-1930 and four-tenths of the years before July 1, 1925. Tables set out the percentages ranging from 67 to 30 years of service to 100 for 40 or more years and also the minimum and maximum pensions to be applied in cases where the computation results in a lower amount than the prescribed minimum or a higher sum than the fixed maximum. In the case of disability pensions the same multiplier is applied to one-sixtieth of one-third of the average yearly salary.

A new provision entitles a teacher ceasing to be employed after August 31, 1939, to receive in addition to one-half of the amount contributed without interest, one-twentieth of such amount for each full year of contribution between 10 and 20 years if he has contributed for at least 10 full years of employment as a teacher. As before, there is no provision for a refund unless contributions have been made for five years.

New Brunswick Workmen's Compensation Act

An order of the Workmen's Compensation Board, effective September 20, amends the list of industrial diseases compensatable under the Act to add bursitis of the prepatellar or of the olecranon bursa due to any employment. Ankylostomiasis and acute bursitis over the elbow incurred during employment in a mine are struck from the list.

Nova Scotia Trade Schools Regulations Act, 1939

Regulations under this Act were approved by order in council on September 8. They prohibit the use of any misleading advertisement regarding trade schools. Trade schools giving instruction by correspondence are not permitted to indicate, either directly or by implication, that a student completing the course of instruction is assured of employment, or that there is a specific demand for workers trained in the courses offered or that there are positions available for such workers without giving full particulars and location

where such opportunities exist. In no case may trade school advertising be inserted in the "help wanted" columns of newspapers. Advertisements must give the name and address of the school or its agents.

The proprietor of a trade school must keep a register of all students resident in the province and, when applying for a certificate of registration or a renewal thereof, must furnish the Director of Technical Education with the names and addresses of all students registered during the preceding 12 months.

No trade school is to be operated jointly with a shop or other commercial business. However, goods made by the students or services carried out by them may be sold to the public at prices approved by the Director of Technical Education. The Director must also approve all contracts made between trade schools and their students, the hours of instruction and the course of studies in the school and the instructors hired. The proprietors and operators are responsible for carrying out all health, sanitary and safety regulations.

The proprietor or operator of any trade school must deposit and maintain with the Minister of Labour a surety bond of $1,000. In the case of correspondence schools, where the surety bond is not deposited, no contract relating to the school may be enforced in any Nova Scotia court by the proprietor or operator and the Minister of Labour may realize on a surety bond and use part or all of it to satisfy any judgment against the operators of the school.

Provision is also made for the refund of tuition fees for home-study courses where the pupils wish to drop the course or where there has been misrepresentation or failure to deposit the surety bond.

Ontario Unemployment Relief Act

Regulations in respect of the Farm Rehabilitation Plan were published on September 23. The scheme is open to any head of a family group of at least three Ontario residents who are related by blood or marriage and who are on relief and in necessitous circumstances and are able and willing to assist in farming. The applicant himself must have had farm experience. Preference is to be given to heads of families that include dependants of age and capacity to assist in farm operations, selection to be made without discrimination as to politics, race or religion. Direct relief is to be continued until the revenue from the farm is adequate.

The Unemployment Relief Administrator in the local municipality in which the applicant resides is to investigate the eligibility, including the physical fitness and other qualities of the group and on his recommendation and that of the local agricultural representative the provincial Director of Unemployment Relief decides on the application. The Minister of Public Welfare may appoint local advisory committees to co-operate in selecting applicants.

Each farm is to be selected by the relief administrator and the applicant together and is to be within 60 miles of the applicant's municipality. Stock and equipment is to be chosen in the same way with the approval of the local agricultural representative. The municipality may lease the farm for not more than three years at an annual rental up to $200 and the cost of stock and equipment is not to exceed $600. The municipality may pay both as direct relief.

The approval of the provincial Director is necessary for all transactions and he is to be furnished with a monthly statement by the municipality. He must approve the agreement between the municipality and the applicant which is to provide that if for any reason the applicant fails to operate the farm or to fulfil the agreement he will give up the premises on the request of the Relief Administrator or the Inspector. The municipality is exonerated from liability where it is, in the opinion of the Director, unable to fulfil the agreement.

The municipality may enter into contracts in respect of the stock, crops and produce of the farm. With the Director's approval, provision may be made under the Conditional Sales Act, for the eventual transfer of ownership in the stock and equipment to the applicant. At the end of three years on presenting to the Clerk of the municipality a certificate that the agreement has been complied with, the applicant is entitled to ownership in the goods.

Quebec Fair Wage Act

The application of Order 24 governing the manufacture of doors, sashes and wooden building products is suspended for two more months from September 3 by order in council approved on September 9. The order was previously suspended for two months from July 3. (Labour Gazette, July, 1939, p. 677.)

Order 22 (Labour Gazette, February, 1939, p. 157) dealing with the manufacture of brick, tile, building blocks and similar products is suspended from August 3 to October 1.

By resolutions of June 12 and August 10, effective from June 1, the Fair Wage Board includes under "seasonal industries," as defined in Order 4 and for which special minimum rates may be fixed, establishments or open air sporting clubs operating only during the summer season. Only clubs the charter or constitution of which is approved and to which

a certificate has been issued by the Board, are entitled to benefit by the resolutions. When employed by such clubs, such workers as office employees, including office boys, chauffeurs and drivers, cooks and their helpers, waiters and waitresses, chambermaids and other servants, bell-boys, porters and messengers as well as building watchmen must be paid the minimum rates fixed for their respective classes by Order 4. (Labour Gazette, 1938, p. 512.) No minimum is fixed for other employees but it is provided that the rates of wages in effect through agreement in the last week of August, 1938, may not be reduced without the Board's permission.

Three further tables of percentages for the grouping of employees into classes to which different wage-rates are payable were published on September 16. They show the numbers to fall in each of four classes so: 10 per cent, 60 per cent, 15 per cent and 15 per cent, and two divisions into five classes, one being 15 per cent, 30 per cent, 30 per cent, 15 per cent and 10 per cent, the other 10 per cent, 20 per cent, 20 per cent, 20 per cent and 30 per cent.

Taxicabs in Montreal and Quebec

Orders 26 and 29 covering taxi cabs and automobiles for hire, the former on the Island of Montreal and within a five-mile radius and the latter in the Cities of Quebec and Levis, as well as Order 28 dealing with laundries, dyeworks and dry cleaning establishments in Quebec City and Quebec West were approved by orders in council on September 9. They are to be in force for one year from October 7 and renewed for a further year unless the Lieutenant-Governor in Council decides otherwise. Drafts of these orders as well as a proposed Order 27 applying to canning of fruit, vegetables, macaroni, etc., throughout the province were previously published and one month allowed for receiving suggestions or objections.

The taxicab orders apply to owners or operators or taxicabs and cars not provided with taximeters for hire and also to persons furnishing owners with an auxiliary service such as the receiving of telephone calls, use of stand or the use of a name. Order 26 divides employees into seven categories: chauffeurs; agents and starters; telephone operators; office employees; inspectors; messengers; managers, superintendents, etc., the Quebec and Levis order providing only for the four first-named classes. Both orders permit the Board to determine any employee's category and to add new categories and fix for them rates of wages and working conditions.

For chauffeurs governed by both Orders, there are alternative conditions between which the employer may choose, notifying the Board of his choice: (1) A minimum rate in Montreal of 12½ cents an hour and in Quebec and Levis of 10 cents an hour for a 66-hour week, or a 77-hour week between December 15 and January 15 and also for the summer season in Quebec and Levis, together with overtime rate of time and a half, plus 15 per cent commission except on long distance trips or where, in spite of the driver's efforts to collect, the passenger fails to pay; (2) Rates ranging from 20 cents to 30 cents an hour with an hourly rate for temporary chauffeurs of 25 cents. If the Board is not notified of the employer's method of payment, his employees are entitled to the hourly rate plus the commission. Where the employer chooses to pay a straight hourly rate, his employees must be divided into five classes. A minimum of 30 cents an hour must be paid to not less than 10 per cent of his employees, minima of 27½ cents, 25 cents and 22½ cents, to three groups of not more than 20 per cent each and 20 cents to not more than 30 per cent. The Board may adopt and publish in the Quebec Gazette tables determining the distribution of any number of employees into such classes. (See note above concerning tables of percentages recently published). All permanent employees paid on this plan must be counted in figuring the percentages. Members of the employer's family may be included and himself if he drives an automobile for hire for at least 20 hours. Under the hourly rate no-commission plan, a temporary chauffeur is one who is hired only intermittently during the periods when a 77-hour week is allowed for regular men.

Agents and starters receive under both Orders a minimum of 25 cents an hour for a 66-hour week. Telephone operators in Quebec and Levis have a regular 60-hour week with 15 cents or 20 cents an hour according to skill; in Montreal telephone operators in the taxicab industry receive 25 cents an hour for a 54-hour week. For office employees in Montreal the rates of 17 cents an hour for the first 12 months and then 25 cents apply to a 48-hour week. In Quebec and Levis the same classes have a normal 60-hour week and receive 15 cents an hour for the first year, then 22½ cents an hour. The other classes in Montreal include inspectors at 35 cents an hour, messengers at 20 cents an hour for a 66-hour week; and managers, superintendents, etc., at the rates mutually agreed on between the employer and employees, but not less than $20 a week for a 60-hour week. The latter employees cannot claim overtime payment until the overtime exceeds 12 hours in one week but for other classes the overtime rate of time and a half is payable after the specified number of

hours per week subject to certain exceptions such as when higher wages are paid or holidays given as set out in Order 4.

As under Order 4 working time includes time in which a worker is at his employer's disposal waiting for work, etc., and an employee called to work must be paid for at least three hours and regular drivers must be paid for at least five hours. In Montreal, an employee whose work falls in more than one category is to be paid the rate fixed for the higher one unless he works "much longer hours" at the other or unless it is his "ordinary" work. The Board may by resolution fix the wage in the latter case.

Both Orders provide that except to complete a trip or except in case of "force majeure," or by special permit of the Board or on a long distance trip, a driver must not be in charge of a taxi or automobile for hire for more than 12 consecutive hours without rest in addition to time for meals. Drivers must have regular hours of work. Day drivers begin between 5 a.m. and 7 a.m. and finish between 5 p.m. and 7 p.m. and night drivers take over between 5 p.m. and 7 p.m. With permission of a member of the Board an employer may arrange for other work periods but, except in unusual cases, no driver is to work for more than 12 consecutive hours without rest in addition to time for meals.

Except in the case of "force majeure" or where permitted by the Board the total hours of work of employees other than drivers is not to exceed, under either of the Orders, 60 hours a week for females and boys under 18 and 72 for adult males unless the latter are authorized to work seven days a week when the limit of hours is 84.

Both Orders provide that all tips are the property of the employee and that the driver gives credit at his own risk unless he is authorized to do so. He must keep a log sheet supplied by the employer in which to record daily his hours of work, cash received for trips made and the amount of those made on credit.

Laundries, Dye-works, etc., in Quebec City

Order 28 is to govern dye-works, dry cleaning and pressing establishments and laundries in Quebec and Quebec West but it does not affect tailoring and dressmaking establishments, hotels or religious or teaching institutions or establishments where the work is done not for the general public but for the purpose of another main enterprise. The provisions of Order 4 apply where not incompatible except the provision requiring a 15 per cent increase in wages for part-time work of 30 hours a week or three a day.

There are four classes of employees: male employees, whatever their occupation, female employees in dyeing, cleaning and pressing departments, other female employees, and temporary employees. Temporary employees are those hired intermittently, in addition to the regular employees, for not more than 20 hours in a week, from April 1 to July 31 each year or for any other period the Board may, by resolution, determine. The Board may fix the proportion of temporary employees permitted in any establishment and it may determine in which category an employee may be classified, adopt new categories and fix for them rates of wages and working conditions. Female office employees working in establishments where laundering is done are classified with employees in dyeing, cleaning and pressing departments. Otherwise they come under "other female employees."

The wage-rates vary according to the classification of the workers in each establishment, permanent male employees being divided into five classes and female into four. Of the male workers, not less than 15 per cent must be paid 40 cents an hour, not more than 30 per cent, 30 cents, not more than another 30 per cent, 25 cents, a maximum of 15 per cent, 20 cents an hour and a maximum of 10 per cent, 10 cents an hour. Temporary male workers are to be paid 20 cents an hour. Of the permanent female workers in offices and in dyeing, cleaning and pressing not less than 10 per cent must be paid 27 cents an hour; not more than 60 per cent, 24 cents; not more than 15 per cent, 20 cents an hour; and another 15 per cent, 15 cents an hour. Other female workers under the Order are given the hourly rates of 24 cents, 20 cents, 18 cents and 15 cents governed by the same proportions. Temporary female employees must be paid 15 cents an hour. For the purpose of the classification, females who have worked in any one week at occupations covered by different categories must be included in each category. The names of employees in each category must be shown in the register. The Board may by resolution adopt tables which must be published in the Official Gazette determining the distribution into classes of any number of employees.

The hourly rates apply to a regular work-week of 54 hours but carters and drivers may have a 72-hour week from June 1 to September 15. Overtime beyond these hours is paid for at the rate of time and a half. Uniforms of female employees are to be laundered and mended at the employer's expense.

COMBINES INVESTIGATION ACT

Prosecution of Alleged Combine in the Manufacture and Sale of Fibreboard Boxes and Related Products—Dismissal of Imperial Tobacco Company Appeal.

TRUE bills on two indictments charging manufacturers of fibreboard boxes and related materials with offences against section 498 of the Criminal Code were found by a Grand Jury in Toronto on September 19, 1939. The prosecution was undertaken on instructions of the Attorney General of Canada and follows an investigation completed in March under the Combines Investigation Act. Reports of the investigation and subsequent proceedings appeared in the January, April and July, 1939, issues of the LABOUR GAZETTE.

During July and August documents relating to the case were secured under search warrants by the Royal Canadian Mounted Police at the premises of the manufacturers and other alleged parties to the combine. On the direction of Chief Justice Rose the indictments were preferred before the Grand Jury in Toronto on September 18 and true bills were brought in on September 19.

The first indictment charges one association officer and nineteen companies engaged in the manufacture and sale of corrugated and solid fibreboard shipping containers with unlawful conspiracy or combination amongst themselves and with others, contrary to the provisions of section 498 of the Criminal Code. The accused are charged with combining, in relation to the manufacture and sale of shipping containers in Canada, to unduly lessen competition, to restrain and injure trade and commerce, to unduly limit facilities for manufacturing and supplying, and to prevent or lessen manufacture and production or to unreasonably enhance prices. The greater number of the companies charged have their head offices and plants in Ontario. Other defendants charged in the first indictment are located in Montreal, Halifax, Fairville, N.B., Winnipeg and Vancouver.

Under the second indictment one association officer and four companies engaged in the manufacture and sale of paper and paperboard materials used in the manufacture of shipping containers are charged with similar offences. Two of the companies charged in this group have their head offices in Toronto and the other two have their head offices in Montreal.

H. J. Badden, of Toronto, charged as a managing officer of the two associations whose members are named in the indictments, appeared in court through his counsel on September 22 and was admitted to bail at $3,000. Notices of the indictments have been served on the corporation defendants. It is expected that hearings will proceed at the fall assizes in Toronto.

Dismissal of Imperial Tobacco Company Appeal on Combine Report

The Court of Appeal of the Supreme Court of Ontario on October 12, 1939, dismissed an appeal by the Imperial Tobacco Company of Canada, Limited, and its subsidiary sales company in an action taken by these companies to quash the report on an alleged tobacco combine issued in August, 1938, under the Combines Investigation Act.

The appeal was argued before Justices Riddell, Fisher, and Gillanders of the Ontario Court of Appeal on September 25 to 29, 1939. Counsel for the tobacco companies were D. L. McCarthy, K.C., J. R. Cartwright, K.C., and J. G. Edison. The Commissioner of the Combines Investigation Act, respondent, was represented by J. C. McRuer, K.C., J. J. Robinette and F. A. Brewin. The appeal was from the judgment of Mr. Justice Hogg, delivered in March, 1939 (LABOUR GAZETTE, April, 1939, pages 393-395), who had then dismissed the companies' motion, with costs.

All three judges gave written reasons for judgment. Mr. Justice Riddell, after indicating the nature of the investigation and report made under the Combines Investigation Act, referred to a letter written by the Commissioner to the secretary of the appellant companies in the course of the investigation and stated, in part:

"This, to my mind is a plain statement that it had been alleged that the appellants had been parties to the objectionable agreements, that they might be such but that before finding that they were the Commissioner would hear what they had to say to the contrary. Advantage was taken by the appellants of this offer—no little correspondence took place; the appellants placed their formal agreements before the Commissioner, the evidence of their responsible officer was taken on oath, and so far as appears, they were not prevented from making any representation on oath or otherwise to meet the charge made against them. . . They complain now that they were refused the evidence taken at that early enquiry: but I fail to see how they are thereby injured—the documents they themselves furnished the Commissioner are amply sufficient without more to justify the findings made by him."

After referring further to the conduct of the appellant companies in the course of the investigation, Mr. Justice Riddell concluded:

"Moreover, in addition to this conduct, which I consider a waiver, the materials furnished by the appellants themselves fully justify the conclusions of the Report."

Mr. Justice Fisher stated in his reasons for judgment:

"In my opinion the Commissioner's duties were administrative and not judicial, and in such circumstances it goes without saying that it is not the function of this Court to grant the order asked for and thereby destroy the peculiar benefits and advantages of an administrative inquiry."

Mr. Justice Gillanders, in the conclusion of his written reasons, stated:

"While we are not here passing upon whether or not the evidence before the Commissioner justified his conclusions, an examination of the report would seem to indicate that the notices of the allegations against the appellants were fair and reasonable summaries of the matters on which the report is based, and that much of the important material and information was furnished by the appellants themselves and was within their own knowledge. I am of opinion that the appeal should be dismissed with costs."

EMPLOYED WOMEN AND FAMILY SUPPORT

The Women's Bureau of the United States Department of Labour has recently issued a Bulletin (No. 168) entitled "Employed Women and Family Support," which indicates that women support families to a much greater extent than is realized. Through the co-operation of the United States Bureau of the Census the family schedules from three large industrial cities in the United States in 1930 have been examined, and the information taken therefrom forms the basis of the findings in the present bulletin. These cities—Fort Wayne, Ind., Bridgeport, Conn., Richmond, Va.—were selected as representative industrial communities in various sections of the United States, all having considerable percentages of their women population in gainful employment.

The proportions of women 16 years of age or more in gainful occupations in the United States and in these cities were as follows:

	Per cent
United States	25·3
Fort Wayne, Ind.	29·6
Bridgeport, Conn.	32·7
Richmond, Va	38·8

In each city these working women, though mature, were likely to be younger than the rest of the woman population of the city. From one-half to three-fifths of them were 25 and under 55 years of age. The median age of the working women—half older and half younger—is shown by city in the following:

Fort Wayne	28 years
Bridgeport	28 years
Richmond	30 years

Of every 10 employed women in the two northern cities, 6 were single, 2 were married and living with their husbands, and 2 were separated, widowed, or divorced; in Richmond only 5 were single, 3 were married, and 2 were widowed, separated, or divorced.

Clerical work or manufacturing was the largest employer of single women, while manufacturing or domestic service was the largest employer of married and widowed and divorced women. The proportion of single women in professional fields far exceeded the proportion of married or widowed and divorced women in professional work.

The families of wage-earning women in the three cities ranged in size from 2 to more than 10 persons. Though small families predominated, a very large number had 4 or more members.

A surprising number of these households were supported entirely by women; in Bridgeport and Fort Wayne about a sixth, and in Richmond something over a fifth, of the families of the wage-earning women had no male wage earners.

The burden of support for dependents was heaviest, of course, on the widowed and divorced women. About 3 in 10 of these women in Richmond and Bridgeport, and 1 in 4 in Fort Wayne, were the sole support of the family in which they lived. Married women were least likely to be solely responsible for family support, but there were many cases, especially among the Negro women, where they were supporting families of considerable size, and these families very often included small children.

Well over half the single women in the study were living with one or both of their parents, but this did not mean that their wages could be used solely for personal adornment or pin money. The parents of 1 in 14 of these single women had no other means of support than the daughter's earnings. Frequently the household included not only dependent parents but small children also dependent on her earnings.

One-third of the 58,000 women whose records were studied combined with a job of breadwinner the many tasks and responsibilities of a homemaker. This is approximately the same as the proportion in the United States as a whole. The percentage was somewhat less in Fort Wayne and Bridgeport and somewhat larger in Richmond.

TRADES AND LABOUR CONGRESS OF CANADA

Proceedings of Fifty-Fifth Annual Convention Featured by Declaration of War Policy—Confirmation of Executive Action in Suspending C.I.O. Unions

The fifty-fifth annual convention of the Trades and Labour Congress of Canada was held in London, Ontario, September 25-30, 1939. Credentials were received from 432 delegates, including 53 representatives of international organizations which had the whole of their Canadian memberships in affiliation with the Congress, 3 representatives of provincial federations, 60 representatives of trades and labour councils, 14 representatives of system divisions of railroad telegraphers, 301 representatives of labour unions, and one fraternal delegate, representing the American Federation of Labor.

His Worship Mayor Allan Johnston in extending a civic welcome to the delegates, assured them that Labour in London was co-operating in every way to make the city a better place in which to live.

The former Minister of Labour, Hon. Norman McL. Rogers, in a letter regretted his inability to be present at the convention, his newly assumed duties as Minister of National Defence making it quite impossible for him to leave Ottawa. Similarly the new Minister of Labour, Hon. Norman A. McLarty, was unable to be present but stated he was sending an officer of the department to represent him. Hon. Mr. Rogers asked for his successor the same co-operation from Labour as was accorded him. It was necessary, the Hon. Mr. Rogers stated, to devote every moment of his time to the duties confronting him at this critical period, and he was sure that Labour would co-operate to the fullest extent in bringing the present conflict to a successful conclusion.

Dr. A. S. Duncan, M.P.P., London, expressed the view that united effort was necessary to conquer the menace confronting the world, and hoped that the deliberations of the convention would prove successful, not only to the members but to the nation as a whole.

A message was received from Hon. Dr. Manion, Leader of the Opposition, advising that owing to the international situation it was impossible for him to be present.

The chairman, Mr. R. H. Hessell, in handing over the convention to the acting president, R. J. Tallon, expressed the hope that there would soon be labour unity in Canada.

Resignation of President Draper

Expressing appreciation on behalf of the delegates for the welcome extended, Mr. R. J. Tallon, read the resignation of the president, Mr. P. M. Draper, who had been prominent in the labour movement for forty-eight years, forty years as an executive officer. The chairman expressed regret on behalf of the Congress members that ill health had prevented President Draper from continuing in office and voiced the hope that he would be spared for many years to enjoy a well earned rest. Mr. Tallon also expressed regret that Hon. Mr. Rogers was unable to be present and reiterated the pledge given to the former Minister of Labour on behalf of the Trades and Labour Congress for full co-operation with the government during the present crisis.

A telegram was forwarded from the convention to President Draper expressing regret that ill health had forced him to reliquish the presidency and a hope for a speedy recovery.

Subsequently, on motion of Mr. Gustave Francq, the convention by unanimous standing vote elected Mr. Draper president-emeritus of the Congress.

Report of Executive Council

In opening its report the executive referred to the tragic events of the recent weeks and to the war in which Canada, as a part of the British Empire, is involved. "The Congress had let it be known that it is unequivocally behind the stand of the government in active support of the democracies, that in its efforts the government may rely upon our whole hearted co-operation and assistance."

Reference was made to the legislative program prepared by the executive and after submission to a conference of accredited representatives of affiliated national and international unions, was presented to the Federal Government on December 15, 1938, (a summary of the legislative program was published in the January, 1939, issue of the Labour Gazette, page 39). The report contained a review of the fourth session of the eighteenth parliament, giving a summary of the more important items coming before the House. An outline of the legislative activities of the various bodies of the Congress in the several provinces, was presented by the executive.

Suspension of C. I. O. Affiliations.—Under this heading the executive drew attention to the action of last year's convention of the Congress in expressing its keen desire for the maintenance of the greatest degree of trade union unity in Canada, and enunciated the policy to be followed by the executive council in the furtherance of this objective by adopting a resolution as follows: "That this con-

vention concurs in the desires expressed for the avoidance of divisions of our movement in Canada, as set forth in the resolutions above mentioned: and be it further resolved, that the executive of the Congress be instructed to continue its efforts to maintain harmony within the international trade union movement in Canada in compliance with the decision of the Ottawa convention 'that action taken shall be on terms acceptable to international trade unions and thus avoiding any disregard for or defiance of their laws and policies' and that we call on our executive to exert every effort to the end that we may again have a unified labour movement on the North American continent, to explore every possible avenue and lend their fullest support to all moves in this direction."

The executive regretted the fact that this question was raised at the American Federation of Labor convention at Houston, Texas, by a Canadian delegate introducing resolutions "which were full of misleading and untrue statements ."

Two events were mentioned which, according to the report, "made it impossible to avoid division" in the ranks of the Congress. These were: (1) the declarations emanating from the convention of the American Federation of Labor, which had they been carried into effect, would have completely changed the past relationship of the Congress with the A. F. of L. (2) the action taken at the first constitutional convention of the Committee for Industrial Organization which met at Pittsburgh, Pa., November 14-19, and adopted the new name of "Congress of Industrial Organizations." The report stated that "the constitution of this new body establishes it, without question, as a dual organization to the American Federation of Labor, and its membership dual to that constituting the American Federation of Labor."

In view of the action referred to above, the executive stated, "one large organization temporarily withdrew its support to the Congress, and the executive bodies of a number of others authorized their officers to take similar action if C.I.O. unions were continued in membership with the Trades and Labour Congress of Canada."

Carrying out the instructions from the last convention of the Congress, the executive arranged a meeting with the executive of the American Federation of Labor. At this meeting the officers were informed "that further delay in taking action respecting C.I.O. organizations would lead to the almost complete disorganization of the Congress as it had been constituted since 1902."

Following the decision of the members of the executive council as to the course to adopt, the following C.I.O. organizations were officially notified of their suspension from membership in the Trades and Labour Congress of Canada and further advised that, as provided by the constitution, this action would be reported to the next annual convention:

United Mine Workers of America, with 72 local unions and 15,000 members;
Amalgamated Clothing Workers of America, with 20 local unions and 4,000 members:
International Union of Fur Workers, with 11 local unions and 750 members;
International Union of Quarry Workers, with 1 local union and 54 members;
United Automobile Workers, with 1 local union and 200 members;
Steel Workers' Organizing Committee, with 8 local unions and 1,120 members;
Mine, Mill and Smelter Workers, with 3 local unions and 1,100 members.

The report explained that the number of members shown for each of the organizations mentioned was that upon which per capita tax was last paid as reported to the Niagara Falls convention. It was further pointed out that the convention must record its decision as to whether the action of the executive should be sustained, and the affiliation of the organizations above enumerated cancelled.

Right to Organize.—The executive drew attention to the new section (502A) which was added to the criminal code dealing with the right of workers to organize in unions of their own choice. It was pointed out that all provinces except Ontario and Prince Edward Island have laws according protection under the Civil Law in respect to the right of workers to organize, but for the two provinces mentioned there was some doubt as to the application of the Federal Act, due to the fact that no legislation existed respecting this matter.

Social Security.—The executive emphasized the importance of unemployment insurance in the sphere of social security and considered that unemployment insurance was "as far from being made effective in Canada as at any time during the past four years."

The report contained the following methods by which organized labour was seeking remedial action: (1) Provision of work to eliminate unemployment; (2) adequate provision for those requiring aid; (3) measures to cope with future unemployment in an organized manner and prevent its recurrence to the greatest possible degree. It was emphasized that labour's demand is not for charity, but for the right to work at wages which will give a progressively increased purchasing power.

Address of Director of Employment Service

The Chairman advised the delegates that the Federal Minister of Labour was unable to be present but had sent Mr. R. A. Rigg, Director of the Employment Service of Canada, to represent him, and then called upon Mr. Rigg to address the convention.

Mr. Rigg stated that his Minister, the Honourable Norman A. McLarty, very keenly regretted his inability to be present. The delegates would, of course, appreciate the fact that at the present time the most extreme demands were being made upon the Federal Cabinet Ministers. Not only during the past week had there been Cabinet meetings every day, but probably the same conditions would apply during the Convention week. In addition, during the past week there had been a re-arrangement of certain Cabinet Portfolios, which involved the transfer of the Honourable Mr. McLarty from the Portfolio of Postmaster General to that of Labour. The war situation and the Cabinet re-arrangement imposed such onerous tasks that the Honourable Mr. McLarty had been obliged to send a substitute to represent him at the Convention. These exceptional emergent conditions were solely responsible for the Minister's absence. The Honourable Mr. McLarty desired that his warmest greetings be extended to the Convention and his sincere wish expressed that the Convention would yield results beneficial both to organized labour and to the community of Canada as a whole. The Minister was keenly aware of the vital part which organized labour would play in the prosecution of the war and appealed for the fullest co-operation of labour with the Federal Government in promoting those measures most necessary to enable Canada to exert her full power and ensure the ultimate victory of the Allies. The speaker further stated that he had also been commissioned by Mr. W. M. Dickson, Deputy Minister of Labour, to extend his best wishes for a successful convention.

Mr. Rigg said that the Conventions of organized labour in Canada are popularly and properly regarded as the assemblies of the parliament of labour. During the period of his own lifetime impressive forward steps had been made and the influence of organized labour enormously extended. The effective contribution of Canada in successfully prosecuting the war depended in a very large measure upon the wholehearted co-operation of labour. That this was fully realized he did not for a moment doubt. As citizens, trade unionists had a common interest with other sections of the community in stopping the ravages of those powers that would annihilate personal liberty and subjugate the individual to the status of a mere vassal of the State. As trade unionists, however, they had special cause for expending the last ounce of energy if necessary to check the ruthless onslaught that was being made upon the democracies. A few years ago, Mr. Rigg stated, he had been honoured by being commissioned to represent the Canadian Government at a Convention of the International Labour Office in Geneva. One of the principal subjects upon the agenda of the Convention was that of the right of workers to freedom of association. It was hoped that the principle affirmed in Article 13 of the Treaty of Versailles, which Article has sometimes been called the Magna Charta of labour, might find more concrete expression in a recommendation or convention which could be placed before the governments of the world for approval. The Treaty clause reads as follows: "The right of association for all lawful purposes by the employed as well as by the employers." The representative of a totalitarian state violently opposed any action being taken by the International Labour Office on this subject. He claimed that action was unnecessary. The Treaty clause affirmed the right of workers to associate within the law. In his country that principle was fully observed. Workers were not hindered but were encouraged to join the one legal labour organization. To join any other would be illegal and he asked if any responsible minded individual would set up the plea that workers should have the right to join unlawful organizations. The attitude of this totalitarian country stranded this subject on the rocks.

The speaker said that the delegates gathered at the Convention in London were there free to express their own views and formulate the policies of the Trades Congress. This is the principle for which the pioneers of organized labour struggled, suffered and sometimes paid the ultimate sacrifice to achieve. Totalitarianism would destroy that freedom and permit only that form of organization which is wholly controlled, and whose policies are dictated, by the State. In closing, Mr. Rigg stated that if organized labour is to be worthy of the sacrifices made by these pioneers and to fulfil the traditions established by them at such cost, no effort would be spared to render every reasonable assistance to the government in this crisis.

Report of Secretary-Treasurer

The financial statement presented by Mr. R. J. Tallon, acting president, showed total receipts from all sources for the fiscal year ending August 31, 1939, including balance brought forward from last year, amounting to $55,062.77, with expenditures totalling $29,-

666.46, leaving a balance of $25,396.31. The total membership upon which per capita tax had been paid was 137,764, a loss of 22,614 as compared with that reported for 1938. The secretary-treasurer explained that the membership reported did not include those who, while still active members of affiliated organizations, were relieved, because of unemployment, or other cause, from payment of their regular contributions. The report further showed that there were 61 international and 6 Canadian central bodies in affiliation with the Congress.

The Audit Committee, to which the secretary-treasurer's report was referred, found the financial statement correct and its recommendation of approval was adopted.

Committee on Officers' Reports

This committee endorsed the sentiment expressed in regard to Canada's participation in the present war. Appreciation was also expressed for the co-operation received from the representatives of the railroad running trades in the work of the provincial committees and federations and the committee recommended that efforts be made to have these running trades affiliate with the Congress. The work of the various officers on public bodies was commented upon favourably.

In regard to the publishing of the *Canadian Congress Journal* it was suggested that more of the important items carried in the journal should be translated into French.

Referring to the subject "Right to Organize" the attention of the delegates were drawn to the fact that Ontario and Prince Edward Island had not as yet passed this legislation and the committee urged that every effort be made to secure the necessary legislation in these two provinces. The steps recommended by the executive to secure social security for the workers were endorsed.

The committee's report as a whole was adopted by the convention.

Committee on Legislative Activity

In its report this committee reviewed the legislative activities of the Congress, provincial executive committees, and federation officers. Reference was made of the submission of the legislative program to the Federal Government which had been previously presented to, and approved by, representatives of international unions and railroad brotherhoods. The legislation coming before the last session of parliament was reviewed at some considerable length. Before the committee's report was adopted Mr. A. Laverty of the Textile Workers' Union asked what action had been taken to have the recommendations of the Turgeon Commission put into effect. The chairman replied that this matter had not been overlooked, and that further steps would be taken in this regard by the incoming executive.

Committee on Constitution and Laws

This committee recommended that two new sections be added to the constitution in respect of federations of labour chartered by the Congress, as follows: (1) No federation of labour chartered by the Congress shall adopt policies, legislative, political, civic or organizational which are contrary to policies adopted at conventions of the Congress; and (2) that the executive have the necessary power to make any necessary rules to govern federations which will not conflict with the constitution.

The committee also concurred in two resolutions recommending amendments to the constitution, as follows: (1) No organiaztion or person which has seceded from or expelled by the Congress, or which has been expelled from the American Federation of Labor, national or international union or any other body affiliated to, or chartered by the Congress, while under such penalty, shall be allowed representation, hold office or have recognition in the Trades and Labour Congress of Canada or in any trades Council or federation of labour chartered by the Congress under the penalty of suspension of the body violating this provision of the constitution; and (2) If any officer resigns or ceases to be an active member of an organization affiliated with the Trades and Labour Congress of Canada or one that has been expelled from the American Federation of Labor or from any other cause has ceased to be an officer of the Congress thereby causing a vacancy in the council, the vacancy shall be filled as soon as possible by the executive council.

The report of the committee was adopted by the convention.

Greetings of Ontario's Minister of Labour

Extending felicitations to the delegates, many of whom he had personally met during the past year, Hon. N. O. Hipel, Ontario Minister of Labour, referred to the friendly discussions he had had with labour's representatives, and urged a continuance of mutual co-operation.

Address of Fraternal Delegate

Mr. E. L. Wheatley, vice-president of the National Brotherhood of Operative Potters and fraternal delegate from the American Federation of Labor, in opening his address referred to the conflict in Europe, and emphasized that the great majority of American people with whom he had come in contact since the war began were for strict neutrality

as they felt that self-defence was the first consideration. He reviewed the aims and objects of the American Federation of Labor, which he said was "growing in numbers and economic power," and reported that there had been an increase in membership of the Federation of 1,566,299 over that of 1936—the year the C.I.O. was organized—the A.F. of L. now having 4,600,354, comprised in 105 national and international unions, with 33,744 local unions, 49 state federations of labour, 806 city central bodies and 1,563 directly chartered trade and federal unions. Mr. Wheatley declared that one of the main objectives of the American Federation of Labor was to advance national labour legislation. Another objective "was the finding of a permanent solution for unemployment, there being 10,560,000 unemployed or employed on unemployment projects." He contended that in urging amendments to the National Labor Relations Act, the Federation did not seek to destroy this legislation but rather to make it an instrument of real worth to the workers. The delegates were given a review of labour legislation which had been secured and amendments sought.

In speaking of the division in the ranks of labour in the United States, the fraternal delegate emphasized that the American Federation of Labor desired unity and peace in the labour movement.

The fraternal delegate from the British Trades Union Congress, in a letter to the president, regretted his inability to be present at the 55th annual convention of the Congress owing to the international situation.

Other Addresses

Mr. James Wilson, former president of the Patternmakers' League of North America and permanent representative of the American Federation of Labor to the International Labour Organization, extended greetings from the latter body. He referred to the resignation of President Draper and expressed regret that ill health had prevented his presiding over the Congress convention. The representative of the I.L.O. reviewed the formation and aims of the organization. The speaker contended that if the principles of the I.L.O. had been carried out the present conflict would not have taken place, and that world peace could only be maintained by social justice. Mr. Wilson pointed out that the first move of dictatorships was to destroy the trade union movement. He stated that notwithstanding the many difficulties encountered "the I.L.O. is carrying on in an endeavour to bring about social justice throughout the world" but remined the delegates that in many instances progress comes through suffering and sacrifice.

Mr. Edward Flore, president of the Hotel and Restaurant Employees' International Alliance and Bartenders' International League of America, spoke to the delegates on the progress being made by his organization, especially in the Dominion of Canada. He asked the members of the various international bodies to assist in the organizational campaign now being carried on by his union.

Mr. W. L. Best, secretary of the Joint Legislative Committee representing the Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen, Brotherhood of Railroad Trainmen and Order of Railway Conductors, in addressing the convention referred to the close collaboration between the organizations he represented and the Trades and Labour Congress of Canada. He advised that the locals of his own organization (Brotherhood of Locomotive Firemen and Enginemen) were at liberty to join trades and labour councils in the various localities.

Foreign Relations

There were nineteen resolutions submitted by various organizations dealing with the subject of foreign relations. After carefully considering these resolutions, the committe on resolutions submitted the following substitute, which was adopted:—

Whereas, the Trades and Labour Congress of Canada, a year ago, at its Niagara convention, declared; "We are meeting with the black clouds of war overhanging Europe, threatening to engulf the world, devastating cities and towns, raining bombs and slaughtering women and children," and whereas, this Congress further declared for the need and necessity to render help to all democratic countries whose independence and integrity were being challenged, and at that time urged upon our Government to co-operate with other peace-loving countries of the world in whatever steps were deemed essential to destroy the reign of terror imposed by Nazi and Fascist dictators and thus remove the menace of international lawlessness; and whereas, we have, in the past, commended our Brothers in Britain and France for their stand in defence of those nations who have been singled out for attack and destruction by dictatorship powers, assuring them that should the time ever come when, through their action in defence of democracy and the rights of the workers in any land, they might be in need of our assistance and help, that we would rise to their defence; and whereas, in all Fascist and Nazi nations the free trade union movement has been outlawed, its property and funds confiscated, its leaders persecuted, in many cases ruthlessly murdered, thousands of its most active members are now in prison or languishing in Nazi concentration camps where dreadful terrorism is being used to break down their health and spirit, similar treatment being meted to democratic, political organizations and institutions, thus destroying not only the trade union movement, but also the medium through which the common people in any of these countries could utilize constitutional and orderly methods to bring

about improvement or changes in their social and economic structure, which action constitutes a complete destruction of democracy; and whereas, the trade union movement has supported all conciliatory efforts that have been made to preserve peace, which unfortunately have failed, and it has become necessary to resort to arms in order to prevent the aggressive action of Germany and her allies from destroying the independence of Poland and other nations where democratic Government still exists.

Therefore, be it resolved that this 55th Annual Convention of the Trades and Labour Congress of Canada reiterates its stand of former years and pledges its unwavering support of our membership to the Canadian and British Governments in the prosecution of war against the aggressor nations to the end that the threat of aggression may be removed for all time and that democratic privileges, institutions and rights may be restored to the people now suffering under the heel of dictatorship; and be it further resolved; in order that the full resources of the country may be utilized for the achievement of victory, it is essential that profiteering and greed must be eliminated in the production of the sinews of war, and the supply and distribution of home requirements; To this end we urge that the machinery of production and the wealth of the nation be mobilized to serve the country's interest instead of those of individuals and corporations, so that there will be an equitable contribution on the part of capital comparable to that of the sacrifice of human life.

C.I.O. and Unity

Under this heading there were forty-four resolutions submitted calling for "unity within the trade union movement as represented in the Trades and Labour Congress of Canada." During the early part of the discussion which followed the presentation by the committee of a substitute resolution, the situation confronting the executive was clearly set forth, to the effect that if definite action was not taken to suspend the C.I.O. unions, the other international unions would withdraw from the Congress, which would have caused a much greater loss in membership. Some opposed the substitute resolution, claiming that there should be unity for the prosecution of the war, and that it was necessary for the Congress to consolidate its forces for this purpose. The opinion was expressed that the C.I.O. unions should have been allowed to bring their case before the convention, and afterwards a referendum vote of the entire membership should have been taken. The substitute resolution was as follows:

Your Resolution Committee having been instructed by the convention to consider and report on that section of the Officers' Report appearing on Pages 29, 30 and 31 and dealing with the suspension of the C.I.O. Unions and at the same time giving consideration to Resolutions Nos. 27 to 70, dealing with trade union unity beg to report as follows:

We have carefully read and considered the Officers' Report dealing with this matter, the circumstances which faced your Executive at the latter part of 1938 demanded the suspension of the C.I.O. Unions in order to retain in membership during 1939 those organizations affiliated with the American Federation of Labor, which have in the past, and do now, represent the vast majority of the organized workers of this Dominion and whose affiliation has over a long number of years assisted to build and give influence and prestige to this Congress.

We find that in suspending the C.I.O. Unions the Executive Council was within its rights and in full accord with the resolution of the convention of last year which stated: "That action taken shall be on terms acceptable to international trade unions and thus avoiding any disregard for or defiance of their laws and policies." This is corroborated by the fact that closely following our last convention the Committee for Industrial Organization held a meeting at Pittsburgh, Pa., which they themselves have designated as the first convention of the Congress of Industrial Organizations, and which action resulted in them becoming definitely dual to the American Federation of Labor, also changing the relationship with this Congress as it existed at our last convention.

To maintain the strength and authority of our Congress it is essential and necessary that the action of the Executive be confirmed and that a roll call vote to reach a decision on this issue be now taken in accordance with provisions in Section 7, Article III of the Constitution.

The resolutions submitted show a desire that every effort should be continued to assist in whatever development shall take place that would lead to reuniting the forces of organized labour in this Dominion and in concurrence with this view we recommend that the incoming Executive assist wherever possible and hold themselves in readiness to do their utmost to heal the breach so that Labour can continue to grow in solidarity and strength within the American Federation of Labor and the Trades and Labour Congress of Canada.

In accordance with the provisions of the above resolution, the roll call vote resulted as follows: For 231; against 98; absent 92; abstaining 13.

Other Resolutions Adopted

Among the recommendations contained in other adopted resolutions were:

Ratification of I.L.O. conventions.

Advocating the strictest government supervision of all private detective agencies and that such agencies submit names and reports of all their operatives and operations to the Federal Department of Justice.

Urging the establishment of an economic advisory board composed of representatives of labour organizations, farmers, competent engineers, statisticians and economists to plan production and distribution of the wealth of the country in accordance with the needs of the people.

Favouring the establishing among fishermen of co-operatives for the processing and sale of fish.

Advocating public ownership and control of banking and credit institutions.

Requesting the Canadian Government to establish a freight rate for fish on the Canadian National Steamships and all subsidized lines, which will not be greater than the rate of flour.

Urging governments to provide that all workers be off duty two working hours of their shift to vote without loss of wages.

Inauguration of a drive towards educating the public to the real value of public utilities.

Favouring labour representation on the liquor control boards of all provinces.

Urging the Ontario Provincial Government to increase the grants to cover fifty per cent of the cost of education.

Requesting an increased grant for technical education, and also to universities which would assist at least 2,000 deserving young men and women who could not finance themselves.

Seeking the consent of the Provincial Governments for the complete nationalization of all social and labour legislation.

Re-iterating the request that the Old Age Pension Act be amended to become a Retiring Allowance Act.

Endorsing a contributory retirement plan for all railway workers in Canada.

Urging that masters, mates, and deck and engineers' officers on government ships be placed under Superannuation Act.

Establishment of a superannuation and benefit fund for all civic employees.

Government superannuation for street railway and motor coach employees who are 60 years of age and have completed 25 years of continuous service in the industry.

Opposing the lowering of the standard of direct relief and proposing the establishment of a shorter work week in order to absorb some of the unemployed into industry.

Urging the establishment of a commission to control all systems of transportation, by water, highways, rail, and in the air.

Compulsory recapitalization of the railroads and the facilitating of refinancing existing railroad bonds at lower interest rates.

Requesting the prohibition of the entry of goods unless marked with the name of the country of origin.

Re-affirming the demand that the possession, production and distribution of nickel be nationalized.

Nationalization of the production of war materials.

Providing the unemployed with socially important work to the country at the prevailing union rate of wages in any given community and for an eight-hour day; unemployed to receive adequate support until the above conditions prevail.

Ascertaining information regarding the export of raw materials which are manufactured in foreign countries and the finished product sold back in Canadian markets.

Favouring a reforestation campaign by all provincial governments.

Requesting a survey of the best means of transporting transient labour where employment is secured through recognized employment offices.

Assisting the Canadian Youth Congress.

Establishment of a technical training school on forestry under the Dominion-Provincial Youth Training Programme.

Establishment of special labour union courses by one or more universities.

Favouring summer labour courses.

Seeking an amendment to the clause in the Criminal Code pertaining to the workers' right to organize to contain provision for collective bargaining and to include penalties for employers who refuse to bargain with unions of their employees.

Recommending that the executive of the Congress and representatives of international organizations meet the Prime Minister and his Cabinet with the view of securing the right of the workers on armament contracts to organize in unions of their own choice.

Impressing upon the Ontario Government the necessity of enacting legislation covering the right of workers to organize.

Protesting against the non-delivery of mail to persons who have not used the mail illegally but who are residing at a prohibited address.

Opposing the use of Court injunctions in labour disputes.

Pledging continued support and co-operation in any effort to prevent the amalgamation of the railways in whole or in part.

Favouring the adoption by parliament of a Workers' Creditors Arrangement Act.

Requesting the running trade unions to have the necessary constitutional changes made at their next international conventions so that they may affiliate with the Congress.

Instructing the executive council in conjunction with representatives of the various affiliated international unions to submit a definite policy for the organization of the unorganized, consistent with existing conditions and the means at their disposal.

Establishment of the six-hour day and five-day week, with corresponding increase in pay to equalize any loss of earnings.

Endorsing the policy of the three platoon system for fire fighters in the province of Ontario.

Favouring a reduction in hours and proper rest periods and holidays for officers and crews on Great Lakes vessels.

Enactment of Federal legislation providing for holidays with pay for all classes of workers in the Dominion.

Withholding government contracts from companies consistently violating fair wage schedules and those denying workers the right to join unions of their choice.

Amending the Fair Wage Act so as to apply to seamen on any boat the owner of which receives a subsidy or subvention from the federal government.

Compulsory registration of barbers at a fee sufficient to cover administration costs.

Obtaining seasonal contracts for all masters and mates operating on the Great Lakes and St. Lawrence River.

Removal of the present personnel of the Labour and Industry Board of the province of Ontario.

Enforcement of the Industrial Standards Act.

Repeal of Bills Nos. 19 and 20 of the province of Quebec.

Restriction on foreign ships operating through the canals to the Great Lakes.

Hospitalization and medical care under state control for all workers in Canada.

Licensed radio operators being put in charge of radio-telephone equipment.

Abolition of night work in bake shops.

Inclusion of all industrial diseases within the provisions of the Workmen's Compensation Act.

Compelling all employers to have their employees covered by the Workmen's Compensation Act.

Placing every domestic worker under the Minimum Wage Act.

Requesting Provincial Governments to pass enabling legislation to give effect to Part 2 of the Housing Act.

Re-organization of the financial structure of Canada.

Abolition of the eight per cent sales tax and removal of the one cent a pound tax on sugar.

Exempting a portion of the assessment of small homes from taxation.

Recommending that fifty per cent of all licence fees and gasoline taxes be paid to municipal authorities by Provincial Governments.

Urging government use of watermarked paper.

Election of Officers

The election of officers resulted as follows: President, Tom Moore, 172 McLaren St., Ottawa; vice-presidents, P. R. Bengough, Vancouver, James A. Whitebone, Saint John, Arthur D'Aoust, Hull; secretary-treasurer, R. J. Tallon, 172 McLaren St., Ottawa.

Provincial Executive Committees: Nova Scotia.—W. K. Clark (Chairman), Halifax; James Woods, Halifax; George A. Smith, Halifax; W. A. McDonald, Halifax. Manitoba.—Robert Hewitt (Chairman), Winnipeg; L. V. Guberman, Winnipeg; R. C. McCutchan, Winnipeg; C. W. Foster, Winnipeg. Saskatchewan.—A. M. Eddy (Chairman), Saskatoon; R. Heseltine, Regina; A. Mose, Moose Jaw; H. Davis, Prince Albert. British Columbia.—C. E. Herritt (Chairman), Vancouver; J. N. Ross, Vancouver; T. Dunlop, Vancouver; H. Pearson, Vancouver.

The provinces of Alberta, New Brunswick and Quebec having federations chartered by the Congress, the executive officers carry on the legislative work of these provinces.

The convention instructed the executive to take a referendum vote of the affiliated membership in the Province of Ontario to ascertain whether or not a provincial federation was desired. Until such time as the vote is taken all legislative matters for the province will be conducted through the Congress office.

Fraternal delegate to the British Trades Union Congress, Frank Hall, vice-president of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Montreal.

Fraternal delegate to the American Federation of Labor, David W. Kennedy, vice-president, Cigarmakers' International Union of America, Toronto.

Vancouver, B.C. was selected as the convention city for 1940.

ALL-CANADIAN CONGRESS OF LABOUR

National Unity Emphasized at Annual Convention— Summary of Proceedings

With an approximate attendance of one hundred delegates representing twenty-five national and chartered local unions, the ninth regular convention of the All-Canadian Congress of Labour was held in Montreal, on September 18-20. In welcoming the delegates, the chairman of the local National Labour Council, Mr. Joe Wall, referred to the progress being made by that body and to the serious times through which the world was passing and to the part being taken by the All-Canadian Congress in the affairs of the Dominion.

President's Address

In opening his address, Mr. A. R. Mosher, president of the Congress, reviewed the principles and policies of the organization, and stated the ideals which guide in the deliberations and decisions of the convention at this period of crisis and tension.

Referring to the war the president declared: "We Canadians are engaged in it, pledged to do our utmost to exterminate the forces which threaten not only our lives, but what is dearer than life itself, our freedom and our democratic institutions." Mr. Mosher contended that the workers must be organized thoroughly and efficiently in order to obtain political democracy and economic justice. "The workers, he said, "are fighting not for the wholly inadequate measure of democracy which even the most advanced nations have attained but for the application of the democratic principle to every aspect of the economic and political life of the world"; and expressed the conviction "that the Congress will do its utmost to prevent industrial disputes in the future as in the past, and to ensure that any employer who signs an agreement with a Congress union may expect that agreement to be observed both in the letter and the spirit."

Stressing the need for national unity, Mr. Mosher said "it is our duty as workers and citizens to set an example of loyality and patriotism, and to encourage every Canadian to emphasize the things we have in common rather than those which might cause disunity and ill-will." Advocating increased organizational activity, the president stressed the fact that personal effort was essential if the greatest results were to be achieved.

Executive Board Report

In reviewing the activities of the Congress since the last convention the report of the Executive Board listed thirty-four new local unions that had been chartered; five lodges of the Canadian Association of Railwaymen which had affiliated, being members of a non-affiliated national union, and seven local unions that had been reinstated. The board impressed the workers generally "that their own faith in labour organization and their willingness to stick together and make whatever sacrifices may be necessary in the circumstances, are the most important factors in the success of any union."

Under the heading "Assistance to Unions on Strike," the board expressed the opinion "that, without in any way abandoning the right of the workers to strike, every avenue of adjustment and conciliation should first be explored, and strike action be considered only when other means of inducing an employer to deal justly with the workers have failed."

The report reiterated the policy of the Congress in regard to amalgamation, unification or joint management of the Canadian National and the Canadian Pacific Railways, as being "unalterably opposed to such schemes, on the ground that they would throw large numbers of railway workers out of employment, and that the solution of the railway problem would be found only by placing all industries under government ownership and control, and operating them for service rather than profit."

Attention was drawn to the amendment to the Criminal Code passed at the last session of parliament in respect to the right of the workers to organize and bargain collectively with employers, and urged all officers and members of Congress unions "to take advantage of any opportunity to make the purposes and principles of the Congress known to unorganized groups, and to give them whatever assistance they may require in becoming organized under the banner of the Congress."

The executive were agreed that the amendments to the National Housing Act passed at the last session of the Federal Parliament had undoubtedly stimulated home-building to some extent but felt that the government would have to go even further before any widespread program is undertaken.

In discussing the subjects of unemployment and unemployment relief the board considered that "there seemed to be great reluctance on the part of the government to undertake any comprehensive method of meeting the situation." According to the report, the failure of the government in this respect was due, "to some extent at least, to its inability to obtain the co-operation of provincial governments in carrying out its policies." The executive contended that " in as much as the remedy for unemployment must be a general one, and can be taken only by the Federal Government, it was felt that the whole burden of relief should be laid upon the Federal authorities, and if this were done, it might expedite action along constructive lines."

The board's report reiterated the views of previous conventions on such subjects as holidays with pay, shorter hours of work, old age pensions, etc., and commended the effort made by Congress unions to study proposals of this nature, and to spread a knowledge of them as widely as possible. The board further confirmed the action taken by the officers of the Congress in assuring the Government of its support in this period of crisis, and endorsed the suggestion made to the Prime Minister that a National Advisory Council, on which labour shall be represented, be established without delay, for the purpose of co-ordinating all activities of the nation in such a manner as to bring about the most effective participation of Canada in the struggle in which the country is now engaged.

Committee Reports and Addresses

According to the report of the editor and manager of the *Canadian Unionist,* official organ of the All-Canadian Congress of Labour, the publication was making good progress and with an increased circulation the profit earned was being used to defray expenses for organizing activities.

After taking up seriatim each section of both the president's address and the executive officers' report, the committee recommended adoption of each as a whole without amendment, and the recommendation was approved by the convention.

The delegates were addressed by Mr. William Rowell and Mr. Todd Sloan, both of London, England, speaking on behalf of the Moral Re-Armament Movement, and Mr. Fred. Knowles, secretary-treasurer of the Amalgamated Civil Servants of Canada, who spoke on the work of that organization.

The financial statement, covering the calendar year ending December 30, 1938, showed assets in excess of liabilities of $2,004.10.

A letter from Hon. Norman McL. Rogers was read in which he advised that it would be impossible for him to be present at the convention and expressed appreciation for the stand taken by the officers of the Congress in the present crisis. He wished the convention success in its deliberations. A letter was also received from the deputy minister of Labour,

Mr. W. M. Dickson, expressing regret at his inability to attend and extending felicitations to the organization.

Resolutions Adopted

The recommendations contained in the adopted resolutions were as follows:—

Enactment of adequate social legislation of a national character.

Opposing the proposal for legislation to provide provision for appeals to rulings of the Workmen's Compensation Board.

Amendment to the Ontario Workmen's Compensation Act to provide compensation for all time lost as a result of accidents.

Provision of old age pensions to persons of 60 years of age or over.

Requesting the Federal Government to appoint members of the delegation to the International Labour Conference each year sufficiently far in advance to permit of familiarity with the questions to be discussed and an understanding of the government's attitude towards these questions.

Demanding the prevention of war materials being exported directly or indirectly to nations unfriendly to the allies.

Investigation into charges that a campaign of Fascist and Nazi propaganda is being conducted in Canada, and the imposition of penalties on all those found guilty.

Encouraging affiliated units of the Congress to join the local co-operative societies.

Supporting the Canadian Youth Congress or any other youth movements that are in accord with the policies of the All-Canadian Congress of Labour.

Opposing the bringing of American dance orchestras into Canada unless by reciprocal agreement and asking amendments to the Immigration and other Acts for the protection of Canadian musicians.

Licensing of music teachers.

Establishing, if possible, a fair price for bread in Ontario.

Nationalization of the entire armament industry in Canada.

Instructing the executive board of the Congress to continue their efforts to bring about unity in the labour movement.

Opposing railway amalgamation.

Favouring affiliation for all units of the Congress with the Workers Educational Association in centres where classes are conducted.

Annual vacation with pay for all hourly-rated employees.

Establishing a maximum of eight hours per day with no reduction in wages.

Opposing the "Padlock Law" or "any similar legislation which infringes upon the constitutional rights of Canadian citizens."

Provision of equitable system of non-contributory unemployment insurance.

Urging the building of safety walks for pedestrians alongside the highways.

Furnishing free school books and other school supplies to all pupils in both elementary and high schools.

Requesting compensation to injured workers be paid weekly, based on weekly wages.

Maintenance and control by the Canadian Government of a fish market in Nova Scotia.

Amending the National Housing Act to permit workers to obtain suitable homes by means of a national housing program.

Abolition of the Senate.

Requesting that any qualified organization of musicians be allowed to broadcast over the C.B.C. network.

Favouring a minimum of fifty cents per hour for all workers in Canada.

Imposition of a substantial tax on money leaving the country as per capita tax and assessment.

Retaining in good standing all members of Congress unions joining the armed forces.

Legislative investigation in the various provinces of funeral costs, with the view to ultimately providing for either state, provincial or municipal handling of all funerals.

Requesting the Quebec Government to rescind Bill No. 40, and that engineers employed in all "so-called charitable institutions" be protected by Ordinance No. 6 of the Quebec Fair Wage Act.

Recommending that those employed as guards against sabotage be either enrolled with the militia with full military status, or be classed as civilians and paid local rates with the protection of compensation.

Requesting that the insurance schemes of international unions be legalized, with such restrictions as now apply to all other insurance companies.

Election of Officers

The officers elected were: President, A. R. Mosher (Canadian Brotherhood of Railway Employees), Ottawa; vice-president, C. A. Beattie (Canadian Association of Railwaymen), Toronto; secretary-treasurer, N. S. Dowd (Canadian Brotherhood of Railway Employees), 230 Laurier Ave. W., Ottawa.

Executive board members: George Taylor (Algoma Steel Workers' Union), Sault Ste. Marie; Lionel Guay (National Union of Full-Fashioned Hosiery Workers), London; Roy F. Gould (Canadian Brotherhood of Railway Employees), Moncton; T. Prezeau (National Union of Operating Engineers), Montreal.

CONFEDERATION OF CATHOLIC WORKERS OF CANADA

Proceedings of Eighteenth Annual Convention—Resolutions Concerning Dominion and Provincial Legislation—Importance of Collective Agreements Emphasized by Provincial Minister of Labour

THE Confederation of Catholic Workers of Canada held its eighteenth annual meeting in Quebec City from September 10-13 with 172 official delegates from 32 centres and 80 fraternal delegates.

The Congress was addressed on the opening day by Cardinal Villeneuve, Honourable William Tremblay, Minister of Labour of Quebec, Mr. E. McG. Quirk and Mr. Liguori Pepin, representatives of the Dominion Department of Labour and by officers of the Confederation. Honourable Norman McL. Rogers, then Minister of Labour of Canada, who had expected to attend the Congress was unable to do so owing to the war emergency. Cardinal Villeneuve emphasized the importance of social justice as the foundation of national and international peace and the dependence of social justice on the Christian virtues of justice and charity. He deprecated the tendency to look to the State rather than to rely on personal initiative and on such organizations as workers' and employers' associations. Collaboration between these bodies, he considered necessary for the solution of the problems arising in industrial relations. Honourable Mr. Tremblay also stressed the value of close relations between trade unions and employers' associations and considered collective agreements to constitute a firm basis for industrial peace. Legislation, he emphasized, was powerless to bring employers and workmen together in understanding and goodwill but the co-operation of employers had to be won by labour unions. Until such co-operation makes possible collective agreements throughout industry it was necessary, however, to have minimum wage legislation to prevent abuses. When the unions have succeeded in educating both the workers and employers to collective bargaining, agreements can be expected to replace fair wage orders. Mr. Tremblay pointed out that the Government had to accept conditions as they were but he paid tribute to work of the leaders of the National Catholic unions as missionaries of a new social order.

Scope of Confederation

The constitution of the Confederation as amended in 1937 provides for a Confederal Bureau comprising the executive committee, made up of the president, two vice-presidents, treasurer, general secretary and chaplain, together with one representative of each of the federations and of each central council. The report of the Confederal Bureau shows that since the 1938 congress a new central council has been organized at Sorel and that 14 local syndicates have been affiliated directly with the Confederation. Nine new locals have been affiliated through federations and eight study circles through the Federation of Study Circles. In May, 1939, there were 12 central councils, Montreal, Quebec, Three Rivers, Sherbrooke, the Diocese of Ottawa, Jonquiere, Chicoutimi, St. Joseph d'Alma, St. Hyacinthe, Sorel, Ha Ha Bay and Farnham. Affiliated with the central councils were 236 local syndicates with membership of 44,231. Syndicates not affiliated with central councils number 22 with a membership of 5,170, making a grand total of 238 local unions in the Confederation with a membership in all of 49,401. Analysing the membership according to federations, not including the Federation of Study Circles of which there are 18, the report shows that there are federations of workers in asbestos, of barbers and hairdressers, and of workers in building, leather and shoe manufacture, commerce and finance, printing, furniture, pulp and paper, textiles and clothing with a total membership of 34,109 organized in 141 local unions. The members in local unions not organized in federations numbered 15,292.

Report of President

The reports of the president and of the Confederal Bureau were approved by the meeting. In his report, the president deplored the relatively slight progress in organization during the year owing to the difficulties met by organizers in certain industries. Considerable time was consumed, too, in trying to ensure the observance of collective agreements and wage orders. Ten consumers' co-operatives were reported to have been organized in the last two years and in several other places circles were studying co-operative problems in preparation for organization of co-operative societies. At Chicoutimi a producers' co-operative for the manufacture of wood products was recently formed. Some municipalities and school commissions during the year declared their willingness to recognize the Catholic unions by teaching the "Syndical Catechism" or by recognizing syndicates among the workpeople in local insti-

tutions or by giving preference to organized Catholic labour on public works.

Little success was reported by Mr. Charpentier in obtaining legislation in either the provincial or the Dominion field. Certain amendments in the Collective Labour Agreements Act, the Fair Wage Act and the Professional Syndicates Act were welcomed but the president deprecated the apparent tendency of the Provincial Government to regulate labour conditions instead of encouraging the self-government of industry by organizations of employers and employed. He referred particularly to the dissatisfaction with the so-called Bills 19 and 20 of the session of 1938 which were identical amendments made in the Collective Labour Agreements Act and the Fair Wage Act providing penalties for any person who prevents or tries to prevent any worker from joining an association or who dismisses or tries to have dismissed any worker because he is or is not a member of an association or because he is not a member of a particular association. Also noted was the Superior Court judgment to the effect that a clause in a collective agreement fixing minimum prices for shoe repairing was invalid as being in restraint of trade and therefore in violation of the Dominion Combines Investigation Act and of Section 498 of the Criminal Code dealing with combines. In view of what was regarded as the unsatisfactory condition of the provincial legislation, the president indicated that the Confederation would press strongly for the setting up of a Superior Council of Labour and of a Labour Court. The former would be competent to perfect existing laws and to elaborate a modern labour code in which freedom of association would be safeguarded while being restricted where necessary and it would have power to settle all questions relating to organization. To the Labour Court, which would supplement the Superior Council of Labour, would be referred all disputes arising out of the application of labour laws and it would serve also as an arbitration tribunal in disputes between employers and employed.

In the federal field, Mr. Charpentier commented approvingly on the Bill introduced in the House of Commons by Mr. M. Raymond, M.P., to amend the Dominion Companies Act to give the Secretary of State power to obtain information as to the shareholders, number of paid-up shares and working conditions of employees in tariff-protected industries. He hoped that the Bill would be presented next session in a constitutional form. On unemployment insurance he expressed approval of a Dominion-provincial scheme in view of the Provincial Government's attitude towards a Dominion system while pointing out that the Confederation advocated a wider measure of social insurance.

On the question of participation in war outside Canada, the president referred to the resolution adopted at the 1938 Congress opposing such participation and declared that the Confederation considered that Canada ought to remain neutral. On the other hand, he expressed the Confederation's willingness to co-operate with the Dominion Government in order to prevent any stoppages in industry through labour disputes but he urged that it should be recognized by the Government that the employers' co-operation was equally essential for the desired end and that the surest means of achieving industrial peace is the general acceptance of collective bargaining. He emphasized that the exceptional circumstances of the time ought to facilitate an agreement between the Dominion and the provincial governments in order to impose, for the duration of the war, the legal obligation on employers and employed in industries where the workpeople are sufficiently organized to meet in conference with the object of making a collective agreement and if they do not arrive at an agreement to require them to submit their differences to arbitration before boards specially named for this purpose. A second condition deemed necessary to insure the continuous operation of industry was a declaration by the federal Government and by the provinces of the workers' right to a revision of wage-scales in accordance with changes in the cost of living. High-tariff industries should be those to which such conditions should be first applied and, in the opinion of the Confederation, if applied generally, industrial peace would prevail throughout the war period.

In this connection Mr. Charpentier emphasized, the acceptance of such conditions would be a considerable step towards uniformity in labour laws, an objective long desired. It would also be a decisive influence towards effective co-operation between the federal and provincial Departments of Labour. As an indication of such co-operation they noted with pleasure the recent organization of the Canadian Association of Administrators of Labour Legislation.

Report of Confederal Bureau

In the report of the Confederal Bureau, which was presented by Mr. Picard, general secretary, in addition to the statistical information given above, several matters dealt with during the year were touched on briefly and certain others were set out at considerable

length. Attention had been given to the question of the closed shop, which seems to be impossible under Bills 19 and 20, and the Provincial Government had been asked to amend the legislation to permit the insertion, in any agreement which is registered under the Professional Syndicates Act, of a clause stipulating that only members of a professional syndicate may be employed. In accordance with a resolution adopted last year an "employers' association day" was held under the auspices of L'Ecole Sociale Populaire and there was a special conference of business agents of the unions at Montreal in February. The Bureau is obtaining copies of labels used by the Catholic syndicates with a view to distributing information concerning them. The General Secretary had been authorized to attend lectures in law at Laval University.

Other Matters Reported

Other matters reported by the Bureau related to a "journée syndicale", an official organ for the Confederation, an order of procedure for the meetings of the Confederation, and the appointment of delegates to the International Labour Conference. A draft program suggested for a "trade union day" calls for two study sessions for union officers to which members may be admitted and for a general meeting open to all workers, if considered desirable, to be addressed by speakers from the Confederal Bureau or from any federation with locals in the town concerned. As regards the Canadian delegation to the International Labour Conference, the Bureau recommended that in future the representative of the Confederation of Catholic Workers should be appointed as a technical adviser to the labour delegate rather than an adviser to the Government delegate.

The committee appointed by the Bureau to consider the publication of an official organ suggested the monthly issue of a multigraphed paper for one year and recommended that each union collect from its members the annual subscription for the journal. To simplify the procedure at the annual meeting of the Confederation, it was recommended that at least thirty days before the date of the meeting there should be sent to the general secretary by the central councils all resolutions received from the local syndicates which do not form part of a federation and all resolutions of a general nature received from the federated syndicates. Any resolutions received at a later date would be dealt with only after the regular agenda of the Confederation has been disposed of. A federated syndicate is to forward to its federation any resolutions of special interest to that body at least six weeks before its annual meeting and as soon after the meeting as possible the resolutions adopted by the federations are to be sent in prescribed form to the general secretary of the Confederation. It was recommended that no resolutions should be published before being dealt with by the appropriate body. The Confederal Bureau suggested also that two secretaries be appointed for each federation, one to note the proceedings of each meeting and the other to prepare the reports and resolutions to go forward to the Confederation.

Professional Syndicates Act

Several resolutions adopted by the Confederation had to do with the Professional Syndicates Act, Collective Labour Agreements Act and the Fair Wage Act. An amendment proposed in the Professional Syndicates Act would expressly permit collective agreements made by syndicates incorporated under the Act to include provisions fixing minimum prices for services provided to the public such as prices charged by shoe repairers or by barbers and hairdressers, a power deemed necessary to enable employers to pay the wages fixed in the agreement. Under other suggested amendments syndicates could name one or more representatives to act on behalf of any of their members involved in a trade dispute and they would also have authority, in the name of their members, to bring legal action for violation of the wage orders of the Fair Wage Board.

Collective Labour Agreements Act

In the Collective Labour Agreements Act changes advocated by the Confederation include restricting the power of the Lieutenant-Governor in Council to amend or cancel a decree so as to allow such action only after consultation with the parties to the agreement and permitting a clause in a collective agreement fixing a minimum charge for services to be made legally binding. Another amendment proposed in this statute would render any employer who refuses, in case of a trade dispute, to negotiate with the representatives named by a professional syndicate registered under the Professional Syndicates Act liable to a penalty. It was recommended also that a clause in a collective agreement voluntarily entered into by the two parties, which provides for a closed shop, should not be illegal.

Fair Wage Act

An amendment proposed in the Fair Wage Act would require the labour representatives on the committees of conciliation provided for in the Act to be nominated by professional

syndicates where such syndicates exist. Another change proposed in this statute would require any exemptions from the wages and hours provisions of the regulations to be made by the Fair Wage Board only after consultation with the syndicates or unions concerned, such exemptions to be published by the Board in the Official Gazette and no exemption to be valid for more than one month. In no case should the work-week to which the specified wages apply exceed 54 hours.

Hours of Labour

The Industrial and Commercial Establishments Act, it was suggested, should be amended to reduce the maximum hours for which women and boys under 18 may be employed in industrial establishments from 10 to 8 a day and from 55 a week to 48 a week. It was recommended further that the longer hours that may be permitted by the factory inspector in emergencies should be reduced from a maximum of 12 a day to 9 a day and from 65 to 54 a week, that the maximum period for which these hours may be permitted should be decreased from 6 to 4 weeks in a year and that the employment of these classes of workers must fall between 8 a.m. and 7 p.m. instead of between 6 a.m. and 9 p.m. It was also proposed that no person permitted to work the longer hours allowed by the Act should be required to do so without her own consent.

Workmen's Compensation Act

Changes urged in the Workmen's Compensation Act would extend it to all employers without exception, would fix as the basis for determining the annual benefits payable for total or partial disablement the hourly wage being earned at the time of the accident multiplied by 2400, that is, earnings for 300 days of eight hours each, the computation not to be based on a wage lower than 30 cents an hour. It was recommended further that the right to benefit date from the day of the accident, that hospitals and other institutions of the kind be brought within the scope of the Act, that silicosis contracted in industries other than mining, such as stone and granite cutting, be compensated and that lead poisoning occurring in the painting industry be added to the list of occupational diseases for which compensation is payable.

Other Provincial Measures

Another resolution related to the statute passed in 1939 providing for the settlement of disputes between persons employed in charitable institutions and their employers. In the opinion of the confederation, the Act was defective in that it ignored the professional syndicates, did not make adequate compensation for depriving the workers of the right to strike and made no provision for the enforcement of the arbitration award. Other measures advocated were the establishment by the provincial authorities of a Superior Council of Labour, the setting up of a Government body to determine, at the request of a professional syndicate, a proper basis for calculating the wages to be paid under a bonus system and the enactment of legislation making holidays with pay compulsory.

Dominion Legislation

Amendments were proposed in section 498 of the Criminal Code and in the federal Combines Investigation Act so as to insure that the parties to collective agreements which are made legally binding under provincial law and which fix uniform conditions of labour and minimum prices for services to consumers should not be liable to any charge of infringing the Dominion legislation. It was also resolved to ask the federal Government to amend the National Housing Act, 1938, so as to extend Part II of the Act providing for schemes of low-rental houses until March 31, 1941. Another motion set out that since the federal Government has no power to regulate labour conditions and since there ought to be co-operation among the nine provinces to bring about uniform labour laws to do away with the unfair competition arising from varying labour standards, the Dominion Government should be asked to form a federal Economic Council of representatives of each province whom the provinces should be asked to nominate, a representative of bona fide trade unions and representatives of the federal Government. It was also decided to ask the Dominion and provincial Governments to set up a Labour Court to decide labour cases in the province of Quebec.

Also passed by the Confederation was a considerable number of other resolutions having to do with a great variety of subjects including matters requiring legislative or administrative action as well as those relating to organization.

Election of Officers

The following officers were elected for next year: President—Alfred Charpentier, Montreal; 1st vice-president—Emile Tellier, Three Rivers; 2nd vice-president—Maurice Doran, Hull; Treasurer—Alphonse Bourdon, Montreal; Secretary General—Gérard Picard, Quebec; Chaplain—L'Abbé Georges Coté, Quebec.

These officers, together with the following representatives of the federations and central

councils and two to be chosen for St. Hyacinthe and Farnham comprise the Confederal Bureau; Osias Filion, Montreal; G. A. Gagnon, Montreal; Alphonse Roberge, Quebec; Philippe Lessard, Port Alfred; Albert Coté, Montreal; Jos. O. Landry, Thetford Mines; J. A. Anzalone, Quebec; J. A. Francœur, Quebec; P. E. Cabana, Montreal; Philippe Hamel, Victoriaville; Rosario Gosselin, Quebec; O. D. Paulhus, Sherbrooke; Nap. Latraverse, Sorel; L. P. Boily, Jonquiere; René Harmegnies, St. Joseph d'Alma; Georges Michaud, Ha Ha Bay; Alexis Desforges, Chicoutimi.

EIGHTEENTH REGULAR CONVENTION OF THE CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES

THE eighteenth regular meeting of Grand Division, Canadian Brotherhood of Railway Employees, was held in the Chateau Laurier, Ottawa, on September 11th to 15th, inclusive, with an attendance of 162 delegates and officers representing local divisions from coast to coast. Mr. A. R. Mosher, who has been President of the Brotherhood since it was formed in 1908, was in the chair.

At the opening session, Mr. S. Wolstein, President of Division 110, Ottawa, extended a hearty welcome to the delegates on behalf of the Ottawa membership, and an official welcome was extended on behalf of the city of Ottawa by His Worship Mayor Stanley Lewis.

The report of membership, presented by Secretary-Treasurer M. M. Maclean, showed a considerable increase in membership not only among railway employees but among other groups of transport workers, particularly in the field of highway transport. Mr. Maclean also presented the financial statement of the Brotherhood for the three-year period since the previous convention, which indicated that the Brotherhood was in a strong financial position. Other reports submitted to the convention were those of the Executive Board of the Brotherhood and the Board of Trustees, all of which were approved.

President's Address

In his presidential address, Mr. Mosher reviewed the work of the Brotherhood during the past three years, and emphasized the fact that the Brotherhood was based upon two fundamental principles, the organization of railway and transport workers, and the right of Canadian workers to manage their own affairs. It was essential, he stated, that the economic strength of the workers be developed by means of labour organization, and that they use their political power for the continuance and expansion of democratic institutions. Dealing with the transport industry, Mr. Mosher referred to the desirability of continuing the Brotherhood's policy of opposition to railway amalgamation and similar schemes which would result in an increase of unemployment.

Resolutions

Approximately sixty-five resolutions were considered by the convention, covering a wide variety of subjects of interest to the workers. Among the questions dealt with were: vacations with pay, abolition of the Senate, youth training program, the Workers' Educational Association, seniority for members on military service, pensions for railway employees, support of the Government's war efforts, and unemployment insurance, as well as a large number of administrative questions.

At the closing session, an address was given by Mr. Norman S. Dowd, Secretary-Treasurer of the All-Canadian Congress of Labour, expressing appreciation of the co-operation given by the Brotherhood to the national labour movement. Mr. Dowd outlined some of the principles and purposes of the movement, and stated that the progress which had been made during the past few years gave assurance that the objectives of the Congress in uniting all the workers of Canada under one national banner would ultimately be reached.

The election of the Grand Division Officers and the Executive Board of the Brotherhood resulted as follows: President, A. R. Mosher; Vice-President, J. E. McGuire; and Secretary-Treasurer, M. M. Maclean (all re-elected by acclamation). Two members of the Executive Board, B. H. Crawford, of Sydney, and George Stoker, of Toronto, were re-elected, and the other two members elected were E. Bolduc, Levis, and A. S. Simpson, Winnipeg. The members of the Board of Trustees, George E. Lowe, Moncton; C. H. Taylor, Cochrane, and A. J. Teasdale, Winnipeg, were re-elected.

It was announced recently that Mr. Carter Goodrich of the United States had been elected president of the governing body of the International Labour Office.

SAFETY CONDITIONS AND WORKING HOURS IN BRITISH INDUSTRY

THE annual report of the Chief Inspector of Factories and Workshops (Great Britain) for the year 1938, issued recently, reviews the work of the Factory Department of the Home Office during the year.

The report states that the principal event during the year was the coming into force of the Factories Act, 1937, on July 1, 1938. Since this Act had been passed in July, 1937 (LABOUR GAZETTE, October, 1937, page 1059), a full year had been available before compliance with the new provisions became legally necessary. During this interval, the report states, many, and probably most, firms made arrangements to secure compliance in good time by modifying, where necessary, their hours of work and by altering their machines and premises so as to observe the new safety and welfare requirements. Although in many instances difficulties arose which called for careful consideration and rendered some delay inevitable, employers with few exceptions fully accepted their new responsibilities and showed a general desire to secure rapid compliance, and by the end of the year most of the difficulties experienced had been surmounted. As regards hours of employment, numerous applications for the special modifications which the Act empowers the Secretary of State to grant were received both from industrial associations and from individual firms, and many of these were still under consideration at the end of the year. (LABOUR GAZETTE, September, 1939, page 888 and August, 1939, page 779).

Industrial Accidents.—During 1938 a distinct decrease is reported in the number of reportable industrial accidents (involving more than three days' absence from work), the total number for the year being 180,103 as compared with 193,542 in 1937. Fatal accidents, included in these totals, numbered 944 in 1938 as compared with 1,003 in 1937. The report remarks that the decrease must have been due to some extent to the reduced numbers in employment, but the fact that the decrease was specially marked among fatal accidents on factory premises encourages the hope that the safety requirements of the new Act have already begun to take effect. An outline is also given in the report showing the development in organized attempts to reduce accidents in recent years. Accidents among young workers form the subject of a separate chapter.

Health.—In a chapter devoted to health the report details important additional safeguards contained in the Factories Act, 1937, and to the various industrial diseases. Marked reduction is reported in cases of lead poisoning to a total of 96 in 1938, a figure which compares with 1,058 in 1900.

Other chapters in the report review the developments in the past year in respect of welfare, truck, piece-work, and the Home Office Industrial Museum.

The report contains a number of statistical tables giving particulars of the number of factories and other premises covered by the Acts, and analyses the number of accidents reported in 1938 according to the sex and age of the persons involved, the industries in which they were employed, the cause of the accident, etc.

The Law and Women's Work

The International Labour Office has recently published another in its series of studies and reports on the employment of women and children, entitled *The Law and Women's Work.*

The 1935 Assembly of the League of Nations had upon its agenda the question of the status of women, with reference to the equality of the sexes. On examination of the question, it found that it would be necessary to explore a number of problems and it mentioned two of them: the political and civil status, and the economic status of women. It decided to carry out an enquiry into the first problem itself but it recognized "that the question of conditions of employment, whether of men or women, is a matter which properly falls within the sphere of the International Labour Organization" and expressed the hope that the International Labour Office would "undertake an examination of those aspects of the problem within its competence—namely, the question of equality under labour legislation—and that it will, in the first place, examine the question of legislation which effects discriminations, some of which may be detrimental to women's right to work."

The Law and Women's Work is an outcome of the Assembly's invitation. It is an extensive survey of women's labour problems and of the ways in which those problems have been met; it also contains a detailed analysis of the laws and regulations throughout the world which are especially concerned with women's employment. The twelve chapters of the volume deal with: methods of regulation; the authorities responsible for supervising women's work; maternity protection; hours of work; night work; the employment of women in unhealthy, exhausting and dangerous occupations; employment on work involving moral dangers; the right of women to employment; wage regulation; the special position of women under social insurance schemes; the legal status of professional women, and labour problems arising out of the civil and political status of women.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, AUGUST 1939

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on September 1 was 11,856, the employees on their payrolls numbering 1,165,631 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for August was 1,924, having an aggregate membership of 241,824 persons, 10·9 per cent of whom were without employment on September 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of September, 1939, as Reported by Employers

According to data tabulated by the Dominion Bureau of Statistics, industrial employment showed decided improvement at the beginning of September, the gains being widely distributed, both geographically and industrially. The advance was smaller than that noted at September 1 in either 1938 or 1937, but with these exceptions, was the largest recorded at that date in any of the years since 1920, considerably exceeding the average increase between August 1 and September 1 in this period of eighteen years.

Statistics were compiled from 11,856 employers whose staffs aggregated 1,165,631; this was an increase of 20,247, or 1·8 per cent over their August 1 labour forces of 1,145,384. The crude index rose from 117·5 in the preceding month, to 119·6 at September 1, as compared with 115·1 at the same date in 1938. It was, however, a few points lower than that of 123·2 at the beginning of September in 1937. With this exception, it was higher than at September 1 in any other year since 1929.

After correction for seasonal movement, the index slightly advanced, rising from 114·3 at August 1 to 114·9 at the date under review, when it was higher than the seasonally-adjusted figure for any other month since the opening of 1938.

The following are the unadjusted indexes for September 1 in recent years, the figures being calculated on the 1926 average as 100: 1939, 119·6; 1938, 115·1; 1937, 123·2; 1936, 107·1; 1935, 102·7; 1934, 98·8; 1933, 88·5; 1932, 86·0; 1931, 107·1; 1930, 116·6; 1929, 126·8; 1928, 119·1 and 1927, 111·0.

An analysis of the returns by industries shows unusually marked expansion in manufacturing, in which over 13,100 persons were added to the reported payrolls; this increase greatly exceeded the average advance at September 1 in the years since 1920, although it was not equal to that reported at the same date in either 1938 or 1937. While employment in this division was rather more active than at the beginning of September of last year, the index was lower than at the same date in 1937; with this exception, it was the highest September 1 figure since that of 1929. The greatest improvement in factory employment at the date under review took place in vegetable foods, textiles and iron and steel. In the first two of these industries, the large advances were seasonal in character, while those in iron and steel, also pronounced, were contra-seasonal.

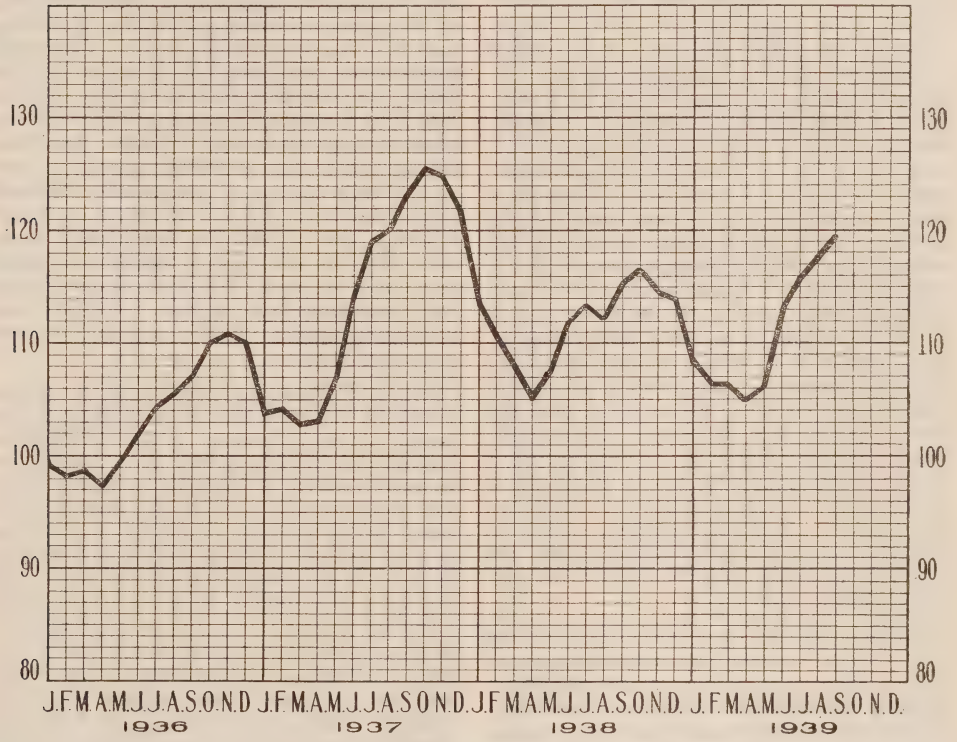
In the non-manufacturing industries, coal-mining, transportation, construction and maintenance, services and wholesale trade showed heightened activity. The increases in construction were most extensive and were especially interesting because the average change in employment at September 1 in the experience of past years has been a decline. On the other hand, logging and retail trade were quieter.

The employers furnishing data for September 1, 1938, had numbered 10,915, and their employees had aggregated 1,103,989, which was an increase of 2·8 per cent over their August 1, 1938, payrolls. The improvement then had also been fairly general, extending to each of the five economic areas and to the main

industrial divisions, with the exception of logging and trade.

Employment in Financial Organizations

For some months, statistics of their employment have been collected from banks, trust companies and stock market operators. For September 1, 414 firms and branches in these lines of business reported staffs aggregating 33,095 persons, compared with 33,148 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, construction, service and trade industries bring the total number of employees included in the September 1 survey of employment to 1,198,726 in 12,270 establishments, and slightly lowers the index of 119·6 in the industries above enumerated, to 119·2; when the employees of the co-operating financial organizations were added to the general figures for August 1, the index was lowered from 117·5 to 117·2. Comparable data for 1938 are not available.



Employment by Economic Areas

Firms in New Brunswick reported no general change; in British Columbia there was a slight slowing-up in industrial activity, while elsewhere the situation showed considerable improvement. The gains in Quebec, Ontario and Manitoba were most pronounced. Employment in all five economic areas was brisker than at September 1 of last year. In Quebec and the Prairie Provinces the index was also higher than at September 1, 1937, but the situation in the remaining provinces was not so favourable, although activity was generally greater than in September in any of the years, 1930-1936. In the Prairie Provinces, however, the favourable comparison goes back only to 1932.

Maritime Provinces.—Employment in Nova Scotia showed a moderate increase and there was a slight gain in Prince Edward Island, while New Brunswick reported an insignificant decline. The improvement in the Maritime Provinces as a unit was contra-seasonal, there

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

being, on the average, a contraction between August 1 and September 1 in the experience of the years since 1920. Most of the gain at the date under review took place in construction, mainly in work on the roads; shipping and communications also recorded an advance, but manufacturing, logging and trade released employees. Statistics were received from 829 firms in the Maritime Provinces, whose staffs aggregated 85,972 workers at September 1, 1939, compared with 85,416 in the preceding month. A rather smaller increase had been indicated at the beginning of September of last year, when the 798 employers furnishing data had reported 82,972 persons on their payrolls; the index then was slightly lower than at the latest date, when it stood at 116·4.

Quebec.—Increased employment was noted in Quebec, mainly in manufacturing and construction and maintenance. Within the former, textile and iron and steel plants showed important recovery, while non-ferrous metal, clay, glass and stone and other classes were rather busier; vegetable food factories, on the other hand, were slacker. In the non-manufacturing groups, logging, shipping and trade reported reductions in staff. The working force of the 2,943 employers co-operating in Quebec stood at 366,824 persons, as against 360,718 at August 1. This gain greatly exceeded the average increase indicated at September 1 in the years, 1921-1938, being also considerably larger than that which took place at the same date last year. Employment was then in generally smaller volume, the index standing at 118·1, as compared with 128·5 at the beginning of September, 1939. Statements for September 1 of last year had been tabulated from 2,706 establishments employing 332,820 men and women, compared with 331,862 in the preceding month.

Ontario.—In this province, 5,184 business men reported considerable additions to their staffs, which were enlarged from 453,840 at the first of August, to 461,854 at September 1. Expansion on a larger scale had been noted at the same date last year, but the index then was over a point lower than at the latest date, viz., 116·2. Manufacturing recorded a substantial advance; there was marked improvement over August 1, 1939, in the vegetable food and iron and steel divisions, together with smaller gains in the textile, leather, chemical, rubber, non-ferrous metal, electrical apparatus, electric light and power and some other classes, while the working forces of lumber mills declined. In some of these industries, the gains were seasonal in character. Among the non-manufacturing divisions, wholesale trade, building construction, transportation and hotels and restaurants reported heightened activity, while logging, mining, communications, highway construction and retail trade reduced their personnel.

The 4,745 firms co-operating at the same date in 1938 had employed 449,147 persons, as compared with 434,399 at Aug. 1 of last year.

Prairie Provinces.—A further, important advance on the whole was indicated in industrial employment in each of the Prairie Provinces at the beginning of September; the general index was 1·8 points higher than at Sept. 1, 1938, when marked improvement had also been recorded by the firms making returns. Data for the date under review were tabulated from 1,674 employers of 148,534 workers, as compared with 142,620 in the preceding month. This increase of over four per cent substantially exceeded the average gain at Sept. 1 in preceding years for which information is on record, although it was on a smaller scale than at that date in 1938. Manufacturing, mining, transportation, wholesale trade and construction and maintenance showed heightened employment, the gains in transportation and construction being most extensive. On the other hand, logging and retail trade were slacker. For Sept. 1, 1938, 1,530 establishments had reported 143,167 employees, an increase of seven per cent over the preceding month.

British Columbia.—Employment in British Columbia showed a falling-off at Sept. 1, following a marked increase at the beginning of August; the reduction was very largely due to conditions in the logging industry which was greatly affected by the fire hazard intensified by the weather conditions. Some firms in that industry, however, also reported a lack of orders. Manufacturing, on the whole, was brisker than at Aug. 1, 1939, the improvement occurring largely in the lumber and vegetable food factories. In the non-manufacturing divisions, transportation, construction and maintenance and services also showed heightened activity. The working force of the 1,226 firms furnishing data declined from 102,790 persons in the preceding month, to 102,447 at the beginning of September. At the same date last year, 1,136 employers had made returns, showing an aggregate staff of 95,883. The index then stood at 112·0, several points below the latest index, viz., 116·6.

Table 1 gives index numbers by economic areas.

Employment by Cities

Employment advanced in six of the eight cities for which data are segregated, firms in Montreal, Quebec City, Toronto, Windsor, Winnipeg and Vancouver showing improve-

ment since Aug. 1, while curtailment was indicated in Ottawa and Hamilton. Except in Ottawa, Hamilton and Windsor, the situation in these centres was more favourable than at Sept. 1, 1938.

Montreal.—Employment in Montreal, increased at the beginning of September, 2,614 persons having been added since Aug. 1 to the paylists of the 1,711 co-operating firms, who employed 169,423. Considerable improvement was noted in manufacturing, particularly in textiles, but iron and steel, non-ferrous metal and many other factories were also busier. Among the non-manufacturing industries, building showed heightened activity, while retail trade, road construction and maintenance and transportation did not afford so much employment. A rather larger advance on the whole had been made at Sept. 1, 1938, when data were received from 1,566 employers of 163,049 men and women; the index was then slightly lower.

Quebec.—A moderate increase was indicated in Quebec, according to 212 establishments having 17,920 workers, as compared with 17,795 in the preceding month. Manufacturing showed little general change; transportation, building and hotels and restaurants recorded slight improvement, while there were small losses in road construction and trade. Employment was decidedly more active than at the beginning of September of a year ago, when a smaller advance had been reported by the 187 concerns making returns, whose staffs had aggregated 14,984.

Toronto.—Manufacturing showed substantial improvement, chiefly in the leather, vegetable food, textile, chemical, electrical apparatus, iron and steel and non-ferrous metal divisions; services and building also afforded considerably more employment, while retail trade was quiet. Statements were received from 1,758 firms with 141,950 employees, or 2,486 more than at Aug. 1. Expansion on a larger scale had been indicated at the same date of a year ago, but employment was then slightly below its present level, according to the information furnished by 1,612 employers with 135,556 persons on their staffs.

Ottawa.—Reduced activity was noted in Ottawa, chiefly in trade and construction, while manufacturing was rather brisker. The 230 establishments making returns reported 14,706 workers, compared with 14,925 in the preceding month. At Sept. 1, 1938, an increase had been indicated by the 203 co-operating employers, who provided work for 14,402 men and women; the index was then fractionally higher.

Hamilton.—Manufacturing showed no general change, moderate improvement in food, textile and some other factories being about offset by small losses in metal and electrical apparatus plants. Construction and transportation also released some employees. Three hundred and thirty concerns had 33,159 persons on their payrolls, as compared with 33,265 at Aug. 1. An upward movement had been indicated at the beginning of September of a year ago, when industrial employment was at a higher level, according to data from 301 firms with 34,966 employees.

Windsor.—Heightened activity was shown in Windsor, where the 197 establishments making returns reported 15,928 workers, as against 15,500 in the preceding month. Textile and iron and steel plants afforded more employment, and construction was also rather busier. Little change, on the whole, took place in other industrial groups. More pronounced recovery had been noted at the same date of last year, and the general index was then higher; a combined working force of 16,542 had been employed by the 189 firms furnishing statistics for Sept. 1, 1938.

Winnipeg.—Employment in Winnipeg showed its fifth successive advance; manufacturing, transportation, construction, wholesale trade and communications recorded improvement, while retail trade and services were not quite so active. An aggregate staff of 42,842 men and women was reported by the 525 co-operating establishments, which had employed 42,079 in the preceding month. A smaller increase had been indicated at the same date in 1938, when the index was slightly lower. Statements had then been received from 499 firms, whose employees had numbered 41,477.

Vancouver.—There was an upward movement in industrial activity in Vancouver, according to information received from 521 employers of 39,151 persons, as against 38,431 at Aug. 1. Manufacturing plants reported rather larger payrolls, there being moderate gains in the lumber, food and textile divisions; transportation, construction and services were also brisker. Employment was somewhat more active than at the same date of last year, although a larger increase had then been noted in the personnel of the 471 co-operating employers; they had reported 37,414 workers.

Employment by Industries

Manufacturing.—Employment in manufactures showed important expansion at Sept. 1, the 6,457 co-operating employers enlarging their payrolls from 577,984 at Aug. 1, to 591,113 at the date under review. This increase of 2·3 per cent considerably exceeded the advance recorded, on the average, at Sept. 1 in the years since 1920, although it was smaller than that indicated at the same date in 1938. The index stood at 115·3 at the latest date, com-

pared with 112·8 at Aug. 1, 1939. At Sept. 1, 1938, it was 113·8, while at the same date in 1937, the unadjusted figure was 121·2; with this exception, the latest index was the highest for September in the years since 1929.

After adjustment for seasonal movement, the index rose from 110·3 at Aug. 1 to 112·1 at the date under review, when it was higher than in any other month since March, 1938.

An analysis of the returns from manufacturers shows particularly large increases in the vegetable food, textile and iron and steel divisions. As already stated, those in canneries and textile plants were seasonal. The gains in iron and steel were especially interesting in that they were contra-seasonal in character, the movement having been downward in thirteen of the eighteen preceding years for which data are available; the increase resulted in a higher index for Sept. 1, 1939, than at the same date in any other year since 1930, except 1937. Leather, rubber, tobacco, chemical, electric light and power, electrical apparatus and non-ferrous metal factories also reported considerable improvement. On the other hand, animal food, lumber and pulp and paper mills were slacker. The trend in factory employment was favourable in Quebec, Ontario, Manitoba and British Columbia, the gains in Ontario being most pronounced.

The unadjusted indexes of employment in manufacturing at September 1 in recent years, based on the 1926 average as 100, are as follows: 1939, 115·3; 1938, 113·8; 1937, 121·2; 1936, 105·9; 1935, 100·8; 1934, 94·3; 1933, 86·8; 1932, 83·1; 1931, 94·7; 1930, 108·2; 1929, 119·8; 1928, 115·9 and 1927, 106·8.

For September 1, 1938, 6,202 manufacturing establishments had reported 579,709 men and women on their staffs, compared with 560,553 in the preceding month.

Animal Products, Edible.—Curtailment was indicated in fish canneries and in dairies, while meat-packing plants were rather busier. The payrolls of the 322 co-operating factories included 31,081 employees, as compared with 31,490 in the preceding month. Employment at September 1, 1938, had also declined. The index number then was decidedly lower than at the date under review.

Leather and Products.—A further increase took place in the leather industries, chiefly in the footwear division; the general gain in the group was smaller than that noted at the beginning of September of last year, but employment then was not so active. Statements were received from 331 manufacturers having 24,108 men and women in their employ, as against 23,494 at August 1, 1939. Ontario firms reported the greatest advances.

Lumber and Products.—There were seasonal reductions in sawmills, and vehicle factories were also slacker; on the other hand, furniture, container and other wood-using works showed improvement. The result was a decrease of 677 persons in the staffs of the 949 lumber establishments furnishing data, whose payrolls aggregated 50,092. A similar decline had been indicated at September 1, 1938, when the index was some three points lower.

Musical Instruments.—A slight increase was reported in musical instrument plants, 36 of which employed 1,709 workers at the date

[1] For explanation of term "Relative Weight", see footnote to Table I.

under review, compared with 1,632 in the preceding month. No general change took place at the beginning of September, 1938, and the index of employment was then a point lower.

Plant Products, Edible.—Confectionary and chocolate, bread and bakery and fruit and vegetable preserving factories reported heightened activity, the additions to staffs in canneries being particularly pronounced. The general improvement was on a much smaller scale than at the same date last year, when the index stood at 157·5, compared with 143·7 at September 1, 1939. Data were compiled from 542 firms in the vegetable food division, whose payrolls rose from 38,544 at August 1, to 43,744 at the date under review. Ontario recorded the most marked advances.

Pulp and Paper Products.—Employment in this group showed a falling-off, gains in paper product manufacturing being more than offset by losses in pulp and paper mills and printing and publishing plants. A downward movement had also been noted at September 1 of last year, when the index at 107·1, was three points lower than at the date under review. The forces of the 709 co-operating establishments included 68,315 persons at the beginning of September, as compared with 68,598 in the preceding month.

Rubber Products.—The trend was favourable in rubber factories, 54 of which employed 14,023 workers, compared with 13,452 at August 1. The situation at September 1, 1938, had also shown a marked betterment as compared with the preceding month; although this was on a larger scale than that recorded at the date under review, employment was then at a lower level, the index standing at 102·9, as against 112·2 at September 1, 1939.

Textile Products.—Pronounced recovery of a seasonal nature occurred in textile factories, 1,169 of which had 104,300 employees, as against 100,802 at August 1. Most of the advance took place in Quebec. Garment and personal furnishing, headwear, silk and cotton mills were decidedly busier. The general increase reported at the same date of last year had, however, involved a much greater number of workers; nevertheless, the index then was fractionally lower.

Beverages.—Slight improvement was noted in these industries at September 1 as compared with August 1, 18 persons being added to the payrolls of the 147 co-operating factories, which employed 9,705 operatives. The level of employment was higher than at the beginning of September, 1938, although a greater gain had then been indicated in the group as a whole.

Tobacco.—Tobacco factories were busier; 46 of these employed 8,359 workers, compared with 8,079 in the preceding month. Additions to staffs on a smaller scale had been recorded at September 1, 1938, and the index was then slightly lower.

Chemical Products.—An upward movement was shown in this division according to statistics from 301 employers of 18,840 persons, compared with 18,509 at August 1. The general situation in the chemical industries was much the same as at the same date a year ago.

Clay, Glass and Stone Products.—These classes of building materials reported moderately lowered activity; statements were received from 223 plants, having 11,208 employees, as against 11,261 in the preceding month. A similar loss had been noted at the beginning of September last year, when the index was several points lower.

Electric Light and Power.—Further expansion was shown in electric current plants, 100 of which provided work for 18,066 persons, or 529 more than at August 1. Employment was brisker than at September 1, 1938, improvement on a smaller scale having then been indicated.

Electrical Apparatus.—Activity in this group increased to some extent at the beginning of September, 229 workers having been added since August 1 to the forces of the 124 co-operating establishments, which had 17,934 employees. The gain occurred mainly in Ontario. A larger advance had been noted at the corresponding date in 1938, and the index then was much higher.

Iron and Steel Products.—The agricultural implement and shipbuilding divisions of the iron and steel group recorded contractions in employment, while the automobile and other land vehicle, crude, rolled and forged, machinery, heating appliance, wire, tool and foundry and machine shop divisions were busier. On the whole, there was an increase of 2,637 in the forces of the 925 co-operating iron and steel manufacturers, who employed 123,185 men and women at the beginning of September. The greatest revival in activity was in Ontario. The trend at September 1, 1938, had also been upward, but the index number then was a point lower than at the date under review, when it stood at 94·1.

Non-Ferrous Metal Products.—The precious and the base metal product divisions reported heightened employment; 190 manufacturers of non-ferrous metal products provided work for 25,295 operatives, as against 24,695 at August 1. Improvement on the same scale had been indicated at the corresponding date last year, when the index in these industries was fractionally lower.

Non-metallic Mineral Products.—Employment in this group showed a decline, according to statements from 99 establishments with 12,783 persons on their payrolls, as against 12,931 at the beginning of August. The index was slightly lower than at September 1, 1938.

Logging

Logging operations were further curtailed in the beginning of September. Data were received from 364 firms, whose payrolls aggregated 17,726 workers, compared with 21,634 in the preceding month. The reduction, which was contra-seasonal, resulted partly from fire precautions in British Columbia. The number engaged in bush work at September I was decidedly larger than at the same date in 1938, although a smaller decrease from the preceding month had then been reported.

Mining

Coal.—Statistics were tabulated from 100 operators having 23,972 men on their payrolls, as compared with 22,787 at the beginning of August. Most of the improvement was in Alberta. Rather larger gains had been made at the same date a year ago, and the index number then was fractionally higher than at the date under review.

Metallic Ores.—Employment in metallic ore mines showed a small decrease, according to returns from 236 firms whose forces declined from 43,958 persons at August 1, to 43,807 at the beginning of September. An advance had been shown at September 1, 1938, but activity was then at a lower level.

Non-Metallic Minerals (other than coal).—A slight gain was reported in this group, in which 101 firms enlarged their staffs by 59 workers to 10,158 at September 1. A contraction had been noted at the corresponding date of last year, and employment was then decidedly slacker.

Communications

Little general change occurred in the communications division, in which the co-operating companies reported a personnel of 23,314, as compared with 23,361 in the preceding month. The index was somewhat lower than in the early autumn of 1938, a slight gain having then been recorded.

Transportation

Street and Electric Railways and Storage.—A marked advance was shown by 282 local transportation companies, whose staffs aggregated 30,036, or 644 more than in the preceding month. The increase took place chiefly in the Prairie Provinces. Employment had also gained at the beginning of September, 1938, but the index was then six points lower.

Steam Railways.—There was an improvement in employment in steam railway operation at September 1, according to the 100 organizations from which returns were received, and which had 61,937 employees, compared with 59,601 at August 1. Employment was more active than at the corresponding date last year, when a smaller advance had been indicated. The expansion reported at the beginning of September, 1939, took place mainly in the Prairie Provinces as the movement of grain commenced.

Shipping and Stevedoring.—A slightly upward trend was noted in the water transportation group, in which the index was several points lower than at the same date in 1938, although the tendency had then been downward. Statements were received from 124 employers of 17,123 workers, as against 17,086 at August 1, 1939.

Construction and Maintenance

Building.—Important expansion was shown in building construction, in which employment was brisker than in the late summer of 1938. Data were received from 877 contractors, whose payrolls stood at 34,261 at September 1, 1939, as compared with 32,448 at the beginning of August. The trend was generally favourable, but Ontario and the Western Provinces reported the greatest gains.

Highway.—There was a further increase in this group, 4,919 men being added to the forces of the 433 co-operating organizations, which had 118,691 workers. There were advances in all provinces except Ontario and Alberta. The number employed on road work was much greater than at September 1 of last year, the advance then indicated having been on a decidedly smaller scale.

Railway.—Improvement was recorded by the 34 employers furnishing data in this division, which provided work for 31,001 persons, as against 30,592 in the preceding month. A fair-sized gain was noted in Quebec, while elsewhere the changes were relatively slight. There had been a much larger advance at the corresponding date in 1938, but the index number was over a point lower.

Services

Further expansion was shown in the service group, in which the general level of employment was rather higher than that indicated last autumn. The 595 firms furnishing information for September 1, 1939, reported 33,474 assistants, or 427 more than at August 1. The gain took place in hotels and restaurants.

Trade

Employment in retail trade again declined, while wholesale houses further increased their working forces. A slight betterment was shown in trading establishments as compared with September of last year, when a rather larger loss in the group as a whole had been reported. Statistics for September 1, 1939, were received from 2,067 retailers and wholesalers employing 129,018 persons, compared with 129,623 at the beginning of August, 1939.

Tables

Index numbers of employment by economic areas, and industries are given in the accompanying tables, in which the columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

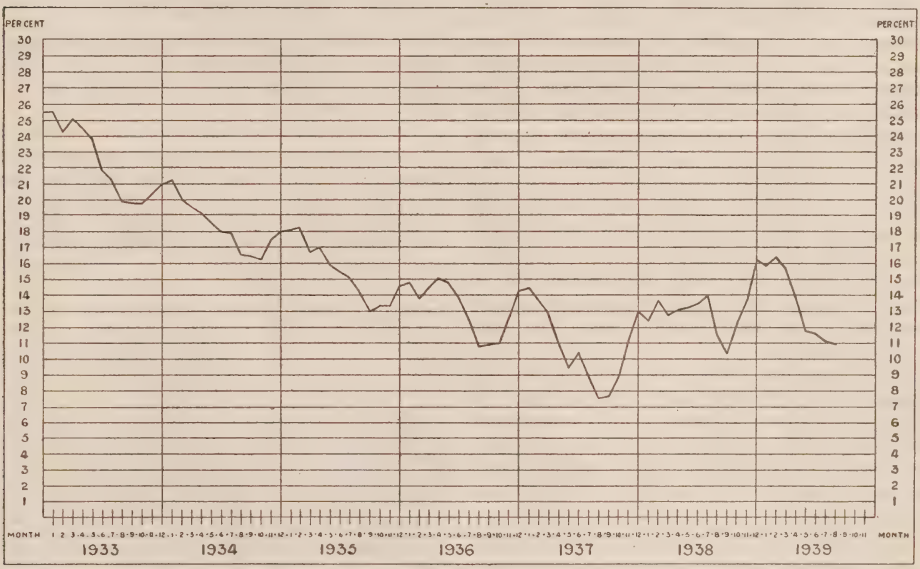
(2) Unemployment in Trade Unions at the Close of August, 1939

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle on account of illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The favourable movement of employment for local trade union members, which has characterized the situation unceasingly since the close of February, continued throughout August according to the reports received from 1,924 labour organizations, comprising a membership of 241,824 persons. Of these, 26,287 or 10·9 per cent were without work on the last day of the month compared with a percentage of 11·1 in July. Nominal advances in work afforded were also noted from August last year when 11·6 per cent of unemployed members was registered. Alberta unions showed improvement in conditions of nearly 4 per cent from July which was almost entirely confined to coal mining activities. The trend for Saskatchewan, Nova Scotia, New Brunswick, Ontario and Manitoba members was also toward heightened activity though the changes from July were very slight. In British Columbia the lumbering and manufacturing industries, particularly the woodworking division in the latter, and hotel and restaurant employees were chiefly responsible for the slight drop in activity registered from July, while in Quebec there was scarcely any variation from July conditions, increases and decreases in the various trades and industries being of a largely offsetting influence. When a comparison is made with the returns for August, 1938, the situation for Manitoba and New Brunswick members was moderately improved during the month surveyed, and increases in activity, on a small scale, were reflected by Nova Scotia, Quebec, Saskatchewan, Alberta and British Columbia locals. Ontario members alone, showed fractional curtailment in employment, the building trades, and metal trades of the manufacturing industries being determining factors in the adverse movement indicated from this province.

The returns on unemployment from the largest city in each province with the exception of Prince Edward Island are tabulated separately each month. The changes in the various cities used for comparison were not outstanding during August when contrasted with the July reports, Edmonton and Toronto unions showing advances of over 2 per cent in work afforded, Saint John and Winnipeg increases of slightly over one per cent, and Montreal and Regina but fractional improvement. In Halifax and Vancouver, however, the situation declined in each city by about 2 per cent. When comparing with the returns for August last year Edmonton unions showed substantial gains in activity during the period reviewed and conditions were moderately better for Winnipeg, Montreal, Vancouver and Regina members. In Toronto minor gains occurred. On the contrary, rather noteworthy recessions in employment were recorded by Halifax members and curtailment, of a lesser degree, was manifest by Saint John locals.

Appearing with this article is a chart which illustrates the trend of unemployment by months from January, 1933, to date. The course pursued by the curve which has been consistently downward since the end of February continued in the favourable movement throughout August. The level reached by the curve at the close of the month was also slightly below that of August, 1938, denoting a slightly better employment trend.



The manufacturing industries, as a whole, showed little change in the situation during August from the preceding month though tending toward an increased volume of employment. This was apparent from the reports compiled from 573 locals with a membership total of 95,146 persons, 11,306 or 11·9 per cent of whom were idle in comparison with an unemployment percentage of 12·5 in July. Improvement in somewhat greater measure was indicated from August last year when the percentage of inactivity stood at 14·0. Hat, cap and glove, and glass workers showed large percentage gains in employment from July which did not affect greatly the situation in the manufacturing industries, as their membership was rather small. The garment trades were considerably more active than in July and advances of lesser importance were registered by meat cutters and butchers, cigar and tobacco, and textile and carpet workers, general labourers, bakers and confectioners, and printing tradesmen. Of the recessions in the other trades which were of a largely counteracting nature the most marked were recorded by paper makers and wood and leather workers, while slight curtailment in activity was reflected by iron and steel, fur, jewellery and brewery workers and metal polishers. A much higher level of employment than in August last year was indicated by textile and carpet, garment and glass workers, the meat cutters

and butchers during the period under review and among bakers and confectioners pronounced gains were noted. The iron and steel trades also showed some increase in employment. Brewery workers reflected only a slightly more favourable trend. Marked increases in slackness, however, were reported by hat, cap and glove, leather and wood workers, and metal polishers, while noteworthy contractions in employment were evident among paper makers. The situation also declined slightly for fur and jewellery workers, general labourers and printing tradesmen.

The coal mining industry during August reflected somewhat heightened activity from the drop in employment. In addition to the members reported as entirely unemployed, a number were shown as working at reduced time.

Some slowing up in employment in the building and construction trades was evident during August from the preceding month though conditions were slightly improved from August last year. Reporting for August were 208 locals of building tradesmen with 26,418 members, 7,442 or 28·1 per cent of whom were idle in comparison with percentages of 24·7 in July and 30·3 in August, 1938. Bricklayers, masons and plasterers, carpenters and joiners, tile layers, lathers and roofers, and hod carriers and building labourers all showed noteworthy

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

preceding month, the percentage of unemployment standing at 11·7 in contrast with 14·9 per cent in July. The percentage for August was based on the reports forwarded from a total of 56 labour organizations including 20,924 members, 2,442 of whom were without work on the last day of the month. Losses in employment, on a small scale, however, were evident from August last year when 9·8 per cent of the members reported were idle. The Alberta coal fields afforded a considerably better volume of activity than in July and slight advances were recorded from the Nova Scotia and British Columbia areas. In New Brunswick, however, there was some falling off in available work. The situation in both the Eastern and Western coal districts was less favourable than in August last year, British Columbia unions showing the most important recessions from July, and curtailment in activity of considerably lesser degree was manifest by granite and stone cutters. Among plumbers and steamfitters the losses indicated were so slight as to be almost negligible. Steam shovelmen on the other hand were decidedly busier than in July but as their membership was small they had no marked influence on the situation in the building and construction trades as a whole. Employment advancement on a rather small scale, however, was registered by bridge and structural iron workers, electrical workers, and painters, decorators and paper hangers. When contrasted with the returns for August last year the improvement registered by carpenters and joiners during the month under review was a large factor in the better situation obtaining in the building trades, though substantial gains were manifest

by bridge and structural iron workers, and tile layers, lathers and roofers. Granite and stone cutters, and plumbers and steam fitters also contributed in lesser degree, to the group advancement. Hod carriers and building labourers, and painters, decorators and paper hangers, on the contrary, were much slacker than in August last year and the recessions indicated by steam shovelmen were rather noteworthy. A less favourable movement was also shown by brick-layers, masons and plasterers, and electrical workers.

Increases in employment, on a small scale, were reflected in the transportation industries during August from both the preceding month and August a year ago, the 823 local unions making returns with a membership aggregate of 65,308 persons showing that 3,116 or 4·8 per cent were without work as contrasted with 5·8 per cent of inactivity in July and 5·5 per cent in August, 1938. Steam railway employees, whose returns included over 79 per cent of the entire group membership reported, showed an improved situation in each comparison. Among navigation workers, and teamsters and chauffeurs there was a nominal drop in available work from July, while more pronounced contractions were apparent from August last year, navigation workers especially showing decidedly less favourable conditions. Street and electric railway employees indicated little variation in all three months used for comparative purposes.

Retail shop clerks were busily engaged during August compared with only 0·2 per cent of idleness in July and with a fully employed situation in August a year ago. For the month reviewed 6 associations of these workers furnished reports with a membership numbering 1,804 persons.

Returns were compiled at the close of August from 78 associations of civic employees embracing a membership of 9,378 persons, 106 or 1·1 per cent of whom were idle at the end of the month in comparison with 0·8 per cent of inactivity in July and 0·4 per cent in August, 1938.

In the miscellaneous group of trades with 141 locals reporting a total of 10,808 members during August, 878 or 8·1 per cent were idle on the last day of the month in contrast with an unemployment percentage of 6·3 in July. Unclassified workers showed a large falling off in activity from July and curtailment of considerable degree was indicated by hotel and restaurant employees. Theatre and stage employees, and stationary engineers and firemen, however, reported moderate employment advancement and slight gains were apparent among barbers. Less favourable conditions prevailed also in the miscellaneous group of trades from August last year when 6·8 per cent of idleness was reported. In this comparison unclassified workers, hotel and restaurant employees, and barbers all showed some lowering in the level of activity during the period surveyed. The tendency for stationary engineers and firemen, and theatre and stage employees, on the other hand, was toward heightened activity though the changes were quite small.

Fishermen with 6 unions showing a combined membership of 2,263 persons indicated 3·3 per cent of their members idle on the last day of August contrasted with 1·6 per cent in July and with 5·0 per cent in August last year.

Among lumber workers and loggers a considerable increase in slackness was manifest during August from July, according to the reports tabulated from 4 local unions with 2,389 members. Of these, 549 or 23·0 per cent were unemployed at the end of the month contrasted with a percentage of 14·6 in July. In August a year ago 23·3 per cent of inactivity was recorded.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1929 to 1938, inclusive,

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N S and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

and also the percentages of unemployment by provinces for August of each year from 1929 to 1936, inclusive, and for each month from August, 1937, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for August, 1939

During the month of August, 1939, reports from the offices of the Employment Service of Canada showed gains in the average daily placements of nearly 23 per cent and of more than one per cent, respectively, over those effected during the preceding month and those of the corresponding period a year ago. All industrial groups, except logging, where a moderate loss took place, recorded increases over July, very marked gains being reported in farming and construction and maintenance and more moderate ones shown in services and throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications followed a sharp upward trend during the first half of the month, but traced a downward course during the latter half of the period under review. At the close of August, however, the levels shown were slightly above those registered at the end of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 67·6 during the first half and 63·8 during the

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

transportation, increased placements in the remaining groups, trade, manufacturing and mining, being nominal only. In comparison with August, 1938, fair expansion was registered in logging, services and manufacturing, while small gains in mining and transportation were largely offset by declines in trade and construction and maintenance. Farming also registered a decline which was quite substantial.

The accompanying chart shows the trend of employment since January, 1937, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service second half of August, 1939, in contrast with the ratios of 65·9 and 62·6 during the corresponding periods of 1938. The ratios of placements to each 100 applications during the periods under review were 64·5 and 60·7 as compared with 62·9 and 59·4 during the corresponding month of 1938.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during August, 1939, was 1,650, as compared with 1,327 during the preceding month and with 1,631 in August a year ago.

The average number of applications for employment received daily by the offices of the Service during the month under review was 2,515 in comparison with 2,311 in July, 1939, and with 2,541 during August last year.

The average number of placements made daily by the offices of the Service during August, 1939, was 1,573, of which 1,174 were in regular employment and 399 in work of one week's duration or less, as compared with a total daily average of 1,281 during the preceding month. Placements in August a year ago averaged 1,552 daily, consisting of 1,081 in regular and 471 in casual employment.

During the month of August, 1939, the offices of the Service referred 43,617 persons to vacancies and effected a total of 42,470 placements. Of these, the placements in regular employment were 31,693, of which 26,343 were of men and 5,350 of women, while placements in casual work totalled 10,777. The number of vacancies reported by employers was 33,210 for men and 11,339 for women, a total of 44,549, while applications for work numbered 67,901, of which 51,644 were from men and 16,257 from women. Reports for July, 1939, showed 33,151 positions available, 57,754 applications made and 32,002 placements effected, while in August, 1938, there were recorded 44,028 vacancies, 68,590 applications for work and 41,891 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1929, to date:—

Year	Placements		
	Regular	Casual	Totals
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1032	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939 (8 months)	157,967	98,549	256,516

Nova Scotia

During the month of August, 1939, positions offered through Employment Offices in Nova Scotia were nearly 6 per cent higher than in the previous month, but over 12 per cent below the corresponding month of last year. There was an increase of nearly 5 per cent in placements when compared with July, but a decline of over 13 per cent in comparison with August, 1938. The decrease in placements from August of last year was mainly due to a decline in construction and maintenance, although small reductions were also reported in nearly all other groups. There was a small increase in mining. Industrial divisions in which most of the placements were effected during the month were: logging, 57; farming, 35; construction and maintenance, 557, and services, 516, of which 423 were of household workers. During the month 481 men and 132 women were placed in regular employment.

New Brunswick

There was an increase of nearly 19 per cent in the numbers of positions offered through Employment Offices in New Brunswick during August when compared with the preceding month and of over 16 per cent in comparison with the corresponding month of last year. Placements were over 20 per cent higher than in July and nearly 17 per cent above those of August, 1938. The increase in placements over August of last year was due to a substantial gain in construction and maintenance. There was a small increase in services, a moderate decline in logging and small changes only in all other groups. Placements under construction and maintenance numbered 615 and in services 632. Of the latter, 493 were of household workers. Placements in regular employment numbered 220 of men and 156 of women.

Quebec

The demand for workers, as indicated by orders received at Employment Offices in the Province of Quebec during August, was nearly 18 per cent better than in the preceding month, but nearly 4 per cent below the corresponding month of last year. Placements were 11 per cent higher than in July, but nearly 3 per cent below August, 1938. Placements under construction and maintenance were considerably less than during August of last year and accounted for the decline under this comparison for the province as a whole. There was a decrease also in transportation. These losses were largely offset by a substantial increase in services, a moderate improvement in logging and smaller gains in manufacturing and farming. Placements by industrial divisions included: manufacturing, 144, logging, 433, farming 146, construction and maintenance, 2,928 and services, 3,080, of which 2,737 were of household workers. There were 3,724 men and 1,742 women placed in regular employment.

Ontario

During August, orders received at Employment Offices in Ontario called for nearly 4 per cent more workers than in the preceding month and over 2 per cent more than during the corresponding month of last year. There was an increase also in placements of over 3 per cent when compared with both July, 1939

* 30 placements effected by offices since closed.

and August, 1938. With the exception of a large decrease in farming and a small loss in trade, all industrial divisions showed gains in placements over August of last year. The most important increases were in construction and maintenance, logging and manufacturing. Placements by industrial divisions included: manufacturing, 879; logging, 420; farming, 2,177; mining, 149; transportation, 159; construction and maintenance, 4,868; trade, 244, and services, 3,631, of which 2,364 were of household workers. During the month 6,075 men and 1,549 women were placed in regular employment.

Manitoba

Orders received at Employment Offices in Manitoba during August called for nearly 7·8 per cent more workers than in the preceding month, but nearly 4 per cent less than during the corresponding month of last year. There was an increase of nearly 76 per cent more placements when compared with July, but a decline of nearly 4 per cent in comparison with August, 1938. When comparing placements by industrial divisions with August of last year, there was a large decline in farming and a moderate loss in logging. These decreases were largely offset by gains in all other groups, the most important of which was in construction and maintenance. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 95; logging, 105; farming, 3,394; construction and maintenance, 3.043, and services, 826, of which 684 were of household workers. There were 6.555 men and 446 women placed in regular employment.

Saskatchewan

Opportunity for employment, as indicated by orders received at Employment Offices in Saskatchewan were over 200 per cent better than in the preceding month and nearly 32 per cent above the corresponding month of last year. There was an increase also in placements of over 205 per cent when compared with July and of over 30 per cent in comparison with August, 1938. The large increase in placements over August of last year was due to substantial gains in construction and maintenance and farming. There was a small decrease in services and minor changes only in all other groups. Placements by industrial divisions included: farming, 4,417; construction and maintenance, 1,107, and services, 792, of which 535 were of household workers. Placements in regular employment numbered 5,302 of men and 552 of women.

Alberta

There was an increase of over 55 per cent in the number of positions offered through Employment Offices in Alberta when compared with the preceding month and of nearly 10 per cent in comparison with the corresponding month of last year. Placements were over 54 per cent higher than in July and over 9 per cent above those of August, 1938. Placements in logging and farming were higher than during August last year, but there were declines in construction and maintenance and services. The changes in all other groups were small. Industrial divisions in which most of the placements were effected were: manufacturing, 80; logging, 346; farming, 1,786; construction and maintenance, 149, and services, 595, of which 488 were of household workers. During the month, 2,195 men and 439 women were placed in regular employment.

British Columbia

Employment opportunities, as indicated by orders received at Employment Offices in British Columbia during August, were over 16 per cent better than in the preceding month, but nearly 23 per cent below the corresponding month of last year. There was an increase of nearly 16 per cent in placements when compared with July, but a decline of nearly 24 per cent when compared with August, 1938. A substantial decrease under construction and maintenance accounted for the loss in placements from August of last year. There was a fairly large increase in logging and smaller gains in services, farming and transportation. Placements by industrial divisions included: manufacturing, 71; logging, 283; farming, 207; construction and maintenance, 2,114, and services, 758, of which 524 were of household workers. Placements in regular employment numbered 1,791 of men and 334 of women.

Movement of Labour

During the month of August, 1939, the offices of the Employment Service of Canada made 31,693 placements in regular employment, 20,026 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter 392 were granted the Employment Service reduced transportation rate, 364 going to centres within the same province as the despatching office and 28 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

In Quebec during August the Hull office assisted in the despatch of one bushman to Pembroke. At Ontario centres 321 persons secured certificates for transportation within the province. Travelling from Fort William

181 bushworkers, one carpenter and one painter's helper were bound for various situations within the Fort William zone, while from Port Arthur 63 bushworkers, 5 construction employees, 4 mine workers and one hotel employee and from Sudbury 61 bushworkers were carried to employment within their respective zones. To the Sudbury zone also, one cook and 2 cookees were transported from Pembroke. The one remaining transfer was of a cook going from Timmins to North Bay. The Winnipeg office effected all transfers at the reduced rate in Manitoba during August, which numbered 37. Of these, 11 were provincial and 26 interprovincial. Within the province the movement was to centres in the Winnipeg zone and included the transfer of 9 sawmill workers and 2 farm hands. Proceeding outside the province 15 mine workers, 5 farm hands, 4 bushworkers and one electrician were destined to the Port Arthur zone and one construction worker to Regina. The Labour movement in Alberta during August originated at Edmonton and comprised the transfer of 23 persons. Of these, 22 went to provincial situations and one outside the province. The latter was a farm hand bound for employment in the Saskatoon zone. Provincially one engineer was transported to Lethbridge and 8 mine workers, 4 oil refinery workers, 4 cooks, 3 transportation employees, one baker and one cookee to centres in the Edmonton zone. Vouchers for transportation were issued in British Columbia during August to 10 persons all bound for provincial points. From Vancouver 2 cannery workers and one pipefitter went to Kamloops, 2 miners and one waitress to Penticton and 3 hotel workers to employment in the Vancouver zone. The New Westminster office shipped one packer to Penticton.

Of the 392 workers who travelled at the Employment Service reduced transportation rate during August 143 were conveyed by the Canadian National Railways, 246 by the Canadian Pacific Railway, 2 by the Pacific Great Eastern Railway and one by the Temiskaming and Northern Ontario Railway.

In order to facilitate the movement of harvest labour within the Prairie Provinces there was in addition to the 2·5 cent rate referred to in the above a special harvest rate afforded by the railway companies becoming effective on August 1 of this year and terminating October 15. Under this arrangement the railway companies granted a special rate of 1·5 cents per mile to all applicants upon presentation of a certificate supplied by the offices of the Employment Service in Manitoba and Alberta, the movement of labour being confined entirely to regions within their respective provinces. Transferred under this plan during August were 105 harvest workers in Manitoba and 255 in Alberta, a total of 360, of whom 188 travelled over the Canadian National Railways and 172 over the Canadian Pacific Railway.

(4) Building Permits Issued in Canada During August, 1939

The value of the building permits issued by 58 cities during August, 1939, was slightly less than in the preceding month, but was rather greater than in August of last year; during the month under review, these municipalities authorized building estimated to cost $6,159,468, as compared with $6,535,813 in July, 1939, and $5,829,984 in August, 1938. There was, therefore, a decrease of 5·8 per cent in the first comparison, but an increase of 5·7 per cent in the second and more significant comparison. The August, 1939, figure was the highest for that month in any year since 1931.

The value of the building represented by the permits taken out in the first eight months of the present year was $39,807,093; this total showed a gain over that of $37,897,396 reported in the period, January-August, 1938, while the cumulative total in the present year was also higher than in the first eight months of any other year since 1931. However, the estimated cost of the construction work undertaken in each of these years has been very much lower than in earlier years of the record, being also below the nineteen-year average of $77,933,300 for the period, January-August. The wholesale prices of building materials have recently been lower than in the same months of either 1937 or 1938; while they have been rather higher than in January-August in any of the six years immediately preceding, they continue below the average in the years since 1919.

Some 50 cities furnished detailed statistics showing that they had issued over 700 permits for dwellings estimated to cost about $2,250,000, and more than 2,200 permits for other buildings valued at approximately $3,275,000. During July, authority was granted for the erection of some 700 dwellings and 2,400 other buildings, estimated at about $2,250,000 and $3,395,000, respectively.

As compared with July, 1939, Ontario, Manitoba and Alberta reported gains, that of $318,183 or 113·8 per cent in Alberta being most pronounced. Of the reductions elsewhere indicated, those of $531,245, or 26·9 per cent, in Quebec, and $211,520, or 71·6 per cent, in Saskatchewan were most pronounced.

Prince Edward Island, Quebec, Manitoba, Saskatchewan and Alberta reported higher aggregates of building authorizations than in August of last year; the greatest increase was in Alberta, where there was a gain of $324,304

or 118·6 per cent. The remaining provinces showed losses in this comparison; that of $144,319 in Ontario was the largest actual decrease while the decline of $45,929 or 50·5 per cent, in New Brunswick was proportionately the greatest.

Of the four largest cities, Toronto and Winnipeg showed an increase as compared with July, 1939, and also over August, 1938, while Montreal and Vancouver reported reductions in both comparisons. Of the other centres, New Glasgow, Fredericton, Quebec, Shawinigan Falls, Sherbrooke, Three Rivers, Belleville, Fort William, Kingston, Kitchener, Peterborough, Sarnia, York Townships, Welland, Edmonton, Lethbridge, Medicine Hat, Prince Rupert and North Vancouver recorded gains in both comparisons.

Table I gives the value of the building authorized by 58 cities during August, and in the first eight months of each year since 1926, as well as index numbers for the latter, based on the January-August total in 1926 as 100. The average index numbers of wholesale prices of building materials in the first eight months of the years since 1926 are also given, (average 1926=100).

The aggregate for the first eight months of this year was higher by five per cent than in 1938, and also exceeded that for the same period in any of the preceding six years.

Table I

Year	Value of permits issued in August	Value of permits issued in first eight months	Indexes of value of permits issued in first eight months (1926=100)	Average indexes of wholesale prices of building materials in months (1926=100)
	$	$		
1939....	6,159,468	39,807,093	36·4	88·1
1938....	5,829,984	37,897,396	34·7	90·2
1937....	4,262,966	37,849,203	34·7	95·4
1936....	3,673,455	27,026,141	24·7	84·6

1934....	3,764,425	17,433,272	16·0	82·8
1933....	1,910,809	14,407,111	13·2	77·0
1932....	3,823,251	32,576,464	29·8	77·7
1931....	8,201,879	78,194,996	71·6	83·0
1930....	14,028,564	115,268,330	105·5	93·4
1929....	21,582,221	168,894,072	154·6	99·2
1928....	17,448,542	145,247,485	133·0	96·4
1927....	29,478,378	126,690,292	116·0	96·2
1926....	11,672,599	109,211,942	100·0	100·7

While the index of wholesale prices of building materials was lower than in 1938 or 1937, it was higher than in any of the years, 1931-1936; it was, however, lower than in earlier years since 1919.

Table II gives the value of building permits issued by 58 cities during August, 1939, and August, 1938. The 35 cities for which records are available since 1920 are marked thus "*".

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF SEPTEMBER, 1939

Reports of the Superintendents of the Employment Service of Canada

THE employment situation at the end of September was reported by the Superintendents of the Employment Service to be as follows:—

Farmers in the Maritimes were busy completing the harvesting of their crops, as well as starting fall ploughing. Produce at the markets was very plentiful and of fine variety and quality. With recent rains and light frosts, apples were growing and colouring nicely, and the decision of the Government to assist with the apple situation, both financially and with the marketing, details of which were not yet complete, had proved very encouraging to orchardists. Fishing was fair. Little activity was taking place in lumber camps, although prospects were good for a large cut during the coming winter. Sawmills were busy, as heavy shipments of long lumber were being made to overseas markets and stocks on hand were being rapidly depleted. Coal mines in the New Glasgow area operated from four to six days per week, while those in Cape Breton and vicinity worked from four and a half to six days. Nearly all manufacturing concerns were operating with a full complement of workers, evaporators and canning factories and sugar refineries being particularly active; the iron and steel industry likewise reported no idleness. All building construction was progressing regularly and highway work continued. Transportation by rail was increasing in volume, but by water was uncertain. Freight traffic also was heavy. The usual requests were received for household workers in the Women's Division and placements were made.

Farming in Quebec recorded little change, the demand for help in that line remaining steady. Many thousands of bushmen were at work throughout the province and more were expected to be needed shortly. Manufacturing concerns in nearly all centres reported greatly increased business, this being particularly noticeable in the paper, iron, steel, and textile industries. In Montreal, aviation showed noted activity as the result of important contracts. Many building projects also were under way and numerous skilled workers found employment. At Montreal, too, alterations were being effected in large manufacturing plants, which were being reorganized to meet the demand for war munitions. Provincial highway construction progressed, giving work to several hundred men. Transportation was active and services normal, but trade was rather slow.

The demand for farm help in Ontario was well maintained, as additional hands were needed for fruit picking, silo filling, gathering of root crops, grape cutting, and fall ploughing. Farm applicants, however, had declined owing to enlistments in the Army. The call for bushmen was gradually increasing, for operators were starting their winter logging operations, although the number of men so far involved was not large. Sawmills, however, had just about completed the season's cut. Mining was quiet, except at Timmins, but there, too, the demand had dropped off slightly, due to the closing down of surface operations, which is customary at this time of year. Manufacturing concerns were very busy, some working longer hours than usual in an effort to have stock on hand in case their plants were needed for other purposes; others were experiencing additional activity resulting from Government contracts. Conditions also were greatly improved in the iron and steel group, in the pulp and paper industries, and in rubber and textiles. Building construction was brisk, although the majority of activity consisted of finishing contracts already started. At various military posts, however, many men were employed erecting huts and remodelling other buildings for Government purposes; numerous other applicants had been placed on protective duty with various firms. Highway maintenance continued, though on a reduced scale in some localities, as stretches of road were completed. Transportation was active, a number of former railway hands having been called back for service. Trade was better. Orders for domestic help in the Women's Division were being filled with difficulty, many girls and women, who were registered with the offices, desiring factory or office work only. Day work remained steady.

With threshing drawing to a close, calls for farm help in the Prairie Provinces were fewer, although harvesting of the beet crop, which had been held up on account of rain, was getting under way again. However, a number of unfilled vacancies on a monthly basis were on hand. Logging showed improvement, but with little demand, as yet, for bushmen. Unseasonably mild weather had been the cause of some slackness in the coal mines during September, but orders now were increasing in volume as dealers began getting in their supplies, thus increasing the opportunities of employment for miners. Manu-

facturing was fair. Building construction was brisk, a number of artisans obtaining work in preparation of winter quarters for enlisted troops, as well as on direct labour projects. Calgary reported that recruiting had reduced somewhat the number of experienced men in the oil fields particularly drillers. There were, however, a limited number of men who could be promoted. Highway construction also continued. Running trades of both railways were busy hauling the crop, and the usual increase in retail business during the harvest season was augmented by public buying for reserve stocks, due to the possibility of increased prices. Difficulty was found in getting girls to fill positions as farm domestics, but work in city homes was available and more readily taken, although for these, fully qualified domestics were extremely scarce.

A steady demand for general farm hands was maintained in British Columbia. Apple and hop picking was completed, but packing houses and canneries were busy, the Federal Government's agreement to purchase part of the fruit harvest proving of great assistance in taking care of the surplus crop. Movement of labour back to the larger logging camps proceeded, but the number of bushmen involved was not large. Production in some of the sawmills was partly curtailed until regular shipping facilities were more assured, confidence nevertheless was being restored, as it was felt that the export of lumber would be re-established. Coal mines at Nanaimo were active and the larger gold mines were running as usual. Earnings of salmon trollers and gill netters had been poor, owing to the scarcity of the fish and the large number of fishermen involved; however a number of men and boats had been engaged on naval patrol. All building construction started was being speeded up, but new projects were somewhat cut down in certain districts on account of the war, nevertheless at Victoria, a substantial amount of work was under way. Some applicants seeking employment had been placed on guard duty at bridges, tunnels, etc., while others had enlisted. Drydocks and shipyards at Prince Rupert were quiet, but at Victoria very active, opportunities being especially good for iron and steel workers. On the various waterfronts extra hands had been engaged for short periods. Trade was about normal. Requests for domestic help were steady and all experienced applicants were easily placed.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, September, 1939, summarized the employment situation as follows:—

Employment at August 14 showed little change as compared with July 10. There was an improvement in employment in coalmining, engineering, shipbuilding and repairing, building and public works contracting, the cotton and linen industries, shipping service, the distributive trades and hotel, boarding-house, etc., service. On the other hand employment declined in the pottery industry and in boot and shoe manufacture, mainly because of local holidays, and in tailoring and dressmaking.

It is provisionally estimated that at August 14, 1939, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,900,000. This was 12,000 less than at July 10, 1939, but 610,000 more than at August 15, 1938. The figure of 12,900,000 for August 14, 1939, excludes militiamen and reservists, numbering approximately 50,000, who were in training at that date.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at August 14, 1939, was 8·6 compared with 8·8 at July 10, 1939, and 12·2 at August 15, 1938. For persons insured under the general scheme the corresponding percentages were 8·8 at August 14, 1939, 9·1 at July 10, 1939, and 12·6 at August 15, 1938. For persons within the agricultural scheme the percentages were 3·8, 3·9 and 4·2 respectively.

At August 14, 1939, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 968,108 wholly unemployed, 211,978 temporarily stopped, and 51,606 normally in casual employment, making a total of 1,231,692. This was 24,732 less than at July 10, 1939, and 527,550 less than at August 15, 1938.

The total of 1,231,692 persons on the registers in Great Britain, at August 14, 1939, included 615,359 persons with claims admitted for insurance benefit, 438,695 with applications authorized for unemployment allowances, 30,294 persons with applications for insurance benefit or unemployment allowances under consideration, and 147,344 other persons, of whom 44,370 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of

86789—6½

Employment Exchanges at August 14, 1939, was 1,294,805, as compared with 1,326,134 at July 10, 1939, and 1,843,272 at August 15, 1938.

United States

A special survey conducted by the United States Bureau of Labor Statistics showed that the expansion in industrial activity taking place during the past month resulted in American factories hiring more than 300,000 additional workers between mid-August and mid-September. According to a press release issued by Miss Frances Perkins, Secretary of Labor, "only about one-third of this increase is attributable to the seasonal rise that usually takes place at this time of the year."

The following paragraphs taken from the official press release indicate the employment situation in the United States to be as follows:—

Large numbers of workers were hired by cotton goods factories, steel, aircraft and shipbuilding, and meat packing firms, as well as by automobile plants, where work on new models expanded rapidly. There was a large seasonal increase from August to September in employment in canning factories. Special preliminary reports also indicate that in some manufacturing industries, such as woollens and worsteds, some seasonal declines in employment were reported.

Reports from trade sources also indicate employment increases in mines and in retail stores in September.

Between mid-July and mid-August gains in employment in manufacturing were widespread. Sixty-nine of the 90 manufacturing industries regularly surveyed by the Bureau of Labor Statistics reported gains in employment. Pay rolls in factories gained even more rapidly than employment, the increase of 6·5 per cent, or $10,500,000 weekly, being approximately double the customary August increase.

In August, as in September, coal mines employed additional workers. Bituminous coal mines took on 10,000 men and anthracite mines increased their forces by approximately 6,000, an exceptional development at this time of year. Coal-mining pay rolls rose more sharply than employment, reflecting increased production schedules.

Wholesale firms enlarged their staffs in August by 1 per cent, or 14,000 workers, while retail stores reported a decline of 1·5 per cent, affecting 49,000 employees. Employment in the service industries for the most part showed seasonal changes.

For non-agricultural employment as a whole, there were approximately 250,000 more persons at work in August than in July, and approximately 1,110,000 more than in August 1938. These figures do not include employees on Works Progress Administration and National Youth Administration projects, nor enrollees in the Civilian Conservation Corps.

Factory Employment.—There were greater-than-seasonal gains in August of 3·1 per cent, or nearly 230,000 wage earners and 6·5 per cent, or $10,500,000, in weekly factory pay rolls. The expected changes in August are increases of 2·5 per cent for employment and 3·1 per cent for pay rolls. Of the 90 manufacturing industries surveyed, 69 showed employment increases and 74 showed pay-roll gains. The employment level was higher than in any month since December 1937 and pay rolls were higher than in any month since November 1937. Comparisons with the indexes of August 1938 showed increases of 8·6 per cent in employment and 16·3 per cent in pay rolls.

The durable-goods group of industries as a whole employed 1·6 per cent more wage earners in August than in the preceding month and 16·3 per cent more than in the same month last year. For the nondurable-goods industries employment rose 4·2 per cent during the month and 3·4 per cent as compared with a year ago. Pay rolls in the durable-goods group were 7·5 per cent above the July level and 29·5 per cent above August of last year, while in the nondurable-goods industries the increases were 5·8 per cent and 6·4 per cent, respectively.

Gains of about seasonal proportions were shown in the following industries: women's clothing (19·7 per cent, or 36,100 workers), furniture (3·9 per cent, or 5,700 workers), sawmills (1·7 per cent, or 4,700 workers), hosiery (2·5 per cent, or 3,700 workers), and silk and rayon goods (4·5 per cent, or 3,400 workers). A less-than-seasonal gain of 3·6 per cent, or 6,900 workers was reported by men's clothing factories, and shoe plants also reported a less-than-seasonal gain of 1·2 per cent, or 2,300 workers. The 5·8 per cent increase in aircraft factories continued the unbroken series of monthly gains which began in October of last year and lifted the employment level in the industry to nearly three times the 1929 level.

Non-manufacturing Employment. — Retail trade employment decreased seasonally by 1·5 per cent between mid-July and mid-August. The August employment index, 82·4 per cent of the 1929 average, was 3 per cent above that for the same month in 1938. In general, the employment changes in the various lines of retail trade followed closely the seasonal movements shown by the August averages of the last ten years. Gains in employment were reported by dealers in furniture and lumber and building materials.

Employment in wholesale trade establishments increased seasonally by 1·0 per cent, slightly more than the ten-year average gain for August. Agents and brokers and other wholesalers of farm products reported marked seasonal expansion, and dealers in jewelry and in paper products also increased the number of their employees seasonally.

An unusual employment gain of 8·9 per cent in anthracite mines and a pay roll increase of 32·8 per cent reflected increased production in the first half of August. These increases are the first shown in this industry in August in the last 6 years. As compared with last year the employment and pay-roll percentage increases were 29 per cent and 67 per cent, respectively. In bituminous-coal mining the seasonal pick-up of 2·8 per cent in employment, which was virtually the same percentage increase as the average gain for August in the preceding ten-year period, was accompanied by an unusually large rise of 18·3 per cent in weekly pay rolls.

Employment in Private Construction.—Employment in private building construction increased 1·0 per cent from July to August, according to reports from 12,178 contractors employing 125,211 workers. Corresponding pay rolls increased 1·4 per cent.

Employment in Public Works.—There was a decrease of 366,000 in the number of people employed on relief projects operated by the Work Projects Administration in August because of the release by August 31, 1939, as required by law, of workers whose period of 18 months of continuous employment expired before September 1, 1939. The 1,778,000 persons employed on work relief projects in August represents a reduction of 1,286,000 since August of last year. Pay rolls of $102,000,000 were $17,637,000 less than in July and $61,360,000 less than in August a year ago. A decrease was reported on Federal projects under the Work Projects Administration and an increase on work projects of the National Youth Administration. Student Aid projects were inactive in August.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the Labour Gazette for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages Scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

The working hours of persons while so employed shall not exceed eight hours per day

or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair of demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreement with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour show-

ing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

National Harbours Board

Construction of repairs and additions to the Columbia Elevator at Vancouver, B.C. Name of contractors, Carter-Halls-Aldinger Co., Ltd., Vancouver, B.C. Date of contract, September 18, 1939. Amount of contract, $131,000. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Blacksmith	$0 75
Blacksmith's helpers	0 50
Boatmen (rowboats)	0 45
Carpenter and joiner	0 90
Cement mixer operator:	
Gasoline or electric	0 60
Steam	0 90
Cement and concrete finisher	0 90
Compressor operator (gasoline or electric)	0 60
	Per day
Diver (full day's pay to be allowed whether employed full or part time)	$20 00
Diver's tender (full day's pay to be allowed whether employed full or part time)	7 00
	Per hour
Driver, horse and cart	0 60
Driver, team and wagon	1 00
Drivers	0 45
Drill runner	0 55
Electrician (inside wiremen)	1 00
Engineers, operating, steam	0 90
Engineers, crane (steam, gasoline or electric	0 90
Engineer on steel erection	1 12½
Fireman, stationary	0 50
Hoist operator, tower (gasoline or electric)	0 60
Brick and hollow tile layer	1 10
Brick and hollow tile layers' helper (mixing and tempering mortar)	0 50
Jack hammer operator	0 55
Labourers	0 45
Millwright	0 90
Motor truck driver	0 50
Motor truck driver and truck	1 50
Pipefitter (surface, temporary work)	0 65
Plumbers and steamfitters	1 00
Plumbers and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Piledriver boommen	1 00
Piledriver and derrick foreman	1 25
Piledriver and derrick engineer	1 12½
Piledriver and derrick man	1 00
Piledriver bridgeman	1 00
Piledriver and derrick fireman	0 68¾
Painter and glazier	0 80
Plasterer	1 00
Plasterer's helper (tempering and mixing material)	0 62½
Rigger (general)	0 65
Roofer, felt and gravel	0 50
Tractor operator	0 75
Sheet metal worker	1 00
Structural steel workers	1 12½
Shovel operator—gasoline	1 12½
Welder and Burner, on steel erection	1 12½
Welder and Burner, acetylene or electric	0 75
Wharf and dock builders	1 00
Watchman	0 45
	Per month
Class A—Tugs of Class 4 upward:	
Captain	$200 00
Engineer	190 00
Class B—Tugs of Class No. 5 and No. 6:	
Captain	190 00
Engineer	180 00
Class C—Tugs of Class No. 7 and under:	
Captain	180 00
Engineer	170 00
	Per hour
Tug fireman	0 56½
Tug deckhand	0 54
Scowman	0 54

Reconditioning concrete piling at Pier 2, Deep Water Terminals, Halifax, N.S. Name of contractors, Gunite & Waterproofing Ltd., Montreal, P.Q. Date of contract, September 9, 1939. Amount of contract, approximately $10,000.

	Per hour
Air chipper operators	$0 50
Carpenters	0 70
Cement gun operators	0 50
Cement gun nozzlemen	0 85
Drill runners	0 50
Pipe fitters—surface, temporary work	0 55
Timbermen and cribmen (measuring, scribing and, by the use of the axe, adze, etc., cutting and fitting timber)	0 50
Plumbers and steamfitters	0 85
Watchmen	0 35
Blacksmiths	0 70
Blacksmiths' helpers	0 45
Compressor operators—gasoline or electric	0 50
Cement finishers	0 60
Labourers	0 40
Riggers (general)	0 50

Department of National Defence

Construction of a road diversion at the R. C. A. F. Aerodrome, Yarmouth, N.S. Name of contractors, Acadia Construction Co., Ltd., Halifax, N.S. Date of contract, September 5, 1939. Amount of contract, $23,972. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	0 40
Blacksmiths	0 55
Blacksmiths' helpers	0 40
Dragline operators (steam or gasoline)	0 85
Dragline firemen	0 55

	Per hour
Dragline oilers	0 50
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drivers	0 35
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Road grader operators:	
Horse-drawn	0 40
Including team	0 60
Gasoline	0 45
Roller operators (steam or gasoline)	0 60
Steam shovel engineer	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Tractor operators (gasoline)	0 45
Team and scraper	0 60
Team and plough	0 60
Watchman	0 30

Construction of alterations and additions to 1206 First Street East, Calgary, Alta., for the accommodation of auxiliary Air Force. Name of contractors, F. W. McDougall Construction Co., Calgary, Alta. Date of contract, September 1, 1939. Amount of contract, $31,300. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 50
Brick and hollow tile layers	1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 80
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 55
Compressor operators (gasoline or electric)	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 90
Engineers, operating, steam:	
Single drums	0 65
Double drums	0 80
Engineers on steel erection	0 85
Firemen, stationary	0 50
Hoist operators (gasoline or electric)	0 55
Insulation workers (cork, asbestos)	0 85
Labourers	0 45
Lathers, wood	0 75
Machinists	0 70
Motor truck drivers	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
4 tons	2 50
5 tons	3 00
Painters and glaziers	0 80
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 60
Plumbers and steamfitters	0 95
Plumbers and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Rodmen—reinforced steel	0 55
Roofers, felt and gravel: patent	0 50
Sheet metal workers	0 80
Stonecutters	1 00
Stonemasons	1 10
Stonemasons' helpers (mixing and tempering mortar)	0 50
Structural steel workers	0 85
Terrazzo layers	0 75
Terrazzo finishers and helpers	0 60
Watchmen	0 40
Welders and burners on steel erection	0 85

Construction of a 25 yard machine gun range at the Royal Canadian Air Force Station, Vancouver, B.C. Name of contractors, Smith Bros. & Wilson, Ltd., Vancouver, B.C. Date of contract, September 11, 1939. Amount of contract, $15,219. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 90
Cement finishers	0 90
Cement and concrete mixer operators:	
Steam	0 90
Gasoline or electric	0 60
Compressor operators (gasoline or electric)	0 60
Drivers	0 45
Driver, team and wagon	1 00
Electricians (inside wiremen)	1 00
Engineers, operating, steam (single or double drums)	0 90
Engineers on steel erection	1 12½
Engineers, crane (steam, gasoline or electric)	0 90
Firemen, stationary	0 50
Hoist operators—tower (gasoline or electric)	0 60
Labourers	0 45
Machinists	0 75
Machinists' helpers	0 50
Motor truck driver	0 50
Motor truck driver and truck	1 50
Ornamental iron workers	1 12½
Painters and glaziers	0 80
Plasterers	1 00
Plasterers' helpers (mixing and tempering material)	0 62½
Plumbers and steamfitters	1 00
Plumbers and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Roofers, felt and gravel: patent	0 50
Rodmen, reinforced steel	0 75
Sheet metal workers	1 00
Shovel operators (gasoline)	1 12½
Steam shovel engineers	1 12½
Steam shovel cranemen	0 90
Steam shovel firemen	0 74½
Steam shovel oilers	0 60
Structural steel workers	1 12½
Welders and burners on steel erection	1 12½
Watchmen	0 45

Supply and installation of Central Heating Plant equipment at the Dominion Arsenal at Valcartier, P.Q. Name of contractors, Goulet Limited, Quebec, P.Q. Date of contract, September 14, 1939. Amount of contract, $68,900. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 60
Blacksmiths	0 60

	Per hour
Blacksmiths' helpers	0 45
Brick and hollow tile layers	0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 60
Cement and concrete mixer operator:	
Steam	0 60
Gasoline or electric	0 55
Cement finisher	0 55
Compressor operator (gasoline or electric)	0 55
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 65
Engineers, operating, steam:	
1 to 2 drums	0 60
3 or more drums	0 70
Engineers on steel erection	0 75
Engineers, crane (steam, gasoline or electric)	0 65
Electricians (inside wiremen)	0 65
Firemen, stationary	0 45
Hoist operators—tower (gasoline or electric)	0 55
Labourers	0 40
Lathers, metal	0 65
Lathers, wood	0 55
Machinists	0 65
Machinists' helpers	0 45
Motor truck driver	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 65
Rodmen—reinforcing steel	0 50
Roofers, felt and gravel: patent	0 45
Sheet metal workers	0 65
Shovel operators—gasoline	0 85
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Stonecutters	0 70
Stonemasons	0 80
Stonemasons' helpers (mixing and tempering mortar)	0 45
Structural steel workers	0 75
Tile setters (ceramic)	0 80
Tile setters' helpers (all men assigned to help tradesmen)	0 45
Watchman	0 35
Welders and burners on steel erection	0 75

Construction of an isolation hospital at the Royal Canadian Air Force Station at Trenton, Ont. Name of contractors, Frontenac Construction Co., Ltd., Toronto, Ont. Date of contract, August 15, 1939. Amount of contract, $19,700. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 65
Brick and hollow tile layers	0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters	0 70
Cement finisher	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gasoline or electric)	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Electricians (inside wiremen)	0 70
Engineers on steel erection	0 80
Firemen, stationary	0 45
Hoist operators—tower (gasoline or electric)	0 50
Labourers	0 40
Lathers, metal	0 70
Lathers, wood	0 65
Machinists	0 65
Machinists' helpers	0 45
Motor truck driver	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 60
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 75
Roofers, felt and gravel	0 45
Rodmen, reinforced steel	0 50
Sheet metal workers	0 70
Shovel operators—gasoline	0 90
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Stam shovel firemen	0 55
Stonecutters	0 75
Stonemasons	0 90
Stonemasons' helpers (mixing and tempering mortar)	0 45
Structural steel workers	0 80
Welders on steel erection	0 80
Watchman	0 35

Construction of a number of buildings at the Royal Canadian Air Force Station, Camp Borden, Ont. Name of contractors, Frontenac Construction Co., Ltd., Toronto, Ont. Date of contract, August 15, 1939. Amount of contract, $223,350. A fair wages schedule was included in the contract as follows—

	Per hour
Asbestos insulation workers	$0 75
Blacksmiths	0 70
Blacksmiths' helpers	0 40
Brick and hollow tile layers	1 00
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 90
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 45
Cement finisher	0 70
Compressor operator (gasoline or electric)	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Engineers, operating, steam:	
1 to 2 drums	0 80
3 or more drums	0 80
Engineers on steel erection	0 80
Engineers, crane (steam, gasoline or electric)	0 85
Electricians (inside wiremen)	1 00
Firemen, stationary	0 40
Hoist operators—tower (gasoline or electric)	0 45
Labourers	0 35
Lathers, metal	0 90
Lathers, wood	0 75
Machinists	0 75
Machinists' helpers	0 40

	Per hour
Motor truck driver	0 40
Motor truck driver and truck	1 40
Ornamental iron workers	0 80
Painters and glaziers	0 75
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	1 00
Rodmen—reinforcing steel	0 45
Roofers, felt and gravel: patent	0 55
Sheet metal workers	0 92½
Shovel operators (gasoline)	1 10
Steam shovel engineers	1 10
Steam shovel cranemen	0 90
Steam shovel firemen	0 65
Steam shovel oilers	0 55
Stonecutters	0 95
Stonemasons	1 00
Stonemasons' helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 80
Tile setters (ceramic)	0 90
Tile setters' helpers (all men assigned to help tradesmen)	0 40
Welders and burners on steel erection	0 80
Watchman	0 30

Installation of a drainage system and resurfacing runways at the Royal Canadian Air Force Station, Patricia Bay, B.C. Name of contractors, Dawson, Wade and Co., Ltd., Vancouver, B.C. Date of contract, September 5, 1939. Amount of contract, $236,600. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 75
Blacksmiths' helpers	0 50
Carpenters and joiners	0 80
Driver, team and wagon	0 85
Drivers	0 45
Driver, team and scraper	0 85
Driver, team and plough	0 85
Labourers	0 45
Motor truck drivers	0 50
Motor truck driver and truck	1 50
Pipelayers, caulkers and solderers	0 55
Road grader operator:	
Horse-drawn	0 50
Including team	0 90
Gasoline	0 60
Steam roller operators	0 70
Steam shovel engineers	1 12½
Steam shovel cranemen	0 90
Steam shovel firemen	0 74⅛
Tractor operators—gasoline	0 65
Watchman	0 45

Department of Public Works

Construction of wharf repairs at Quatsino, Comox-Alberni District, B.C. Name of contractors, Horie-Latimer Construction Co., Ltd., Vancouver, B.C. Date of contract, September 7, 1939. Amount of contract, approximately $6,979. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver and derrick foreman	$1 25
Pile driver and derrick engineer	1 12½
Pile driver and derrick men	1 00
Pile driver and boommen	1 00
Pile driver and bridgemen	1 00
Pile driver and firemen	0 68¾
Labourers	0 45
Watchmen	0 40

Construction of a steel Hopper Scow. Name of contractors, The Sydney Foundry & Machine Works, Ltd., Sydney, N.S. Date of contract, August 4, 1939. Amount of contract, $29,860. A fair wages schedule was included in the contract as follows:—

	Per hour
Welder, acetylene and electric	$0 58
Angle-smith	0 58
Angle-smith's helper	0 45
Blacksmith	0 58
Blacksmith's helper	0 40
Boilermaker	0 58
Boilermaker's helper	0 45
Chipper and caulker	0 58
Loftsman	0 58
Machinist	0 58
Machinist's helper	0 40
Patternmaker	0 58
Steamfitter and pipefitter	0 58
Steamfitter's and pipefitter's helper	0 40
Riveter	0 58
Template-maker	0 58
Plater	0 58
Shipwright and joiner	0 58
Moulder	0 58
Driller and reamer	0 45
Heater, rivet	0 40
Bolter-up	0 40
Holder-on, rivet	0 45
Rigger	0 48
Crane operator	0 48
Labourers	0 35
Painters	0 48

NOTE: Working hours must not exceed 8 per day and 48 per week.

Construction of harbour improvements consisting of the completion of the terminal for the Harbour Commission at Hamilton, Ont. Name of contractors, Russell Construction Co., Ltd., Toronto, Ont. Date of contract, August 22, 1939. Amount of contract, approximately $313,311.96. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 50
Boatmen (rowboats)	0 45
Carpenters and joiners	0 75
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 67½
Gasoline or electric	0 60
Compressor operators (gasoline or electric)	0 55
Engineer, crane (steam, gasoline or electric)	0 75
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	$14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00

	Per hour
Driver	0 45
Driver, team and wagon	0 90
Engineers operating steam:	
Single or double drum	0 67½
Three or more drums	0 75
Fireman, stationary	0 50
Hoist operators (gasoline or electric)	0 55
Labourers	0 45
Motor truck drivers	0 50
Motor truck driver and truck	1 50
Pile driver and derrick engineers	0 67½
Pile driver and derrick labourers	0 50
Pile driver and derrick firemen	0 50
Pile driver and derrick foreman	0 75
Pile driver and derrick men (rigging, setting and signalling)	0 60
Pumpmen	0 55
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 90
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 55
Watchmen	0 40
Welders and burners (acetylene or electric)	0 70

Construction of a breakwater, at Matlock, Man. Name of contractor, Mr. Wm. Newman, St. Boniface, Man. Date of contract, August 15, 1939. Amount of contract, approximately $15,921. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 40
Labourers	0 35
Driver	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Timbermen or cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 50
Watchman	0 30

Note: Working hours must not exceed 8 per day and 44 per week.

Construction of an extension to the rubble mound breakwater at Port Arthur, Ont. Name of contractors, Canadian Dredge & Dock Co., Ltd., Toronto, Ont. Date of contract, September 8, 1939. Amount of contract, approximately $416,978.75. A fair wages schedule was included in the contract as follows:—

	Per month and room and board
Dredge captain (dipper)	$200 00
Dredge runner (dipper)	160 00
Cranemen (dipper)	140 00
Fireman (dipper)	60 00
Oiler (dipper)	60 00
*Tug captain	145 00—180 00
Chief marine engineer (Class 2)	170 00
Second marine engineer (Class 2)	140 00
Chief marine engineer (Class 3)	165 00
Second marine engineer (Class 3)	130 00
Chief marine engineer (Class 4)	150 00
Second marine engineer (Class 4)	120 00
Chief marine engineer on vessels requiring less than 4th class certificates	135 00
Fireman	65 00
Oiler	70 00
Deck hands	50 00
Cook	80 00
	Per hour
Shovel operator	0 90
Shovel craneman	0 70
Shovel fireman	0 55
Derrick runner (gasoline or electric)	0 70
Pile driver and derrick fireman	0 45
Pile driver and derrick labourers	0 45
Pile driver and derrick foreman	0 80
Pile driver and derrick engineers	0 70
Pile driver and derrick men (rigging, setting and signalling)	0 55
Dinkey engineer	0 65
Labourers	0 40
Blacksmiths	0 60
Powdermen	0 50
Drill runner (machine)	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Motor truck driver	0 45
Motor truck driver and truck	1 45
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 50
Motor boat operators	0 45
Carpenters and joiners	0 70
Shovel operators (gasoline)	0 90
Blacksmiths' helpers	0 45
Compressor operators (gasoline or electric)	0 50
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	$14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00

*According to nominal horse-power of vessels as described in classification of the National Association of Marine Engineers of Canada.

Reclamation from part of Navy Bay on the east side of the Royal Military College grounds at Kingston, Ont. Name of contractors, Canadian Dredge & Dock Co., Ltd., Toronto, Ont. Date of contract, September 13, 1939. Amount of contract, approximately $33,750. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 65
Blacksmiths' helpers	0 45
Compressor operators (gasoline or electric)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drill runners	0 50
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Engineers, crane (steam, gasoline, electric)	0 70
Firemen, stationary	0 45
Labourers	0 40
Machinists	0 70
Machinists' helpers	0 45
Motor truck drivers	0 45
Motor truck drivers and trucks	1 45
Pile driver and derrick foreman	0 75

	Per hour
Pile driver and derrick engineers	0 65
Pile driver and derrick men (rigging, setting and signalling)	0 55
Pile driver and derrick firemen	0 45
Pile driver and derrick labourers	0 45
Riggers (general)	0 50
Timbermen and cribmen (measuring, scribing and, by use of axe, adze, etc., cutting and fitting timber)	0 50
Watchmen	0 35
Welders and burners (acetylene or electric.)	0 65

Construction of a wharf at Fort Frances, Ont. Name of contractor, Mr. William Newman, St. Boniface, Man. Date of contract, August 15, 1939. Amount of contract, approximately $5,331. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Drivers	0 40
Driver, team and wagon	0 75
Engineer, operating, steam (single or double drum)	0 65
Hoist operator—tower (gasoline or electric)	0 50
Labourers	0 40
Motor truck driver	0 45
Motor truck driver and truck	1 45
Tractor operator	0 50
Pile driver and derrick foreman	0 75
Pile driver and derrick engineers	0 65
Pile driver and derrick firemen	0 45
Pile driver and derrick labourers	0 45
Pile driver and derrick men (rigging, setting and signalling)	0 55
Firemen, stationary	0 45
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 50
Watchman	0 35

Construction of a public building at Millbrook, Ont. Name of contractors, M. Sullivan & Son., Ltd., Arnprior, Ont. Date of contract, September 2, 1939. Amount of contract, $10,967 and unit prices for additional work. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 80
Brick and hollow tile layers' helpers mixing and tempering mortar)	0 40
Carpenters and joiners	0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Electricians (inside wiremen)	0 65
Engineers on steel erection	0 80
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Firemen, stationary	0 40
Labourers	0 35
Lathers, metal	0 60
Mastic floor layers	0 75
Mastic floor rubbers and finishers	0 60
Mastic floor kettlemen	0 60
Mastic floor labourers	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 40
Ornamental iron workers	0 55
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 65
Roofers, felt and gravel: patent	0 40
Roofers, sheet metal	0 65
Sheet metal workers	0 65
Stonecutters	0 70
Stonemasons	0 80
Stonemasons' helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 80
Tile setters (ceramic)	0 80
Tile setters' helpers (all men assigned to help tradesmen)	0 40
Watchman	0 30
Waxers and polishers	0 40
Welders and burners on steel erection	0 80

Reconstruction of a wharf at Vercheres, Que. Name of contractors, Lavallee, Lachapelle & Cournoyer, Ltd., Sorel, P.Q. Date of contract, September 13, 1939. Amount of contract, approximately $16,524.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 40
Blacksmiths	0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Compressor operators (gasoline or electric)	0 45
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	$14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Drivers	$0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drill runners	0 45
Firemen, stationary	0 40
Labourers	0 35
Pile driver and derrick foreman	0 70
Pile driver and derrick engineers	0 60
Pile driver and derrick men (rigging, setting and signalling)	0 50
Pile driver and derrick firemen	0 40
Pile driver and derrick labourers	0 40
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30
Welders and burners (acetylene or electric)	0 55

Construction of an extension to the wharf at Malbaie, Gaspe Co., P.Q. Name of contractors, Ludger Lemieux, Ltd., Quebec, P.Q. Date of contract, August 24, 1939. Amount of contract, approximately $66,000.83. A fair

wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 55
Blacksmith's helper	0 40
Boatmen (rowboats)	0 35
Carpenters and joiners	0 55
Compressors operators (gasoline or electric	0 45
Drill runners	0 45
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drivers	0 35
Engineers, operating, steam (single or double drum)	0 60
Fireman, stationary	0 40
Hoist operator—tower (gasoline or electric)	0 45
Labourers	0 35
Machinist	0 60
Machinist's helpers	0 40
Motor truck drivers	0 40
Motor truck drivers and trucks	1 35
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchman	0 30

Construction of a breakwater extension and improvements at Margaretsville, Annapolis Co., N.S. Name of contractors, Messrs. Ralph and Arthur Parsons, Walton, N.S. Date of contract, September 7, 1939. Amount of contract, approximately $26,463.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Driver	0 35
Driver, horse and cart	0 50
Driver, team or oxen and wagon	0 60
Hoist operators, tower (gasoline or electric)	0 45
Labourers	0 35
Motor boat operators	0 40
Motor truck driver	0 40
Motor truck driver and truck	1 35
Timbermen and cribmen (measuring, scribing and, by the use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of a timber pile wharf at Pictou, N.S. Name of contractor, Mr. Robert A. Douglas, New Glasgow, N.S. Date of contract, September 12, 1939. Amount of contract, approximately $143,920.68. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboat)	0 35
Carpenters and joiners	0 55
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Hoist operator—tower (gasoline or electric)	0 45
Labourers	0 35
Motor boat operators	0 40
Motor truck driver	0 40
Motor truck driver and truck	1 35
Pile driver and derrick foreman	0 70
Pile driver and derrick engineers	0 60
Pile driver and derrick firemen	0 40
Pile driver and derrick labourers	0 40
Pile driver and derrick men (rigging, setting, and signalling)	0 50
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of a breakwater extension at Chegoggin Point, Yarmouth Co., N.S. Name of contractor, Mr. Joseph C. Gaudet, Comeauville, N.S. Date of contract, August 19, 1939. Amount of contract, approximately $11,534.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboat)	0 35
Driver	0 35
Driver, horse or ox and cart	0 50
Driver, team or oxen and wagon	0 60
Hoist operators (gasoline or electric)	0 45
Labourers	0 35
Motor boat operators	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of breakwater repairs and improvements at Brooklyn, Queens Co., N.S. Name of contractors, J. P. Porter & Sons, Ltd., Montreal, P.Q. Date of contract, August 21, 1939. Amount of contract, $231,438.56. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 40
Carpenters and joiners	0 55
Compressor operators (gasoline or electric)	0 45
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	$14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Drill runners	0 45
Engineers, operating, steam:	
Single or double drum	0 60
Three or more drums	0 70

The National Research Council of Canada has just issued its twenty-first annual report for the fiscal year 1937-38. The publication contains the report of the President of the Council; the reports of the various divisions; reports of co-operative investigations, and investigations by individual researchers.

A list of forty-seven graduates of Canadian universities who were awarded post-graduate scholarships by the National Research Council for 1937-38 is also given in the report, along with a list of appointments made to the technical staff of the National Research Laboratories.

The Bureau of Railway Economics of the Association of American Railroads has published *Statistics of Railways of Class 1, United States, 1926-38*. According to the review the total number of employees (average number for 12 months) on Class 1 railways during 1938 was 939,171 compared with 1,114,663 in 1937. Earnings also declined during 1938, amounting to $2,329,606,268 compared with $2,799,538,883 paid in 1937. The average yearly compensation per employee increased however from $1,781.21 in 1937 to $1,859.24 in 1938; and the weekly wage rose from $34.16 in 1937 to $35.66 in 1938. Hourly wages per employee during 1938 are recorded as being .75 cents per hour compared with .709 cents in 1937.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the Labour Gazette from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Tobacco and Liquors

Toronto, Ontario.—A Certain Transportation Company and the International Union of United Brewery, Flour, Cereal and Soft Drink Workers, Local 304 (Brewery Drivers).

Agreement which came into effect for the period April 1, 1938 to April 1, 1939, and thereafter from year to year, subject to notice continues to April 1, 1940.

Only union members to be employed, except in busy season when extra help may be employed on permit from the union.

Hours: temporary drivers on city delivery to work 8 hours per day, 48 per week; drivers on transport work to work 9 hours per day, 54 per week from April 1 to Setpember 30; from October 1 to March 31, drivers to work 8 per day, 48 per week.

Overtime: time and one half. All men employed to be paid for four specified holidays.

Wages: permanent drivers to be paid $26 per week, helpers $23.50.

Vacation: drivers and helpers to be given two weeks' vacation with pay; those employed six months, one week's vacation with pay.

Grievances as to the violation of the agreement to be adjusted by an arbitration committee. If these cannot agree they will select a disinterested party and the majority decision to be binding on both parties.

London, Ontario.—A Certain Brewery and the National Beverage Workers' Union, Local No. 1.

Agreement to be in effect from April 1, 1939, to March 31, 1941, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, November, 1938, page 1291, with these exceptions:

Four additional holidays are recognized and employees to receive pay, although not working, for these days. If required to work on these days, time and one half to be paid.

Vacation: permanent employees with two years or more service with the employer to have one week's vacation with pay annually.

Manufacturing: Pulp, Paper and Paper Products

VICTORIA, B.C.—SIDNEY ROOFING AND PAPER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, LOCAL 367.

Agreement to be in effect from June 29, 1939, to July 15, 1940, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1938 page 1406, with these exceptions:

Any employee who is or who becomes a union member is to retain such membership during the term of this agreement.

Overtime: at time and one half to be paid for Sunday repair work over 8 hours.

Any employee called to work and then not given work, to receive 4 hours' pay for reporting.

Prior to any promotion the superintendent or mill manager, will, when possible, confer with the union committee in order to fill the position and ensure better co-operation.

Wages per hour from June 23, 1939: machine tenders 65 and 55 cents, back tenders 55 and 45 cents, third hand 50 cents, fourth hand 45 cents, beater engineers 50 cents, beatermen 45 cents, engineers 60 cents, casual labourers 40 cents.

Manufacturing: Printing and Publishing

ST. CATHARINES, ONTARIO.—A CERTAIN NEWSPAPER AND CERTAIN JOB PRINTING OFFICES AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 416.

Agreement to be in effect from March 1, 1939, to March 1, 1940.

Only union members to be employed.

Hours: for the newspaper office, 8 per day, a 48 hour week for day work, and 7½, a 45 hour week for night work; for job printing work, 8 per day, 4 on Saturdays, a 44 hour week for day work, and 7½ per night, 5 nights per week, a 37½ hour week for night work.

Overtime: time and one half.

Minimum weekly wage rates: for newspaper work, journeymen compositors to be paid $38 for day work and $40 for night work; foremen and machinist operators $2 per week extra; for job printing offices $35 per week for day work and $37, for night work, foremen and machinist operators $2 per week extra.

Apprentices to serve six years, and be paid from one third of journeymen's rate during second year to four fifths during fifth and sixth years. One apprentice allowed to each five journeymen.

WINNIPEG, MANITOBA.—DAILY NEWSPAPER PUBLISHERS AND THE INTERNATIONAL STEREOTYPERS AND ELECTROTYPERS' UNION, LOCAL 59.

The agreement which came into effect May 2, 1933 and was summarized in the LABOUR GAZETTE, July, 1933, page 732, is renewed from May 2, 1939, to May 1, 1940, and thereafter subject to 30 days' notice with these changes:

Weekly wage rates: from May 2, 1939, to July 15, 1939, journeymen stereotypers $41.50, apprentices from $16.20 during first year to $32.35 during fifth year; from July 17, 1939, to May 1, 1940, journeymen stereotypers $40 per week, apprentices from $15.60 during first year to $31.20 during fifth year.

Hours are unchanged from 48 per week for day work and 42 for night work, with overtime at time and one half and double time for work on statutory and civic holidays.

Provision for the settlement of disputes is also unchanged, that is the povisions of the arbitration agreement between the International Stereotypers and Electrotypers Union and the American Newspaper Publishers Association in so far as it provides for local conciliation and arbitration is to be effective, except where it provides for a stated number of arbitrators, in which case it shall be amended to provide for one arbitrator to be selected by the publishers and one to be selected by the union, they to select a third.

EDMONTON, ALBERTA.—CERTAIN JOB PRINTING FIRMS AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL 255.

Supplementary agreement to be in effect from January 1, 1940, to December 31, 1940, and thereafter from year to year, subject to notice. This agreement is supplementary to the one which was summarized in the LABOUR GAZETTE, December, 1938, page 1407.

Overtime: one holiday is added to the eight specified holidays for which time and one half is to be paid.

Minimum wage rates for pressmen are increased from 85 to 90 cents per hour for day work and from 90 to 95 cents for night work. For assistants, there is no change for day work, but it is now provided that assistants receive 5 cents per hour extra for night work.

Manufacturing: Textiles and Clothing

Cornwall, Ontario.—An Artificial Silk Manufacturing Company and the United Textile Workers (Rayon Section), Federal Union, Local No. 3.

Agreement to be in effect from September 10, 1939, to September 9, 1940, and thereafter from year to year subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, November, 1938, page 1293, and October, 1937, page 1153, with certain exceptions:

Seniority: Provision is made in the agreement for the application of seniority when laying-off and re-engaging employees and making promotions.

The number of employees per shift in the viscose department and spinning department is determined by the production.

Hours of work, wage rates and conditions to be the same as heretofore prevailing or as arranged between the company and the union, the same to be open for discussion during the life of this agreement. The 40 hour week now prevailing for day workers not considered as normal and the 50 hour week for day workers to be reverted to as soon as conditions warrant.

In the engineering and maintenance department, the company and the union to discuss the classification of employees into tradesmen, improvers and helpers.

Vancouver, B.C.—Cloak and Suit Manufacturers' Association of Vancouver and the International Ladies Garment Workers' Union (Local 276).

Agreement to be in effect from June 27, 1938, to June 1, 1940.

Only union members to be employed. A shop chairman to be elected in each shop to deal with the manufacturer to adjust all disputes and grievances.

Hours: 8 per day from Monday to Friday inclusive, a 40 hour week. (Previously a 44 hour week was effective.)

Overtime: no overtime permitted until all unemployed members of the union have been absorbed. When this condition is fulfilled, overtime may be worked, but not to exceed four hours in any week to be divided equally into the first four days of the week. All overtime beyond the 44 hours to be paid at time and one half.

Wages: all workers to receive not less than the rates of pay they previously earned for a 44 hour week. Workers who are seriously underpaid to be entitled to a special adjustment. New employees to be engaged to receive a wage agreed upon between the union and the employer. Minimum prices for two of the operations are set, but in no case may earnings be less for 40 hours than they previously were for 44 hours. At the beginning of the season, prices for piece workers to be settled for all crafts engaged on piece work system before any worker commences work; any prices to be decided later in the season to be settled between the union representative and the employer.

No new apprentices to be engaged until all unemployed union members have been absorbed in the industry, and then only with the consent of the union.

During the slack season, work in a shop to be divided as equally as possible.

A joint committee to be formed for the settlement of disputes. If they are unsuccessful, the matter to be referred to an impartial chairman.

Construction: Buildings and Structures

Toronto, Ontario.—Tile and Mantle Contractors' Association of Toronto and the Bricklayers, Masons and Plasterers International Union, Local No. 31 (Marble Setters).

The agreement which was summarized in the Labour Gazette, September, 1935, page 865, has been renewed from March 1, 1939, to February 29, 1940, with this exception:

On any job where tile, terrazzo and marble is used, unless the firm doing the work employs union men in all its departments, members of this union will not work on such job.

Wages for marble setters are unchanged at $1.10 per hour, with a 40 hour week.

Toronto, Ontario.—Certain Electrical Contractors and the International Brotherhood of Electrical Workers, Local 353.

This agreement which came into effect November 22, 1935, and was amended October 6, 1936 to provide for double time for work on Saturdays, continues in effect to June 24, 1940, and thereafter from year to year, subject to notice. It does not apply to assembling, testing, inspecting, rebuilding and repairing of any electrical motors or household appliances when done in licensed electrical repair shops.

Only union members to be employed and the union agrees to give preference in supplying men to the contractors parties to the agreement.

Hours: 8 per day from Monday to Friday inclusive, a 40 hour week. In case of shift work where the overtime shifts equal at least two thirds of the shift, 8 hours' pay for 7 hours' work. When work cannot be done during the day, such work may be done as a night shift of not more than 8 hours at straight time.

Overtime and all work on Saturdays, Sundays and eight specified holidays, double time.

Wages for journeymen electricians: $1 per hour.

Apprentices to be governed by the Ontario Apprenticeship Act. One apprentice allowed to every three journeymen in a shop.

For work out of Toronto zone, fare and board to be paid and travelling time up to 5 p.m.

Toronto, Ontario.—Certain Contractors and the International Union of Plasterers, Local No. 48.

This agreement which came into effect February 28, 1938, for one year and thereafter from year to year, subject to notice, has been extended to April 30, 1940.

Only union members to be employed both for the job and for shop hands. The union to give preference in employing men to contractors parties to the agreement.

Hours: 8 per day, Mondays to Fridays, a 40 hour week. When work cannot be done during the day, it may be done as a night shift of not more than 8 hours. When two or three shifts daily worked, the day shift to be paid at straight time, and the second and third shift at time and one seventh.

Overtime: time and one half; work on Saturdays, Sundays and eight specified holidays, double time.

Minimum wage rate for plasterers: 90 cents per hour. When ten or more plasterers employed, there shall be a superannuated man employed at a rate to be agreed upon between the employer and employee, but in any event at not less than 60 per cent of the regular wage.

Apprentices to be governed by the Ontario Apprenticeship Act.

For work outside the Toronto zone, transportation and travelling time up to 8 hours in a day to be paid by the employer.

A joint arbitration committee to be appointed for the settlement of disputes.

Transportation and Public Utilities: Electricity and Gas

WINDSOR, ONTARIO.—WINDSOR UTILITIES COMMISSION AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL 911 AND EMPLOYEES OF THE HYDRO DIVISION OF THE WINDSOR UTILITIES COMMISSION.

Agreement to be in effect from January 1, 1939, to December 31, 1940, and thereafter from year to year, subject to notice.

No discrimination against any employee on account of union membership. Only union members to be employed.

Hours: 8 per day, 4 on Saturdays, 44 per week, except for substation operators, trouble men, reconnect and disconnect men, auto maintenance men and storehouse and garage janitors, for whom hours to be as mutually agreed on but not more than 8 per day, 48 per week.

Overtime: time and one half to midnight; overtime after midnight and all work on Sundays and eight specified holidays, double time.

Wages per hour: journeymen linemen and journeymen splicers 92 cents, apprentice linemen from 30 cents during first six months to 77 cents during second half of fourth year, truck drivers 69 and 74 cents, groundmen 63 cents. Wages per month: journeymen operators $147, apprentice operators from $56 during first six months to $128 during second half of fourth year. Wages per hour in meter department: journeymen 74 and 79 cents, apprentice metermen from 30 cents during first six months to 65 cents during second half of fourth year. Merchandise maintenance journeymen (including bench men and refrigeration service men) $147 per month, truck drivers $121, utility men $115 and $100. Troublemen 92 cents night and 87 cents per hour for day work. Meter readers $142 per month, collectors $152, utility men (shop) 74 cents per hour. Street lighting maintenance men 63 cents, transformer repairs 76 cents.

Vacation: all employees to be given two weeks vacation with pay each year, except substation operators who are to be given three weeks with pay.

Employees off work through sickness to be paid up to two weeks full pay in any year, in return for which those on hourly rates to work an equal number of hours overtime without pay when required.

Seniority and efficiency to rule in making reductions of the staff and in reemploying them as well as in making promotions.

Disputes or grievances to be dealt with by the union grievance committee with the management.

Service: Public Administration

HAMILTON, ONTARIO.—CITY OF HAMILTON AND THE INTERNATIONAL UNION OF OPERATING ENGINEERS, LOCAL 700.

Agreement to be in effect from January 1, 1939, to December 31, 1939, or 1940, if no notice given 30 days before January 1, 1940. It covers engineers, operators, maintenance men and assistants employed in the water works and sewage divisions of the engineer's department of the city.

Hours: 8 per day, 48 per week.

Overtime: time and one half. Overtime worked on a Sunday, double time.

Wages per hour: at pumping stations and filtration plant, maintenance men and filter plant operators 75 cents, other engineers and operators 73 cents, assistant operators and firemen 67½ cents; at sewage pumping station and sewage disposal plant, maintenance man 75 cents; operators and engineers 73 cents, assistant operators 55 cents.

Seniority with efficiency to govern promotions.

Vacation: two week's vacation with pay each year after one year's service and three weeks after ten years' service.

In case of sickness, two weeks full pay and two weeks half pay allowed each year, on proof by City Physician.

A shop committee to be formed to take up any grievances with city officials.

Service: Business and Personal

TORONTO, ONTARIO.—CERTAIN RESTAURANTS AND CAFETERIAS AND THE HOTEL AND RESTAURANT EMPLOYEES' INTERNATIONAL ALLIANCE AND BARTENDERS' INTERNATIONAL LEAGUE, LOCAL 168 (RESTAURANT EMPLOYEES).

Agreement to be in effect from June 1, 1939, to May 31, 1940.

Only union members to be employed, if available. A union card to be supplied to restaurants and cafeterias, parties to this agreement.

Hours: 8 per day, 48 per week, with time allowance for two meals of half an hour each within the 8 hours. Every employee to have at least 24 consecutive hours off per week, and no female employee to work between midnight and 7 a.m. If possible a day's work to be continuous, split shifts allowed only when necessary and must have only one break and be completed within a 12 hour period. Part time employees during lunch or dinner to work 3 hours per day, 6 days per week.

Overtime to be paid at 65 cents per hour for chef and 50 cents for all others. All employees to be paid for legal holidays.

Minimum weekly wage rates to be paid in addition to meals to be supplied by the employer: chef $20, second cook $16, counterman $15, counter girls $14, waiters $13, waitresses $12, dishwashers $11, busboys $9. Minimum wages for part time employees in addition to their meals while employed: waiter or waitress during lunch or dinner $1.50 per day, $7.50 per week; extra waiter or waitress $2.50 per day, extra second cook $3 per day, extra chef $4 per day, extra dishwasher $2.50 per day. Any employee receiving a higher wage than the minimum to have no reduction in pay.

Vacation: employees with more than one year's service in the same restaurant or cafeteria to have one week's vacation with pay.

Uniforms to be supplied and laundered at the expense of the employer.

Any dispute which cannot be settled between the employer and the union to be submitted to a joint arbitration committee, whose decision will be final.

TORONTO, ONTARIO.—CERTAIN HOTELS AND THE HOTEL AND RESTAURANT EMPLOYEES' INTERNATIONAL ALLIANCE AND BARTENDERS INTERNATIONAL LEAGUE OF AMERICA, LOCAL 299 (HOTEL EMPLOYEES).

Agreement to be in effect from September, 1939, to August 31, 1940. Any party desiring to change, amend or terminate this agreement to

give at least 60 days' notice. The agreement applies to all hotel service and miscellaneous employees except bartenders and beverage room waiters.

Only union members to be employed. Union house card to be supplied by the union to hotels, parties to this agreement.

Hours not to exceed 54 hours per week for male employees and 48 hours for female employees, with time off in the day for one meal per day in the employer's time. Every employee to have at least 24 consecutive hours off per week and no female employee to work between midnight and 7 a.m.

Overtime: chef 65 cents per hour, other employees 50 cents per hour.

Minimum wages per week in addition to meals: chef $21 and up, second cook $18 and up; grill, steamtable and salad man $15 and up, waiters $13, waitresses $11; bell boys, busboys and busgirls $10, housekeeper $14, housemaids $10, dishwasher $11, porter and handymen $14. Wages for part time employees in addition to meals while employed: waiter or waitress during lunch or dinner (3 hours per meal) $1.50 for such three hours, $7.50 for 3 hours, 6 days per week; extra chef $4.50 and up for 9 hour day; extra second cook $3.50 per 9 hour day; grill, steamtable or salad man $3 per 9 hour day; bell boys, busboys, busgirls, maids, dishwashers $2 per 9 hour day; porters and handymen $2.50 per 9 hour day; waiter or waitress $3 per 9 hour day. Occasional employees to be paid 50 cents per hour for banquets (minimum of 3 hours for lunch or 4 hours for dinner), 50 cents per hour for catering work with a minimum of 5 hours, 40 cents for cabaret work with a minimum of 4 hours. Any employees receiving higher than the minimum rate when the agreement was made may not have their wage rates reduced.

Vacation: employees with one year or more service in a hotel, to have one week's vacation with pay.

Uniforms to be supplied and laundered at the expense of the employer.

Toronto, Ontario.—Certain Employers and the International Union of Elevator Constructors, Operators and Starters, Local 116 (Elevator Operators).

Agreement to be in effect from April 1, 1939, to March 31, 1940.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, December, 1938, page 1421 with these exceptions:

Hours are reduced from 51 to 48 hours per week.

Minimum weekly wage rate for elevator operators: $22.50 per week (an increase of $1 per week).

An employee to be allowed 7 days' sick pay during the year, if sickness certified by a doctor.

Edmonton, Alberta.—Certain Hotels and the Hotel and Restaurant Employees International Alliance and Bartenders League of America, Local 579 (Beverage Dispensers).

Agreement to be in effect from May 31, 1939, to May 31, 1940, and thereafter from year to year, subject to notice.

Only union members or those with permit from the union to be employed.

Hours: 8 per day between 7 a.m. and 10 p.m. with one split in the shift. An extra man to be paid for 4 hours from the time of call to work.

Overtime: 60 cents per hour.

Wages: $4.50 per day.

Uniforms to be supplied and laundered at the expense of the employer.

Collective Labour Agreements Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Bakers, Montreal.
Printing trades, Quebec (amendment).
Printing trades, Montreal (amendment).
Shoe manufacturing industry, Province (amendment).
Fur manufacturing industry, Quebec (amendment).
Aluminium industry, Arvida (amendment).
Building trades, Chicoutimi (amendment).
Building trades, Three Rivers (amendment).
Building trades, Sherbrooke (amendment).
Building trades, Montreal (amendment).
Building trades, Hull (amendment).
Longshoremen, Quebec.
Checkers, Quebec.
Checkers and coopers (ocean navigation), Montreal.
Retail stores, Quebec (amendment).
Retail stores, Magog.
Barbers and hairdressers, Quebec (amendment).
Barbers and hairdressers, St. Jerome (amendment).
Garages and service stations, Montreal (amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

Ontario

Bricklayers and plasterers, Galt.
Building trades Kitchener and Waterloo.

Saskatchewan

Carpenters, Regina.
Beauty culture, Moose Jaw (amendment).

Alberta

Lumbering industry, Whitecourt zone.
Lathers, Calgary.
Structural Steel workers, Edmonton.
Bowling Alleys, Edmonton.
Bowling Alleys, Calgary.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the LABOUR GAZETTE, page 503. Amendments to the Act are noted in the LABOUR GAZETTE, June, 1939, page 576. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of five agreements and the amendment of fourteen other agreements, all of which are summarized below. A request was published in the *Quebec Official Gazette,* September 2, for the extension of a new agreement affecting garages and service stations at Montreal, and in the issue of September 9 for the extension of a new agreement affecting the railway car and bus manufacturing industry at Montreal. In addition, Orders in Council were published in the *Quebec Official Gazette,* September 16, 23 and 30, approving the constitution of certain joint committees, and in the issues of September 16 and 23, authorizing certain joint committees to levy assessments on employers and employees, all of which are listed below.

Manufacturing: Vegetable Foods, etc.

BAKERS AND BAKERY SALESMEN, MONTREAL. —An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 16, makes obligatory the terms of an agreement between certain bakeries and Le Syndicat des Employés de la Boulangerie et de la Pâtisserie, Inc. (The Union of Bakery and Confectionery Employees, Inc.) of Montreal.

The Order in Council to be in effect from September 1, 1939, to December 31, 1940. It cancels the previous Order in Council for this trade (LABOUR GAZETTE, January, 1938, page 102 and February, 1939, page 217).

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE as noted above, with these exceptions:

In addition to bakeries, employers and their employees engaged primarily in the sale and

distribution of bread, cake and pastries, when such employers sell or distribute 100 loaves or more per day on an average and use regularly one or more delivery vehicles, are included.

Hours for bakery employees (except salesmen) remain at 60 per week, but exception is made for foremen who may work 67 hours per week. Every employee to be entitled to a half an hour for his meal or rest during his daily work, after a reasonable number of hours.

Minimum weekly wage rates for bakery employees are raised $1 per week, to be as follows: foremen in bakeries of one or two men $25, foremen in bakeries of three or four men $26, foremen in bakeries of five men or over $29; oven-men and dough-men $25, journeymen bakers and pastry cooks $21, helpers $18, apprentices $12.

Minimum weekly wage rates for salesmen or distributors: $15 per week plus 3 per cent commission on collections, but in no case less than $18 per week. A salesman or distributor to be allowed to return without charge to his employer, his stale bread or cakes up to 2 per cent of the amount of goods charged to him; over this 2 per cent, goods returned may be charged to the employee at one half the retail price, but in no case may this affect the minimum of $18 per week.

Manufacturing: Fur, Leather and Miscellaneous Animal Products

Shoe Manufacturing Industry, Province of Quebec.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 16, amends the previous Orders in Council for this industry (Labour Gazette, October, 1937, page 1156, March, 1938, page 335, June, page 691, December, page 1423 and July, 1939, page 728), by adding a number of manufacturers to the parties to the agreement.

Fur Manufacturing Industry, Quebec.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 16, amends the previous Orders in Council for this industry (Labour Gazette, September, 1938, page 1042):

Hours and overtime: from February 15 to August 15, work to end at noon Saturday, but if required to work on Saturday afternoon, an employee will be paid time and one half only if said employee has already worked the regular week of 48 hours. Employees to be paid for Labour Day during which the shop and store are closed.

The wage rate which may be set by the joint committee for handicapped employees may not be less than $15 per week.

The proportion of cutters in the first class, the second class and the third class is specified for shops according to the number of cutters employed.

Manufacturing: Printing and Publishing

Printing Trades, Quebec.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 16, amends the previous Orders in Council for these trades (Labour Gazette, September, 1938, page 1044) by extending the territorial jurisdiction to include the towns of Rivière-du-Loup and Thetford Mines.

Printing Trades, Montreal.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 23, amends the previous Order in Council for these trades (Labour Gazette, April, 1938, page 452, June, 1936, page 546 and December, 1936, page 1181) by changing the category "bindery girls" to "female employees and males when replacing females in any class of employment in printing, bookbinding and lithographing establishments; hand operations of every description considered as women's work". Certain other changes made by this Order in Council do not affect the previous summaries.

Manufacturing: Metal Products

Aluminum Industry, Arvida.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 16, amends the previous Orders in Council for this industry (Labour Gazette, November, 1937, page 1272 and July, 1939, page 728) as follows:

In addition to a few new classifications of workers added to the wage schedule, special provision is made for minors. Minors of both sexes must be at least 16 years of age and have either completed the 6th grade or have been out of school for two years; apprentices, beginners (typists, stenographers and clerks), routine analysts and potroom control boys must be at least 17 years old and have completed the 8th grade in school or equivalent. Boys must be at least 17 years of age to be employed in the plant except as water boys or messengers. Employment of non-resident minors and minors under 16 years of age in the townsite or in the plant must be approved by the Superintendent of Properties or the Works Manager. Except where otherwise provided in the wage scale, minors to be paid the following minimum hourly rates: those age 16 years, 20 cents; 17 years, 25 cents; 18 years, 30 cents, 19 years, 35 cents; 20 years, 40 cents. Female typists to be paid $10 per week during first year (beginner), $12 during second year, $16 during third year and $20 during fourth year.

Construction: Buildings and Structures

Building Trades, Chicoutimi and Lake St. John District.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 16, amends the previous Orders in Council for this industry (Labour Gazette, January, 1937, page 103 and January, 1939, page 96). In the original agreement, a special provision was made for contracts of $10,000 or more in the zone II territory, whereby for such contracts zone I wage rates would apply. The present amendment provides that from July 1, 1939, the county of Charlevoix is excluded from the above special provision.

86789—7½

Building Trades, Three Rivers.—An Order in Council, approved September 13, and published in the *Quebec Official Gazette,* September 23, amends the previous Orders in Council for these trades (Labour Gazette, August, 1938, page 944, May, 1939, page 528, July, page 728 and September, page 951) by adding an additional employer to the parties to the agreement.

Building Trades, Sherbrooke and Eastern Townships.—An Order in Council, approved September 13, and published in the *Quebec Official Gazette,* September 23, amends the previous Orders in Council for these trades (Labour Gazette, June, 1938, page 693, October, page 1173, November, page 1299, and July, 1939, page 729) by providing that the wage rate for journeymen carpenters in the city of Drummondville and within a radius of 5 miles of it, be raised from 45 cents to 50 cents per hour.

Building Trades, Montreal.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 16, amends the previous Orders in Council for these trades (Labour Gazette, July, 1939, page 729, and September, page 941) by the addition of the following clause:

"It is formally agreed that the erection or installation of all substitute of materials instead of regular trade materials shall be subject to the wage rate established for the particular trade concerned."

Building Trades, Hull.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 16, amends the previous Orders in Council for these trades (Labour Gazette, July, 1938, page 798, November, page 1300 and March, 1939, page 335).

The territorial jurisdiction is unchanged and includes the countries of Hull, Gatineau, Papineau and Pontiac. It is now, however, divided into three zones: zone I consists of the city of Hull and within 10 miles of its limits and also all contracts throughout the whole territorial jurisdiction, when the total cost of such contracts, including wages and material, is more than $100,000. Zone II comprises repair work (replacing used materials by new materials on a building already existing but not including substantial additin to a building) not exceeding $1,000 in a year to "small property" in the territory of zone I, that is property of 5 flats or less with a municipal estimate of $20,000 or less, provided one of the flats is occupied by the owner, or in the case of an industrial or commercial establishment that such establishment be under the direction of the owner; zone II also comprises all building contracts in the territorial jurisdiction but outside the city of Hull and within ten miles of it, which contracts are for $20,000 or more (wages and materials). Zone III consists of the counties of Hull, Gatineau, Papineau and Pontiac except the city of Hull and within ten miles of it, for contracts of less than a total cost of $20,000.

It is, however, provided that when an employer hires workmen in any of the following trades: carpenters, joiners, bricklayers, masons, plasterers, painters, electricians, lathers, concrete iron brace workers and labourers, who live in zone I to work outside zone I, they shall be paid the zone I wage rates.

MINIMUM HOURLY WAGE RATES

	Zone I $	Zone II $	Zone III $
Bricklayers	1.00	.80	.70
Masons	1.00	.80	.70
Joiner-carpenters, millwrights, joiners (concrete forms) (shop or job)	.80	.65	.55
Plasterers	.80	.65	.55

Sprinkler fitters	.75	.60	.55
Terrazo layers	.60	.50	.45
Tile setters	.70	.55	.50
Terrazo polishing machine—			
operators (dry)	.55	.45	.40
operators (damp)	.50	.40	.35
Structural iron workers	.75	.60	.55
Drillers	.60	.50	.40
Mortar and celanite mixers	.47	.40	.35
Hod carriers	.47	.40	.35
Riggers	.60	.50	.40
Concrete iron brace workers	.60	.50	.40

Transportation and Public Utilities: Water Transportation

Longshoremen (Ocean Navigation), Quebec.—An Order in Council, approved September 21, and published in the *Quebec Official Gazette,* September 30, makes obligatory the terms of an agreement between certain steamship companies and the Quebec Ship Labourers' Benevolent Society.

The Order in Council is to be in effect from June 1, 1939, to December 31, 1939, and governs all ship labourers employed in loading and discharging ocean-going vessels in the port of Quebec.

Wages of longshoremen: for day work, that is between 7 a.m. and 12 noon and between 1

p.m. and 5 p.m., 70 cents per hour; for night work, that is between 5 p.m. and 7 a.m., time and one half, viz. $1.05 per hour. Double time for work during meal hours and for all work on Sundays.

Checkers (Ocean Navigation), Quebec.—An Order in Council, approved September 20, and published in the *Quebec Official Gazette,* September 30, makes obligatory the terms of an agreement between certain steamship companies and the International Longshoremen's Association, Local 1605 (checkers).

The Order in Council is to be in effect from July 17, 1939, to December 31, 1940, and applies to hourly paid checkers employed on ocean going vessels in the port of Quebec.

Wages for checkers: for day work that is between 7 a.m. and 5 p.m., 55 cents per hour; for night work, that is between 5 p.m. and 7 a.m., 65 cents per hour. Double time for all work on Sundays (between midnight Saturday and midnight Sunday).

When checkers are put to work, they are to receive at least two hours' work at the prevailing rate.

Checkers and Coopers (Ocean Navigation), Montreal.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 16, makes obligatory the terms of an agreement between certain steamship companies and the committee representing the checkers and coopers of the Harbour of Montreal.

The Order in Council is to be in effect from September 16, 1939, to December 31, 1939, and governs all hourly paid steamship checkers and coopers on ocean-going vessels in the Harbour of Montreal. (Employers may use their regular weekly or monthly paid employees for checking and coopering work to be done on the wharves; such employees are not under this agreement.)

Wages and hours for checkers and coopers: from 7 a.m. or 9 a.m. to 12 noon and from 1 p.m. to 6 p.m., 64 cents per hour for checkers and 63 cents for coopers; from 7 p.m. to 11 p.m. and from 12 midnight to 5 a.m., 74 cents for checkers and 73 cents for coopers. When men do not begin at 7 a.m., they may be called for 9 a.m.; in such cases, they shall be put to work and paid for the period between 9 a.m. and 12 noon. Checkers when employed temporarily as head checkers or in doing office work, stowage or employed as warehousemen to be paid 5 cents per hour extra.

Work during meal hours, that is between 5 a.m. and 7 a.m., between noon and 1 p.m., between 6 p.m. and 7 p.m. and between 11 p.m. and midnight, to be paid double time. Double time also for all work on Sundays and three specified holidays.

Employees put to work during the day or night to receive full time for which they were called, except if work discontinued on account of adverse weather conditions in which case they will be paid for one hour in addition to time already worked, and except employees called to work in mail, express or baggage on Sundays or one of the three holidays, in which case they will be paid from the hour they are called to report and do report, with a minimum of one hour's pay at the prevailing rate.

Trade

Retail Stores, Quebec.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette,* September 16, amends the previous Orders in Council for these workers (Labour Gazette, January, 1939, page 96, March, page 336, and July, page 729).

Regular employees are those working the regular week of labour of the establishment and not less than 40 hours per week. All employees working more than 30 hours and less than 40 hours in a week to be considered as regular employees, paid as such and entitled to a surplus of 20 per cent in their wages. Supernumerary clerks are now defined as those taken on as additional help for work between November 1 and January 6.

Retail Stores, Magog.—An Order in Council, approved September 21, and published in the *Quebec Official Gazette,* September 30, makes obligatory the terms of an agreement between certain industrial and commercial establishments and Le Syndicat Catholique et National des Commis de Magog (The National Catholic Union of Clerks of Magog).

The Order in Council is to be in effect from September 30, 1939, to September 30, 1940. It is similar to the one previously in effect and summarized in the Labour Gazette, October, 1938, page 1173, and January, 1939, page 97, with certain exceptions:

Wages in bakeries: apprentices are unchanged for first three years from the previous agreement but thereafter are to be paid regular baker's wage rates. Wages in soft drink bottling plants for mixer's and bottler's helper after two months to be $12 per week. In natural ice storages, ice cutting workmen to be paid 20 cents per hour, ice piler 25 cents. In retail stores, the rates for male clerks are unchanged, as are the rates for female clerks for first three years, but for female clerks the minimum remains at $12 per week after three years' experience.

In "10 cent stores", that is stores where most articles are sold at 10, 15, 25 cents and $1.00, hours are 54 per week. Minimum wages in these stores vary from $8.10 to $10.80 per week, the floor lady to be paid at least $16, delivery worker and goods handler 15 cents per hour: overtime work and extra employees to be paid 25 cents per hour.

Seamstresses in clothing stores to work 48 hours per week and be paid at least $12 per week, 30 cents per hour overtime and 30 cents per hour if she works less than 20 hours per week. An apprentice seamstress may be employed when an experienced seamstress is already employed, such apprentice may be paid 10 cents per hour during first six months.

Service: Custom and Repair

Garage and Service Station Employees, Montreal.—An Order in Council, approved September 13, and published in the *Quebec Official Gazette,* September 23, amends the previous Orders in Council for these trades (Labour Gazette, June, 1938, page 697, July, page 800 and November, page 1300) by

extending the term of the agreement to October 1, 1939, and thereafter from year to year subject to notice. (A request for the extension of a new agreement for these workers was published in the *Quebec Official Gazette*, September 2.)

Service: Business and Personal

BARBERS AND HAIRDRESSERS, QUEBEC.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette*, September 16, amends the previous Orders in Council for these trades (LABOUR GAZETTE, October, 1937, page 1158, December, page 1388, and October, 1938, page 1174).

Beauty parlours and hairdressing establishments were formerly governed by the ordinances of the Fair Wage Board, but are now brought under this agreement.

Hours in beauty parlours and ladies' hairdressing establishments: 48 per week are the hours for which the minimum weekly wage is payable. Overtime to be paid *pro rata*. Hours may not exceed 55 per week.

Wages in beauty parlours and ladies' hairdressing establishments: experienced operators with two years' experience to be paid $10 per week plus a commission of 33⅓ per cent of all gross receipts in excess of $25; apprentices to be paid from $6 per week during first six months to $9 after 18 months' experience. Extra employees (those working less than 48 hours per week) to be paid at least 30 cents per hour, with a minimum of three hours wages for each call. All employees entitled to receive a 50 per cent commission on gross receipts if such receipts exceed twice the salary earned. Tips are the property of the employees and are not part of wages.

Any employee required to wait on the premises to be paid for such waiting time.

One male or female apprentice allowed to each establishment operating under an experienced operator. Where three experienced operators are employed, two apprentices allowed. No hairdressing establishment may have more than two apprentices. A hairdressing school cannot be operated jointly with a hairdressing parlour.

Uniforms required are to be furnished and laundered at the expense of the employer.

BABBERS AND HAIRDRESSERS, ST. JEROME.—An Order in Council, approved September 9, and published in the *Quebec Official Gazette*, September 16, amends the previous Order in Council for these trades (LABOUR GAZETTE, November, 1938, page 1300).

The territorial jurisdiction is extended to include the county of Deux-Montagnes and Isle Jésus, but the municipality of St. Lin is not now mentioned.

Joint Committees

Amendments to the constitution and by-laws of the joint committees set up under the following agreements were approved or amended by Orders in Council and published in the *Quebec Official Gazette* in the issues of September 16 and September 23:

Hairdressers, Montreal (amendment).
Building trades, Three Rivers (amendment).
Plumbers, Hull (amendment).
Retail stores and hotels, Jonquière.
Bakers, Montreal.

Notices were published in the *Quebec Official Gazette*, September 16 and September 23, that authorization was given by Order in Council for the joint committee to levy assessments on employers and employees, parties to the following agreements:

Shoe manufacturing industry, Province.
Cloak and suit industry, Province.
Fur manufacturing industry, Quebec.
Furniture industry, Province.
Building trades, Three Rivers.
Building trades, Hull (amendment).
Retail stores and hotels, Jonquière.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in

Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the Labour Gazette, as follows: Ontario, in the issues of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, May, 1938, page 501, and June, 1939, page 574; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, June 1938, page 633, and June, 1939, page 567; Nova Scotia, in June, 1936, page 604, and July, 1939, page 671; Saskatchewan, in the issue of June, 1937, page 635, May, 1938, page 507, and June, 1939, page 581. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Similar legislation is in effect in Part II of the Fair Wage Act of Manitoba for certain industries (Labour Gazette, May, 1938, page 499, and June, 1939, page 570) and in the Industrial Standards Act of New Brunswick, 1939 (for the construction industry), in effect since August 10. Up to the end of August, however, no schedules had yet been made obligatory in these two provinces.

Ontario

Construction: Buildings and Structures

Bricklayers and Plasterers, Galt, Hespeler and Preston.—An Order in Council, dated August 24, and published in *The Ontario Gazette*, September 2, makes binding the terms of a schedule of wages and hours for the bricklaying, stonemasonry and plastering industry in the city of Galt, the towns of Hespeler and Preston and adjacent area, from September 12, 1939, "during pleasure".

Hours: for bricklayers and masons, 8 per day, 4 on Saturdays, a 44 hour week; for plasterers, 9 per day, 5 on Saturdays, a 50 hour week. Regular rates of pay for night work of not more than 9 hours' duration whenever such work is of such a nature that it cannot be done during a regular working day.

Overtime: time and one half; all work on Saturdays after noon, Sundays and five specified holidays, double time.

Minimum hourly wage rates: bricklayers and masons 90 cents; plasterers 80 cents.

This schedule does not govern work required to complete contracts made prior to the date this schedule was approved by Order in Council if such contracts are filed with the Industry and Labour Board within 15 days from the date of approval.

Building Trades, Kitchener and Waterloo.—An Order in Council dated August 24, and published in *The Ontario Gazette*, September 2, makes binding a schedule of wages and hours in the construction industry in the city of Kitchener, the town of Waterloo and adjacent suburban area to each, from September 12 1939, "during pleasure".

The Order in Council governs all work in connection with the construction, erection, remodelling, repairing, maintenance or demolition of any building or structure, and in connection with the installation of equipment or fixtures in any building; except maintenance repairs to buildings, premises and equipment used in the operation of a manufacturing, industrial or service institution, including minor installations and alterations incidental to the maintenance of such buildings and premises, when performed by the regular employees of such manufacturing, industrial or service institution.

Hours and wages are as follows:

	Minimum Rates per hour	Maximum Hours per week	Maximum Hours per day
Bricklayers, Stonemasons and plasterers	$ .80	44	8
Carpenters	.60	50	9
Painters, Decorators, Glaziers and Spray Painters	.50	44	8
Plumbers, Steamfitters and Gas Fitters	not fixed	not fixed	not fixed
Labourers: including roofers, journeymen's helpers, mechanic's helpers and any other classification of work not specifically dealt with above	.40	50	9

The advisory committee is authorized to fix a special minimum rate for any handicapped employee.

Overtime: time and one half; work on Sundays and five specified holidays, double time. The advisory committee may, however, issue permits to employers allowing overtime work at straight time for emergency repairs.

The schedule does not govern work required to complete contracts made prior to the date this schedule was approved by Order in Council, if such contracts are filed with the Industry and Labour Board within 15 days of such approval.

Saskatchewan

Construction: Buildings and Structures

Carpenters, Regina.—An Order in Council, approved July 19, and published in *The Saskatchewan Gazette*, September 15, makes binding the terms of a schedule of wages and hours governing the carpentering industry in the city of Regina and within ten miles of it, from September 25, 1939, "during pleasure".

This schedule is similar to the one previously in effect and summarized in the Labour Gazette, August, 1938, page 948 and July, 1937, page 816, with this exception:

Hours remain at 8 per day, 4 on Saturdays, a 44 hour week. In case of shift work, however, 7½ hours to constitute a night shift with no time deducted for meals, for which 8 hours' pay to be allowed.

Service: Business and Personal

Hairdressers, etc., Moose Jaw.—An Order in Council, approved August 28, and published in *The Saskatchewan Gazette,* September 15, corrects the previous Order in Council for this trade (Labour Gazette, August, 1939, page 864) by a change in wording which does not affect the summary as given in the Labour Gazette.

Alberta

Logging

Loggers, Saw and Planing Mill Workers, Whitecourt Zone.—An Order in Council, dated September 12, and published in *The Alberta Gazette,* September 30, makes binding in the Whitecourt zone the terms of a schedule applying to all employees of saw-mills, planing mills, box factories, woodworking plants, logging and railway tie contractors.

The schedule is to be in effect from October 10, 1939, to October 9, 1940, or thereafter "during pleasure".

Hours not to exceed 10 per day, 60 per week except: cooks, cookees, bull cooks, night watchmen, barn bosses, blacksmiths, engineers, teamsters, truck drivers and millwrights, blacksmiths' helpers, lake and river drivers, tractor drivers, conductors, firemen, foremen and clerks, all of whom may work the hours required for their duties.

Minimum monthly wage rates to be paid in addition to board and lodging: cooks in camps of 100 men or more $75; cooks in camps of less than 100 men $50; assistant cooks in all camps $35; blacksmiths, engineers and foremen $50; truck drivers $45; edgermen $40; cross-cut filers, tractor drivers and canters $35; scalers and talleymen $32.50; top loaders, tail sawyers, trimmermen, handymen and barn bosses $30, sawyers $27; teamsters, skidders, roadmen, swampers, bull cooks, cookees, labourers, shipping and yard men $26; planermen $50. Night wachmen to be paid a minimum of $2.50 per shift.

Log cutters may be employed on contract or piece work at not less than 3 cents per log. Persons engaged on a piece work basis may be charged not more than $1.00 per day for suitable board and lodging. Where single meals are charged to any sub-contractors or piece workers, not to exceed 35 cents per meal.

Any tools, goods or merchandise sold by an employer to any employee to be sold at a price not exceeding 10 per cent above prevailing retail price of such goods.

Manufacturing: Miscellaneous Wood Products

Saw and Planing Mill Workers, Whitecourt Zone.—These workers are included in the schedule summarized above under "Logging".

Construction: Buildings and Structures

Structural Steel Workers, Edmonton.—An Order in Council, dated August 16, and published in *The Alberta Gazette,* September 15, makes binding the terms of a schedule governing the structural steel industry in the city of Edmonton and within 25 miles of the city hall, from September 25, 1939, to September 24, 1940, or "during pleasure".

This schedule is similar to the one previously in effect and summarized in the Labour Gazette, August, 1938, page 949, with these exceptions:

One apprentice allowed to two journeymen on ornamental work; one apprentice to each rivetting crew, four men to constitute a rivetting crew.

Minimum wages and hours are unchanged at 95 cents per hour for structural steel workers, 60 cents per hour for apprentices, with a 44 hour week.

Lathers, Calgary.—An Order in Council dated September 12, and summarized in *The Alberta Gazette,* September 30, makes binding the terms of a schedule of wages and hours for the lathing industry in the city of Calgary and within a radius of 25 miles of the city hall. The schedule is to be in effect from October 10, 1939, to October 9, 1940, or "during pleasure".

This schedule is similar to the one previously in effect and summarized in the Labour Gazette, August, 1937, page 924 and August, 1938, page 949. The hours remain at 40 per week and minimum wage rates at 90 cents per hour for metal lathers and 75 cents for wood lathers.

Service: Recreational

Bowling Alleys, Edmonton.—An Order in Council, dated September 1, and published in *The Alberta Gazette,* September 15, makes binding the terms of a schedule governing the bowling alleys industry in the city of Edmonton from September 25, 1939, to September 24, 1940, or thereafter "during pleasure".

This schedule is the same as the one previously in effect and summarized in the Labour Gazette, April, 1938, page 454, and September, page 1049, wages for pinsetters being 2½ cents per line for five pins or duck pins and 3½ cents per line for ten pins.

Bowling Alleys, Calgary.—An Order in Council, dated September 1, and published in *The Alberta Gazette,* September 15, makes binding the terms of a schedule governing the bowling alleys industry in the city of Calgary from September 25, 1939, to September 24, 1940, or thereafter "during pleasure".

This schedule is similar to the one previously in effect and summarized in the Labour Gazette, February, 1938, page 217 and September, page 1049, wages for pinsetters being 2½ cents per line for five pins or duck pins and 3½ cents per line for ten pins.

A new clause provides that foul line judges be paid for actual hours worked and at rates to be agreed upon and approved by the Advisory Committee.

PRICES RETAIL AND WHOLESALE IN CANADA, SEPTEMBER, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

THE cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was slightly lower at the beginning of September than for the previous month due to a decline in the cost of foods while the Dominion Bureau of Statistics weekly index number of wholesale prices was substantially higher at the end of the month than at the beginning. The increase was due in large part to higher prices for certain farm products and raw materials following the outbreak of war.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.07 at the beginning of September as compared with $8.16 for August; $8.52 for September, 1938; $8.72 for September, 1937; $8.28 for September, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.64 for September, 1929. Seven items in this list of 29 were higher in cost in the month under review than in the previous month, seven were lower and fifteen were unchanged. The only important change was a seasonal fall in the cost of potatoes. Other changes were, increases in the cost of butter, eggs and evaporated apples and decreases in the cost of beef, mutton, fresh pork and bacon. Including the cost of fuel and rent with that of foods the total cost was $16.93 at the beginning of September as compared with $17.02 for August; $17.41 for September, 1938, and September, 1937; $16.84 for September, 1936; $15.41 for June, 1933 (the low point in recent years); $21.90 for September, 1929; $20.90 for September, 1922; $26.92 for July, 1920 (the post war peak); and $14.33 for September, 1914. Both fuel and rent were practically unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number advanced seven per cent between September 1 and September 22 and was steady at the higher levels for the remainder of the month. The figures are 77.9 for the weeks ended September 29 and 22 as compared with 72·8 for the week ended September 1 and 71·9 for the week ended August 18 which was the lowest point recorded since May, 1936. The latest figures available on a monthly basis are for August when the index number was 72.4 as compared with 74·5 for September, 1938; 85·0 for September, 1937; 76·4 for September, 1936; 63·5 for February, 1933 (the low point in recent years); 97·8 for September, 1929; 103·5 for September, 1921; 164·3 for May, 1920 (the post war peak); and 67·2 for September, 1914. The advance in wholesale prices which occurred during the first half of the month under review resulted from the increased demand for many products following the outbreak of war and from the disturbance in foreign exchange. The advance in the index during this period was due in great part to higher prices for grains, milled products, livestock, meats, potatoes, raw textiles, raw sugar, hides, dairy products and non-ferrous metals. During the last half of the month there was little change in the index, advances in the prices of some commodities being offset by declines in others. In this latter period some of the advance recorded in the prices of many commodities earlier in the month was lost notably in the prices of grains, milled products, meats, eggs, potatoes and raw sugar.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of September of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the Labour Gazette, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the Labour Gazette for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in Other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended September 29, 1939; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(*Continued from page 1072*)

Retail Prices

Meat prices were somewhat lower at the beginning of September than one month earlier. Mutton was about 2 cents per pound lower at an average price of 22·6 cents per pound which was the lowest recorded during 1939 to date. Sirloin steak was down from 28 cents per pound to 27·7 cents and fresh pork from 23·8 cents per pound to 23·5 cents. Egg prices were higher in most localities the Dominion average price for fresh grades being 32·8 cents per dozen at the beginning of September as compared with 30·3 cents for August. Increases in the price of milk were reported from several cities and the Dominion average rose fractionally to 10·8 cents per quart. Creamery butter changed little during the month at 26·2 cents per pound but was about 2 cents per pound lower than for September, 1938. The price of onions was down from an average of 4·9 cents per pound at the beginning of August to 4·1 cents at the beginning of September. Potatoes declined in price from $1.88 per 100 pounds at August 1 to $1.51 at September 1. Prices were considerably lower in Quebec than in other provinces. The price of granulated sugar has averaged 6·6 cents per pound since July as compared with 6·3 at the beginning of September 1938. United States anthracite coal was practically unchanged at an average price $14.08 per ton.

The following are the prices per ton reported for Welsh coal "cobbles" and "French nut" at the beginning of September; Halifax $15.25; Charlottetown $13.50-$14; Moncton $16; Saint John $14; Quebec $13.50; Three Rivers $15 and $14; Sherbrooke $14.75; St. Hyacinthe $14.50; Thetford Mines $17.25; Montreal $14.25 and $14.50; Ottawa $16.25; Kingston $16; Belleville $15; Peterborough $16.25; Oshawa $15; Toronto $14.50; St. Catharines $15; Hamilton $14.50 and $14; Brantford $16.25; Galt $16-$16.50; St. Thomas $16.50; Cobalt $18.50; Timmins $19; Port Arthur $17.75; Fort William $17.75; Winnipeg $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables which appear quarterly, give the official and certain other index numbers of the cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries. The following notes afford information as to recent changes in prices in several of these countries.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number on the base 1930 = 100, was 98·1 for August, showing no change from the figures for the previous two months. The index of prices of food and tobacco was 90·4, showing a decline of 0·9 per cent from the figure for the previous month. The prices of cereals rose 1·2 per cent, those of meat, fish and eggs rose 0·2 per cent but the prices of miscellaneous foods declined 3·1 per cent. The index of prices of industrial materials and manufactures was 102·2, showing an increase of 0·5 per cent over the figure for July, the chief increases in the sub-groups being 2·5 per cent in miscellaneous products and 2·3 per cent in non-ferrous metals; the largest decrease was one of 1·2 per cent in textiles other than wool and cotton.

The *Statist* index number on the base 1867-1877=100, was 90·4 at the end of August as compared to 88·7 at the end of July, an increase of 2·3 per cent for the month. The index for foodstuffs increased 1·4 per cent during August, while that for industrial materials increased 2·3 per cent. The general index for the end of August, 1938, was 88·6, the corresponding figure for this year being 2·0 per cent higher.

COST OF LIVING.—The Ministry of Labour index number on the base July, 1914 = 100 was 155 at the beginning of September showing no change from the previous month. The index of food prices was 138 as compared to 137 the previous month, the increase being due mainly to increases in the prices of eggs and of fish which were only partially offset by decreases in the prices of potatoes. With the exception of the fuel and light group in which prices increased slightly, the indexes for the other groups were unchanged.

France

WHOLESALE PRICES.—The General Statistical Office index number, on the base July, 1914 = 100, was 672 for August as compared with 677 for July, a decrease of 0·7 per cent for the month. The index of food prices declined from 613 to 598 or 2·4 per cent, there having been declines in all of the food sub-groups. The index of prices of industrial materials rose during the same period from 734 to 738 or 0·5 per cent; while textile prices declined 3·6 per cent, the prices of minerals and metals increased 1·6 per cent and the prices of miscellaneous products rose 0·8 per cent.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 101 for June showing no change from the figure for the previous month. The index of food prices rose from 103 to 104 during the month while the prices of non-foods remained unchanged at 100.

COST OF LIVING.—The official index number of the working class cost of living at Bombay, on the base July, 1933 to June, 1934=100, was 105 for July as compared to 104 for June. During the month the index of food prices rose from 112 to 114, that for fuel and lighting materials rose from 98 to 100 and that for miscellaneous products rose from 95 to 96. The indexes for clothing prices and rent were unchanged at 85 and 100 respectively.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number on the base 1926=100 was 75·4 for July as compared with 75·6 for June. Four of the ten groups making up the index showed declines. Chemicals and drugs fell 0·9 per cent; miscellaneous commodities, 0·5 per cent; fuel and lighting materials, 0·3 per cent; and foods 0·1 per cent. The textile products group advanced 0·4 per cent; farm products rose 0·3 per cent; and the hides and leather products group and the building materials group each advanced 0·2 per cent. Metal and metal products and house furnishings remained unchanged. The general index for July was at the lowest point it has reached in the past five years and was 4.3 per cent lower than a year ago.

COST OF LIVING.—The index number of the Bureau of Labour Statistics on the base 1913=100, was 142·5 on June 15, 1939, showing a decrease of 0·3 per cent from the figure for March 15, which was 142·9. The index of food prices declined from 121·1 to 120·9 during the quarter, clothing prices declined from 145·5 to 145·3, rent declined from 113·3 to 113·2, prices of fuel and lighting materials from 163·9 to 158·4, while the indexes of prices of furniture and sundries were unchanged at 174·4 and 196·4 respectively.

The index number of the Industrial Conference Board on the base 1923=100, was 84·5 for August as compared with 84·9 for July, a decrease of 0·5 per cent for the month. During the month food prices declined 1·8 per cent, the prices of fuel and lighting materials increased 0·2 per cent, while the indexes of the clothing, housing and sundries groups were unchanged. The general index was 1·6 per cent lower than in August, 1938.

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 39] NOVEMBER, 1939 [NUMBER 11

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment in Canada showed a further pronounced expansion at October 1, according to statements received by the Dominion Bureau of Statistics from 11,891 employers, each with a minimum of fifteen employees, whose staffs aggregated 1,186,786 persons, as compared with 1,166,242 in the preceding month. The average change in employment between September and October in the years since 1920 has been a small increase; the improvement this year greatly exceeded this average gain, and was also larger than that noted at the beginning of October in the autumn of 1938. The index (based upon the average for the calendar year 1926 as 100) stood at 121·7 at October 1, 1939, compared with 119·6 at September 1, 1939, and 116·7 at October 1, 1938. At the same date in recent years of the record, the index has been as follows: 1937, 125·7; 1936, 110·1; 1935, 106·1; 1934, 100·0; 1933, 90·4; 1932, 86·7; 1931, 103·9; 1930, 116·2; 1929, 125·6; 1928, 118·8 and 1927, 110·3. The latest index is thus higher than at the beginning of October in any of these years except 1937 and 1929; it was also higher than in the early autumn of preceding years since 1920. These index numbers are calculated from returns furnished by employers in the following industries: manufacturing, logging, mining, communications, transportation, construction and maintenance, service (hotels and restaurants and laundries and dry-cleaning establishments), and trade.

Unemployment in Trade Unions.—At the beginning of October, 1939, the percentage of unemployment reported to the Department of Labour by local trade union members throughout Canada stood at 9·1 in comparison with 10·9 per cent of inactivity at the beginning of September, 1939, and with a percentage of 10·4 at the beginning of October, 1938. The percentage for October was established from the reports received from 1,932 labour organizations with a total of 243,569 members, 22,081 of whom were shown as without employment.

89092—1½

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada for September, 1939, showed a slight gain over August of the current year and a more noticeable one over September, 1938, in the volume of business transacted, as indicated by the average daily placements effected. Logging, services and manufacturing showed the highest gains under both comparisons, while substantial declines from August, 1939 and September, 1938, were shown in construction and maintenance and from the previous month in farming. Vacancies in September, 1939, numbered 41,433, applications 73,178, and placements in regular and casual employment 39,608.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was $17.69 at the beginning of October as compared with $16.93 for September. The increase for October was due to increases in the cost of foods and fuel. Comparative figures for certain earlier dates are $17.35 for October, 1938; $17.51 for October, 1937; $16.87 for October, 1936; $15.41 for June, 1933 (the low point during recent years); $21.96 for October, 1929; $22.01 for October, 1921; $26.92 for July, 1920 (the post war peak); and $14.48 for October, 1914. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics was somewhat higher at the end of October than at the end of September. Comparative figures are 79·0 for the week ended October 27; 77·9 for that ended September 29; and 72·8 for the week ended September 1. The advance in October was due in large part to higher prices for raw textiles and other farm products, pulp, lumber and steel sheets. The latest figures on a monthly basis are for September when the index number was 78·2 as compared with 74·1 for October, 1938; 84·7 for October, 1937; 77·1 for October, 1936; 63·5 for February, 1933 (the low point in recent years); 96·8 for October, 1929; 99·6 for October, 1921; 164·3

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended October 27, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending October 28, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending October 7, September 9 and August 12, 1939; October 8, September 10, and August 13, 1938. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation. (9) Excluding gold.

for May, 1920 (the post war peak); and 66·8 for October, 1914.

Business Statistics.—The latest statistics available reflecting industrial conditions in Canada are given in the table on page 1086. The index of the physical volume of business in September was slightly higher than in August when it was at the highest level recorded since November, 1937. Increased activity was indicated in the month under review over the preceding month in manufacturing, output of electric power and in distribution, while somewhat lower activity in mineral production and in construction was indicated by the indexes for these two groups. In mineral production increases in the exports of copper and nickel and in shipments of gold were more than offset by decreases in zinc exports, bauxite imports and in the production of coal. In manufacturing greater activity was indicated in the textile, newsprint and iron and steel industries. In distribution improvement was recorded in trade employment, carloadings and imports while exports were lower. Of the five principal groups mentioned above all were higher in September, 1939, than in September, 1938, with the exception of construction in which a decrease in activity was recorded. Information available for October shows advance in wholesale prices and in employment as compared with September, 1939, and with October, 1938. The number of cars of revenue freight and the gross earnings of the Canadian National Railways while higher than in October, 1938, were considerably lower than in September, 1939. Contracts awarded were lower in both comparisons.

Strikes and Lockouts.—The number of strikes and lockouts during October was 25, involving 6,630 workers with time loss of 35,201 man working days, as compared with 17 disputes during September, involving 8,804 workers and causing time loss of 23,652 days. Most of the time loss during October was due to strikes involving coal miners in Nova Scotia and Saskatchewan, gold miners in British Columbia, textile factory workers at St. Jerome, P.Q., and Cornwall, Ont., fish handlers at Lockeport, N.S., and sheet metal factory workers at Toronto, Ont. In September most of the time loss was due to strikes of coal miners in Nova Scotia. In October, 1938, there were 32 disputes, involving 3,233 workers with time loss of 17,295 days, due chiefly to strikes of coal miners in Saskatchewan and Alberta and automobile and automobile parts factory workers at Windsor, Ont. Of the twenty-five disputes recorded for October, 1939, nineteen were terminated during the month, two resulting in favour of the workers and three in favour of the employers involved while compromise settlements were reached in six cases and the results of eight disputes were recorded as indefinite. Six disputes, involving approximately 2,000 workers, were recorded as unterminated at the end of October. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions involved.

Industrial Disputes Investigation Act

During October the department received one application for the establishment of a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act. Two boards were established by the Minister of Labour during the month and the personnel of a board established during the preceding month was completed.

Particulars concerning proceedings under the Act will be found on page 1092.

Industrial Disputes Investigation Act applicable to war industries and defence projects

Extension of the provisions of the Federal Industrial Disputes Investigation Act, making them applicable to any dispute between employers and employed engaged in war work comprising munitions, supplies and defence projects, was announced on November 7 by Hon. N. A. McLarty, Minister of Labour. Action to this effect was taken by Order in Council, under authority of the War Measures Act, with a view to providing means for adjustment of disputes in all essential war activities, thus avoiding strikes and lockouts.

Ordinarily, provisions of the Industrial Disputes Investigation Act apply only to disputes arising in mines and certain public utility industries including transportation and communication. The action announced by the Minister of Labour will extend greatly the scope of the act for the duration of the war. It was felt that such a step would contribute materially to the avoidance of industrial strife in defence activities and help to ensure maximum production of war necessities.

(The Industrial Disputes Investigation Act provides machinery for the establishment of Boards of Conciliation and Investigation on application of either party to a dispute. The Department of Labour endeavours through its conciliation service to effect a settlement. If these efforts fail, the Minister then establishes a board, on which employers and em-

ployees each name a representative. These two board members confer on the choice of a third member who is chairman of the board. If they fail to agree on a selection, appointment of a chairman is made by the Minister.)

The text of the Order in Council is as follows:

His Excellency the Governor General in Council, on the recommendation of the Minister of Labour and under and in virtue of the War Measures Act (chap. 206, R.S.C. 1927), is pleased to order and it is hereby ordered that the provisions of the Industrial Disputes Investigation Act (chap. 112, R.S.C., 1927), other than section 64 thereof, shall specifically apply in respect of any dispute between employers and employed engaged in the construction, execution, production, repairing, manufacture, transportation, storage or delivery of munitions of war or supplies, and in respect also of the construction, remodelling, repair, or demolition of defence projects, as hereinafter respectively defined, intended for the use of His Majesty's naval, military or air forces or for the use of the forces of any of His Majesty's allies in the present war.

His Excellency in Council is hereby further pleased to order that in and for the purposes of this Order.

(*a*) "munitions of war" means arms, ammunition, implements of war, naval, military or air stores, or any articles deemed capable of being converted thereinto, or made useful in the production thereof;

(*b*) "supplies" includes materials, equipment, ships, aircraft, automotive vehicles, goods, stores and articles or commodities of every kind including, but not restricting the generality of the foregoing (i) articles and equipment which, in the opinion of the Minister of Labour, would be essential for the needs of the Government or of the community in war; and (ii) anything which, in the opinion of the Minister of Labour, is, or is likely to be necessary for or in connection with the production, storage or supply of any such article as aforesaid;

(*c*) "defence projects" includes the construction, erection, repair, improvement or extension of buildings, aerodromes, airports, dockyards, roads, defence fortifications or other naval, military or air force works.

Conference in Ottawa on Wartime Duties of Employment Service

On October 16 and 17 a conference of Dominion and provincial officials was held in Ottawa for the purpose of determining the policy to be pursued by the Employment Service of Canada in ensuring the maintenance of an adequate supply of skilled and semi-skilled workers for wartime industrial requirements. The conference, which convened on the invitation of the Minister of Labour, was attended by representatives of the Dominion Department of Labour and of all the provinces which participate in the operation of the Employment Service of Canada except Quebec, as follows:—

Dominion Department of Labour:
Hon. Norman A. McLarty, Minister of Labour;
W. M. Dickson, Deputy Minister of Labour;
R. A. Rigg, Director, Employment Service of Canada;
V. C. Phelan, Assistant Director, Employment Service of Canada;
A. J. Odam, Statistician, Employment Service of Canada.

Alberta:
M. W. Robertson, Provincial General Superintendent, Employment Service of Canada.

British Columbia:
Adam Bell, Deputy Minister of Labour;
J. H. McVety, Provincial General Superintendent, Employment Service of Canada.

Manitoba:
A. MacNamara, Deputy Minister of Public Works and Labour;
G. Collins, Engineer, Department of Labour.

New Brunswick:
H. R. Pettigrove, Fair Wage Officer, Department of Labour;
W. J. Ryan, Superintendent, Saint John Office, Employment Service of Canada.

Nova Scotia:
R. H. McKay, Deputy Minister of Labour;
Dr. A. E. Cameron, Deputy Minister of Public Works and Mines;
F. O. Schaefer, Superintendent, Halifax Office, Employment Service of Canada.

Ontario:
Hon. N. O. Hipel, Minister of Labour;
J. F. Marsh, Deputy Minister of Labour.

Saskatchewan:
H. R. Johnstone, Acting Commissioner of Labour;
G. E. Tomsett, Provincial General Superintendent, Employment Service of Canada.

For purposes of consultation, representatives of the Department of National Defence, the War Supply Board, the Dominion-Provincial Youth Training Program and the Canadian Manufacturers' Association also were in attendance at various sessions of the conference.

The conference decided upon the immediate institution of a nation-wide survey as to the availability of skilled and semi-skilled labour to meet the demand consequent upon the placing of large contracts for war supplies by the British and Canadian Governments and the inauguration of the training scheme for Empire aviators. Voluntary registration of workers for this purpose is at present being carried on throughout the Dominion by the offices of the Employment Service of Canada.

Extension of youth training program

Extension of projects in the Dominion-Provincial Youth Training Program so as to help along Canada's war effort, were announced on November 6 by Hon. N. A. McLarty, Minister of Labour. These projects will operate in all provinces which have recommended and approved them, and the work will be carried on in more than 400 centres. Instruction will include physical training, health, first aid, citizenship and other group activities. Last year over 20,000 unemployed young people were enrolled in this project, and it is anticipated that the number will be doubled this year.

During the summer valuable work has been done in conserving and developing natural resources in the primary industries of forestry, mining and prospecting, over 6,000 young men having been enrolled in these projects. Not only did they receive valuable training, but the improvement in their morale and physique has been most marked. About five months work and training were planned but many of those in training enlisted after the outbreak of war.

In the field of training for industry, effort has been made to concentrate on occupations where there will be increased demand for skilled workers in war contract work, particularly in the metal working trades. To help the Youth Training program determine in what occupations training should be concentrated, an effort is being made to have a survey in all provinces carried out by co-operation of the Employment Service, employers and organized labour. This will seek to ascertain the available supply of labour in skilled occupations essential to war production. Workers can then be trained for those jobs where a shortage of skilled mechanics may arise.

Training classes for rural young people in a wide range of subjects pertaining to agriculture and rural homecraft are proceeding. As definite needs arising from the war become apparent in the different provinces, the curricula of classes will be adapted to meet them and to follow war time policies as determined by the Dominion and Provincial Departments of Agriculture. Stress is being placed on such activities as farm mechanics, conservation and utilization of foods, homecraft and handicrafts. Provision is also made for instruction in health, first aid, physical training and citizenship.

Statistics of relief recipients for September

The grand total of all classes of persons on urban and agricultural relief across Canada in September this year was 541,500, a decrease of 32 per cent from the previous month. These figures were released recently by the Honourable Norman A. McLarty, Minister of Labour, and are the preliminary results from the re-registration of all direct relief cases carried out for the Department of Labour by the provinces and municipalities in September. The grand total for September, 1939, compared with the same month of 1938, showed a decrease of 2·2 per cent, while compared with September, 1937, the Dominion figure was down by slightly over 25 per cent.

Unemployed but fully employable persons on relief in September this year numbered 121,000, a decrease of eleven and a half per cent from the revised August total. The figure for September this year, however, showed an increase of 5·6 per cent over September a year ago, and of 3·7 per cent over September, 1937, these increases being traceable to the rise in the figure for the Province of Quebec where this year direct relief largely replaces public works projects to relieve unemployment.

A total of 470,000 persons were receiving non-agricultural relief in September, a decrease of eleven and a half per cent from the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of 5·7 per cent from the figure for September, 1938, and was 3·1 per cent more than the figure for September two years ago. The rise in the total on non-agricultural relief was very largely due, likewise, to the changed policy in Quebec.

The number of farmers and members of their families in receipt of agricultural relief showed a sharp decline from a year ago. A total of 15,000 farmers who, together with their dependents, account for a farm population of 71,500, were reported as receiving agricultural aid for subsistence in September.

The Dominion total on agricultural relief in September showed a decrease of 73 per cent from the August figure, was 34 per cent less than in September, 1938, and was 73 per cent less than in September, 1937. The decrease in the total of farmers and their families on relief was due to the altered situation in Saskatchewan, where the number dropped very substantially. In that Province, September showed a decrease of 48 per cent from a year ago, a decrease of 80 per cent from

August, 1939, and a decrease of 81 per cent from September, 1937. The Saskatchewan total on agricultural relief still represented, however, over 61 per cent of the Dominion total.

War activities of Dominion Council of Health

Meeting under the emergency of war, the sessions of the Dominion Council of Health held in Ottawa on October 11 and 12 were featured by discussion of problems related to the national war effort, in the prosecution of which the public health authorities—Dominion and provincial—unreservedly placed their laboratory facilities and trained personnel.

Dr. R. E. Wodehouse, Deputy Minister of Pensions and National Health, as chairman of the Council, presided at the meetings, which were attended by deputy ministers of health or chief medical officers of the provinces. The Department of National Defence was represented by Captain S. G. Shier, Royal Canadian Army Medical Corps. Also taking part in the meeting were medical officers of the Department of Pensions and National Health, including Dr. J. J. Heagerty, Director of Public Health Services, Dr. G. J. Wherrett, Secretary of the Canadian Tuberculosis Association, Dr. Gordon Bates, General Director of the Health League of Canada, and others.

On the agenda were discussions on: Wartime measures for venereal disease control; psychiatric services to the soldiers; hospotalization of psychotics; hospitalization of psychiatric services to the soldier; hospitalization of spychotics; hospitalization of slodiers; hospitalization and after-care of cases of chronic illness discovered among soldiers after enlistment; health hazards in the production of munitions; laboratory assistance in war-time; the scope of laboratory services to be extended by provincial departments; nutrition of soldiers and civilians; education of the public concerning importance of adequate nutrition; control and supervision of food supplies of soldiers and civilians by the Food and Drugs Laboratory of the Department of Pensions and National Health; provincial health services available to the militia; responsibility of provincial health departments for military camps; sanitary services and the extent of contribution to be made by provincial authorities; sanitation of camps; prevention and control of tuberculosis among soldiers; co-operation of provincial tuberculosis services in X-raying recruits; child care during the war; enlistment of public health personnel; jurisdiction in the sanitary control of army camps; disposal of information obtained by public health personnel showing subservient activities on the part of individuals and groups; special clinics or use of the regular established clinics; uniform systems of keeping medical war records; reciprocal reporting of communicable diseases; registration of civilian deaths due to enemy action; communicable disease control; and the importance of maintaining existing health services at a high level of efficiency.

Establishment of Nova Scotia Department of Industry

The establishment of a Nova Scotia Department of Industry was announced on October 25 by the provincial premier, Hon. Angus L. MacDonald.

The Order in Council amending "The Public Service Act" providing for the new Department, also designated the Hon. George Edward Hagen as the Minister of Industry.

In making the announcement of the creation of this new administrative department, Premier MacDonald said that "the necessity for such a department would seem to be greater than ever now," adding that "the field is new, and there is undoubtedly much preliminary study necessary before the department can expect to accomplish results." Mr. MacDonald referred to investigations into the province's natural resources made by the Provincial Economic Council, the Department of Agriculture, and other bodies, and stated that in so far as these related to industry such would be available to the new department.

Mandatory revision of hours and wages in U.S.A.

In accordance with the terms of the mandatory wages and hours schedule set up under the United States Fair Labor Standards Act (LABOUR GAZETTE, July, 1938, page 719, etc.) working hours were reduced effective October 24, from a maximum of 44 to 42 per week, and minimum wages of persons employed in inter-state commerce or in the production of goods for interstate commerce, were increased from 25 cents to 30 cents per hour.

The Fair Labor Standards Act passed in 1938 required certain concerns to pay minimum wages of not less than 25 cents an hour for the first year the Act was in operation, 30 cents an hour for the next six years, and 40 cents an hour thereafter. The Act also stipulated that concerns subject to the measure must observe a maximum work week of 44 hours for the first year, 42 hours per week for the second year of the legislation's operation, and 40 hours per week thereafter.

Thus, in accordance with the Act, minimum

rates of wages for persons employed in concerns engaged in inter-state commerce, or in the production of goods for inter-state commerce, must be raised to a minimum of 40 cents per hour by October 24, 1945, while the forty-hour week, the objective of the law, will become operative in 1941.

In an announcement on October 22, the United States Department of Labor estimated that 690,000 wage earners would benefit on account of the current mandatory increase in minimum wage rates, and that 2,292,500 workers would have their working hours reduced. At the same time, revised estimates of all workers covered by the law indicated that with the present increases in employment, a total of more than 12,600,000 workers are entitled to its benefits.

Provisions of Control of Employment Act in Great Britain

In the LABOUR GAZETTE for September (page 887) a brief reference was made to wartime control of employment in Great Britain. Since then a review of the Control of Employment Act, 1939, which was given Royal Assent on September 21, is contained in the British *Ministry of Labour Gazette* for October.

This Act is designed to secure:

(1) That the Minister of Labour and National Service shall have the fullest information as to the movements of certain types of labour whose services are essential in war time industries, but whose numbers may be scarce in relation to the demand for them; and

(2) That, when it is urgently necessary, the Minister shall be able to exercise some influence on movements so that labour, particularly skilled labour, in, so far as possible, used to the best National advantage.

As summarized in the *Ministry of Labour Gazette* the main provision of the Act is that the Minister may make an Order under which it will be an offence for any employer of a specified class either to advertise for, or to engage or re-engage any employee of a cllass specified without the Minister's permission. The Act *in itself* does not affect the position of any employer or worker; it comes into operation only when specified employers and employees are covered by an Order made under the Act. No such Order has yet been made.

The Act lays down the manner in which Orders are to be made, and the limitations within which the powers given are to be exercised. There have been close consultations with representations of both employers and workers regarding the principles of the Act; and the Act itself provides for continued co-operation with Industry if and when Orders are made. Before any Order is made, the Minister must refer it to a Committee representing the workers and employers affected. The report of this Committee will be laid before Parliament with the Order. The views of interested parties will thus be fully ventilated.

If the Minister refuses consent to the engagement of a worker, he must notify to the worker an opportunity of some suitable alterative employment. If the worker does not consider the alternative suitable, he may appeal to a Court of Referees and, if his appeal is upheld, not only is the Minister's refusal of his original application set aside but the worker may be awarded a certain measure of compensation, to be determined by Regulations made under the Act, for loss suffered by reason of the refusal.

The Act also provides that, in certain circumstances, where engagements or re-engagements of workpeople are effected through approved arrangements between an employer, or organizations of employers, and Trade Unions, the Minister's consent to engagament or re-engagement will not be required. This will make for smooth working without interfering with the general purpose of the Act as the arrangements must conform to any directions given by the Minister.

Canadian delegation to I.L.O. Conference of American States

Canadian participation in the Conference of American States which are members of the International Labour Organization, (League of Nations) was announced recently in an Order in Council.

The Conference, which convenes at Havana, Cuba on November 21, is the second of its kind since the establishment of the International Labour Organization, the first having been held in Santiago, Chile, from January 2 to 14, 1936 (LABOUR GAZETTE, February, 1936, pages 159-160).

The agenda of the Conference is as follows:

(1) The Director's Report.

(2) Examination of the effect given to the resolutions of the Conference held at Santiago, Chile (partcularly as regards the work of women and children and social insurance).

(3) Organization of official institutions dealing with immigration and settlement.

The Canadian delegation is as follows:

Delegate representing the Government of Canada:

Dr. W. A. Riddell, Counsellor, Canadian Legation, Washington, D.C.

Delegate representing the Employers of Canada:

Mr. H. W. Macdonnell, Legal Secretary, Canadian Manufacturers Association, Toronto, Ont.

Delegate representing the Workpeople of Canada:

Mr. Tom Moore, President, Trades and Labour Congress of Canada, Ottawa, Ont.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

AN application for the establishment of a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act was received in the Department of Labour on October 24 from motormen, polemen, conductors and brakemen engaged in freight service by the Niagara, St. Catharines and Toronto Railway. The dispute directly affects 25 men, members of the Brotherhood of Locomotive Engineers and Brotherhood of Railroad Trainmen, respectively, who desire certain improvements in wages, hours and working conditions. The Minister of Labour established a board on November 4 to deal with this dispute and appointed Mr. Arthur W. Roebuck, K.C., a member thereof on the recommendation of the employees concerned. The company has been requested to submit a nomination for board member.

A Board of Conciliation and Investigation was also established by the Minister during October to deal with differences between the Hull Electric Company and its employees being members of Division 591, Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America (LABOUR GAZETTE, September, 1939, page 896). The board is composed as follows:

Hon. Mr. Justice Lucien Cannon, Quebec, chairman, appointed by the Minister in the absence of a joint recommendation from the other board members, Mr. Alexandre Tache, K.C., of Hull, Quebec, nominated by the employees, and Mr. Hammett, P. Hill, K.C., of Ottawa, Ontario, nominated by the company.

On October 27 His Honour Judge J. Welsford Macdonald, of Pictou, Nova Scotia, was appointed chairman of the Board of Conciliation and Investigation which had been established to deal with a dispute between the Malagash Salt Company, Limited, and its employees being members of the United Salt Mine Workers, Local Industrial Union No. 323, C.I.O. (LABOUR GAZETTE, October, 1939, Chapter 978). This appointment was made by the Minister in the absence of a joint recommendation from the other board members, Messrs. George D. MacDougall, of New Glasgow, Nova Scotia, and Foreman Waye, of Sydney, Nova Scotia, nominees of the company and employees, respectively.

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1939

THE following table shows the number of disputes, workers involved and time loss for October, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Numbers of employees involved	Time loss in man working days
*Oct. 1939	25	6,630	35,201
*Sept. 1939	17	8,804	23,652
Oct. 1938	32	3,233	17,295

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While the number of strikes and lockouts during October was greater than in September, with a decrease in numbers of workers involved, there was a considerable increase in time loss due chiefly to strikes of coal miners in Nova Scotia, Saskatchewan and Alberta, gold miners in British Columbia, textile factory workers at St. Jerome, P.Q., and Cornwall, Ont., fish handlers at Lockeport, N.S., and sheet metal factory workers at Toronto, Ont. In September most of the time loss was due to strikes of coal miners in Nova Scotia, involving 8,400 workers for a short time. In October, 1938, nearly one-half of the time loss was due to strikes of coal miners in Saskatchewan and Alberta with some small strikes in Nova Scotia and there was considerable time loss due to strikes of automobile and automobile parts factory workers at Windsor, Ont.

Five disputes, involving 200 workers, were carried over from September, including three reported to the Department too late for inclusion in the statistical table in the October issue of the LABOUR GAZETTE, namely: Coal miners, Kaydee, Alta., spinning factory workers, Listowel, Ont., and longshoremen, Goderich, Ont. Twenty disputes commenced during October. Of these twenty-five disputes, nineteen were terminated during the month, two resulting in favour of the workers and three in favour of the employers involved while compromise settlements were reached in six cases and the results of eight disputes were

recorded as indefinite. At the end of the month, therefore, there were six strikes or lockouts recorded as in progress, namely: gold miners, Pioneer, B.C., coal miners, Estevan, Sask., shoe factory workers, Toronto, Ont., sheet metal factory workers, Toronto, Ont., knitting factory workers, St. Jerome, P.Q., and fish handlers, Lockeport, N.S.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to eight such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938, one employer; dressmakers, Montreal, P.Q., January 20, 1939, one employer; stationary engineers, Toronto, Ont., March 2, 1939, one employer; and fur factory workers, Toronto, Ont., October 17, 1939, one employer, the last dispute being added to the list this month.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A stoppage of work by truck drivers on a highway construction contract near New Waterford, N.S., about the end of September has been reported in the press. It was stated that increases in rates of pay were demanded and it appears that work was resumed in a short time.

Two strikes of 480 coal miners at Stellarton, N.S., on September 27 and September 29, each for one day, to secure the reinstatement of two miners discharged for not performing work ordered to be done, were reported too late for publication in the October issue of the Labour Gazette. Work was resumed on the first occasion pending investigation and on the second when it was agreed that the two miners should be suspended for one week.

Highway construction workers in Trafalgar Township, Halton County, Ont., ceased work for three hours on October 5 demanding an increase in wages from 28 cents to 35 cents per hour. An increase of two cents per hour was given later, effective on November 1.

A cessation of work by highway construction labourers near Rimouski, P.Q., on October 13 has been reported in the press. Particulars as to the dispute have not been received but it appears that the workers demanded payment of wages in arrears.

A dispute involving men engaged to load a boat with pulpwood at Caraquet, N.B., delayed the beginning of work on October 27 until the next day. The men objected to the employment of ten experienced men from a neighbouring locality in connection with the work and blockaded the entrance to the wharf. Police were called and when the situation was explained work proceeded on the next day.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to October

Men's Clothing Factory Workers (Pants and Vests), Montreal, P.Q.—As a result of negotiations between the union representatives and the management this dispute was terminated and work was resumed on October 30 under the terms of the agreement prior to the dispute, which provided for employment of union members only.

Longshoremen, Goderich, Ont.—Men engaged to load a steamship with salt ceased work on September 28 demanding 50 cents per hour. They were replaced by other workers. Later a settlement was reached on a tonnage basis which the workers stated afforded higher earnings. It appears that 50 cents per hour was the rate paid by certain other steamship companies for other cargoes and that the longshoremen worked for some of these while on strike against loading cargoes of salt.

Disputes Commencing During October

Fishery Employees, Erieau, Ont.—Employees of a fish company ceased work on October 6 demanding increases in wages for the boat crews, packers and net repairmen. As a result of negotiations work was resumed on October 10, a compromise having been arranged which provided for increases in wages of ten per cent. The shares of the boat crews in the catch were not increased.

Coal Miners, Lethbridge, Alta.—Employees in one colliery of a coal mining company ceased work on October 4 against the employment of three miners from another mine. The management claimed that the agreement with the United Mine Workers of America provided that the right to hire and discharge miners was vested in the management. The district officers of the union advised the local union that work should be resumed and the question dealt with under the terms of the agreement as to the settlement of dis-

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1939*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to October, 1939.				
MINING, ETC.—				
Coal miners, Kaydee (Luscar District,) Alta.	1	30	300	Commenced Sept. 21; against discharge of workers for alleged interference with management of mine; terminated Oct. 12; conciliation (federal); compromise.
MANUFACTURING—				
Textiles, Clothing, etc.—				
Men's clothing factory workers (pants and vests), Montreal, P.Q.	1	85	2,000	Commenced Aug. 7, 1939; alleged violation of agreement *re* replacement of dismissed worker; terminated Oct. 28, 1939; negotiations; in favour of workers.
Spinning factory workers, Listowel, Ont.	1	22	176	Commenced Sept. 25, 1939; for increased wages; terminated Oct. 10, 1939; return of workers; in favour of employer.
Metal Products—				
Automobile parts, factory workers, Windsor, Ont.	1	28	84	Commenced Sept. 7, 1939; for reinstatement of workers, increased wages, recognition of union, etc.; terminated Oct. 4, 1939; conciliation (provincial); compromise.
TRANSPORTATION—				
Water—				
Longshoremen, Goderich, Ont.	1	35	150	Commenced Sept. 28, 1939; for increased wages; terminated Oct. 15, 1939; negotiations; compromise.
(b) Strikes and Lockouts commencing during October.				
FISHING, ETC.—				
Fishery employees, Erieau, Ont.	1	10	25	Commenced Oct. 6; for increase in wages and reduction in hours; terminated Oct. 9; negotiations; compromise.
MINING, ETC.—				
Coal miners, Lethbridge, Alta.	1	230	1,200	Commenced Oct. 4; *re* interpretation of agreement in connection with employment of new workers; terminated Oct. 10; return of workers; in favour of employer.
Gold miners, Pioneer Mines, B.C.	1	142	2,800	Commenced Oct. 8; for recognition of union, check-off for union dues and increased wages; unterminated.
Coal miners, Sydney Mines, N.S.	1	950	3,800	Commenced Oct. 11; *re* method of payment for overtime work; terminated Oct. 14; conciliation (provincial); indefinite.
Coal miners, Florence, N.S.	1	700	2,800	Commenced Oct. 11; *re* delay in negotiations as to five discharged workers; terminated Oct. 14; conciliation (provincial); indefinite.
Gold miners, Zebellos, B.C.	1	89	890	Commenced Oct. 14; alleged lockout *re* discharge of foreman; terminated October 25; conciliation (provincial); indefinite.
Coal miners, Estevan district, Sask.	5	400	5,000	Commenced Oct. 16; for employment of members of one union only and for signed agreement providing for increased wages and reduced hours; unterminated.
Coal miners, Sydney Mines, N.S.	1	200	200	Commenced Oct. 19; for full day's pay for certain miners working less than eight hours; terminated Oct. 19; return of workers pending inquiry; indefinite.

STRIKES AND LOCKOUTS IN CANDA DURING OCTOBER, 1939*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(b) Strikes and Lockouts commencing during October—*Concluded*				
Coal miners, New Aberdeen, N.S.	1	93	1,950	Commenced Oct. 7; for increase in contract rate owing to nature of seam; terminated Oct. 31; return of workers pending negotiations; indefinite.
Coal miners, Reserve, N.S.	1	750	750	Commenced Oct. 26; against reduction in brushing alleged to reduce earnings; terminated Oct. 26; return of workers pending inquiry; indefinite.
MANUFACTURING—				
Fur and Leather Products—				
Fur factory workers, Toronto, Ont.	1	8	8	Commenced Oct. 17; alleged violation of agreement *re* employment of union members only; working conditions no longer affected by Oct. 17; replacement; in favour of employer.
Boots and Shoes—				
Shoe factory workers, Toronto, Ont.	1	16	64	Commenced Oct. 27; for union agreement with increased wages; unterminated.
Textiles, Clothing, etc.—				
Textile factory workers (artificial silk), Cornwall, Ont.	1	1,000	2,500	Commenced Oct. 21; for increased wages, etc.; terminated Oct. 23; negotiations; compromise.
Knitting factory workers, St. Jerome, P.Q.	1	600	4,200	Commenced Oct. 24; for recognition of union, increased wages and reduced hours; unterminated.
Miscellaneous Wood Products—				
Wood (veneer) factory workers, St. John, N.B.	1	95	190	Commenced Oct. 6; for changes in overtime working conditions; terminated Oct. 7; negotiations; indefinite.
Metal Products—				
Machinists, Trenton, N.S.	1	100	450	Commenced Oct. 13; for increased wages; terminated Oct. 18; return of workers pending negotiations; indefinite.
Sheet metal and steel ware factory workers, Toronto, Ont.	1	585	2,340	Commenced Oct. 27; for closed shop union agreement providing for increased wages, improved conditions, etc.; unterminated.
CONSTRUCTION—				
Highway—				
Truck drivers, Charlottetown district, P.E.I.	1	50	100	Commenced Oct. 27; for increased wages; terminated Oct. 28; return of workers; compromise.
TRADE—				
Fish handlers, Lockeport, N.S.	2	400	3,200	Commenced Oct. 23; alleged lockout *re* recognition of union; unterminated.
SERVICE—				
Recreational—				
Pin boys (bowling), Verdun, P.Q.	1	12	24	Commenced Oct. 1; for increased wages (piece rates); terminated Oct. 2; negotiations; in favour of workers.

*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

putes. The Western Representative of the Department of Labour also advised the local union to the same effect. Following a visit from a representative of the district union office, work was resumed on October 8.

GOLD MINERS, PIONEER MINES, B.C.—A number of employees in one mine ceased work on October 8, to secure recognition of the International Union of Mine, Mill and Smelter Workers, affiliated with the Congress of Industrial Organizations, as bargaining agent for all employees, with the check-off of union dues and an increase in wages of $1 per day. The company reported 142 on strike out of 240 employed, the others being indirectly affected, while the union reported 235 on strike. On September 28 the union had voted to ask the provincial Minister of Labour to appoint a conciliator under the British Columbia Industrial Conciliation and Arbitration Act, 1937. An official of the Department was sent to the locality to investigate and ascertain whether a majority of the employees were supporting the proposal of the union. The company refused to recognize the union on the ground that the organization did not represent all of the employees but stated that it would be recognized if the provincial authorities found it to be a properly constituted bargaining committee of employees in accordance with the statute. As amended in 1938, the statute provides that an employer must bargain collectively with a union if on December 7, 1938, it included a majority of employees affected but otherwise with a committee elected by a majority vote (LABOUR GAZETTE, February, 1939, p. 160 and January, 1938, p. 30). The provincial authorities announced that the strike was illegal as the statute forbids strikes or lockouts prior to the completion of conciliation and arbitration proceedings. On October 17 the company announced that the mine was being closed indefinitely, that bunk houses and cook houses were closed and that the tenants of company houses were being notified to vacate. On October 18 the provincial authorities announced that the officers of the union were being prosecuted for violation of the Industrial Concilation and Arbitration Act. On October 26 the union applied for a court order restraining the company from cutting off heat, light and water to bunk houses occupied by miners on strike.

COAL MINERS, SYDNEY MINES, N.S.—Employees in one of two collieries operated by one company ceased work on October 11 in protest against the delay in negotiations as to the reinstatement of five miners discharged in August. A number of strikes to secure the reinstatement of these men had occurred in the interval, each resulting in a return of workers pending further negotiations. As a result of a conference with provincial authorities the miners returned to work on October 16 pending an inquiry by the county judge, appointed as a commissioner by the provincial government.

COAL MINERS, FLORENCE, N.S.—Employees in the other of the two collieries operated by the company involved in the dispute of Sydney Mines on October 11 ceased work on the same day in protest against a change in the payment for overtime work in cleaning a wall. A minimum of two hours' pay had been made formerly and this was reduced to payment for the time required. As in the case of the strike at the other colliery work was resumed on October 16 pending a provincial inquiry.

GOLD MINERS, ZEBELLOS, B.C.—When a foreman in the mine was discharged for attacking a cook the miners signed a petition to have him reinstated and were reported to have been discharged, on October 13, alleging a lockout. An official of the provincial Department of Labour investigated the dispute and work was resumed on October 26, it having been arranged that the company would deal with a committee regarding the reinstatement of the foreman. It was reported the dispute would be referred to a conciliation commissioner appointed under the British Columbia Industrial Conciliation and Arbitration Act if a settlement was not reached. The miners claimed that a majority of the employees were members of the International Mine, Mill and Smelter Workers' Union. The employees in the mill were not involved in the dispute.

COAL MINERS, ESTEVAN DISTRICT, SASK.—Mining operations ceased in the collieries of four operating companies on October 16 as a result of a strike declared by the United Mine Workers of America, affiliated with the Congress of Industrial Organizations. These companies had refused to recognize the union and negotiate an agreement as to wages and working conditions. The dispute had been referred to a Board of Conciliation and Investigation in November, 1938, following a vote of the miners taken by the Western Representative of the Department, 504 voting to be represented by the United Mine Workers and 122 voting to be represented by the Canadian Federation of Labour union. Strikes in these and other mines from October 3 to October 24, 1938, had been called off (LABOUR GAZETTE, November, 1938, p. 1219). The report of the Board recommended that the operators should negotiate with a union chosen by a majority of the employees and grant

increases in wages, also that the eight hour day for underground work should not be exceeded. A minority report by the Board member nominated by the operators did not agree with the Board's recommendations as to increases in wages or the eight hour day. Both reports recommended some improvements in working and living conditions, (Labour Gazette, August, 1939, pp. 782-798). The operators refused to carry out the recommendations of the Board. Some of the operating companies were working under agreements with the Saskatchewan Coal Miners' Union. In September the provincial authorities, with the Western Representative of the Federal Department of Labour, attempted to bring about a settlement but were unsuccessful. The United Mine Workers claimed that most of the miners in the district had joined their union and that some twenty small mines had agreed to recognize it. When the strike was declared on October 16 the mines and roads leading to them were picketed by large numbers of men, the United Mine Workers reporting that 400 were on strike. The operators claimed that none of their employees were on strike but were prevented from reaching the mines by the pickets. On October 23 one of the operating companies secured an injunction restraining the pickets from watching and besetting the company's property, molesting and interfering with the mine property or the company's business and intimidating workmen in an attempt to prevent them from joining the Saskatchewan Coal Miners Union. On October 20 two leaders in the picket were arrested as a result of a motor car being upset and two special constables of a coal company being injured. At the end of the month the police force in the area was considerably increased and on October 31 one company reported that all its employees had reported for work.

Coal Miners, Sydney Mines, N.S.—A number of miners ceased work on October 19 in support of the demand of twelve workers for payment for a full day although the work had been completed in less time. The miners contended that this was the practice and the management is reported to have agreed to pay it for that day pending the result of the investigation into a number of similar disputes by a commissioner as a result of strikes of employees of the company on October 11. Work was resumed on the next shift.

Coal Miners, New Aberdeen, N.S.—A number of miners in one colliery ceased work on October 7 when their demand for an increase in the contract rate in one part of the mine was refused. It was claimed that the place became more difficult to work but the company claimed that this case had been decided two years previously by the umpire appointed to deal with such cases. On October 31 work is reported to have been resumed pending further negotiations.

Coal Miners, Reserve, N.S.—Employees in one colliery ceased work on October 26 in protest against an order to reduce the amount of brushing in one place, affecting ten workers, claimed to reduce earnings. It was stated that the management considered that an unnecessary amount of rock was being removed from the roof. Work was resumed next day pending inquiry as a result of a meeting by the local union but it was decided that the ten men affected would not work until a settlement had been reached, the men to be paid by the union in the meantime.

Fur Workers, Toronto, Ont.—Employees in one fur manufacturing establishment ceased work on October 17, the employer having replaced a member of the International Fur Workers Union, with which there was a closed shop agreement, by a member of another union. The employer is reported to have dismissed a worker and asked the union to supply another but this was refused as the union wished the discharged man reinstated. The employer then secured a worker who was a member of another union whereupon a strike was called alleging violation of the agreement. The employees on strike were replaced immediately by members of the other union. The establishment was picketed by both unions. At the end of the month the International Fur Workers Union reported the strike as still in effect and it has, therefore, been added to the list of disputes as to which information has been received that employment conditions are no longer affected but which have not been called off.

Shoe Factory Workers, Toronto, Ont.—Employees in one establishment ceased work on October 27 to secure an agreement with the United Shoe Workers of America with an increase in wages of twenty per cent. The union stated that this increase had been secured in four other factories. Early in November as a result of conciliation by the Ontario Department of Labour an agreement with the union was reported to have been reached providing for increases for certain classes only, in some cases twenty-five per cent.

Textile Factory Workers (Artificial Silk), Cornwall, Ont.—A number of employees ceased work on October 21 when a demand for an increase in wages of ten cents per hour was not conceded as a result of negotiations for a week to amend an agree-

ment signed in September. Some of the employees remained in the plant for a time after ceasing work. An increase in the number of workers in certain departments and on certain machines was also asked. Some of the employees continued at work. As a result of negotiations between representatives of the Rayon Section of the Textile Workers' Federal Union and the management work was resumed on October 23. An increase in wages of five per cent from November 19 to December 1, to be raised to ten per cent thereafter, was agreed to. Some concessions were made as to the increase in the number of employees and the union reported that this was to be discussed later.

KNITTING FACTORY WORKERS, ST. JEROME, P.Q.—Employees ceased work on October 24, a demand for increases in wages, reduction in working hours from 55 to 50 per week and recognition of the National Catholic Union of Knitting Employees being refused. Conciliation by representatives of the Dominion and Provincial Departments of Labour had not resulted in a settlement by the end of the month. On October 28 a picket was arrested on a charge of disturbing the peace and was fined.

WOOD FACTORY WORKERS (VENEER), SAINT JOHN, N.B.—Employees in one establishment ceased work from October 5 to October 8 in protest against overtime working conditions. It was reported that five men were discharged for refusing to work beyond the regular hours. Work was resumed when the management agreed to submit a schedule of wages and working conditions in a week's time.

SHEET METAL & STEEL WARE FACTORY EMPLOYEES, TORONTO, ONT.—Employees in one establishment ceased work on October 27 on the refusal of a demand for a closed shop agreement, with a local of the Steel Workers Organization Committee affiliated with the Congress of Industrial Organizations, with an increase in wages of ten cents per hour and changes in working conditions. The management had dealt with a committee of the union for some time but refused to recognize it as the sole bargaining agency for all employees as many of the workers were not members. Maintenance men were not called on strike. As a result of conciliation by the Ontario Department of Labour a settlement was reached and work was resumed on November 3. Wage rates were increased by five cents per hour and piece rates by seven and one-half per cent with a provision that in June, 1940, further increases would be made equal to any further increase in the cost of living. An agreement with the union employees was signed and this is outlined elsewhere in this issue.

FISH HANDLERS, LOCKEPORT, N.S.—Employees of two cold storage and fish dealing companies demanded recognition of a new union, the Canadian Fish Handlers' Union, stated to be affiliated with the Canadian Seamen's Union, and the establishments were reported to have been closed down on October 23. The Fishermen's Union was also reported to be involved. The unions requested the provincial Department of Labour to deal with the dispute and on October 31 it was reported that the Deputy Minister had met the representatives of the union, but no termination of the dispute was reported.

TRUCK DRIVERS (HIGHWAY CONSTRUCTION), CHARLOTTETOWN, P.E.I.—A number of truck drivers operating their own trucks at rates per load ceased work on October 27 demanding increases in rates owing to the poor condition of the roads. Work was resumed after one day when the authorities agreed to keep the roads in as good condition as possible.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month bringing down to date that given in the March, 1939, issue in the review of Strikes and Lockouts in Canada and Other Countries, 1938. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details of the more important ones. These details which are published after investigation do not always

agree with the information given earlier in the press.

The number of disputes which began during September was 72 and 8 were unterminated at the end of August, making a total of 80 in progress during the month, involving 23,700 workers with a resultant time loss of 73,000 man working days. Comparing the September figures with those for August, the number of disputes shows a reduction of 24·5 per cent, the number of workers a reduction of 36·2 per cent and the amount of time loss a reduction of 38·1 per cent.

Of the 72 strikes which began during September, 29 arose out of demands for increases in wages, five were against wage reductions and 16 were over other wage questions. Questions respecting working conditions led to 10 disputes, 10 arose out of questions respecting the employment of particular classes or persons and two were over questions of trade union principle.

Final settlements reached during September numbered 57. Of these, 13 were settled in favour of the workers, 35 were settled in favour of the employers and nine resulted in compromises. In the case of 10 disputes work was resumed pending negotiations.

The strike which involved the largest number of workers during September occurred at a colliery near Barnsley, Yorkshire, where a demand by 37 workers for extra payment for setting steel instead of wood bars caused a stoppage of work in which 2,037 workers were indirectly affected. The strike began on September 12 and work was resumed two days later pending negotiations.

At Wrexham, in northern Wales, 250 coal miners ceased work on September 20 demanding further increases in wages. Workers indirectly involved in this dispute numbered 1,000. The strikers demands were met by the employers and work was resumed on September 22.

A demand that three suspended workers be reinstated led to a one day strike of 1,060 workers at a colliery at Stepps, Lancashire. Work was resumed when the workers in question were reinstated after being reprimanded.

On September 27, 890 colliery workers in the same district ceased work demanding an increase of 2 shillings in their daily wage. Work was resumed on October 2 to permit the tendering of seven days' notice to cease work, this required notice, apparently, not having been given in the first instance.

On September 7, at Rotherham there was a one day strike of 700 underground and surface workpeople at a colliery at Rotherham, Yorkshire, against proposed disciplinary action against a youth for refusing to carry out instructions. Workers indirectly involved numbered 128. Information as to the settlement was not given.

At South Shields, Durham, 750 employees of one colliery ceased work on August 31, demanding increased rates for conveyor fillers. Sixty workers were indirectly involved. Work was resumed on September 1, after the increases had been granted.

Of the 80 strikes which were in progress during the month 42·5 per cent were in mining and quarrying and these involved 82·7 per cent of the workers involved in all strikes. None of the remaining strikes involved as many as 500 persons.

In the September, 1939, issue of the Labour Gazette (page 903) mention was made of a demand by the National Union of Railwaymen and the Society of Locomotive Engineers and Firemen for increases in minimum wage scales. A strike which was to have begun on August 24 was called off in the interest of public safety and the national need and as evidence of national unity in time of crisis. According to a press despatch of October 21, a national tribunal has awarded them the weekly minimum of 50 shillings which they were demanding at that time. The award is subject to acceptance by the workers and employers.

United States

Preliminary estimates of strikes in August, 1929, which as the Bureau of Labor Statistics points out are based on "scattered information from newspapers and other sources and are subject to revision as more definite reports are received" show 275 strikes as beginning during the month which with 125 unterminated at the end of July made a total of 400 in progress during the month. The number of workers involved in these disputes was approximately 100,000 with a resultant time loss of 900,000 man working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 319 strikes in progress, involving about 200,000 workers with a resultant time loss of 1,100,000 man working days.

On September 30 the contract under which members of the United Automobile Workers (a Congress of Industrial Organizations' affiliate) had been working for the Chrysler Corporation expired. During the negotiations over a new agreement, the union sought a union shop, a system of arbitration and a voice in fixing production schedules. The employers argued that granting these demands would deprive them of control over their production policies. On or about October 6 the largest of several

of the company's plants in Detroit closed, the employers claiming that the workers had deliberately slowed down production in order to achieve the effects of a strike without actually declaring a strike and thus losing benefits under the state laws dealing with unemployment benefits. The workers declared they had been locked out. As the plant which was closed supplied essential parts to other plants these were forced to close and by the middle of the month about 60,000 workers were affected. About the same time the union gave five days' notice of strike to the State Labor Board and began picketing. Negotiations were continued throughout October and into November but a settlement has not been reported. The Governor of Michigan, officials of the Federal Labor Department and the National Automobile Dealers' Association have endeavoured to aid in reaching an agreement.

CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

Summary of Recent Decisions

REPORTS have been received of four cases settled recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the LABOUR GAZETTE, September, 1939, page 904, and in previous issues, and the sixth report of the proceedings of the Board covering the period from October 1, 1933, to September 30, 1936, was issued as a supplement to the February, 1937, issue of the LABOUR GAZETTE.

The Board was established under a voluntary agreement concluded in 1918, between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war of 1914-18. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the following Railway Brotherhoods: The Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railway Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

Case No. 478—Canadian National Railways (Central Region) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.—This case dealt with the claim of a conductor and two brakemen for yard rates in connection with the operation of snow clearing equipment in the Hornepayne Yard, December 19, 1938.

The employees contended that the service performed by this crew was exclusively within the switching limits of Hornepayne Yard and that this work is usually assigned to yardmen when available. The crew claimed eight hours straight time and two hours and twenty minutes overtime at yard rates. The company denied the claim.

The company maintained that the service performed by this crew was exclusively within the switching limits of the Hornepayne Yard and was not work to which yardmen are entitled but work to which yard rates and conditions did not apply.

The Board, after hearing additional oral evidence from both parties, decided that as the work was performed by a road crew, and that as there are no yardmen employed at Hornepayne the crew in question was correctly paid, and therefore denied the claim of the employees.

Case No. 479—Canadian National Railways (Eastern Region) and the Brotherhood of Railroad Trainmen.—In this case a conductor and brakemen claimed for "100 miles held-away-from home terminal time" at Joffre, Quebec, September 26, 1938.

The employees contended that: "Inasmuch as the departure time of Train No. 408 from Joffre continues to be shown as 11.00 a.m. in all time-tables issued subsequent to effective date of Bulletin No. 269, and having regard for the language of this Bulletin, the employees take the position that such Bulletin has not in the least changed the departure time of Train 408, and was issued solely for the purpose of off-setting payment of excessive lay over under the provisions of Article 30, 3rd Paragraph, and we cannot concede to the Management the right to nullify provisions of Schedule Articles by local bulletins. Therefore, we contend that the claim of the conductor and crew should be paid."

The Railway's contention was that Train 408 is not operated between Montreal and Joffre during the navigation season and the departure of this train from Joffre was changed from 11.00 a.m. to 2.00 p.m. to ensure connections with Train 406 from Montreal due at Joffre at 1.30 p.m.

The Railways further stated that: "While it is true that the time-table shows Train No. 408 as a scheduled train from Joffre and Riviere du Loup, this is what is ordinarily termed a 'phantom' or ghost schedule. The schedule departure time for train No. 408 on September 26, 1938, was 2.00 p.m. and as this train departed prior to 6.01 p.m. on this date, it was not more than four hours late out of the distant terminal and therefore the claim for held-away-from-home-terminal time is not justified."

In sustaining the claim of the employees the Board stated: "While not questioning the right of the railway to change the departure time of a scheduled train, the fact that the change made by bulletin, operated to the disadvantage of the employees, and in the opinion of the Board did not achieve any other purpose, the Board feels that the employees, based on the advertisement of the assignment, would be unfairly treated if they were not in this instance allowed the time which, without the issuance of the bulletin. they would by Schedule rule be entitled."

Case No. 480—Canadian National Railways (Central Region) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.—This case concerned the claim of a conductor and two brakemen for deadheading from Ottawa to Pembroke Jct., January 26, 1939.

The employees in their submission pointed out that on January 26, 1939, the claimants deadheaded from Ottawa to Pembroke Jct. "to protect temporary assignment between Pembroke Jct. and Lake Traverse which temporary assignment had been advertised and bid in by this crew." For this deadhead assignment the crew claimed payment for 100 miles which was denied by the company.

The employees therefore contended that, as this crew were required to deadhead to protect a temporary assignment which lasted for approximately six weeks, and that as the crew were returned to their home terminal, Ottawa, in freight service on the completion of this temporary assignment, this deadheading was occasioned by the requirements of the Railroad and the crew should be compensated in accordance with the provisions of the current schedule.

The Railways' contention was that a further provision of the current schedule definitely provides that trainmen will not be entitled to compensation when deadheading to exercise seniority rights.

The Board denied the claim of the employees.

Case No. 481—Canadian National Railways (Central Region) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.—This case arose from a protest regarding crews in suburban service out of Montreal, being permitted to operate Trains 47 and 152, Montreal to Ottawa and return on Sundays.

The employees' contention in the dispute was as follows: "Prior to the change of time card, September, 1938, four train crews were assigned to suburban service between Montreal and Vaudreuil, and three crews to trains 47 and 50, operating daily between Montreal and Ottawa, and trains 25 and 26, operating daily except Sunday, between Montreal and Brockville. Effective with the change of time card, September, 1938, one crew in the suburban service was required to operate trains 47 and 152, Sundays only, between Montreal and Ottawa.

"This re-arrangement of assignments reduced the mileage of two crews in the Montreal, Ottawa, Brockville assignment approximately 536 miles per month, and permitted the Railway to absorb 600 constructive mileage previously allowed one crew in the suburban service."

The Railways maintained that "The re-arrangement of runs made effective September 25, 1938, was to avoid the payment of premiums under the provisions of Article 7, Rule (*a*), and not for the purpose of enabling the Railway to absorb constructive mileage. The assignments so established were not in violation of the intent and interpretations thereto of Article 7 of current schedule. This article states that short turn-around and suburban runs may be segregated or divided provided that crews are not taken off or reduced in number. The rule also states that added mileage up to mileage equalling the mileage rate divided into the guaranteed daily rate does not change, take from or add to the minimum day's pay, and this added mileage is not to be construed as 'increase in mileage' within the meaning of the article. There has been no increase in mileage, as contemplated by this article, nor has there been any reduction in crews. The change does not involve an adjustment of runs in short turn-around and suburban service, nor does it constitute combining short turn-around runs with long straightaway or turn-around runs. The combining of short turn-around runs with straightaway runs means the combination of such runs in the day's assignment and not assignments in short turn-around service on one day and straight or long turn-around runs on another day."

In addition to the foregoing both parties appeared before the Board and presented additional oral evidence.

The decision of the Board denied the claim of the employees.

WARTIME PRICES AND TRADE BOARD

Conference With Provincial Attorneys-General—Wool, Sugar and Leather Situation—Licensing of Coal Trade

DURING the past month, the activities of the Wartime Prices and Trade Board have been developed in a number of directions under the authority of the War Measures Act (LABOUR GAZETTE, September, pages 890-892).

In a press release of October 20 it was stated that while the adoption of a wool control administration in the United Kingdom has produced a temporary interruption in the arrival of Canadian supplies, the Canadian Wool Administrator is in daily contact with the British Wool Controller with a view to expediting and securing, at the earliest possible moment, adequate shipments of wool both from England and from Australia where supplies and the crop are abundant.

It was also announced that to conserve the domestic supply, an order was issued providing that licences for the export of wool, tops, rags, waste and yarn would only be issued after approval by the Wartime Prices and Trade Board. Telegraphic instructions were sent to every border point instructing officials to turn back all cars containing wool for export. This stopped the export of wools required for military needs.

The Wool Administrator also negotiated with the holders of rags, waste and reclaimed wool in order to ascertain the stocks on hand and to arrive at a fair price basis.

The work of the Board and the Wool Administrator has not been solely confined to the supply and conservation of wool; every effort has been made to stabilize prices at levels which would be fair to growers, manufacturers and consumers.

The Wartime Prices and Trade Board has not yet found it necessary to employ any of its compulsory power in setting wool prices or controlling the allocation of wool. Owners and manufacturers of wool have voluntarily agreed to prices suggested by the Administrator. As a result, the Government is purchasing military and other requirements at advantageous prices. Similar voluntary co-operation is being organized amongst dealers in rags and reclaimed wool.

A further development in the co-ordination of effort to enforce the regulations of the Board was the conference with the provincial Attorneys-General, held in Ottawa on October 26-27, the sessions being attended by not only the Board members but by officers of the Dominion Department of Justice.

Following the conference, the Hon. Norman A. McLarty, Minister of Labour, stated that the spirit of complete co-operation manifested by those charged with the administration of justice in the provinces was to him, as a member of the Government, inspiring and encouraging. The Chairman of the Wartime Prices and Trade Board, who presided at the sessions, indicated further that the results of two full days of conference were fraught with significance for persons disposed to take advantage of the present situation to hoard necessaries of life or to make undue or unusual profits out of their sale.

Representatives of provincial governments who attended the conference were: Honourable E. C. Manning and Mr. R. A. Smith from Alberta; Honourable J. W. Estey from Saskatchewan; Honourable W. J. Major from Manitoba; Clifford Magone from Ontario; J. Bacon Dickson from New Brunswick; Honourable J. H. MacQuarrie from Nova Scotia; James E. Wells from Prince Edward Island; and Mr. E. Pepler of British Columbia.

Regulations Governing Sugar Control

The Board announced on October 30 the adoption of regulations extending the powers of the Sugar Administrator in relation to the control of imports and exports of sugar.

In order to carry out the co-ordinated buying scheme entered into with the United Kingdom Sugar Control Board, the Wartime Prices and Trade Board, acting through the agency of the Sugar Administrator, is given power to buy sugar from the United Kingdom Sugar Controller and power to sell to refiners and others in Canada. The Order further confers upon the Sugar Administrator in Canada full control of imports and exports of sugar. No other person may import or export sugar except under permit from the Sugar Administrator. This, however, is not to be interpreted as including maple sugar.

The sugar scheme into which Canada has entered with the United Kingdom provides for the bulk purchase by the United Kingdom Sugar Controller of all sugar required by both the United Kingdom and Canada. The United Kingdom Sugar Controller will resell at cost to the Canadian Sugar Administrator, who will in turn sell to refiners. Under this scheme each refiner is assured of regular supplies at equated and stabilized costs, and as a consequence the consumer is guaranteed a normal flow of supplies at the lowest possible price.

Census of Leather Stocks

Upon the recommendation of Maurice Samson, Hides and Leather Administrator of the Wartime Prices and Trade Board, arrangements have now been completed for a monthly census of all stocks of leather and hides in Canada. The information will be compiled by the Dominion Bureau of Statistics.

From information already secured by the Administrator, the leather and shoe industries are well equipped to meet both the normal and wartime demand. While there exists no lack of supplies, the survey has been instituted to provide information which will enable the Administrator to prevent advantage being taken of any conditions which might encourage speculation in, or otherwise unnecessarily increase the price of leather. In addition, the census will enable more rapid action to be taken, should it be required, to assure a continuous flow of supplies to the trade at stable prices.

Appointment of Coal Administrator

With the appointment on October 27 of a Coal Administrator, the production and distribution of coal and other fuel came under the purview of the Board. The Coal Administrator is Mr. J. McG. Stewart, K.C., of Halifax, who is serving on a dollar-a-year basis, and Mr. Frank G. Neate, secretary of the Dominion Fuel Board, has been seconded to the Wartime Prices and Trade Board as technical adviser.

According to the official announcement, Mr. Stewart will be responsible, in co-operation with the coal trade and under the direction of the Board, for conducting negotiations with the United Kingdom for the export of coal and other solid fuels to Canada; for maintaining and stimulating, in co-operation with the provinces concerned, the production of Canadian coal and other solid fuels; for supervising the purchase, shipment, distribution and allocation of coal, coke and other solid fuels whether domestic or imported; and for other similar duties which may be assigned to him by the Board.

Experience in the last war indicated that the production, importation and distribution of coal in wartime is surrounded by peculiar difficulties and problems which require careful consideration and supervision if the needs of the public are to be adequately met.

Such problems include fluctuations in exchange rates, possible interference with production and shipments both from the United Kingdom and from the United States, and the dependence of many Canadian households on regular supplies of United Kingdom anthracite for which it will shortly be necessary to arrange supplies for the 1940-41 season.

One of the main duties of the Coal Administrator will be to assure regular and adequate supplies of coal at reasonable prices in every region of the Dominion.

Licensing of Coal Trade

The appointment of a Coal Administrator was followed by the issuance on November 7 of Order No. 1 of the Board which provides that from December 1 the entire Canadian coal and coke trade will operate under licence. The order covers all manufacturers, importers, exporters, producers, jobbers, wholesalers and retailers of coal and coke. The licences, without which no company or individual will be permitted to deal in these fuels, will be issued by the Board. The whole licensing plan will be administered by J. McG. Stewart, K.C., the Canadian Coal Administrator, and Frank G. Neate, the technical adviser to the Administrator.

According to the official announcement, licensing has been adopted to keep the Government adequately informed of the situation surrounding the production, importation and distribution of coal; to assure an adequate distribution of coal; and to protect the public against any undue advance in price.

According to Mr. Stewart, the purpose of the coal control, of which the licensing plan is a basic feature, is to maintain supply and distribution of coal at as low a cost as possible through the regular channels of trade. The Coal Administrator also pointed out that many leading wholesalers, dealers, and producers of coal have already indicated their willingness to co-operate to the full in the licensing plan.

The licensing plan will enable the Coal Administrator to make the necessary arrangements for the 1940-41 import of coal from overseas and abroad, particularly of anthracite coal. While it is stated that there is presently available in Canada more anthracite than at any time during the last decade, the licensing plan will make available to the Coal Administrator information from which it will be possible accurately to determine and to arrange for the maintenance of these supplies.

From December 1, coal and coke dealers, importers and exporters, and producers will all report to the Coal Administrator the amount of coal and coke on hand or in transit; the quantities sold or distributed each month; the prices charged, and any further information which the Board may require.

To avoid duplication and overlapping in the compilation of these returns and to simplify the work for the coal trade, the weekly, monthly and other data required by the Coal Administrator will be collected by the Dominion Bureau of Statistics which already obtains from the trade most of the needed information. Only slight alterations will be made in the statistical forms issued by the Bureau of Statistics.

Under the Board's order, the word "coal" includes coals of all types including lignite and all cokes including those manufactured from petroleum. The licensing fee is $1; each licence terminates on March 31 following the date of issue. The licences must be displayed conspicuously in each place of business and the licensee is required to report to the Board, through the Coal Administrator, at such times as may be required. Any changes in the place of business, management, ownership or in character of the business must also be forwarded to the Board.

The order concludes by stating that the licensee must "perform such other acts as, in the opinion of the Board, may be necessary or desirable for the effectual enforcement of this or any subsequent order."

COMBINES INVESTIGATION ACT

Report of an Investigation into Alleged Combine of Wholesalers and Shippers of Fruits and Vegetables in Western Canada—Dismissal of Motion to Quash Indictment Against Members of Alleged Combine of Paperboard Containers.

THE report of an investigation into an alleged combine of wholesalers and shippers of fruits and vegetables in Western Canada was made public on November 8 by the Minister of Labour. The report was submitted to the Minister of Labour on October 31, by F. A. McGregor, Commissioner of the Combines Investigation Act, who finds that the control which Western Grocers Limited, of Winnipeg, and its wholly-owned subsidiary Dominion Fruit Limited secured over certain shipping agencies representing fruit growers in British Columbia is in violation of the Combines Investigation Act. No combine is reported to exist among the three major wholesale fruit houses, Western Grocers Limited, Consolidated Fruit Company Limited, and Macdonalds Consolidated Limited, which together handle about three-quarters of the wholesale fruit and vegetable business in the prairie provinces, and which were alleged to have combined to depress prices to the growers and to enhance prices to consumers.

The investigation under the Combine Investigation Act commenced in November, 1938, following an application from certain growers in British Columbia. Hearings were held throughout the Okanagan Valley and at Calgary, Edmonton, Regina, Saskatoon and Winnipeg. H. I. Bird of Vancouver assisted the Commissioner as counsel in the inquiry.

Alleged Combine of Jobbers and Shippers

The report states that the combine of jobbers and shippers was formed in 1936, when Western Grocers Limited, through Dominion Fruit Limited, purchased half of the shares of Lander Company Limited, of Vernon, B.C., a holding company which controlled Sales Service Limited, representing the second largest group of fruit shippers in the Okanagan Valley in British Columbia. "The relationship," according to the report, "was secretly established and maintained, and growers using these shipping agencies are said to have known nothing of it until it was disclosed at a meeting in Vernon, B.C.", in August, 1938. Such a relationship between jobbers and shippers is stated to correspond closely with that between jobbers and brokers which was declared to be unlawful in the Nash fruit combine case in British Columbia fourteen years ago. Specific legislation was enacted in British Columbia at that time designed to prevent the recurrence of the practice of jobbers exercising control over agents of the growers. The fundamental objection to this relationship is stated in the report as follows:

> The interest of a jobber who buys fruit and vegetables from a shipper is adverse to that of the grower whose products are being bought. If the jobber has a substantial interest in the shipper, the shipper cannot be expected to exercise independent control as an agent for his grower principal; he is placed in the position of having conflicting responsibilities.

The report reviews the negotiations which led to the investment by Western Grocers Limited in 1936, and emphasizes the secrecy which characterized the arrangements as a whole and the registration of shares in particular. At the time of these negotiations formal provision was also made for special secret quantity discounts to be paid to Western Grocers Limited by Sales Service Limited and Associated Growers of B.C. In referring to this and other arrangements between 1936 and 1938, the report states that the discounts were paid to the head office with the result that branch managers, in determining their selling

prices, were unaware of the reduction in cost which had been effected:

The secrecy surrounding various deals between 1936 and 1938, the non-disclosure of important information by Sales Service Limited to its principals, and the general atmosphere of domination by Western Grocers Limited over this grower selling agency, are together illustrations of conduct, furthered and intensified by the investment, which cannot be regarded as in the public interest. In British Columbia legislation has stated that, as a matter of public policy, jobbers should not invest in fruit shipping concerns. To that further extent the investment in the Lander Company may be regarded as a detriment to the entire public of the province.

Quantity Discounts

The report finds little or no justification for the quantity discount system as it operated between Sales Service and Western Grocers. The thousands of dollars paid annually out of grower funds to Western Grocers on the basis of such discounts, the report continues, were nothing more than gratuities for which there was no consideration, and had little or no effect on the volume of Western's purchases of Okanagan apples. While such discounts may not have been the result of the investment, nevertheless, as in the case of other claims, Sales Service Limited was in a less advantageous position to refuse the payment of discounts because of its corporate connection with Western Grocers. In discussing these special quantity discounts the Commissioner says:

It is the growers who ultimately pay the quantity discount, and net returns of the growers have been reduced by thousands of dollars annually on this account. Presumably it would be a wise expenditure for them if it produced substantially increased sales, but this result is quite uncertain. In any case the growers should know how their money is being spent and under the present Fruit Board arrangements it appears that in respect of quantity discounts they now have this information. When growers entrust to shippers decisions of such importance as this, involving large expenditures of grower funds on which returns are doubtful, it is only reasonable that the shippers should be scrupulously careful to avoid alliances with the interests they are bargaining with, and that they should fully inform their principals of the nature of the deals made on their behalf.

A close relationship between jobbers and brokers is also disclosed, in an arrangement made in 1936 whereby the C. H. Robinson Company Limited, which is controlled by the Nash fruit organization in the United States, agreed to pay to Western Grocers all but a slight portion of the profits on the Robinson brokerage business in Canada. These payments are characterized as "little less than an outright gift" from broker to jobber. On these arrangements the Commissioner comments:

For the broker to argue that he may dispose of his profits as he sees fit is to ignore the very special relationship that exists between his principals (the growers and shippers) and himself as their agent. . . The fact that jobbers have secured substantial portions of the earnings of the brokerage agencies through which they buy is evidence of the inordinate strength of the bargaining position of these jobbers in the distribution of fruits and vegetables in Western Canada.

The danger of too great a concentration of trading power in the hands of a single company controlling thirty wholesale branches in the prairies, and having close relations with several hundred retail houses as well as with important fruit shipping and brokerage agencies, is pointed out in the following paragraph:

It is in the public interest generally that no single private enterprise shall obtain too great a control upon the sources of necessary products or of the facilities for their distribution. Through controlling the largest single block of wholesale houses and connections with a very substantial number of retail outlets, and now by the investment in a company supervising and in part controlling the shipment of almost twenty per cent of the Okanagan Valley's supplies, Western Grocers Limited has achieved a primary position in the distribution of British Columbia fruits and vegetables in Western Canada.

That Western Grocers Limited has not reached the monopoly stage is recognized, however, in the succeeding sentence:

The presence of two large competitors and other smaller wholesalers limits, however, the extent to which it can maintain any complete control over supplies and prices.

Alleged Combine of Prairie Jobbers

No price agreements justifying an adverse finding were found to exist amongst the three major jobbers, Western Grocers, Consolidated Fruit and Macdonalds Consolidated. Local discussions on prices were held, but on this subject the report concludes:

In the matter of common price arrangements among jobbers it was clear on the one hand that discussions were frequent, and that some common understandings had been reached, among branch managers of wholesale houses in certain centres. On the other hand, the extent and effectiveness of such understandings were greatly limited by the nature of the fruit and vegetable distributing business and by the wide discretion allowed to individual branch managers to alter prices as occasion demanded. Discussions of selling prices amongst jobbers appear to have resulted at most in "marks to shoot at" and not in price agreements to which participants gave real support. The vigorously independent position of Macdonalds Consolidated Limited also made impossible any general agreement to fix common wholesale prices of fruits or vegetables. Specific instructions from the Company's head office required Macdonald Consolidated managers to refrain from agreeing with competing branch houses on the fixing of common wholesale prices, and in general those instructions were followed. After an endeavour to give due weight to these considerations, the present conclusion is that no breach of the Combines Investigation Act in the matter of price agreements can be said to have taken place.

The Commissioner found also that there was no evidence to support the claim that the major jobbers had combined to prevent independents from participating in pool supplies or to impose special trade deals upon British Columbia fruit and vegetable shippers. Moreover no evidence,

(was) secured showing that the wholesalers had taken any joint action to reduce unduly the volume of their purchases of British Columbia fruits or vegetables with a view to depressing prices to the growers or to increasing prices to retailers or consumers.

Government Control of Marketing

The report refers to parallel developments of government control on behalf of growers in British Columbia and concentration of control by jobbers in the prairie provinces.

It becomes apparent, then, that in the production and distribution of fruits and vegetables in Western Canada a dual movement has developed: on the one hand the creation of governmental supervision of production and marketing which has given to that part of the industry the character of a quasi-publicly operated monopoly, and on the other the rise of three organizations whose branch houses and total tonnage almost completely dominate the distribution of fruits and vegetables on the prairies. To this parallel development must be added the increasing control of two of these major jobbers over retail outlets and the effect of such control upon the reduction of the number of independently owned channels through which fruits and vegetables may reach the general public.

The possibility of consumer interests being injured by a combination of growers and distributors is discussed in the following passage:

Another danger to the public which must be made clear is the possibility of a combination between growers acting as a unit and distributors acting as a unit for the purpose of exploiting the consumer through smaller volume and higher prices. This is a potential danger but it is clear that willingness to pursue such a course is not lacking among some western fruit growers, shippers, and distributors. It would be unfortunate if the present public good-will towards the grower were sacrificed, and the many sound measures possible to further the fruit growing industry imperilled, by the development of any such monopolistic combination which would exploit the western fruit consumer.

Development of Fruit Growing

In this extensive report the Commissioner has traced the origin and development of apple production in British Columbia, which increased from 1,317,000 to 5,397,000 boxes between 1920 and 1937. Periodic crises have faced the growers, and although in recent years almost half the apples have been exported, the problem appears to have been to enable the grower to receive adequate returns for a crop whose chief market was outside the province, principally the prairie provinces and the United Kingdom.

Certain general problems of fruit growing and marketing are examined in the report. It touches upon the development of marketing control, from the establishment of the co-operative movement to the creation of administrative bodies such as the British Columbia Fruit Board to regulate production and distribution. Attention is paid in this section of the report to the question of grower-shipper relations and to the dependence of the independent grower upon the shipper who is his consignee and trusted agent.

The report examined also in some detail the price spread between what the consumer pays for apples on the prairies and what the grower receives for his product. It finds that a large part of the spread is accounted for by heavy packing and selling costs, together with transportation charges, and that the jobber's margin in a group of seventeen illustrations absorbed a minimum of six and a maximum of sixteen cents of the consumer's dollar.

A copy of the report and of evidence taken in the inquiry have been remitted to the Attorney General of British Columbia for such action as he may decide to institute in view of the conditions revealed by the investigation.

Dismissal of Motion to Quash Indictment against Members of Alleged Combine of Manufacturers of Paperboard Containers

Judgment was given by Mr. Justice MacKay of the Supreme Court of Ontario on November 6 dismissing a motion to quash the indictment against one individual and nineteen corporations charged with offences against section 498 of the Criminal Code (LABOUR GAZETTE, October, 1939, p. 1004).

Counsel for the accused moved to quash the indictment when an application was made by Crown Counsel at the Assizes in Toronto that the accused persons named in the indictment be arraigned.

Two main points were urged by counsel for the accused on the motion to quash, firstly, that the jurisdiction of the court did not extend to certain corporations located outside the province of Ontario and secondly, that the indictment was defective in form and should therefore be quashed.

Counsel for accused persons located in the province of Ontario contended that if the extra-provincial corporations could not be tried in Toronto then the indictment was bad as against their clients. Mr. Justice MacKay said that even if such corporations were not triable in the Court he did not believe the indictment would be bad. However, he decided that the Court has jurisdiction to try the

accused persons as charged in the indictment for any offence alleged to be committed within its jurisdiction.

On the question of the form of the indictment, Mr. Justice MacKay stated that

"the indictment here, is framed in the exact words of the section creating the offence and in addition certain other details are given. The indictment therefore falls within sub-section 3 of section 852, which provides that the statement of the offence may be made in the words of the enactment. . .

"I am of opinion each count of the indictment charges an offence and it is therefore not open to me to quash any one of them on this motion.

"The motion to quash should be refused, and the trial should proceed."

Collective Bargaining in the Newspaper Industry in U.S.A.

As the result of a study of newswriters' organizations and representative unions in the mechanical trades, and an analysis of the effects upon interstate commerce of industrial conflict within the newspaper industry, the Division of Economic Research of the United States National Labor Relations Board has issued bulletin No. 3 entitled "Collective Bargaining in the Newspaper Industry."

In an introduction to the study, it is explained that in the performance of its statutory duties the National Labor Relations Board has had occasion to examine conditions in the newspaper industry relating to the causes and effects of industrial strife. The bulletin contains the results of studies which were made by the Division of Economic Research in connection with proceedings before the Board in the two major branches of the industry—the press services engaged in the gathering and distribution of news, and newspapers engaged in the publication of news and its final dissemination.

Outlining the contents of the bulletin it is stated in the introduction that in the first chapters "certain characteristics of the newspaper industry are set forth which have led the National Labor Relations Board to assume jurisdiction in various cases on the grounds that strikes in the respondents' plants or offices would burden and obstruct the free flow of commerce.

"Representative wire services, newspaper chains, and independently owned papers are discussed in detail to show the extent to which they depend upon instrumentalities of commerce, the nature of their ties with industries and services in widely separated communities, and the extent to which they draw upon extra-State sources for raw materials and news items and upon extra-State outlets for their finished product. An analysis is then made of the effects upon commerce of strikes in such enterprises."

It is further stated that a "legislative finding which led to the creation of the Board was the fact that the flow of commerce is affected and burdened by the inequality of bargaining power between 'employees who do not possess full freedom of association or actual liberty of contract and employers who are organized in the corporate or other forms of ownership association.' For this reason, integration of management and personnel policy within the press agencies and newspaper chains and co-ordination of publishers' labour activities through the American Newspaper Publishers' Association are analyzed to determine the strength of the publishers' bargaining position derived from co-ordinated action, pooled resources, and capacity to hire experts, conduct research, and disseminate propaganda. With this analysis there is a description of three of the major labour organizations in the newspaper industry. Since most of the newspaper cases which have come before the Board have involved the newly organized editorial workers, special attention has been given to the only national union in this field, the American Newspaper Guild. The experiences of the International Typographical Union and of the International Printing Pressmen's and Assistants' Union have been recounted because they provide valuable background material against which to evaluate the more recent experiences of organized newswriters. The histories of these unions and an account of early attempts of editorial employees to organize and bargain collectively provide a basis upon which conclusions may be reached on several points. These are: Whether newspaper employees have enjoyed full freedom of association, whether there is disparity between the bargaining power of employers and that of employees, whether the flow of commerce is burdened by strikes and lockouts when such disparity exists and when publishers refuse to accept the procedures of collective bargaining, and whether industrial strife is minimized when labour's right to organize and bargain collectively is recognized.

"Finally an outline is given of the history of governmental intervention in the newspaper industry through agencies created to prevent industrial strife and to facilitate adjustment of disputes by protecting labour's right to organize and bargain collectively."

OLD AGE AND BLIND PENSIONERS IN CANADA

Financial and Statistical Summary as at September 30, 1939

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at September 30, 1939. (The text of the Old Age Pensions Act was given in the LABOUR GAZETTE for April, 1927, page 375, and the new regulations were reviewed in the issue for March, 1938, pages 286-288.)

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as $365 a year and who has resided in Canada for 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is $240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds $125 a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (LABOUR GAZETTE, May, 1937, page 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is $240 per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to $120. If a pensioner is unmarried, the maximum pension is reduced by the amount of his income from earnings or other sources in excess of $200 a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of $165, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $400. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $200.

Under agreements negotiated between the Dominion and the provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in the *Canada Gazette* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

OLD AGE PENSIONS—FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT SEPTEMBER 30, 1939

—	Alberta Act effective Aug. 1, 1929	British Columbia Act effective Sept. 1, 1927	Manitoba Act effective Sept. 1, 1928	New Brunswick Act effective July 1, 1936	Nova Scotia Act effective Mar. 1, 1934	Ontario Act effective Nov. 1, 1929

RECENT REGULATIONS UNDER PROVINCIAL LEGISLATION

Price Control and Early Closing in Alberta—Hours in Alberta Lumbering—Motion-picture Operators in British Columbia—Minimum Wages, New Brunswick, Nova Scotia, Quebec and Saskatchewan—Workmen's Compensation, Ontario and Saskatchewan

ALBERTA has appointed a Price Spreads Board and tightened the code of fair competition for the retail trade to require catalogues of wholesale prices published in Alberta to be filed with the Deputy Minister of Trade and Industry. There are regulations also concerning the application of the Early Closing Act in Improvement Districts and provision for a seasonal exemption from the Hours of Work Act of workmen in the logging and railway tie industry in rural districts. In British Columbia two licensed projectionists are now required only in motion-picture theatres open for more than 40 hours in a week.

Minimum wage regulations have been revised for the lumbering industry in New Brunswick, for female workers in the textile and needle trades in Nova Scotia, for the cotton textile industry in Quebec and for all persons covered by the Act in Saskatchewan. New minimum wage orders apply in Quebec to the woodworking industry and to wholesale food stores. Workmen's compensation through the collective liability system is extended to cover persons employed in the construction of airports in Ontario and in the construction, maintenance or repair of rural telephone lines in Saskatchewan.

Alberta Department of Trade and Industry Act

An amendment in the code of fair competition for the retail trade, effective September 30, prohibits a retailer selling or offering for sale any goods at a price less than 5 per cent above that at which he bought the goods or above the lowest wholesale price published in the catalogue of any licensed wholesalers carrying on business in the same locality. The code as amended on October 26, 1937, stipulated that the retail price should not be less than 5 per cent above the recognized wholesale price in the locality. Catalogues of wholesale prices published in Alberta must be filed with the Deputy Minister of Trade and Industry under the provisions of the Wholesalers' Code.

Alberta Price Spreads Board

Two orders under the Department of Trade and Industry Act provide for the appointment of a Price Spreads Board and an agent to inquire into the wholesale and retail distribution of goods in the province. The Price Spreads Board, whose members are W. D. King, Deputy Minister of Trade and Industry (Chairman), R. A. Smith, K.C., Legislative Counsel, W. S. Campbell of Edmonton, former Chairman of the Petroleum Producers' Association, and H. M. Jenkins of Calgary, head of the Retail Advisory Board for the province, may, on its own initiative or at the direction of the Minister of Trade and Industry, inquire into any matter relating to the production, manufacture, supply, distribution or sale of any goods or merchandise or into any matter relating to any trade or industry and fix, for the whole province or for any part of it, maximum or minimum prices for any goods sold or services rendered. The Board is to serve without remuneration but is to be paid travelling and other expenses and a subsistence allowance approved by order in council.

By the second order, one of the members of the Price Spreads Board, R. A. Smith, K.C., of Edmonton, is to act as agent for the Minister to carry out such duties as may be prescribed in relation to the business of wholesale and retail distribution of goods in Alberta. This action has been taken in the public interest because, in the opinion of the Minister, conditions detrimental to the trade and the public interest exist in the wholesale and retail trades.

Alberta Early Closing Act

Regulations approved by order in council gazetted October 14 relate to the application of the Act in Improvement Districts. A 1939 amendment in the Act gives the Minister of Municipal Affairs power to fix the closing time of shops in an Improvement District, his order to have the same force as an early closing by-law of a municipal council. The regulations require the Minister to give notice of his intention to make an early closing order for shops by publication in prescribed form weekly for two weeks in a newspaper printed or circulating in the district concerned. Copies of the notice are to be posted within five days of the first publication in four conspicuous places and in the post-office in the district. Objections on the grounds that the order is insufficiently signed or is otherwise invalid must be filed with the

Minister within 30 days clear from the date of the first publication of the notice. Early closing orders may be repealed by the Minister in respect of any class of shops, only when a majority of the occupiers of shops in that class petition for repeal and the petition, signed by a majority of the occupiers, is verified by statutory declaration and by such other proof as the Minister may require.

Alberta Hours of Work Act

An order of the Board of Industrial Relations gazetted September 30 is similar to one issued last year (Labour Gazette, January, 1939, p. 57), and exempts for a period of six months from that date certain classes of employees in the lumbering, logging and railway tie industry from the maximum nine-hour day and 54-hour week laid down in the Act for male workers. Cooks, night watchmen and barn bosses may be required to work longer hours than the daily and weekly maxima and are not entitled to the weekly rest period of 24 consecutive hours prescribed by the Act. Blacksmiths' engineers, teamsters, truck drivers and millwrights are also exempt from the daily and weekly hours provisions but must be allowed the weekly rest period. The order applies to the specified industries when operated more than 10 miles from a city or in a town or village of less than 1,000 inhabitants.

British Columbia Fire Marshal Act

The regulations governing the licensing of motion-picture projectionists (Labour Gazette, 1938, p. 1093) were amended on October 18 to change the requirement for two operators in every projection room of any theatre with two or more kinematographs to the stipulation that only in theatres open to the public for more than 40 hours in the week must there be two licenced projectionists on duty at the same time.

New Brunswick Forest Operations Commission Act

An order of the Commission effective October 1 re-establishes the minimum average monthly wage of $40 and board in force from May 1, 1937, to August 15, 1938 for persons employed in cutting, peeling, yarding or hauling or doing piece-work in the lumbering industry. This minimum was reduced to $34 a month and board for the 1938-39 season (Labour Gazette, 1938, p. 1236). The minimum wage is increased from $30 a month and board to $36 and board. As before, where board is not furnished wages must be increased by 50 cents a day and the wages paid to cooks, tractor operators, truck drivers, foremen, bookkeepers, clerks and employees working on piece-work are not to be included in determining the average wage.

Other provisions of the 1938 order re-enacted without change stipulate that all payrolls must be submitted to and, if necessary, audited by the Commission and state that the industry may be investigated from time to time by the Fair Wage Officer. A new section requires all employers to keep a time-book showing the name, days of employment and rate of pay of each employee.

Nova Scotia Minimum Wage for Women Act

A new order applying to female workers employed in the textile and needle trades in the cities and towns of the province which came into force on November 6 covers weaving and spinning, the making of wearing apparel and working in and on leather goods, boots, shoes and furs. It continues in force, for persons employed for not less than 44 and for not more than 50 hours a week, the same minimum weekly rates as were provided by an order effective February 15, 1931 (Labour Gazette, 1931, p. 984).

But a punitive overtime rate is fixed for the first time and in the rates for short time, as for overtime, there is no distinction between experienced and inexperienced workers. The new order does not fix the proportion of inexperienced adults or young girls that may be employed. Under the earlier order short time and overtime were paid at proportionate rates, the former based on the regular work-week of the establishment and overtime on a 50-hour week. Under the new order in cities and towns of 17,000 or more a minimum hourly rate of 22 cents or in incorporated towns of less than 17,000 a minimum of 20 cents an hour is payable to any female worker, experienced or inexperienced, who is employed for less than 44 hours a week. Moreover, she must be paid for at least four hours. For overtime beyond 50 hours a week time and a half must be paid, 33 cents an hour in larger places and 30 cents in towns of less than 17,000 population.

The minimum weekly rates continued in force for experienced workers are $11 in cities and large towns and $10 in smaller towns; for inexperienced workers, $9 or $8 for the first six months according to the size of the town and $10 and $9 for the second six months; and for girls under 18 $7 for the first six months, $8.50 for the second six months and $10 for the third six months in cities and large towns and $6, $7.50 and $9 for these respective periods in smaller towns. Inexperienced workers are entitled to the rates for experienced workers after one year and girls after 18 months. A new provision stipulates that where employees are paid on a piece-work basis at least 80 per cent must be paid the minimum fixed by the order.

As before, deductions from wages for absences must not exceed the value of the time lost and all waiting time must be paid for.

Ontario Industrial Standards Act

On October 20 two new sections were added to the general regulations for carrying out this Act. (LABOUR GAZETTE, 1937, p. 1207). As amended in 1937 the Act allows a schedule of wages and hours agreed upon by a conference of employers and employees, subject to the approval of the Ontario Industry and Labour Board and with respect only to interprovincially competitive industries, to provide for the assessment of employers only or of employers and employees in any such industry in order to raise revenue for the enforcement of the schedule. The schedule may authorize the advisory committee appointed to administer it to collect the assessments. The regulations as amended now provide that when a schedule requires the employees to be assessed, the employer is to act as the agent for collection, deducting from the wages paid the amount of the assessment. The money is to be remitted to the advisory committee before the 10th of each month with a return showing the amount of the assessment and of the wages paid to each employee for the work performed in the industry during the previous calendar month; also the method of calculating the assessment.

Ontario Workmen's Compensation Act

By an order of the Workmen's Compensation Board, approved September 29, "construction of airports" was added to the list of industries in Schedule 1 of the Act, those within the collective liability system.

Quebec Fair Wage Act

Hours of Labour.—By a resolution of the Fair Wage Board gazetted on September 30 as a result of the war emergency, the provisions of Order 4 "limiting the number of working hours in industrial establishments are suspended for three months from September 1 or until otherwise decided by the Board or the Lieutenant-Governor in Council." Order 4 (LABOUR GAZETTE, 1938, p. 512) reproduces the provision of the Industrial and Commercial Establishments Act limiting hours of women and boys under 18 in industrial establishments to 55 a week and restricts the hours of adult males to 72 in a week. The Industrial and Commercial Establishments Act imposes also a limit on the hours per day and authorizes the factory inspector to permit longer hours up to 12 in a day and 65 in a week for not more than six weeks in any year. All restrictions imposed by the statute remain in effect. The requirements of the Fair Wage Order as to the payment of overtime rates for time worked in excess of the normal work-weeks specified in the Order are to remain in effect but such rates do not have to be paid by employers who have increased, or who increase in the future, wage rates to an amount considered sufficient by the Board.

Woodworking Industry.—Order 30 applying to the manufacture of wooden boxes and other wood products is to remain in force for one year from October 21 and then to be renewed for another year unless it is otherwise decided by the Board or the Lieutenant-Governor in Council. The Order includes all workers in the province employed in the manufacturing of wooden boxes or shooks or boxes partly made of wood, veneer, plywood or fibre, or in manufacturing butter or cheese boxes or veneer or plywood or in making such wood products as reels, shingles, dowels, brooms, shovels, tool-handles, wooden railway ties and shims, snow fences, wash boards, ironing boards, bee-hives, clothespins and toothpicks. It does not apply to the manufacture of funeral caskets, trunks or valises or of containers used only for display purposes or for packing goods made in the establishment or to establishments manufacturing wood products for uses incidental to the main business or to religious, charitable or teaching institutions or to establishments employing blind men only. With the exception of the provision of Order 4 requiring the payment of workers hired for less than 30 hours a week or three hours a day at a rate 15 per cent higher than the minimum prescribed, the provisions of that Order which are not incompatible are to apply. Woodworking establishments in rural districts, to which Order 4 does not apply, are to be treated as if in Zone IV of Order 4.

For the purpose of Order 30 the province is divided into five zones: Zone I, the Island of Montreal and within a five-mile radius; Zone II, Quebec City and other cities and towns with a population of 10,000 or more except Levis and those in Zone I; Zone III, Levis and cities and towns with a population of from 2,000 to 10,000; Zone IV, all other cities and towns and Zone V the remainder of the province. The workers are classified into three categories. Category I which includes all workers but the temporary and new employees, which are categories II and III respectively, is subdivided into four classes. "Temporary workers" are those hired for less than 20 hours a week or for any other period determined by the Board and "new employees" those who have less than three months' experience in any particular establishment. The latter class is limited to 10 per cent of the employees in Category I. Not more than 20 per cent of the workers may be in Class A

and not more than 40 per cent, 25 per cent and 15 per cent in Classes B, C and D, respectively. Unless permitted by the Board, the percentages are to be established weekly and the number in each class are to be determined by the table of percentages provided by the Board and gazetted on the same date.

For Category I in Zone I the minimum hourly rates are 30 cents for Class A, 26 cents for Class B, 22 cents for Class C and 17 cents for Class D; in Zone II, for Class A, 27 cents and for the other three Classes rates 2 cents lower than in Zone I. Zones III, IV and V have minimum rates 2 cents lower in each Class than those provided in Zones II, III and IV, respectively. Temporary employees in Zone I must be paid at least 22 cents an hour and the minimum decreases by 2 cents for each Zone from I to V. New employees have an hourly minimum of 15½ cents in Zone I, 13½ cents in Zone II, 12½ cents in Zone III, 11 cents in Zone IV and 10 cents in Zone V.

Higher wages fixed by agreement on August 1, 1939, are to remain in force but overtime need not be paid at time and one-half the higher rates but only at time and one-half the minimum rates provided for Class A and for temporary and new employees.

Overtime at the rate of time and one-half the regular rate must be paid for work in excess of 60 hours a week in the case of labourers, drivers and their helpers, of 72 hours for night watchmen and in excess of 55 hours for all other workers. The same exemptions from overtime are provided as in Order 4. Stationery enginemen employed in establishments covered by Order 30 which are in Zone I are governed by Order 6 (Labour Gazette, 1938, p. 624); stationary enginemen in other zones are to be placed in Category I but are to have a regular work-week of 60 hours.

Cotton Manufacturing.—An amendment made by the Fair Wage Board in Order 8 applying to the Dominion Textile Company and certain subsidiaries and gazetted on October 21 (Labour Gazette, 1938, p. 625) increases by 10 per cent the scale of wages in force in the establishments governed by the other. The increased rates go into effect on the twenty-first day after publication.

Wholesale Food Stores.—Order 33 gazetted on October 21 applies to establishments where food of all kinds is sold at wholesale, such as: groceries, grain, flour, fish, eggs, butter, cheese, meat, fruit, vegetables, pickles, etc.; also where grain, flour, hay, salt, middlings of all kinds are sold at wholesale and places where any food products, grain or middlings are stored for remuneration. An employee is to be paid the rate fixed for the zone where he customarily works or, if he customarily works in both zones, the rate for the zone where the establishment is situated. Not included in the order are establishments, the principal undertaking of which is retail selling or establishments where the main business is not selling at wholesale or the storage of food but where the latter business is carried on only for the purposes of the main undertaking. The Board may, by resolution, declare a whole or a part of any establishment exempted to be governed by this order. The order applies to the departments and services of the provincial Government.

The order which is to remain in force for one year and be renewed for another year unless the Board or the Lieutenant-Governor in Council decides otherwise, covers Quebec district, Quebec City being Zone I and Levis and Lauzon, Zone II.

The order divides employees into seven categories: office employees, travelling salesmen, messengers, temporary employees, new employees and male and female employees not otherwise classified. The two classes last mentioned are "new" employees during the first three months of employment and office workers are "new" for six months but not more than 10 per cent of the workers in any of the categories which include "new" employees may be classified as "new." "Temporary employees" are those who are not hired to work every day.

In both zones a weekly wage of $15 is fixed for travelling salesmen and messengers must be paid $5 a week. Male and female temporary employees, not classified, are to receive 30 cents and 20 cents an hour respectively in Zone I and 25 cents and 18 cents in Zone II. Temporary office employees have a 25-cent hourly rate in Zone I and 20 cents in Zone II. The rate for temporary messengers is 10 cents an hour in both zones.

Male workers not included in the above groups are to be divided into four classes, not less than 10 per cent to be paid $21 and $19 a week in Zones I and II respectively, not more than 20 per cent, $19 and $17, not more than 60 per cent, $17 and $15 and not more than 10 per cent, $15 and $13. Of the female employees not otherwise classified not less than 60 per cent must receive $12 and $11 per week according to the zone, not more than 25 per cent, $10 and $9 and not more than 15 per cent, $7.50 and $6.50 in Zones I and II respectively. For "new" male employees not otherwise classified, the weekly rate is $12 in Zone I and $10 in Zone II and "new" female employees not otherwise classified, receive in Zone I $6 and $5 in Zone II.

Male and female office employees are also divided in three classes, not less than 25 per cent to be paid $15 and $12.50 a week depending on the zone, not more than 60 per cent,

$12.50 and $10 and not more than 15 per cent; $10 and $8. For office workers who are new employees, that is for the first six months, a $7-rate is fixed in Zone I and $6 in Zone II. Percentages are to be established weekly unless the Board issues a special permit.

As regards the hours in a week to which the rates apply, the regular work-week, except for travelling salesmen, watchmen, stablemen and furnace men, is 48 hours. For the latter three classes the rates apply to a 72-hour week.

Overtime for male and female employees not otherwise classified, including those who are "new", means all work before 7 a.m., after 6 p.m. or in excess of the hours fixed for the regular week but work done before or after the daily limits by watchmen, stablemen and furnace men is not required to be paid as overtime. Temporary employees are only entitled to their regular rate for overtime. Office workers and messengers must be paid for overtime at the rate of time and a half. For male and female workers who are not otherwise classified, including new employees, overtime is to be paid for at the rate of 45 cents and 30 cents an hour respectively in Zone I and 40 cents and 27 cents in Zone II. The same exceptions in respect to the payment of overtime are allowed as under Order 4 (LABOUR GAZETTE, 1938, p. 512).

The rates already fixed by agreement on September 1, 1939, when higher than those provided here are to be maintained unless the salary is at least $200 a month. Where the business hours of an establishment are less than those fixed by the order for a regular week the employer may not pay full-time employees less than the weekly wage fixed by the order. Neither may deductions be made from the wage on account of legal or civic holidays.

Silk Manufacture.—On October 17 the Board adopted a resolution under the authority of revised Order 5 (LABOUR GAZETTE, 1938, p. 985) applying to the silk textile industry providing that the number of looms per operator must be restored to the number in effect on February 12, 1938, when the original Order 5 (LABOUR GAZETTE, 1938, p. 294) went into effect or if a weaver is assigned additional looms he must be given for each extra loom a 5 per cent increase in the rate per hour or by the piece.

Classification of Workers.—Two more tables of percentages were issued on October 2 indicating the grouping of employees into four classes when orders fix four different wage-rates to be paid to 10 per cent, 20 per cent, 60 per cent and 10 per cent of the total number of workers and into three classes when rates apply to 25 per cent, 60 per cent and 15 per cent of the workpeople.

Saskatchewan Minimum Wage Act

Revised minimum wage orders were made effective in Saskatchewan on November 6. They apply only in cities and within a five-mile radius but by order in council effective October 6 the Act may be applied to the towns of Estevan and Melville. The new orders relate, as did the orders in force since January 10, 1938, (LABOUR GAZETTE, 1938, p. 42) to both male and female workers in retail and wholesale stores and mail-order establishments; factories, fuel, lumber and building supply yards; places where warehousing, draying, cartage, transfer and delivery are carried on; hotels and boarding houses and restaurants catering to more than five persons; beauty parlours, barber shops; and theatres and dance halls. In theatres and dance halls the rates apply only to managers, cashiers, doormen and cleaners.

The weekly minimum rates for experienced workers ranging from $12 to $14 and the rates for inexperienced workers and for part-time work remain unchanged.

Changes include a higher minimum for inexperienced minors in beauty parlours and barber shops by removing the distinction between the rates for minors and adults when inexperienced and increased rates for hours in excess of 48 in a week for all classes except persons employed in hotels and restaurants. There is no change in the overtime rates of 25 and 30 cents an hour, according to experience, in hotels and restaurants where overtime for bell-boys, porters and elevator operators begins only after 60 hours in a week and for other classes after 48 hours. For inexperienced persons employed in beauty parlours and barber shops the increase in the overtime rate is from 20 or 25 cents, according to age, to 27½ cents and for those with experience from 30 cents to 35 cents. Any person employed in a theatre or dance hall beyond 48 hours in a week has an hourly rate of 35 cents instead of 30 cents. For inexperienced workers in all places, except beauty parlours, barber shops, theatres and dance halls, and hotels and restaurants, the overtime rate is increased from 20 cents an hour to 27½ for the first 12 hours in excess of 48 in a week and 40 cents for additional overtime. For experienced workers the increase is from 30 cents to 35 for the first 12 hours and then to 50 cents an hour. Boys delivering merchandise on foot or bicycle, however, have an overtime rate of 25 cents an hour for the first 12 hours and 30 cents thereafter instead of 20 cents for all overtime.

Drivers of horse-drawn and motor vehicles are expressly provided for in the new orders applying to shops, factories and to the warehousing and cartage business. For the first three months the minimum is $13 and for experienced drivers $14 for a 48-hour week. Similarly, the orders covering factories and the sale of lumber, fuel and building supplies now make provision for messenger and errand boys on foot or bicycle. The minimum of $6 a week for three months increasing to $8 a week prescribed formerly for messenger and errand boys in connection with shops and mail-order houses now applies to the same classes in the above mentioned establishments. In the storage and cartage business, the minimum for all messengers and errand boys remains at $6 for a regular week. It is stipulated that if a boy employed in any place is, after 12 months' employment as a delivery boy, taken on the staff in any other capacity, he must be paid the minimum for a learner in that occupation of at least six months' experience.

Other changes in the orders are in the definition of part-time work and the application, except in hotels and restaurants, of the minimum rates to the normal work-week of the establishment whether it is 48 hours or less. Formerly, a part-time worker was one employed in any week for less than 43 hours. The new definition applying to all establishments but hotels and restaurants is that of work for six hours or more less than the normal work-week.

Saskatchewan Workmen's Compensation Act

A regulation approved by Order in Council on September 25 extends the application of Part I of the Act, providing for the collective liability of employers, to include workmen engaged in the construction, maintenance or repair of rural telephone lines. Telephone operators are not to be included except where operator's service is rendered by workmen ordinarily engaged in construction, maintenance and repair. Companies employing such workers must apply for protection each year to the Workmen's Compensation Board and are to be assessed at rates based on the number of subscribers for telephone service instead of on payroll. The section of the Act requiring the employer to furnish statements showing the payroll and the regulations governing assessments based on the amount of the payroll are not to apply to rural telephone companies.

LABOUR AND INDUSTRY IN BRITISH COLUMBIA IN 1938

Annual Report of Provincial Department of Labour

THE twenty-first annual report of the British Columbia Department of Labour records a decrease during 1938 of approximately five and one-half million dollars in the total industrial payroll of the province compared with the figures for 1937.

This decline is attributed in part to a large decrease in the lumber industry and a reduction of one and one-half million dollars in payrolls in the pulp and paper industry. In general, the report states that "unsettled conditions in Europe in the Far East had an adverse effect and in a large measure were responsible for the decrease in the total payroll."

While a decrease in the total payroll was recorded the report points out that the average industrial weekly wage covering all industries was not affected by the decrease in the total payroll, although fluctuations occurred in the average weekly wage in the various industries.

Industrial Statistics, Payrolls, etc.—The total number of firms reporting in time for tabulation in the tables of the report was 4,895 as compared with 4,711 in 1937, an increase of 184.

For these 4,895 reporting firms, a summary of the payrolls reveals a total of $122,498,097. The report states however, that "inasmuch as this figure covers only the industrial payrolls, it should not be considered as the total payroll of the Province, and must be further augmented by the following, yielding an accumulative total of $158,026,375, or a decrease of $4,627.859 over 1937": Payroll of 4,895 firms making returns to Department of Labour, $122,498,097; returns received too late to be included in above summary, $655,053; employees in occupations included in Department's inquiry, not sending in returns (estimated payroll), $1,400,000; transcontinental railways (ascertained payroll), $12,473,225; Dominion and Provincial government workers, $5,500,000; wholesale and retail firms, $2,950,000; delivery, cartage and teaming, warehousing, butchers, moving-picture operators, coal and wood yards, and auto transportation, $3,550,000; ocean service and express companies, $7,500,000; miscellaneous, $1,500,000.

During 1935 the statistics for the same classifications showed a payroll of $125,812,140, the figures for 1938 thus showing an increase of $32,214,235 over the three-year period.

The percentage of the total payable to wage-earners decreased during the year re-

viewed by the report. Of the total payroll, wage-earners received 77·10 per cent in 1938 in comparison with 78·67 per cent in 1937. Of the total payroll the report also shows that officers, superintendents and managers received 10·82 per cent and clerks, stenographers and salesmen 12·08 per cent.

An analysis of the payroll statistics for 1938 shows that of the twenty-five industrial groups, ten show an increased payroll while fifteen indicated a decrease.

Of the ten classifications registering an increase in wages, miscellaneous trades headed the list with an increase of $1,198,572, followed by metal-mining with $373,284 and public utilities with $249,888; builders' materials increased by $210,019; metal trades with an addition of $132,032; followed by printing and publishing with $35,765; paint-manufacture showed an additional $17,422; laundries, cleaning and dyeing, $7,720; and jewellery-manufacture, $5,348.

The decreases include the following, headed by the lumber industry with a decrease of $2,979,062; pulp and paper mills with a loss of $1,514,470; Coast shipping, $981,099; coal-mining, $376,560; explosives and chemicals, $264,920; garment-making, $235,620; wood (N.E.S.), $114,451; ship-building, $30,301; breweries, $26,679; smelting, $18,882; food products, $7,311; house-furnishings, $6,998; oil-refining, $6,331; cigar and tobacco manufacturing, $4,964; leather and fur goods, $2,402.

Weekly Wage Rates.—The figures in the accompanying table taken from the report show the average weekly wage for 1931, 1937 and the year reviewed, 1938.

AVERAGE FULL WEEK'S WAGES IN EACH INDUSTRY (ADULT MALES ONLY)

Industry	1931 $	1937 $	1938 $
Breweries	27 58	26 18	27 42
Builders' materials	25 81	22 31	22 82
Cigar and tobacco manufacturing	20 40	15 50	13 00
Coal-mining	28 40	27 46	28 20
Coast shipping	29 63	31 99	32 93
Contracting	27 41	25 61	25 81
Explosives and chemicals	26 78	24 58	24 20
Food products, manufacture of	23 43	23 85	23 70
Garment-making	22 51	22 97	23 15
House-furnishing	23 18	22 25	20 80
Jewellery, manufacture of	31 29	34 60	38 95
Laundries, cleaning and dyeing	25 29	22 89	23 33
Manufacturing leather and fur goods	25 81	21 23	22 23
Lumber industries	21 09	26 81	26 59
Metal trades	27 74	24 77	25 09
Metal-mining	30 02	30 34	30 48
Miscellaneous trades and industries	23 43	23 85	23 46
Oil-refining	31 24	27 92	28 68
Paint-manufacturing	26 11	23 08	22 78
Printing and publishing	39 78	33 69	34 19
Pulp and paper manufacturing	25 94	26 75	26 36
Ship-building	29 58	27 88	28 76
Smelting	30 44	25 08	24 80
Street-railways, gas, water, power, telephones, etc.	29 11	27 20	27 78
Manufacturing of wood, (N.E.S.)	23 67	21 97	22 68

From the foregoing, it will be observed that the average weekly wage per adult employee increased in sixteen of the twenty-five occupational classifications. Increases in the average weekly wage ranged from ·14 cents in metal mining to $4.35 in the manufacture of jewellery and $1.24 in breweries. Of the nine groups reporting decreases in the average weekly wage the cigar and tobacco manufacturing group registered the largest decrease of $2.50, followed by house furnishing, $1.45; miscellaneous trade and industry, and pulp and paper manufacturing each ·39 cents; explosives and chemicals, ·38 cents; paint manufacturing, ·30 cents; smelting, ·28 cents; lumber industries, ·22 cents, and manufacture of food products, ·15 cents.

The report, as usual, contains tabular statistics indicating the number of wage-earners and wage classifications in each of the twenty-five industrial groups. The following table gives a summary of all such statistics indicating the number of employees in each wage classification for the week of employment of the greatest number.

CLASSIFIED WEEKLY WAGE-RATES (WAGE-EARNERS ONLY)

For Week of Employment of Greatest Number	Males		Females		Apprentices
	21 years and over	Under 21 years	18 years and over	Under 18 years	
Under $6.00	234	123	329	54	80
$6.00 to 6.99	95	191	91	67	67
7.00 to 7.99	133	115	353	59	95
8.00 to 8.99	154	174	191	78	126
9.00 to 9.99	220	136	375	80	78
10.00 to 10.99	381	165	536	50	96
11.00 to 11.99	373	199	713	20	73
12.00 to 12.99	950	426	820	93	75
13.00 to 13.99	697	267	967	32	70
14.00 to 14.99	1,293	398	1,396	86	47
15.00 to 15.99	1,570	371	1,517	35	53
16.00 to 16.99	1,964	239	834	20	35
17.00 to 17.99	1,964	140	571	7	26
18.00 to 18.99	2,531	104	654	21	29
19.00 to 19.99	10,207	359	337	11	19
20.00 to 20.99	3,987	79	813	9	19
21.00 to 21.99	5,685	100	301	28	9
22.00 to 22.99	4,691	52	127	5	13
23.00 to 23.99	3,046	47	145	7	18
24.00 to 24.99	7,898	129	104	6	10
25.00 to 25.99	4,763	52	98	4	5
26.00 to 26.99	3,229	45	63	1	6
27.00 to 27.99	3,754	40	44	3	7
28.00 to 28.99	4,370	13	39	2	4
29.00 to 29.99	2,287	12	39	3	6
30.00 to 34.99	13,132	22	93	4	9
35.00 to 39.99	7,060	3	25	4	5
40.00 to 44.99	5,995	4	5	.....	1
45.00 to 49.99	1,654	4	7	.....	.....
50.00 and over	1,667	1	.....	.....	.....
Totals	95,984	4,010	11,587	789	1,081

Apprenticeship.—The report of the Director of Apprenticeship shows that at March 31, 1939, the Apprenticeship Branch had dealt with a total of 965 contracts; 180 new contracts being executed. Of these new contracts, 144 were in trades designated under the Apprenticeship Act and 36 in trades not designated. During the period reviewed by the report, 71 apprentices completed their apprenticeships to the satisfaction of their employers, making a total of 100 to date. Fifty-nine contracts were cancelled by mutual consent "many of the lads concerned entering the Air and Naval Forces or bettering their positions in other avenues." In this connection the report states that: "It is a source of some satisfaction that the training obtained under their contracts was largely instrumental in their advancement."

Employment Service.—In a section of the report devoted to the activities of the Employment Service, the General Superintendent records an increase in the number of applications and re-applications, a total of 308,347 in 1938 compared with 198,775 in 1937. Employers' orders dropped to 48,511 as against 52,523 in the previous year, and placements also declined to 48,441 compared with 52,365 in 1937.

Commenting generally on the employment situation the Superintendent states:

> The annual influx of transient unemployed men and women remained one of the principal problems confronting the Service, and these transients, because of their inability to obtain relief, secured employment which should have gone to residents of the Province, often without much regard for the Minimum Wage laws. Establishment of work camps for single men unable to obtain other employment was undertaken on a different basis than has hitherto been attempted, in that all transients admitted to camps were required to earn an amount sufficient to cover the cost of meals and transportation for return to their place of domicile. For other single men admitted to camps under Public Works and Forestry Works Projects, the deferred-pay plan, introduced in 1937, was continued with a greater measure of success. These earn-your-way-home and deferred-pay plans appear to have reduced agitation materially, and it is hoped that they will, to some degree, diminish the annual trek to the Coast.

The Superintendent's report also refers to the work of the Handicap Section and the Women's Section, the importation of labour, youth training plans and the "work test" scheme in Vancouver.

Unemployment Relief.—The report of the Administrator of Unemployment Relief for 1938 states: "The general improvement in the relief situation experienced in 1937 was not maintained during the calendar year 1938. While the average monthly numbers of those receiving material aid during 1938 were slightly less than for 1937, the last six months of this year showed a substantial increase over 1937. The highest number receiving assistance during 1938 was during the month of March, the number being 70,799, compared with 82,772 in March, 1937, and 128,858 in March, 1933. The lowest numbered receiving assistance was 51,677 in September, 1938, compared with 43,110 for September, 1937."

The Province continued to pay 80 per cent of the cost of material aid afforded to municipal residents and the full cost of material aid to provincial and transient cases residing within municipal limits. The Federal Government assisted in this work by means of a monthly grant-in-aid of $115,000.

The report of the administrator also deals with various phases of the relief problem and the steps taken to cope with it, under such headings as "registration," "grub stakes," "assistance to settlers' plan," "forestry training plan," "mining training plan," and "water works projects."

Trade Schools Regulation Act.—During 1938, the number of practical schools registered under the Trade Schools Regulation Act was seventy-four. Of these fifty-five were practical schools situated within the Province and nineteen were correspondence schools. Of the latter seven are Canadian schools and twelve are American.

Referring to the regulations in force under the Act, the report states: "As regards correspondence schools: The somewhat stringent regulations instituted have apparently achieved their objective, as complaints regarding sales misrepresentations and objectionable collection practices have practically ceased.

"The regulations have resulted in an increase of business for legitimate and worthwhile organizations by the elimination of unfair competition by those concerns that depended largely upon high-pressure salesmanship and irrevocable contracts."

Factory Inspection.—During the year 1938, there were 1,972 inspections and re-inspections of factories made by the Factories Inspection Branch. The report also reviews the activities of the branch in connection with accident prevention, prosecutions, factory conditions, investigations into complaints and inspections of passenger and freight elevators. During the year six prosecutions were laid under the Factories Act and as a result, six convictions were registered.

Home-Work.—Referring to "home-work" the Factories Inspector's report states:

> Inspection of factories manufacturing ladies' wearing-apparel which previous to Part II of the "Factories Act" being enacted gave employment to a far greater number of persons in the home than was recorded in the factory, revealed this situation to be entirely the reverse.

To what extent these former home-workers have accepted employment in these factories is difficult to say, but we are certain that this legislation has been the means of vastly increasing the number of female factory employees. The entrance of these employees into supervised industry has not only proven beneficial to them as individuals but it has also eliminated a most unfair competitive condition which previously existed. And further, the public interest has also been served in this respect, that garments formerly made in homes where sanitation was of secondary importance are now being manufactured under proper sanitary conditions. In order to provide adequate accommodation for these additional workers, new factories have been built and extensions have been made to present plants during the year under review.

While "home-work" has long been considered something that should be abolished we have, in the course of our investigations, learned to realize that a certain type of industrial home-work, properly regulated, can serve a very useful purpose, as it enables incapacitated persons to earn a livelihood in their homes. With this in view, a limited number of home-work permits have been issued.

Labour Disputes and Conciliation.—Contained in the report is the first annual report of the Industrial Conciliation and Arbitration Branch. The report states that very few disputes marred the industrial scene in 1938 and that fewer employees were affected and fewer working days lost in 1938 than in any other year since 1931. A total of eleven strikes were reported in 1938 affecting 837 workers and causing a loss of 8,236 working days.

Report of Board of Industrial Relations

The report also contains the fifth annual report of the Board of Industrial Relations in which details are given concerning the operation of the Hours of Work Act and the Male and Female Minimum Wage Acts.

Male and Female Minimum Wage Acts.—During 1938, statistical forms were received from 4,259 employers of women and girls, an increase of 510 over the 1937 figure. These returns covered some 26,732 women workers for the year, an increase of 2,648 women and girl employees on the payrolls when compared with the previous year.

A further increase in wages is revealed in the returns. The average weekly wage for experienced women 18 years of age or over rose from $15.64 to $15.74 in 1938. For younger, inexperienced employees the average weekly wage for the year stood at $9.80 compared with $10.17 in the previous year.

A slight increase in the average hours worked per week is reported. The average hours worked per week by women and girls was 42·42 hours compared with 42·05 hours in 1937.

It is also recorded that the percentage of employees under 18 years of age or inexperienced, decreased from 6·70 per cent to 5·26 per cent.

Separate tabular statistics are given for each occupational classification, the above figures being taken from summary statistics. Referring to the individual occupational classifications the report notes "that the average wages in five of the occupations register increases over those of 1937 for the adult or experienced worker, these being the mercantile, laundry, personal service, telephone and telegraph, and manufacturing industries. Slight decreases are recorded in the hotel and catering, office, fishing, and fruit and vegetable groups."

Inspections, Adjustments, Court Cases.—During 1938 the inspectors of the Board made 15,223 personal investigations throughout the Province, an increase of 2,011 over the 1937 figure. Adjustments were made for arrears of wages totalling $53,202.82 of which $38,259.59 represented payments made to male employees and $14,943.23 was turned over to women and girls whose wages had not equalled the amounts required under the respective Minimum Wage Orders of the Board.

In addition to this amount, $2,371.56 was ordered paid to employees as a result of Court actions. Commenting on the adjustments made the report states: "The sum of $55,574.38, is, therefore, a tangible manifestation of protection afforded employees against employers who through ignorance, neglect, or wilful action fail to pay the correct wage."

Under the Female Minimum Wage Act there were 66 prosecutions during 1938, 57 convictions were registered, 7 cases dismissed and 2 withdrawn. Under the Male Minimum Wage Act there were 43 prosecutions, 32 resulting in convictions, 8 were dismissed and 3 withdrawn.

Hours of Work Act.—The report notes that with thirty industries covered by the Hours of Work Act since 1930, "eight reveal fractional increases in the average weekly hours worked, the remaining twenty-two registering decreases." The 4,895 industrial firms submitting returns for 1938 gave information regarding hours covering 96,188 male and female employees. Of these employees, it was shown, that 88·67 per cent worked 48 hours or less per week, 5·29 per cent worked from 48 to 54 hours per week, and 6·04 per cent worked in excess of 54 hours per week.

During the year 76 prosecutions were made under the Hours of Work Act, 70 convictions being registered, 5 cases were dismissed and 1 was withdrawn.

EFFECT OF WAR ON LABOUR STANDARDS

Review of Situation in Great Britain, France and Germany

ATTENDANT upon the gearing of industry to a war basis, there has resulted among belligerent countries the establishment of emergency measures in regard to labour conditions. To what extent these have resulted in a lessening of restrictions or a relaxing of pre-war standards as to hours and conditions of work, etc., is reflected in the following extracts from surveys published by the International Labour Office at Geneva, and from other publications from various countries.

Labour Conditions in Great Britain

Overtime in Civil Defence Work

A memorandum issued by the National Joint Industrial Council for Local Authorities Non-Trading Services (Manual Workers) after an interview with the British Home Office emphasises the view already expressed by the Home Office that in many parts of the country unnecessary overtime is being worked on civil defences, and repeats the Minister's recommendation that every effort should be made to reduce overtime by the temporary engagement, if necessary, of additional workpeople.

Payment for Time Lost through Air Raids or Warnings

An arrangement in regard to time lost through air raids or warnings has been concluded in the flour milling and cattle food industries in Great Britain.

Workpeople arriving late because of a raid or warning are to be paid from the time they were due to begin work. Workers having to take shelter during their working hours are to be paid for this period of interrupted work. Those having to work after their normal shift finishes, as a consequence of their relief being held up because of a raid or warning, are to be paid at ordinary rate for time worked. Piece workers are to be paid at ordinary time rate for time lost.

Working Hours of Road Transport Drivers

The British Minister of Transport has made an Order under the Defence Regulations to the effect that section 19 of the Road Traffic Act, 1930, shall not apply to motor vehicles while used for the haulage of material or supplies for Government purposes in defence services.

Section 19 of the Act provides that it shall not be lawful for any person to drive, or cause or permit any person employed by him or subject to his orders to drive, for any continuous period of more than five and a half hours, for continuous periods amounting in the aggregate to more than 11 hours in any period of 24 hours or so that the driver has not at least ten consecutive hours for rest in any period of 24 hours calculated from the commencement of any period of driving.

The Order provides that the above limits shall be respected unless the holder of the licence of the vehicle enters, on the current records required to be kept by him, the fact that the driver is employed on the haulage of materials or supplies for Government purposes in defence services and unless the driver has at least ten consecutive hours of rest after every occasion on which an excess period is worked under the Order.

Transfer of Dock Labour

According to the British *Ministry of Labour Gazette,* an agreement has been concluded between the Minister of Labour and National Service (on behalf of H.M. Government), the National Council of Port Labour Employers, and the Transport and General Workers' Union (on its own behalf, and on behalf of the Unions associated with it, namely, the National Union of General and Municipal Workers and the National Amalgamated Stevedores and Dockers), which has as its object provision for the temporary transfer, on a voluntary basis, of dock labour in wartime with a view to supplementing labour at ports where the supply of local registered dock workers is inadequate for the purpose of dealing with the additional traffic caused by the diversion of shipping.

Other Measures

On September 21, Royal Assent was given to the Control of Employment Act (outlined elsewhere in this issue on page 1091). Other measures adopted include the Unemployment Insurance (Emergency Powers) Act, 1939, and the Unemployment Assistance (Emergency Powers) Act, 1939, under which the Minister of Labour was given power to make regulations for the purpose of adapting the schemes of unemployment insurance and unemployment assistance to war conditions. Regulations under both Acts have now been made, and came into operation on September 6, 1939.

Employment Conditions of Munition Workers in Australia

Under the Supply and Development Act, 1939 (this Act came into force on June 17, 1939, and provides for the supply of munitions, and the survey, registration and develop-

ment of the resources of Australia), the Australian Commonwealth Government is empowered to make regulations relating to the establishment, maintenance or operation of factories for or in relation to the provision or supply of munitions, including such machines, commodities, etc., as the Government considers necessary for purposes of defence.

Private Factories.—As regards conditions of employment in private munition factories, it is laid down that the Act does not empower the making of regulations (*a*) depriving a trade union or any member of a trade union of any right conferred by any law of the Commonwealth or of a State relating to rates of wages or conditions of employment; (*b*) altering or affecting, to the detriment of a trade union or any member of a trade union, any provision of an agreement between an employer and the trade union relating to rates of wages or conditions of employment; (*c*) restricting the freedom of any employee to change his employment; (*d*) altering to the detriment of any employees, or any trade union, any rule, practice or custom in any industry; or (*e*) affecting the rules of any trade union.

Government Factories.—On behalf of the Australasian Council of Trade Unions and the Australian Labour Party, the Labour Advisory Committee asked that similar guarantees should be given as regards conditions of employees in Government munition factories. The Committee pointed out that, while Government employees could apply to the Commonwealth Public Service Arbitrator for an award fixing their conditions of employment, any award of the Arbitrator which was inconsistent with a Commonwealth Act or regulation relating to conditions of employment could be disallowed by either House of Parliament; the protection afforded by awards of the Arbitrator was, therefore, not complete. In reply, the Prime Minister said that this power of Parliament to disallow an award of the Public Service Arbitrator had existed for 20 years past and had been exercised very rarely. He considered that Parliament itself could be trusted to see that there was no interference by it with the important principle that workers were entitled to the protection of industrial tribunals—a principle to which he himself adhered very strongly. The Government did not intend to use its powers so as to set aside or impair the efficacy of awards or industrial agreements governing the fixation of wages and conditions of employment in Government or private factories.

Regulation of Labour in France

The British *Ministry of Labour Gazette* for October summarizes the important changes in legislation governing working conditions in France as covered by a Decree-Law dated September 1, 1939, and amending Decrees and Orders. Extracts from this summary follow:

Increased Weekly Working Hours.—All industrial, commercial, handicraft and co-operative undertakings and public hospitals and institutions are authorized to increase working hours to 60 a week, to be distributed in such a manner that the daily working time does not exceed 11 hours. On continuous processes, the weekly working time is limited to 56 hours on average over a period which, except as otherwise authorized by the Inspector of Labour, may not exceed 12 weeks. Where work on continuous processes is being carried out in the interests of national defence or for one of the public services, an extension of working time to 72 hours a week may be sanctioned. The application of the revised regulations may not result in the extension of the normal working hours of children and women beyond 10 a day or 60 a week, except with the authority of the Inspector of Labour.

Overtime, etc.—Undertakings are to continue to enjoy the overtime facilities, during periods of pressure of work, granted under previous legislation. Where the work is of national importance, the duration of the overtime is to be fixed by agreement between the Inspector of Labour and the local representative of the Ministry concerned.

Adjustment of Wages and Contribution to National Solidarity Fund.—In order that production costs may not be unduly raised by the increase in working hours, it is provided that workers, the duration of whose working week has been extended, are to receive for 45 hours of such working week the remuneration which they formerly received for a week of 40 hours. The remuneration which would normally have been due for hours of work performed between 40 and 45 a week is to be retained by the employer and paid to the Treasury as a contribution to the National Solidarity Fund, which, by a Decree-Law dated September 1, 1939, has been established in order to provide allowances for necessitous families of persons serving with the forces. For hours of work in excess of 45 a week, workers are to receive two-thirds of the normal hourly remuneration. The remaining third of the normal hourly remuneration is to be appropriated to the National Solidarity Fund. In addition, men between the ages of 18 and 49 who are not embodied in a military unit are required to make a contribution to the National Solidarity Fund, as from October 1, 1939, of 15 per cent of their earnings, unless they are in receipt of a military or civil war-disability pension. For all other workers, the special tax of 2 per cent on wages, salaries and earnings instituted by the Decree-Law dated November 12, 1938 is to be increased, as from January 1, 1940, to 4 per cent.

Suspension of Conciliation and Arbitration Legislation.—The application of the existing legislation respecting conciliation and arbitration in labour disputes has been suspended, and the Minister of Labour has been empowered to institute a war-time system of conciliation and arbitration. The wage revision clauses of all collective agreements and labour contracts are also suspended.

Regulations applicable to Special Industries.—Special regulations have been issued regulating the working hours and wages of underground workers in mines. The normal working week of such workers has been extended from 38 hours 40 minutes to 32 hours 30 minutes, inclusive of rest periods of 25 minutes a day and of both winding times. The working week is to consist of six days of 8 hours 45 minutes each; but the weekly rest day need not be the same for all the workers employed in an undertaking. The working time may be further extended to 60 hours a week by an Order to be issued jointly by the Ministers of Public Works and Labour. Provision is made for temporary extensions of working hours in case of accidents, etc., and on preparatory and complementary work, and work in the interests of national defence and other specified circumstances.

Mine workers are required to make contributions to the National Solidarity Fund similar

in character to those made by industrial and commercial workers generally.

Further special regulations applicable to railways and the mercantile marine are to be issued later.

Working Hours in Government Departments.—The duration and distribution of working time in the various Government Departments and State works and services are to be determined by Ministerial Decree, subject to a maximum of 60 working hours a week.

Weekly Rest.—The grant of a weekly rest may, so far as is necessary, be withheld in the case of workers employed in State undertakings, undertakings executing State contracts, and undertakings engaged on work for the national defence. In other industrial and commercial undertakings, the weekly rest may, for the time being, be granted in rotation. During the period of hostilities, the staffs of Government Departments may be allowed to take the Saturday half-holiday and Sunday rest in a similar manner.

War-Time Measures in Germany

In its review of war-time measures in Germany, the International Labour Office publication (*Industrial and Labour Information,* October 2) has drawn chiefly on the Reich Government controlled press. (Measures taken since the advent to power by the Nazi regime are reviewed in an article appearing in this issue on page 1122). Paragraphs from these sources indicate a cross-section of labour control as follows:

Control of Employment

The Council of Ministers for the Defence of the Reich issued an Order on September 1, 1939 concerning restrictions on change of employment and the Minister of Labour issued a further Order on September 6, 1939 containing detailed provisions for the application of the above Order.

In virtue of the first Order, the consent of an employment office is required whenever labour is engaged by an employer, except in agriculture. By the second Order, mining and domestic service in houses in which children under 14 years are living were added to the exceptions, unless the person to be engaged was last employed in agriculture, in which case the consent of the employment office is required.

Similarly, anyone who wishes to terminate a contract of employment or apprenticeship requires the consent of an employment office, unless the parties agree to terminate the contract, or the work of the undertaking is suspended, or the worker is engaged as a probationer or substitute and the contract comes to an end within one month, or the worker renders only occasional services or receives very little pay and is consequently not covered by the sickness insurance system. In all these cases a worker who leaves his employment must immediately register at the employment office.

Regulations have been issued concerning the engagement of labour in the "freed area of West Prussia." Labour can be engaged only through the employment offices and in virtue of an Order of the president of the regional employment office in Dantzig it is forbidden to engage labour in the above area for employment in the former Free City of Dantzig. Employment offices are to be established in a number of places in the area.

Compulsory Labour Service

By an Order of the Minister of Labour of September 4, 1939 a change has been made in the additional allowances payable in certain circumstances to persons who are engaged on compulsory labour service on work of national importance.

Previously, such allowances were based on the principle that a worker on compulsory service should not receive less than he had been receiving in his previous employment. Under the new Order, if a worker on compulsory service has to live away from his family he is entitled to receive a separation allowance not exceeding 19 marks per week in addition to his wages. An additional allowance may be paid if the worker has incurred obligations which are reasonable in relation to his previous economic situation and which he is unable, in consequence of his compulsory service, to fulfil either wholly or partly.

Labour Service for Young People

The Council of Minister for the Defence of the Reich issued an Order on September 4, 1939 increasing the strength of the compulsory labour service for young women to 100,000. The Leader of German Labour is empowered to enrol single women from 17 to 25 years of age who are neither fully employed nor are being educated or trained, and who are not absolutely required for work with their families in agriculture.

An Order of September 5, 1939 provides that the discharge from the labour service of young women who were due to leave at the end of September, 1939, has been postponed.

The labour service for young men is engaged in Poland to follow the army and repair roads, bridges, etc., which have been destroyed during the military operations.

Employment of Women and Young Persons

Under the Order of September 4, 1939 concerning war economy, exceptions may be allowed to the labour protection provisions in general. In addition, the Order of September 1, 1939 to amend and supplement the existing provisions concerning labour law, empowers the competent authorities to suspend the provisions for the protection of women workers which concern prohibited occupations, hours of work, breaks, night work, and leave of absence before and after childbirth.

On September 11, 1939, the Minister of Labour issued an Order defining the exceptions to be admitted with regard to the hours of work of women and young persons. Under the terms of this Order, women may be employed in an emergency for 10 hours a day and 56 hours a week. This exception does not apply to pregnant women during their last three months of pregnancy or to women feeding their infants, or to unhealthy occupations

in which hours of work are specially regulated. Breaks for women workers may be shortened if their work involves a sufficient number of breaks of short duration to ensure them adequate rest. The prohibition of night work is maintained in principle, the only exception allowed being for women employed in the evening or morning in regular alternating shifts. In particular cases, the labour inspection offices are authorized to widen the scope of the exceptions, or to restrict it if they consider it necessary for the women workers' protection.

On September 11, 1939, the Minister of Labour issued an Order with regard to exemptions to be granted for the hours of work of women and young persons. In urgent cases, the hours of work of young persons over 16 may be prolonged up to 10 hours a day and 56 hours a week. This provision does not apply, however, to unhealthy occupations governed by special regulations with regard to hours of work. For young persons under 16, hours of work may in urgent cases be prolonged up to 10 hours a day, including the time spent in occupational schools, and up to 48 hours a week, if the time spent in the occupational schools is not counted as working time. In order that the day's work shall not end too late owing to daily hours of work being prolonged, the breaks for young persons may be shortened, provided that their work involves sufficient short breaks to ensure them adequate rest. The prohibition of night work for young persons is maintained in principle, and the only exception allowed is for young persons over 16 employed in the evening or morning in regular alternating shifts. Exceptions are also provided with regard to the half-holiday before Sundays or holidays. In particular cases, the labour inspection departments are empowered to widen the scope of the exceptions or restrict it if they consider it necessary for the young worker's protection.

The Order of September 1, 1939 under which a permit is required from the Labour Office for any engagement of workers or termination of a contract applies equally to apprentices.

Hours in Shops

The Prefect of Police in Berlin issued an Order on September 6, 1939 altering the closing hours for food shops in order that workers may be able to buy their food later in the evening. In order to compensate the staff of food shops for this extra work, a break in the middle of the day has been made compulsory.

The shops will now close at 8 p.m., a break being granted in the middle of the day from 12.30 to 3.30 p.m. The Order concerning hours of work provides that, normally, shops should be closed to the public from 7 p.m. to 7 a.m. The decision taken by the Prefect of Police in Berlin is based on a clause in the Order enabling the Minister of Labour or an authority to whom the Minister has delegated his power, to amend the provisions in force when such amendment is urgently required in the public interest.

STATE CONTROL OF LABOUR IN GERMANY

Abolition of Trade Unions—Control of Employment and Labour Costs—Forced Labour

THE following is a summary of an article entitled "State Control of Labour in Germany", appearing in the October issue of the *Monthly Labor Review* published by the United States Department of Labor.

The article outlines the absorption of labour under the state in the German Reich since the ascendency of the National Socialist Government to power in 1933. Since that time, by a series of legislative and administrative measures, conditions of employment of all workers have been subordinated to the interests of the state in the carrying out of the doctrine of "totalitarianism." In a society founded on such a principle, the article emphasizes there can be no room for free trade unions, for strikes or lockouts, or even for serious argument over wages and working conditions.

The article outlines the steps in the domination of civilian and labour rights—the abolition of trade unions, the prohibition of industrial disputes, and assumption of control by the state of all other labour conditions.

Abolition of Trade Unions

In January, 1934, under the terms of the National Labour Law, all labour unions were abolished by the National Socialist Government. By this enactment "the theory of conflict of interests between the employers and the workers, resulting in the class struggle, is replaced by one which assumes a harmony of interests between employers and workers and joint effort to further the purposes of the enterprise and the common well-being of the people and the state as a whole."

Under this law there is established a highly integrated system of authority beginning with the shop leader—the employer. Over him is the leader of an industrial area—the labour trustee; over the latter is the state minister of labour; and, finally, over all, the supreme leader of the German Co-Nationals (Folksgenossen) and their state.

The law provides for close co-operation between the employers and their workers—something like a shop family, in which the employer is the family head in the role of the shop leader, and his workers are family members in the role of the followers of and advisers to the leader, but with the latter alone deciding and directing all matters concerning the establishment.

Democracy and the majority rule has been replaced by the omnipotent state with its exclusive power of selection, appointment, guidance, and control over industrial and trade relations.

Labour unions and employers' associations have been replaced by a shop council of advisers, consisting of the workers and the employer as their responsible leader.

Labour unions have been replaced by the so-called Labour Front, organized and controlled by the state and consisting of both workers and their employers.

Control of Employment

Dealing with control of employment, the article states: "This Government control over the employer-worker relationship, exercised through the Labour Front, did not go far enough, however, to meet the desires of the Government. The forcing of armament production and the building of forts and military roads required the quick shifting of great masses of workers and keeping them on particular jobs and at particular workplaces. Therefore it became necessary to put the workers more directly and more completely under the control of the Government through the state labour offices, the labour trustees, and the local governments."

In an attempt to meet this objective, a number of decrees were passed. In May, 1934, a decree authorized certain Government officials to require the dismissal of former farm workers from other employment; to prohibit certain ex-farm workers from engaging in other forms of labour; and to transfer workers from public works to farm work. At the same time certain districts were closed to non-resident workers.

In June, 1935, a system of labour passports was introduced making it possible for authorities to keep in close touch with all shifting or attempts at shifting in employment.

In October, 1936, with increasing armament activities, the Government decreed that workers could not be employed without the approval of the Employment Service, and that metal workers employed in other industries must return to the metal industries if their services were needed. Anonymous advertising for skilled workers was also prohibited.

In March, 1938, a series of orders furthered the control of employment by codifying measures which had applied to Government labour authorities for some time; by controlling the employment of apprentices under the age of 25; and by the compulsory registration of young people with local labour offices and the prohibition of recruiting workers in certain establishments without Government permission.

89092—4

In June of the same year a Government regulation required all Germans "to perform certain urgent state tasks for a period of time or to undergo vocational training as prescribed by the Government."

Forced Labour

The article then proceeds to trace the application by decrees of forced labour as a permanent policy. The introductory paragraph of a decree of February 13, 1939, containing the new policy is as follows: "The execution of important state political tasks which cannot be delayed must not be endangered by a lack of workers. For the execution of such tasks the possibility must be afforded of drafting the inhabitants of the Reich territory for work and of making closer ties to their place of work."

Control of Labour Costs

Reference is also made to the attempts of the National Socialist Government to keep the cost of production from rising and if possible, to lower it. "This it was hoped", the article continues, "to accomplish by an increase in the productivity of workers by rationalization, i.e. by the reorganization of industrial production on a more efficient basis; and by keeping down wages, which constituted 20 to 50 per cent of the production cost in the various industries."

The article then outlines certain substitutes adopted to take the place of incentive based upon wage increases; and the fixing of not only the lower limits of wages but the upper limits to offset the tendency of wages to rise on account of a shortage of skilled workers in the armament industries.

Public Canteens

Reference is made to the increasing number of women wage earners in Germany, the total having risen from 4,500,000 in 1933 to 6,600,000 in 1939, contrary to the earlier plan of the National Socialists favouring the return of women to home-making. This has been brought about by the increasing demand for workers in the armament industries. Coincidental with this trend there has been developed a system of public feeding through a canteen system, the National Socialist Government apparently being convinced that the state must recognize public mass-feeding as a permanent institution, similar to that established in the Soviet Union. An organization in which various bodies were represented was created to deal with this question, and was given the task of organizing canteens on a uniform pattern and in such a way as to ensure "sound nourishment from home-produced foods in the place where the majority of the people take their meals."

MINIMUM WAGE-FIXING MACHINERY IN OTHER COUNTRIES

MINIMUM wage legislation is the subject of a study being made by the International Labour Office. Monographs on wage regulation in Australia, Belgium, Czecho-Slovakia, France, Great Britain, Ireland, New Zealand, Peru and the United States of America have been published under the title, The Minimum Wage, an International Survey. The Office proposes to publish at a later date analyses of laws in other countries and a general survey of the principles and problems of minimum-wage regulation.

Of the nine countries, whose legislation has been analysed, all but Czecho-Slovakia, Peru and the United States have ratified the Convention concerning the creation of minimum-wage-fixing machinery which was adopted by the International Labour Conference in 1928. This convention requires each country ratifying it to create or maintain machinery for fixing

> minimum rates of wages for workers employed in certain of the trades or parts of trades (and in particular in home-working trades) in which no arrangements exist for the effective regulation of wages by collective agreement or otherwise and wages are exceptionally low.

Each country is free to decide the nature and form of the machinery and the methods to be followed in its operation provided: (1) that before the machinery is applied in any trade, representatives of the employers and workers, including representatives of any organizations there may be, are consulted; (2) that the employers and workers concerned are associated in the operation of the machinery to such extent and in such manner as the national law determines but in any case in equal numbers and on equal terms; and (3) that the minimum rates fixed are not subject to abatement by agreement between an individual worker and employer or, except with the permission of the competent authority by collective agreement.

A Recommendation made at the same session of the Conference for the guidance of the Member States supplemented the Convention with "certain general principles which, as present practice and experience show, produce the most satisfactory results." The most important of the principles relating to the machinery for fixing wages may be noted as follows: (1) In order to make a decision on the application of the machinery to any trade, the wages actually paid and the arrangements, if any, for the regulation of wages should be ascertained with respect to any trade to which employers or employed request the application of the machinery and submit *prima facie* evidence that no arrangements for effective regulation exist and that wages are exceptionally low; (2) There should be consultation with the employers and workers in the trade and the views of both should be solicited and given equal consideration; (3) To secure greater authority for the rates that may be fixed, the general policy should be to have the employers and workers, through representatives equal in number and votes, jointly take a direct part in the deliberations and decisions of the wage-fixing body which should include also one or more independent persons with voting rights; (4) As far as practicable, employers and workers should have a voice in selecting their representatives; (5) Account should be taken of the necessity of enabling the workers to maintain a suitable standard of living and for this purpose regard should be had to the rates paid for similar work in organized trades operating under collective agreements or where there are no such agreements, to the general level of wages in the country or particular locality.

Minimum-Wage Regulation defined

The term "minimum-wage regulation" is defined by the International Labour Office as "the fixing of legally enforceable minimum rates of wages by some authority other than the employers and workers or organizations of employers and workers, directly concerned." The study, therefore, excluded collective agreements unless they could be legally enforced against persons who were not parties to an agreement. In the words of the report,—

> Collective agreements, though they fixed the standard or lowest rates of wages which may be paid in any particular trade or industry are consequently not included in this survey unless they can be made binding on persons who have not agreed to accept their provisions. If, however, provision exists for the compulsory extension of such agreements to third parties, such provision constitutes, as regards employers and workers who are required to observe conditions which they have not voluntarily accepted, a form of wage-fixing by authority and it is therefore included in this study.

Excluded from the study, however, is one form of wage-fixing by authority which is familiar in Canada, that requiring a "fair wage clause" in public contracts by which contractors for public works or supplies must observe certain standards in the payment of their workers. The limited and special nature of this kind of regulation and the lack of available information on its extent and operation caused the Office to reserve this subject for a later publication.

One of the most important and interesting parts of the volume is the description of

the machinery and method of wage regulation in different countries and even within one country. These methods are five in number and may be briefly indicated as the enactment of a minimum rate by the legislature, compulsory arbitration, the compulsory application of collective agreements to non-parties and regulation by trade boards and by general boards. Not always is the distinction clear cut, however, and two or more of these methods may be used or, the machinery being chiefly of one type, may resemble other types in some particulars. The European countries, except Great Britain, and the Argentine Republic, restrict their minimum-wage laws to home-workers.

Statutory Rates

Minimum wages have been fixed by statute in only a few countries. The object of some early laws of this kind appears to have been to prevent the exploitation of young workers but more recently this method has been applied in some countries to workers without regard to age. Of the nine countries covered in the Labour Office survey, Australia, New Zealand, Peru and the United States, in addition to providing for minimum-wage fixing by administrative action, have laws fixing minimum rates of wages for some classes of workers. In Peru, only dock workers are dealt with in this way. In Australia, the States of Victoria, Queensland, Western Australia and Tasmania have statutory minimum rates for factory workers and Queensland and Western Australia for shop assistants also. In New Zealand, there is a statutory minimum for persons beginning employment in factories, shops and offices with provision for a half-yearly increase until the end of the third year of employment and a minimum rate applying thereafter. In both Australia and New Zealand, the minimum rates prescribed in the statutes are superseded in most cases by higher rates fixed in arbitration awards, collective agreements extended and made binding on the whole industry and, in Victoria and Tasmania, in determinations of wages boards. In the United States, the minimum wage laws applying to women and minors in the States of Arkansas, Nevada and South Dakota and in Puerto Rico specify the rate but in Arkansas power is given to the Industrial Welfare Commission to vary it. The federal Fair Labour Standards Act, 1938, applying to industries engaged in interstate commerce or in the production of goods for interstate shipment, established a minimum hourly rate of 25 cents for the first year from October 24, 1938, 30 cents for the next six years and 40 cents from October 24, 1945. In addition to this provision for a general upward movement in minimum rates at stated intervals, the Act provides machinery for increasing the rates industry by industry above the statutory minimum in effect at the time.

In Canada, the method of fixing minimum wages by statute was used by Alberta from 1917 to 1926. At the present time, only Manitoba has a law establishing a minimum rate of wages. This action was taken first in 1934 to prevent the employment of males at wages lower than the minimum fixed by regulation for women. The present Manitoba Minimum Wage Act, which applies to both male and female workers in cities, stipulates that no person over 18 years of age may be employed in a factory, shop, office or other workplace covered by the Act at less than 25 cents an hour unless the Minimum Wage Board has fixed a lower rate. The Act may be extended by order in council to parts of the province outside cities and certain regulations apply to all parts of the province but the statutory rate of 25 cents relates only to employment in cities.

Compulsory Arbitration

Tht minimum-wage principle was adopted first in New Zealand in 1894 and regulation was effected by the compulsory arbitration of industrial disputes concerning wages. Arbitration tribunals, such as now exist in Australia and New Zealand, which are competent to issue compulsory awards, usually function as wage-fixing bodies only in relation to parties to such disputes. Moreover, in New Zealand and some Australian States, their jurisdiction is restricted to disputes involving registered trade unions. Such tribunals are thus not engaged in the systematic regulation of wages nor are they necessarily concerned with industries in which wages are especially low. However, under the power conferred in comparatively recent years to declare the amount required for a living wage, or a basic wage as it is more commonly called in Australia, the Commonwealth Court of Conciliation and Arbitration and the arbitration authorities in New South Wales, Queensland, South Australia and Western Australia and in New Zealand function in somewhat the same way, although to a limited extent, as general minimum-wage-fixing boards in other countries. In Australia, such declarations appear to be binding only for the purposes of the Act, that is, on the arbitration tribunals and on parties to collective agreements to be made legally binding through registration. In New South Wales, the arbitration authorities may not fix minimum rates of wages that are lower than the "needs basic wage" for an adult unskilled worker fixed by the Commonwealth

Court of Conciliation and Arbitration for its own guidance in dealing with disputes extending beyond the bounds of any one state. Victoria, too, has tried to bring about greater uniformity and overcome the difficulties arising from conflict between the Commonwealth awards effective in Victoria and the determinations of the State Wages Boards by stipulating that the Wages Board for every trade affected by an award of the federal Court shall, as soon as possible, incorporate in its determination any provisions of the award which deal with matters within its jurisdiction.

Generalization of Collective Agreements

The compulsory application of collective agreements voluntarily concluded by employers' associations and trade unions to all employers and their employees in the industry affected by the agreement is another method of regulating minimum wages by governmental authority. This method is used in France, Greece, Mexico, Brazil, South Africa, New Zealand and the Australian States of Queensland and Western Australia. Such legislation was also in effect at one time in Austria, Germany and Czechoslovakia and applies, at the present time, in England to the cotton weaving industry under an Act of 1934. In Canada, the Quebec Collective Labour Agreements Act, enacted first in 1934, utilizes the collective agreements made by employers or employers' associations and trade unions to establish minimum rates of wages, maximum hours of work and the proportion of apprentices throughout the industries and areas affected by the agreements. The extension of agreements to non-parties is effected in most countries by the administrative authorities in accordance with the conditions laid down in the statute but in Australia and New Zealand the arbitration tribunals have power to declare agreements generally binding. Such agreements are, however, voluntary in their origin and are to be distinguished from the arbitration awards made by the same authorities in case of disputes, although both constitute a form of minimum-wage regulation.

The extension of a collective agreement so as to regulate conditions in those portions of the industry in which labour is not organized or where agreements have not been made is unlike other forms of minimum wage-fixing machinery in being put in motion neither at the request of the employers or employees to whom the rates will apply nor on the initiative of a government agency but at the request of one or both of the parties to the agreement who make such application for their own protection from what they consider unfair competition in the matter of working conditions. Accordingly, the law usually provides that an agreement may be extended only after the authorities have satisfied themselves that it has been voluntarily accepted by a substantial proportion of the industry and after they have examined, in the public interest and that of the persons to whom it is to be compulsorily applied, any objections to its extension.

Trade Boards

Regulation of wages by permanent and, in most cases, autonomous, boards acting independently of each other and made up of an equal number of representatives of the employers and employed in the trade or industry concerned, together with one or more independent members, was the method adopted first in the State of Victoria in 1896 and is that most commonly used at the present time. Such boards fix minimum wages, time and piece rates, for the various occupations in their own trades in the areas for which they are appointed. Provision is usually made, for the publication, before a final determination of a board is made, of the proposed rates and for the consideration of any objections that may be made within a fixed period. The members of a board serve for a fixed term, usually two, three or four years, but, in all cases, they may be reappointed. This system is in effect in Great Britain and Northern Ireland, in the Irish Free State, France, Norway and the Argentine Republic as well as in the Australian States of Victoria, Tasmania and South Australia. It was formerly used, too, in Germany, Austria and Czechoslovakia. In some cases, the principle of wage-regulation by trade boards was incorporated first in an Act relating only to home-workers or, as in Britain, to persons employed in industrial establishments where wages were low and there was no effective machinery for their regulation, but after some years of experience it was applied also, with variations, to other classes, such as agricultural workers and also in Britain to coal miners in 1912 and to road haulage workers in 1938.

Legal effect is given to the determination of a trade board by a formal order of the responsible Minister or other government authority. In some cases, as in Britain, Tasmania and the Argentine, the decision of a trade board is final. So also in Germany before 1933 if the minimum rates were adopted by at least a two-thirds majority of the board, and in Czechoslovakia. In Great Britain the Minister of Labour must confirm the rates fixed by a board within one month

or refer them back for further consideration but he has no power to revise or modify them.

On the other hand, under some laws as in France, Norway and Victoria, there is a right of appeal from the rates fixed by a trade board to another body on which there is also equal representation of employers and employed and of which the chairman is an independent person. In Victoria, objections to the rates agreed on by a wages board may be heard by the Court of Industrial Appeals which consists of a Judge of the Supreme Court and two other members who have been engaged in the trade concerned as employer and employee respectively for at least six months in the three years preceding their nomination for the Court by the employers and employed in the trade. It is stipulated, however, that if the Court alters the determination of a Board, the latter, after twelve months, may revise the decision of the Court without its leave. In France, where there are two different boards for each industry, one to fix minimum hourly rates and the other to determine piece rates, there is a right of appeal to a Central Board presided over by a Judge of the Supreme Court of Appeal with a permanent officer of the Ministry of Labour as secretary with the right to vote and including for each case three employers and three workers in the particular industry. Similarly, in Norway a Central Council of equal numbers of employers and employed with one independent member may modify the determination of a trade board. But since 1928 the Norwegian Council has had power to fix wages of home workers without appointing a trade board, the Act merely requiring that the employers and employees in the trade be "consulted" by the Council. Under the law in Austria the Minister in charge of labour matters had authority to alter the rates agreed on by a trade board.

The essential feature of the trade board system, then, is the imposing of responsibility for the fixing of wages on the industry itself. The system provides, also, direct and continuous means of ascertaining the views of employers and workers actually engaged in the industry it is proposed to regulate and in the task of enforcing minimum rates the hands of a government are strengthened by the fact that the rates have been either agreed to by representatives of both sides or at least accepted by them as the majority opinion of a board on which they agreed to serve.

Especially important, therefore, is the thoroughly representative character of a board. It must represent all parts of the trade, the main grades of workers for whom rates are to be fixed, the various classes of employers, the different districts or centres, and the home-workers if any. In Britain and Tasmania, the size of a trade board depends on the circumstances of the trade but the average number of members in Britain is about 40 of whom three are independent or "appointed" members, as they are called. In Victoria the law stipulates that there shall be not less than six or more than ten representative members and an impartial chairman selected by the other members or, if they cannot agree, by the Minister. In France the number of representative members is two or four and in Norway not less than four. Austria and Czechoslovakia provided for boards on which employers, workers and the public were equally represented.

Since the chief function of the independent members of a board is to reconcile as far as possible the conflicting views of employers and workers, to see that the relevant facts are brought out and to vote according to their judgment, it is essential that there should be confidence in their impartiality and general competence. Where there is only one independent member, he is chosen by agreement between the other members as in Australia and acts as chairman of the board. In Britain the Minister of Labour has adopted the policy of not appointing as independent members of trade boards persons who are employers of any considerable number of employed persons, including directors of companies, or those who are themselves employed or connected with any organization of employers or employees or persons prominently connected with any political party as members of Parliament, political candidates or agents, public speakers or otherwise. When there is a large proportion of women among the workers, the British Act requires that one appointed member shall be a woman. The Ministry of Labour maintains a panel of suitable persons from which "appointed members" may be chosen and, as the boards are reconstituted every two years, there is opportunity to revise the panel as the members show their fitness for the work. Of the 57 appointed members of trade boards in 1937, 17 were university professors or lecturers, 13 were lawyers, 10 were social workers and nine were former civil servants. An appointed member may serve on several boards but in practice none acts on more than six boards. Appointed members in Britain receive travelling expenses and a fee for time spent on trade board business; representative members are paid allowances for travelling, subsistence and loss of earnings during trade board sittings.

The method of choosing representative members for trade boards differs from one country to another. As far as possible they are selected by the employers and workers themselves or after consultation with them and in most cases the law stipulates or the policy is followed of requiring that a large proportion of the representative members shall be persons actually engaged in the trade. Wherever there are organizations of employers or workers, they are invited to submit names from which the representatives of the organized parts of the trade may be chosen. In Britain representatives of the unorganized workers may be nominated at meetings held in individual establishments and presided over by an investigating officer of the Ministry or they may be selected by the Minister from his knowledge of the trade or after inquiry through the local offices of the Ministry. Election of representatives of either employers or workers has proved unsatisfactory. In other countries representatives of unorganized workers may be chosen by specified authorities, the probiviral courts in France or the local authorities in Norway.

Principles for Determining Rates

Laws providing for minimum-wage-fixing machinery of the trade board type, although enacted in Australia, Great Britain and other countries to eliminate the "sweating" system did not expressly prescribe that the minimum rates for the lowest class of workers should provide "a living wage." Different minimum rates were to be fixed for the various occupations in the trades to which the legislation applied, margins being allowed for skill and other factors. It was generally accepted that a "fair" rate of wages should be fixed for each class of workers in the sense in which that term was used at the time. The "fair wage" principle which, in several countries, has been expressly incorporated in government policy for the regulation of conditions on government works, is based on the practice of good employers. According to the classical definition, real wages in any occupation are fair when, allowance being made for differences during the year in the steadiness of the demand for labour in different industries, they are about on a level with the wages paid for tasks in other trades which are of equal difficulty and disagreeableness and which demand equally rare natural abilities and an equally expensive training.

Minimum wage regulation on a fair-wage basis continues to be the guiding principle in most countries but, in respect to the lowest grade of workers, it is likely to be combined with if not replaced by the living wage principle. As the latter, however, involves an estimate of a wage sufficient for a decent livelihood, it varies from one country to another not only with the cost of living but with the standard generally accepted as one below which no member of the community should be allowed to fall. The principle of the living wage has been applied by the arbitration tribunals in Australasia as a fundamental guide in fixing minimum wages but the "living wage" has been interpreted as a wage permitting a female worker or a particular family unit to live at "the average standard being enjoyed at the time by living-wage earners" or at a particular standard of living which is gauged with reference to current rates and standards. Thus, the "basic wage" declared by the wage-regulating authorities from time to time in Australia tends to approximate to a "fair wage" for that grade of worker. The amount of the wage varies from state to state with the cost of living, the conception of the authorities as to what are the requirements for a proper standard of living and, in the case of male workers, with the number of children in the family unit but in recent years there has been a noticeable trend towards uniformity through acceptance of the standards adopted by the Commonwealth Court of Conciliation and Arbitration.

In Victoria and Tasmania, where no "basic wage" is declared but each trade is regulated by its own wages board, the statutes give some guidance as to the principles to be followed. The Tasmanian Wage Boards are required to consider the nature of the work and conditions in other trades, a "fair wage" policy. In Victoria, the Court of Industrial Appeals is instructed to consider, when an appeal against a board determination comes before it, whether the rate has or may have the effect of prejudicing employment in the trade and to prevent such effect while at the same time securing a living wage to the workers in the industry.

Thus, a third principle of determining minimum wages with reference to what the trade can afford to pay is observed in Victoria and, indeed, is given weight, too, in practically every country since minimum wage authorities must have regard to the prosperity of the industry, not to the poor financial condition of particular plants arising from causes peculiar to them but to general conditions affecting the industry as a whole. Trade boards, from the very nature of their constitution and responsibilities, are likely to pay great attention to this factor which operates to permit increased minima in relatively prosperous times.

Varying, of course, is the relative weight given to these three principles—a living wage, a fair wage and what the trade can bear—but

in some degree they operate in all countries. They are, in fact, more or less bound up with each other, the conception of a living wage varying with the accepted standard of decent living and the standard being based, to a large extent, on the general wage-level of the country but necessarily modified in its practical application to a particular trade by the market condition of the trade. The Recommendation of the International Labour Conference noted above refers to the necessity of a living wage enabling a suitable standard of living and suggests as a basis for determining the minimum rates the wages paid for similar work under collective agreements or the general wage level where there are no agreements. The Recommendation also calls attention to the principle of the Peace Treaty that men and women should receive equal remuneration for work of equal value.

Trade boards may be organized by districts as in France and Norway where the Acts apply only to home-work, or one board may cover the whole country, as is usually the case in Britain. Minimum rates may be uniform throughout the country or there may be regional variations. In a half dozen trades there are separate boards for Scotland. Only four of the British trade boards have set up district committees and some 12 boards have fixed differential rates for special areas of which six are in the service or distributive trades with local markets.

Where minimum wages are regulated by wages or trade boards, there is generally means of co-ordinating their work to some extent at least. In Britain, the Minister of Labour provides a secretary for each board and it is the practice to appoint the same officer of the Trade Boards Division of the Ministry of Labour to act as secretary for all boards. Further, as indicated, some independent members act on several boards as do also some employers' and workers' representatives. In Victoria and Tasmania, the same chairman may preside over several boards. Another influence towards co-ordination may be that of the appeal body as in Norway and Victoria or the confirming authority as in Britain where the Minister in referring back to a board its recommendation may call attention to factors which he believes have not been given adequate consideration.

Central Board Systems

But under the trade board system there is naturally not as much uniformity in the rates fixed by the various boards as in countries which have a general or central board system. Moreover, the latter system, which has been so widely adopted for minimum-wage fixing on this side of the Atlantic, is usually concerned, primarily, with the fixing of one minimum rate on a living wage basis for the unskilled workers in each trade or industry within the scope of the Act, leaving the rates in occupations requiring skill or other special qualifications to adjust themselves above that level. There is, therefore, likely to be little difference between the minima established by law for the various industries but regard is had to differences in the cost of certain necessaries for some classes of workers, such as training for office employees or clothing for certain workers. As under the trade board systems, minimum rates lower than the ordinary minima are usually fixed by central boards for workers who, through age, inexperience or other handicaps, are slower than the ordinary adult worker but, under most of the latter type of laws, separate minimum rates are not fixed for a variety of occupations as is usually done by trade boards.

The essential difference, however, between the central board and the trade board systems is that the former permits direct government regulation while the trade board system is one of self-regulation as far as that is possible in unorganized or poorly organized industries, government assistance being provided in establishing the boards so as to ensure adequate representation to different parts of the trade and a slight measure of government control being exercised by way of hearing appeals or objections in order to see that consideration is given to all the relevant factors. In most countries with a central board system there is some machinery for direct consultation with employers and workers either through temporary or permanent advisory committees or through more or less informal conferences with representatives of the trades or industries but naturally, if the object is to fix a minimum wage for unskilled workers based on an estimate of the sum necessary to maintain the health of the workers, expert knowledge of the industry is not so necessary as where minimum rates are to be fixed for different occupations. Accordingly the degree of reliance on the representatives of the industry for the purpose of wage-fixing under central board systems varies considerably. In practice, then, general board systems may have some of the features of trade board regulation but the fundamental distinction of control of the former by government remains.

The general or central board system is used, with some variations, in Belgium and Peru for home-workers, in South Africa and in the United States of America and Canada. The International Labour Office study covers Belgium, Peru and the United States.

In Belgium the National Home-Work Board, composed of three heads of undertakings, three workers and a chairman with special knowledge of economic and social problems, is charged, under an Act of 1934, with the regulation of all matters relating to home-workers. On the recommendation of the employers or workers or of the Minister, the Board must appoint a committee of employers and workers to inquire into wages and then representatives of the employers' and employees' groups concerned are summoned before the Board with a view to making an agreement. If no agreement is reached by a majority of both employers and workers, the Board may itself fix minimum rates on the basis of rates paid in factories for similar work or of rates paid to other home-workers. Determinations of the Board and agreements are made compulsory by Royal Order. Up to the present time, the Board has not been called on to impose minimum rates but agreements reached in three industries have been ratified.

Under a Peruvian Act of 1937 giving the General Labour Inspectorate power to fix minimum rates for home-workers having regard to the wages for factory employment, no orders have yet been made.

The Wage Act, 1937, of South Africa is a revision of a statute of 1925 and is complementary to the Industrial Conciliation Act in that the machinery of the Wage Act, except under special direction of the Minister, is not to be applied where employers and workers are sufficiently organized to take advantage of the latter statute under which collective agreements may be made generally binding. The Union Wage Board has three permanent members appointed for a number of years fixed by regulation. Investigation by the Board into any trade is made on the initiative of the Minister or on complaint from employers or workers. The Board is required to report as to the class of workers for whom it considers it desirable that a minimum wage shall be fixed in order to safeguard a decent standard of living and in considering the minimum rates for the various occupations it must have regard to the prosperity of the industry. The Minister may publish any recommendation of the Board in order to afford opportunity for the lodging of objections and the Board may subsequently amend its recommendations but the Minister has himself no power to alter the rates fixed by the Board. He may, however, exclude from the order any section of a trade, class of worker or any district.

A provision enabling the Wage Board to have the assistance of representatives of the industry appears to have been seldom utilized. For any particular inquiry, the Minister may add to the Board one representative of the employers and one of the employees in the trade concerned. At the Board's request, he is required to appoint such representative members and if either an employers' association or a trade union, which is sufficiently representative of the employers or employees as the case may be, nominates a representative, he must appoint the person or persons so nominated.

In the United States as in Canada, minimum-wage regulation, until comparatively recent years, was confined, broadly speaking, to fixing, in each industry to which the legislation applied, one rate below which no experienced adult worker within the scope of the particular order was permitted to be paid, exceptions being made of those suffering from some mental or physical handicap and rates below the ordinary minimum being fixed for young and inexperienced employees. For some places of employment such as hotels, separate minimum rates were fixed for two or three classes of workers but most wage-orders established a single minimum rate for adult workers in the industry. Most American State laws applied to females and to boys under 18 or 21 years of age while the first Canadian provincial statutes related only to females.

In both countries emphasis was placed on the necessity of fixing a wage sufficient to meet the cost of living although the present American statutes show a variation in the wording of this stipulation induced by the constitutional difficulties besetting a statute affecting freedom of contract between employers and employed. In some States other factors must be taken into account, such as the value of the service rendered and the rates paid for similar work in other industries. In Canada, only in Saskatchewan and Quebec are there now any guiding principles laid down in the statutes for determining the amount of the minimum wage. The Saskatchewan Act directs that the wage shall be adequate to furnish the necessary cost of living and in Quebec the Fair Wage Board is instructed to take into consideration competition from other provinces and countries.

The wage-fixing machinery in both the United States and Canada, as in South Africa, was that of the general or central board system. Most of the American State laws provide for a wage board or conference composed of one or more representatives of the general public and equal numbers of representatives of employers and employed in the trade or industry for which it is proposed to fix a minimum wage. As the wage boards are

temporary, there appears to be little difference between a wage board and a conference. The employers' and workers' representatives may be appointed directly by the government authority administering the Act but in a few states they must be appointed, as far as possible, from persons nominated by the two sides. The recommendation of a board is not binding on the administrative authority which may accept it or refer it back for further consideration or may reject it and appoint a new board. If it is accepted, opportunity must be given for objections to be put forward at a public hearing after which the recommendation may be revised. Some laws make provision for appeal to the Courts against a minimum wage order but usually appeals must be limited to questions of law. A wage order, in a considerable number of states, is not legally binding during an initial period of several months but employers not complying with it may be publicly advertised and the order may be made mandatory after the lapse of the fixed period. In Colorado, Kansas and Minnesota, minimum wages may be fixed without the assistance of a wage board.

American Fair Labour Standards Act

The Fair Labour Standards Act passed by the Congress of the United States in 1938 prescribes a minimum rate for all industries engaged in interstate commerce or in production for shipment beyond the boundaries of a state with the exception of seamen and persons employed in the fishing, agricultural or air transport industries, in retail or service establishments doing the greater part of their business within a single state or in connection with the publication of a small-town newspaper. The statute fixed a minimum of 25 cents an hour for a 44-hour week for one year from October 24, 1938, to be raised to 30 cents for a 42-hour week for the next six years and to 40 cents for a 40-hour week from October 24, 1945. Provision is made for overtime at the rate of time and a half, with some exceptions, but the restrictions on working hours do not apply to motor or railway transport.

Since the purpose underlying the Fair Labour Standards Act is to reach, as rapidly as possible without substantially curtailing employment, a minimum wage of 40 cents an hour for all industries within its scope, machinery is provided for fixing minimum rates above the statutory minimum in effect at the time. Committees to be appointed in all industries to which the Act applies are to recommend to the administrator the highest minimum rates, having regard to economic and competitive conditions, which will not be likely substantially to curtail employment but which must not be more than 40 cents an hour for any class of workers. No rate may be fixed solely on a regional basis and there may be no classification of workers on the basis of age or sex but to be taken into account are the wage-rates established by collective agreements and those paid by good employers. A wage-rate made effective on the recommendation of an industry committee is not to remain in force after the date when the 40-cent minimum becomes mandatory and no minimum rate is to be fixed on the recommendation of a committee after that date unless the committee and the administrator find that the lower rate is necessary in order to prevent a substantial reduction of employment in the industry. The administrator has authority to grant and determine the conditions of exemption in the case of learners, apprentices and messengers and of those handicapped by some mental or physical infirmity.

The industry committees may vary in size but they must comprise representatives of the public, employers and workers in equal numbers and be appointed with due regard to the geographical distribution of the industry. No other directions as to the method of their appointment are laid down in the Act. In practice, it has been found desirable to have some members act on more than one committee in order to co-ordinate the recommendations of the committees, particularly those in allied industries. When a committee has submitted its report, it may be dissolved or it may be called together again at any time by the administrator. Opportunity must be given for objections to the proposed order but wage-rates may only be fixed in accordance with the recommendation of a committee. The administrator, however, may refer back a recommendation to a committee or he may appoint a new committee. Only on points of law is there a right of appeal to the courts from a wage order of the administrator.

The machinery and method of fixing wages is only one part of the International Labour Office report. Attention is given, too, to the scope of the legislation in the countries studied and to its enforcement and application. The information is comprehensive and covers not only the principal or best known statutes for minimum-wage fixing but Acts relating to special classes of workers such as agricultural workers, coal miners and road transport workers in Britain, farm workers in New Zealand, seamen and dock workers in Peru and persons employed in the cultivation and harvesting of sugar beets in the United States.

FEDERAL-STATE CO-OPERATION UNDER THE UNITED STATES FAIR LABOUR STANDARDS ACT

REGULATIONS issued recently by the United States Department of Labor lay down the procedure and the standards required of the State departments of labour that wish to qualify as agencies of inspection to ensure, within their own states, the enforcement of the provisions of the federal Fair Labor Standards Act. As the statute prohibits the employment of children under 16 years of age and that of juveniles between 16 and 18 in any occupation declared hazardous by the Children's Bureau of the United States Department of Labor as well as regulating wages and hours in industries engaged in interstate commerce or in producing goods for shipment beyond the bounds of any state, with certain exceptions, it affects labour conditions which have been subject only to State regulation and inspection in the past. The federal Act stipulates that where a State law requires higher minimum wages, shorter maximum hours or a higher standard in respect of child labour in the industries to which the former Act applies than are provided in the federal statute, the State law shall prevail.

In order to avoid, as far as possible, the inspection of establishments by both federal and state authorities, the Fair Labor Standards Act empowers the administrator charged with carrying out the wage and hour provisions of the Act and the Chief of the Children's Bureau, both of whom are officers of the United States Department of Labor, to utilize, with the consent and co-operation of the State departments responsible for the administration of State labour laws, the services of State and local agencies and to reimburse such agencies for their services. An agreement between the State agency and the federal authorities made after the latter are satisfied with the plans for co-operation submitted by the State is valid only when the Attorney-General of the State or other authority has certified that the agreement is valid under the laws of the State.

The regulations which were drawn up by the Administrator of the Wage and Hour Division and the Chief of the Children's Bureau stipulate that in order to make investigations and inspections under the federal Act, a State agency must have as its primary function the administration of State labour laws and must be under the direction of a full-time executive. It must be engaged in inspecting places of employment for the enforcement of State child-labour laws and of State maximum-hour or minimum-wage laws.

A definite plan for co-operation must be submitted by the State agency, including a description of its organization and of the manner in which it is proposed to co-ordinate investigations and inspections under the federal Act with those made under State labour laws, of the location of its offices and how the work of inspectors will be supervised. The plan must also indicate the measures to be taken to ensure suitable staff and it is stipulated that positions are to be classified according to duties and responsibilities and salaries are to be on the usual scale paid by the State for similar services, but are not to exceed those paid for similar federal positions; new appointments must be made on the merit system either through State-wide competitive examinations with requirements similar to those for federal employees or from the federal lists established after examination. The plan must indicate, too, that there is to be provision for adequate training of staff, promotion on the basis of qualifications and performance, security of tenure with right of notice and hearing prior to demotion or dismissal. Employees are to be prohibited from engaging in political activities other than voting and privately expressing political opinions. Finally, a budget is to be submitted showing the estimated expenditures to be made in connection with the federal law and with comparable State laws, the amount appropriated and the amount spent for enforcement of the State laws during the last year.

Once the agreement has been made, the State agency must follow the procedure set out in an Inspection Manual issued by the federal authorities, use the prescribed forms and make reports as required. Federal representatives on notifying the State agency, may make investigations or inspections at any time. There is to be a federal audit.

The only legal action which may be taken by the State agency is institution of civil action on behalf of an employee for the recovery of wages. In such a case the federal Department must first be notified.

AMERICAN FEDERATION OF LABOR

Summary of Proceedings of Fifty-ninth Annual Convention—Unseating of Typographical Union Delegates

THE fifty-ninth annual convention of the American Federation of Labor was convened on October 2, 1939, at Cincinnati, Ohio.

In his opening address Mr. William Green of the Federation referred to the last Great War and said "I am confident that when this congress of labour expresses itself it will be in opposition to European entanglements and to any involvement in a European war, and for the preservation of our peaceful, democratic form of government in the United States of America." Speaking of the entry of Canada into the war, which, would mean the calling upon the Canadian membership for service, President Green expressed regret "that the logic of events has made it necessary that these men be called to serve in this European conflict."

Sincere regret was also expressed because of the division which occurred within the ranks of labour but the president declared that "we are in no way responsible for the division," and then went to recount the unsuccessful efforts made to bring about an amicable settlement.

Report of Credential Committee

According to the report of this committee, credentials were received from 512 delegates, representing 88 international and national unions, 4 departments, 38 state branches, 106 central bodies, 193 local unions, 79 local trade and federal labour unions and 4 fraternal delegates.

Report of Executive Council

In the summarized report of the executive council attention was directed to the increase in union growth during the past year, and at the same time it was declared that "there has also been increased hostility to the labour movement," taking the form of "repressive labour legislation and amendments having for their purpose the restriction and limitation of already existing laws."

The report of the secretary-treasurer for the year ending August 31, 1939, showed a balance on hand of $546,504.36, of which $501,963.54 is in the defence fund for local trade and federal labour unions, and the balance of $44,540.82 is in the general fund. A summary of finances for the year shows the total receipts from all sources to be $1,800,249.70, with total expenses $1,697,376.53, leaving a balance of $102,873.17. The amount expended by the Federation for organizing expenses during the fiscal year was $889,549.66.

The total paid membership of the Federation for the month ending August 31, 1939, was 4,006,354. There were 105 national and international unions comprising 33,744 local unions and 1,563 local trade and federal labour unions directly affiliated. In addition the report showed a total of 4 departments with 942 local department councils, 49 state federations of labour, and 806 city central bodies. During the year charters were issued to one new international union, 23 central labour unions, 322 directly affiliated local trade unions, and 62 federal labour unions.

Under the caption "Organization Work" the executive reviewed the extent of their organizing activities and recommended a continuance of the one cent per member per month assessment to carry on organizational work.

The report showed that 1,442,610 members of affiliated unions were working the 5-day week, while 624,515 enjoy vacations with pay.

The executive after considering the matter of the issuance of charters by the A. F. of L. to central bodies in the Dominion of Canada recommended that section 4 of the report of the special committee on relations of organizations in Canada and the United States adopted by the 1910 convention of the A. F. of L. should be stricken out. This resolution reads as follows:

That Canadian provincial or central bodies holding charters from the Canadian Trades and Labour Congress may at their discretion also hold charters from the American Federation of Labor."

In the section of the report dealing with the "C.I.O. and Peace Negotiations," a further review was made of the conferences between the two groups and the statement was concluded by the assertion that "the A.F. of L. committee still stands ready to resume negotiations."

Under the heading "National Legislation" the report gave a detailed presentation of the activities of the Federation.

The transferring of the U.S. Employment Service from the Department of Labor to the Federal Security Agency was criticized and the executive recommended that everything possible be done to secure a reversal of the decision, at the same time insisting that the functions and services of the Department of Labor be increased and expanded.

A detailed statement setting forth the efforts made to secure the enactment of proposed amendments to the National Labor Relations Act was presented in the report the delegates being advised that the Federation would "continue its vigilance over the Act and its administration so that the fundamental rights of Labour guaranteed by the Act shall not be perverted or destroyed."

The delegates were informed that the immediate problem was to restore industry to full productive activity so that the adjustments of this decade may take effect in higher living standards and increased incomes for all. The executive re-emphasized the need of continued efforts to achieve the shorter work-week, with the 30-hour week as the ultimate objective. It was considered essential that proper and adequate agencies should be made available to give workers the training they need in order to equip themselves for new jobs, and to assist in securing suitable employment.

Among other subjects dealt with by the executive were: social security; consumer co-operatives; education; youth; International Federation of Trade Unions; German boycott and the conflict between European nations.

President Roosevelt's Message

In a letter to the convention President Roosevelt drew attention to the international situation declaring that "perhaps the highest service we Americans can render at this time is to demonstrate that our personal liberty, our democratic ways of life, our free representative government, make it possible for us to disagree among ourselves over many things without bitterness and find quickly the means of settlement and adjustment of controversy when it has gone far enough."

Mr. Roosevelt drew attention to the development of Labour's status in economic and industrial life of free trade unionism, and intimated that sound constructive relations between employees and employers should be maintained.

The President thanked the members of the committee from the American Federation of Labor, and the Committee for Industrial Organizations who carried on negotiations for a settlement of the differences between the two organizations, and for "the intelligent and persistent efforts towards peace and congratulated them upon the substantial progress made." He stated that "this must be continued until a sound negotiated basis of peace between the labour groups is reached and agreed upon."

The convention was asked by the President to continue "whole heartedly and generously" the search for an accord and he anticipated "that the progress already made will be continued, and that your committee is prepared to renew the negotiations and continue them until a settlement is reached." The Federation was informed that a similar request was being made of the Congress of Industrial Organizations.

In his reply President Green informed President Roosevelt that a copy of the executive report was being forwarded to him in which there appeared a statement dealing with negotiations carried on during the past year by committees representing the A.F. of L. and C.I.O.

"Our committee still stands clothed with authority to function, ready to resume negotiations when it is accorded an opportunity to do so."

Addresses of Fraternal Delegates

Representing the Trades and Labour Congress of Canada, Mr. D. W. Kennedy, third vice-president of the Cigar Makers International Union of America, extended greetings on behalf of the Congress and expressed great pleasure in being chosen as fraternal delegate to the American Federation of Labor. A detailed account of the proceedings of the fifty-fifth annual convention of the Trades and Labour Congress of Canada, in which was featured the resolutions dealing with foreign policy and the expulsion of the C.I.O. Unions, was presented by Mr. Kennedy.

On behalf of the British Trades Union Congress felicitations were extended by Mr. Herbert H. Elvin, general secretary of the National Union of Clerks and Administrative Workers. In the course of his address, the fraternal delegate of the B. T. U. C. discussed among others the following subjects: Science and trade unionism; workers' leisure; world relationships; and the new European war.

Typographical Delegates denied Representation

A special report of the Credential Committee dealt with the seating in the convention of delegates representing the International Typographical Union. The financial records of the Federation were read indicating that the I. T. U. failed to pay the one cent per member per month assessment, which was levied by the fifty-seventh annual convention of the American Federation of Labor held at Denver, Colorado, and the fifty-eighth convention held at Houston, Texas. The chairman of the committee stated that the delegates from the I. T. U. were seated "because their co-delegates at the Houston convention firmly and fully believed that I. T. U. would, during the course of the ensuing year, pay the

American Federation of Labor the full amount of the assessment due." The I. T. U. delegates, when meeting the committee, submitted a resolution which was adopted at the 1939 convention of the International Typographical Union, reading in part "that continued affiliation cannot be dependent upon the International Typographical Union paying said assessment."

A Section of the constitution was read which provided that "delegates shall not be entitled to a seat in the regular or special conventions unless the tax and assessments of their organization have been paid in full to the second month preceding the regular or special convention." After pointing out that no exception could be made in this case, the committee recommended that the delegates from the International Typographical Union be denied seats in the fifty-ninth annual convention of the American Federation of Labor. During the discussion which followed, President C. M. Baker was accorded the privilege of presenting the position of the I. T. U. He reviewed the events since the 1938 convention of that organization and outlined the purported action of the executive council of the A. F. of L. at a meeting held a short time prior to the 1939 convention of the I. T. U., which was as follows: "The executive council decided that in the event the International Typographical Union at its coming convention or by its executive board failing to make provision for the payment of the assessment, that the secretary-treasurer be directed to return their next per capita tax cheque, and if any cheque is received in the meantime that the same be held until the final action of their convention is known on the question." President Baker informed the delegates that the I. T. U. convention answered in the language read by the chairman of the committee, to the effect, "that continued affiliation could not be dependent upon payment of the assessment."

The report of the committee was adopted.

Reports of Committees

Report of Committee on Laws.—To this committee was referred a resolution calling for an increase in the per capita tax paid to the American Federation of Labor by national and international unions. The recommendation of non-concurrence by the committee was adopted by the convention.

Committee on Shorter Work Day.—In a comprehensive report on the subject of the "shorter work day" this committee recommended: (1) Assisting industry so as to put the unemployed at work and progressively raise living standards; (2) reaffirming endorsation of the six-hour day, five-day week, without reduction in pay; and (3) initiating a publicity campaign to feature the importance of the shorter work-week from a standpoint of public welfare.

The report of the committee was adopted.

Committee on Organization.—Reporting on the activity of the Federation during the year, the Committee on Organization indicated that special assistance had been extended to the following international unions: The Laundry Workers' International Union; American Federation of State, County and Municipal Employees; United Leather Workers' International Union; International Glove Workers' Union of America; International Metal Engravers' Union; International Ladies Handbag, Pocketbook and Novelty Workers' Union; United Brick and Clay Workers; The Commercial Telegraphers' Union of North America; Seafarers' International Union of North America; United Textile Workers of America; and the International Union Progressive Mine Workers of America.

After the committee had reported on the growth of the United Textile Workers' Association, the delegate from a directly chartered fur workers' local of the A.F. of L., Toronto, Ont., remarked "that we have to-day in Canada quite a number of locals of the textile industry chartered by the Trades and Labour Congress of Canada, and the textile locals are controlled by some of the C.I.O. organizers and the Communist organizers.

"I would suggest to the president and executive council, that in the very near future, these textile workers of Canada should be under the control of the American Federation of Labor."

A number of resolutions which had been referred to the committee were approved and adopted by the convention.

Committee on Legislation.—To this committee was referred that part of the executive report dealing with "National legislation" and also a number of resolutions. From the latter the following were among the recommendations adopted by the convention:

Extension and improvement of U.S. civil service system.

Thirty year optional retirement for government employees.

Favouring the continuance of the bi-partisan nature of the U.S. Civil Service Commission.

Approving of the U.S. Employees' Compensation Commission.

Favouring Court of Appeals in Federal Civil Service.

Application of seniority principles to all Federal employees.

Protection for American wood pulp industry from foreign competition.

Prohibiting government agencies purchasing products made in foreign countries.

Social Security for agricultural workers.

Committee on Education.—In presenting its report, the committee informed the convention

that they were in complete agreement with the Permanent Committee on Education which asserted that the "time had come for the broadening of the principle of representation by labour on such local education boards in accordance with labour's interest and responsibility for the sound administration of these agencies." The permanent committee also urged upon every central labour union the task of undertaking such a campaign for adequate representation, and also urged the need for wise planning by labour to bring its maximum contribution to bear in the development of vocational education, juvenile placement, and adult education.

Committee on International Labour Relations.—In its report this committee reviewed the changes which had taken place in Europe affecting the membership of the International Federation of Trade Unions, and necessitated the taking of appropriate action to meet the changes which were going on in many different countries. The delegates were advised that while two national centres, United States and New Zealand, were added to the Federation, Danzig, Memel, South West Africa, South Africa and Greece had gone out. It was reported, however, that the Federation had a net gain in membership of some 6,000,000 since the last triennial congress. The committee further reported that "after a debate on the question of admission of the Russian trade union membership the Congress finally voted down the proposal for the admission of the Russian delegates and adopted the proposal as presented by the United States delegate which recommended that they discontinue further negotiations with the Russians in line with the action taken at the Oslo meeting the previous year."

It was suggested that the decision of the I. F. T. U. to consult the four affiliated national centres of the United States, Canada, Mexico and Argentine regarding the increase in the number of vice-presidents from five to six, should be carefully considered by the executive council of the American Federation of Labor. The recommendations of the committee that the I. F. T. U. be invited to hold its regular executive meeting in the United States as soon as the international tension makes it feasible, was adopted.

Satisfaction was expressed for the steps being taken to reorganize the Pan-American Federation of Labor and the establishing of a closer bond of unity between the workers in the Western Hemisphere.

A recommendation that the convention convey to the Canadian membership a message of "the most cordial and fraternal good wishes for the achievement of the high objectives which has prompted their patriotic action in joining the colours to fight for democracy," was unanimously adopted.

Resignation of Mr. Frank Morrison

Prior to the election of officers, Mr. Frank Morrison, secretary-treasurer of the Federation, intimated to the convention that he would not be a candidate for the ensuing year, owing to his advanced years and increasing visual incapacity. Mr. Morrison reviewed his long association with the Federation (since 1897) and expressed the hope that he might be of some assistance in adjusting the differences between his own organization, the International Typographical Union, and the American Federation of Labor.

In expressing regret at the decision of Secretary-treasurer Morrison to resign, Vice-president Matthew Woll, stated that "when the announcement goes forth, not only throughout our land, to our neighbours on the north, but throughout the whole of the labour world they, too, will express deep regret and manifest keen disappointment at the event that has taken place to-day."

The convention unanimously adopted resolutions expressing appreciation of Mr. Morrison's long and efficient services, and authorized the executive council to tangibly recognize his service by the payment of a retirement compensation of $6,000 annually.

Committee on Resolutions

To this committee was referred the message of President Roosevelt calling for unity in the labour movement of the United States. After reviewing at some length the efforts put forth by the A. F. of L. in this direction, the committee expressed appreciation for the President's desire to be helpful in bringing about this condition but "called attention to the fact that further appeals would be more fittingly directed to the C. I. O." The committee approved the reply of President Green to the letter of President Roosevelt. Before the adoption of the committee's report vice-president Daniel J. Tobin urged that every effort be made to heal the breach dividing labour and "that there be one organization of the workers in this country."

Other Adopted Resolutions

The recommendations contained in some of the resolutions adopted were as follows:—

Urging the application of apprenticeship standards as recommended by the Federal Committee on Apprenticeship.

Proposing organization of union committees to promote an industrial safety program.

Requesting enforcement of provisions of Wages and Hours Act in the furniture industry.

Opposing extension of the immigration laws of the United States.

Full rights of adult suffrage to all citizens.

Favouring amendments to National Labour Relations Act and calling especially for the creation of a new Board of five members and a change in personnel.

Recommending a Federal investigation of the construction industry.

Protection of trade union representation and collective bargaining rights in draft of official industrial mobilization plan.

Favouring a boycott against German and Russian goods and services, such boycott to apply to all other countries joining with Germany and Russia in the present conflict.

Continuation of the boycott against Japanese goods and services while that country is at war with China.

Election of Officers

The officers elected were: President, William Green, Washington; first vice-president, William L. Hutcheson, Indianapolis; second vice-president, Thomas A. Rickert, New York; third vice-president, Matthew Woll, Washington; fourth vice-president, John Coefield, Washington; fifth vice-president, Arthur Wharton, Washington; sixth vice-president, Joseph N. Weber, New York; seventh vice-president, G. M. Bugniazet, Washington; eighth vice-president, George M. Harrison, Cincinnati; ninth vice-president, Daniel J. Tobin, Indianapolis; tenth vice-president, Harry C. Bates, Washington; eleventh vice-president, Edward J. Gainor, Washington; twelfth vice-president, William D. Mahon, Detroit; thirteenth vice-president, Felix H. Knight, Kansas City; fourteenth vice-president, George E. Browne, New York; fifteenth vice-president, Edward Flore, Buffalo, secretary-treasurer, George Meany, Washington.

The selection of fraternal delegates to the British Trades Union Congress and the Trades and Labour Congress of Canada was referred to the executive council.

New Orleans, La., was selected as convention city for 1940.

CONGRESS OF INDUSTRIAL ORGANIZATIONS

Summary of Proceedings of the Second Constitutional Convention, featured by a Declaration on War Policy and Unemployment

THE second constitutional convention of the Congress of Industrial Organizations was held in San Francisco, October 10-13, 1939, with 385 delegates in attendance, representing 35 national and international unions, 7 national organizing committees, 25 state industrial union councils, 85 city and county industrial union councils, and 93 local industrial unions. The delegates were welcomed by Mr. George Wilson, president of the San Francisco Industrial Council and by Mr. Harry Bridges, West Coast Director of the C. I. O. The latter after reviewing labour conditions in the western area generally and California in particular, called attention to the many changes which had occurred in the past few years and which had been to the advantage of organized labour. Much of the credit for these changes was given to the Governor of the state of California, Culbert L. Oslon, who was introduced as the next speaker.

During the course of his address Governor Olson enumerated the progressive labour legislation required by the state, such as—"a little Wagner Act"; a minimum wage law to cover the areas not covered by the Federal law; state monopoly of the writing of workmen's compensation insurance; effective laws to protect women and minors in industry; better safety laws; consumer education and consumer protection; progressive farm legislation; public ownership of public utilities; a broad system of social insurance; to revise and reform the tax system; and a generous old-age pension system. Governor Olson stated his administration was "determined to put an end to the dole as a means of unemployment relief by providing employment at productive and useful work for those who are unable to find employment in private industry." The speaker made a strong plea for labour unity in the United states.

Address of President Lewis

Thanking the previous speakers for the welcome accorded the delegates, President Lewis gave a brief outline of the functions of the organization, and declared that the aims of the membership were the achieving of orderly progress in union activities and the carrying on of an educational program among the unorganized workers of the country.

Discussing the European situation, the president said that "safety and security for Americans lie in non-participation in this conflict and the addressing of ourselves to the major problems now confronting us in our own internal economy and domestic establishment." He called upon the people of the United States to support the President's program of neutrality.

While not minimizing the importance of the other activities of the Congress, President Lewis emphasized that organizing the unorganized would be the main objective of the membership during the next year.

Message of President Roosevelt

In a message for the delegates, President Roosevelt extended personal greetings and best wishes for a successful convention. Referring to the problems confronting the United States as a result of the international situation, President Roosevelt contended that "the highest service Americans can render at this time is to demonstrate that our personal liberty, our democratic ways of life, our free representative government, make it possible for us to disagree among ourselves over many things without bitterness and find quickly the means of settlement and adjustment of controversy when it has gone far enough." He drew attention to the conflict and separation in the labour movement of the United States and intimated that this division could not be overlooked "when discord in any group is so harmful to world peace." Drawing attention to the negotiations carried on to promote reunion and bring about peace in the labour movement, the President asked, that these be continued until a settlement is reached.

Reports of Committees

Committee on Officer's Reports.—This Committee reviewed the president's address, with special reference to such features as—the growth of the organization; work of the various officers; support of the National Labor Relations Act; efforts to maintain the W. P. A. program; the new contract of the United Mine Workers of America; and the European conflict. It was the committee's contention "that the greatest contribution that can be made to the cause of democracy, peace and prosperity, is through the building of the progressive labour movement." Under the heading "organizational activities" the committee advocated the need for increased co-ordination of the activities of the C. I. O. organizations in Canada, and recommended that the executive officers be requested to establish a method which will provide a uniform approach to the problems of all C. I. O. unions in the Dominion. The stated intention of the officers to continue their efforts in behalf of the unemployed youth and co-operation with bone fide youth organizations received the approval of the committee. In regard to social security, the committee endorsed the position laid down by the executive board, as follows: "That the C. I. O. undertake a national campaign in co-operation with old age and progressive groups to achieve a program of real security for our aged people upon the basis of a pension of $60 per month at 60 years of age for individuals and $90 per month for married couples of 60 years of age."

The full report of the committee was adopted.

Committee on Press and Publicity.—In the report of this committee the press of the city and state industrial union councils were urged to broaden the scope of their endeavours in publicity and education so as to reach an ever-growing number of readers in the working, professional and middle class population. The committee urged that the various organizations take advantage of the facilities of broadcasting stations to present labour's views.

Committee on Appeals.—After taking into consideration the various viewpoints and proposals embodied in resolutions submitted, the committee recommended the establishment of an appeal committee setting forth its functions.

Labour and the European War

For a number of resolutions received on the subject matter of "Labour and the European War", the committee on resolutions submitted a substitute, the conclusion of which read as follows:

(1) Labour wants no war or any part of it and while countries in Europe are engaged in their barbaric orgies of conquest and aggression as they have been doing for centuries, it must ever be the purpose of the United States to remain out of these wars; and

(2) That the C.I.O. offers its support to President Roosevelt's neutrality policy based upon the cardinal principle of keeping America out of war and calls for further legislation to take the profits out of war business by rigorous taxation of excess profits and surplus incomes; and

(3) That this second annual convention of the C.I.O. declares in no unequivocal terms that we will defend the free institutions of this Republic, the greatest democracy on earth, under the Declaration of Independence and the Constitution, a government of the people, for the people and by the people. It shall ever be our purpose as Americans to defend our country and our free institutions against foreign invasion; and

(4) The C.I.O. will devote itself to continuing the organization of the unorganized American workers, promoting genuine collective bargaining, for the welfare of American labor and the stabilization of industry, and, through the preservation of peace, find a solution of the basic economic ills of this country and bring about a permanent prosperity. By these efforts we shall prove to the world that the United States is the highest form of democratic government on earth and set the example of the effectiveness of democratic government in promoting life, liberty and happiness for mankind.

The convention adopted the resolution and ordered that a copy be sent to the President of the United States, members of the Cabinet, all members of the Congress and to the governor of each state.

Technological Unemployment

A number of resolutions were also received on "technological unemployment," and the committee presented a substitute, which contained the following recommendations:

That this convention calls upon the Federal Government through its appropriate agencies to make an investigation looking toward legislation calling for—

(*a*) An immediate and thorough-going survey of technological unemployment and its consequences;

(*b*) A further shortening of the number of hours of work per day and the total number of hours per week, without any decrease in established wages under collective bargaining agreements or minimum wage and hour legislation until the goal of a 6-hour day and 30-hour week is reached; and

(*c*) Measures which will assure to the workers full employment and the just distribution of the benefits of technological improvements.

The report of the committee was unanimously adopted.

Other Resolutions Adopted

Among the recommendations contained in other adopted resolutions were:

Favouring a program for insurance for medical care on a Federal basis covering all persons.

Endorsing an old age pension program based upon a flat maximum pension of $60 per month for each single person and $90 for each married couple with an age limit of 60 years.

Expansion of the public assistance program.

Seeking legislation establishing permanent and total disability benefits.

Increasing the amount of unemployment compensation benefits.

Extension of the merit system in the civil service.

Expansion of the United States Housing Authority program.

Authorizing the establishment of a union label department of the C.I.O.

Supporting a program of efficient and adequate reforestation.

Calling for action on the Federal Wage Hour law, as follows: (1) Raising of the minimum standards; (2) adequate enforcement machinery; (3) condemning alleged inefficiency of the Wage Hour Administration; (4) opposition to any weakening of the provisions of the law and demanding public hearings on all proposed amendments before action taken.

Listing the corporations alleged to be unfair to labour.

Supporting the organization of workers in the retail, wholesale and department store industry.

Establishing guarantees of collective bargaining in government contracts.

Elimination of war-time profiteering.

Seeking the franchise for residents of the District of Columbia.

Representation of labour on the directing bodies of private welfare agencies.

Enforcement of the child labour provisions of the Fair Labor Standards Act and the enactment of the Federal Child Labor Amendment in state legislatures.

Maintenance of model conditions of employment in the Federal service.

Seeking suitable representation upon the governing board of the American Red Cross.

Opposition to all forms of sales and other consumer taxation, direct or indirect.

Urging newspaper publishers to comply with the National Labor Relations Act.

Development of co-operatives for the distribution of the goods and services required by the members.

Authorizing the continuation of the negotiating committee for labour unity.

Opposing political or economic discrimination based upon race, colour, creed or nationality.

Condemning the principle that wage increases must be related to increases in the cost of living.

Restricting the use of the National Guard in labour disputes.

Federal aid to educational facilities.

Extension of the work of the Monopoly Investigating Committee.

Requesting full access to the facilities of radio broadcasting stations for organized labour.

Condemning the action of corporations in moving operations from one community to another.

Expressing opposition to the existence of wage differentials.

Defending labour against state anti-labour laws.

Changes in workmen's compensations laws as follows: (1) benefits to be liberalized and increased; (2) extended to include occupational diseases not now covered; and (3) the state fund method to be adopted.

Amending the proposed Neutrality Act to give assistance to merchant seamen.

Continuing co-operation between the C.I.O. and farm groups.

Organizing workers in the aviation industry, utilities, hospitals, banks, brokerage houses and other financial institutions and farm labour.

Revision of the methods and procedure of the National Labor Relations Board.

Insisting on appropriate labour representation on all important federal and state administrative agencies.

Repeal of the criminal syndicalist law.

Demanding full C.I.O. representation to the International Labor Office.

Favouring a comprehensive youth program.

Requesting President Roosevelt to call a conference of representatives of labour, industry and government to end unemployment.

Adherence to contractual obligations in letter and in spirit.

Condemning the use of anti-trust laws against labour.

Election of Officers

The officers elected were: President, John L. Lewis, Washington, D.C.; vice-presidents, Sidney Hillman, New York, N.Y.; Philip Murray, Pittsburg, Pa.; R. G. Thomas, Detroit, Mich.; Sherman H. Dalrymple, Akron, Ohio; Reid Robinson, Denver, Colo.; Emil Rieve, New York, N.Y.; secretary-treasurer, James Carey, Washington, D.C. In addition to the elected officers, the executive board of the C.I.O. consists of one representative from each of the affiliated central organizations.

CONFERENCE OF CANADIAN COMMITTEE FOR INDUSTRIAL ORGANIZATION

THE Canadian Committee for Industrial Organization held a conference in Ottawa on November 5. In attendance were 105 delegates from Eastern Canada representing 55,000 members, according to a statement made to the conference, which was under the chairmanship of Mr. Silby Barrett, Director of the Canadian Region, Congress of Industrial Organizations.

Among the resolutions adopted was one submitted by representatives of steel workers in Hamilton, Sydney, Trenton, and Sault Ste. Marie. This urged co-operation with the Federal Government in the "prosecution of the war and in the maintenance of fair and reasonable standards of wages and working conditions and in the avoidance of industrial strife."

Emphasizing that "national necessity demands that the steel industry operate efficiently, continuously and with a maximum of co-operation between management and labour," the resolution urged that, "The Dominion Department of Labour call into conference with them, representatives of management and labour, the purpose of this conference being to stabilize efficient production, promote satisfactory relations in the steel industry and enable common and competitive problems to be solved."

In furtherance of this program the resolution declared it "imperative that collective agreements be negotiated by representatives of bargaining agencies chosen by ballot vote of the employees in the various steel plants," such agreements to include the following:

"1. Uniform standards of wages, hours and working conditions.

"2. A minimum basic labour rate of not less than 50 cents an hour.

"3. All occupations to be classified, with appropriate adjustments of rates.

"4. The eight-hour day and forty-eight hour week to be standard practice.

"5. Payment of time and one-half for time in excess of standard day or week.

"6. Stipulated methods and procedure for settling differences and disputes as they may arise.

"7. The Department of Labour shall insist that, in placing Government contracts for steel and/or its products, the above principles and the conditions established shall be observed by the producer."

Subsequently, in a conference with the Minister of Labour, Hon. Norman A. McLarty, the Canadian Committee for Industrial Organization submitted a memorandum, the conclusion of which was as follows:

"To eliminate the injustices and dangers which confront our people, the Canadian Committee for Industrial Organization, insists:—

"1. That labour should have adequate representation on all government boards and agencies set up to cope with the war situation and to mobilize national defence. In addition we feel that the industrial workers who are engaged in the production of necessary war supplies should have an opportunity of putting forward through their organizations and representatives, their opinions on all matters concerning production, wages, hours and other conditions of employment.

"2. That minimum wages should at all times be determined by what responsible Social Welfare and Government Bodies consider to be the standard for health and decency. The real wages of workers must not be allowed to suffer from rising living costs, and that every effort must be made to stop profiteering. It is our opinion that the creation of the Price Control Board is to be commended. However, we feel that this Board should co-operate with labour organizations in the various localities to investigate and curb profiteering, by establishing and giving assistance to the work of local anti-profiteering committees.

"3. That pre-occupation with foreign affairs must not be allowed to detract attention from unemployment and other pressing problems of internal economic insecurity. Knowing that the aftermath of war means increased unemployment and insecurity, we urge the government to immediately put into effect national unemployment insurance.

"4. More than usual vigilance must be exercised to guard existing labour and social legislation and democratic rights against curtailment under the pretext of emergency considerations. We demand that the Federal Government intercede to prevent the destruction of franchise in municipal election now being ordered by the Province of Ontario and further that organized labour be given the full freedom to criticize and oppose any curtailment of civil liberties."

Immigration to Canada During First Six Months of Fiscal Year

During the first six-month period of the current fiscal year, 12,024 immigrants entered Canada up to September 30, compared with 10,704 entering the Dominion during the same period of 1938, according to statistics issued by the Immigration Branch of the Department of Mines and Resources.

Of the total number of immigrants entering the Dominion during the period reviewed, 2,544 were from the British Isles, an increase of 15·1 per cent over the number reported for the same period in 1938; 3,410 were from the United States, an increase of 1·3 per cent; 1,556 from Northern European countries, an increase of 79·5 per cent, while 4,514 were classified under "other races" an increase of 5·9 per cent.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Meeting of the Emergency War Committee

THE Emergency Committee, to which the Governing Body of the International Labour Office has delegated its powers during the war, owing to the impossibility of convening the Governing Body itself, met at Geneva on September 20th and 21st and elected the officers of the Governing Body for the year 1939-1940. Mr. Carter Goodrich, United States Government representative, was unanimously elected Chairman, and Mr. Oersted (Employer, Denmark) and Mr. Mertens (Worker, Belgium) were unanimously re-elected as Employers' and Workers' Vice-Chairmen respectively.

The Committee took note of twenty-eight replies hitherto received from Governments, which are unanimous in declaring that the International Labour Organization should endeavour to function as completely as possible during the war. The Government representatives in attendance at the meeting took the opportunity of reaffirming their intention of maintaining the activity of the International Labour Office.

The United States Government representative in particular said that this question had been considered by the highest authorities of his country, and that they had declared themselves in favour of the energetic continuance of the work of the International Labour Office, which should be practically adapted to the conditions of the present period on the lines of the program of activity laid down by the Governing Body. The maintenance of the International Labour Organization as an instrument of co-operation between Governments, employers and workers will, he said, be of the utmost value during the war and during the difficult period which may be expected immediately after the cessation of hostilities.

The representatives of Brazil, Canada, Chile, France, Great Britain, Mexico, Norway and Poland made similar statements on behalf of their respective Governments.

The Committee warmly approved the intention of the Director of the International Labour Office to convene the Second Labour Conference of American States Members of the Organization at Havana in November as previously arranged. The representatives of Governments, Employers and Workers all agreed that this Conference should be held. It will be a manifestation of the vitality of the International Labour Organization and its determination to carry out the work entrusted to it. The Committee decided that the preparations for the Conference should be continued, and the Governments concerned informed of the measures taken.

It was also decided that, in connection with the Havana Conference, the Office should call a meeting at Havana of the American members of the Permanent Agricultural Committee, which was to have met in Geneva towards the end of the year, but which has had to be postponed owing to the international situation. It is thought very important that the study of conditions in agriculture should be continued actively, especially in connection with the countries of America, since the increased demand of Europe for agricultural products will raise new and important problems.

The meetings of the Committee of Statistical Experts, the Committee of Experts on Safety in Coal Mines, the Preparatory Technical Conference Safety in Coal Mines, and the Correspondence Committee on Industrial Hygiene, which had been fixed for various dates in October and November, have been postponed.

The Emergency Committee, it was announced, was to meet again on October 10th, when it was to consider in more detail the way in which the work of the International Labour Office could be adapted to wartime conditions, and will discuss proposals for a revised budget for 1940.

National Housing Act Loans

The Honourable J. L. Ralston, Minister of Finance, has released figures showing National Housing Act loans to October 31, 1939, at above $45,000,000 and the number of new homes provided at more than 12,500.

Loans approved in October numbered 435, an increase of 42 per cent over the corresponding month last year. The volume of loans at $1,312,974 also showed an increase over the October, 1938 total of $1,269,009.

It is estimated by the Department of Finance that Dominion and National Housing Act loans to date account for home building construction (excluding land) aggregating well over $50,000,000. Based on the generally accepted estimate that 80 per cent of the cost of house construction goes to skilled or unskilled labour, either directly or indirectly, the contribution of this legislation to employment and the elimination of unemployment is estimated at a minimum of $40,000,000. This does not take into account advances under the Home Improvement plan which is estimated to have provided an additional $28,000,000 in wages and salaries.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, SEPTEMBER, 1939

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on October 1 was 11,891, the employees on their pay-rolls numbering 1,186,786 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for September was 1,932, having an aggregate membership of 243,569 persons, 9·1 per cent of whom were without employment on October 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of October, 1939, as Reported by Employers

Industrial employment at the beginning of October showed further substantial improvement, according to statements received by the Dominion Bureau of Statistics from 11,891 firms, whose staffs aggregated 1,186,786 persons, as compared with 1,166,242 in the preceding month. This increase of 20,544 workers, or 1·8 per cent was considerably larger than that noted at October 1, 1938, and also exceeded that average gain indicated between September and October in the years, 1921-1938.

The crude index of employment, based on the 1926 average as 100, advanced from 119·6 at September 1 to 121·7 at the beginning of October, as compared with 116·7 at October 1, 1938. The index for the date under review was lower than that of 125·7 at the beginning of October, 1937, and was also below the October 1, 1929, figure of 125·6; with these exceptions, it was higher than at that date in any other year for which data are available.

Since the expansion at the latest date was larger than usual at the beginning of October in the experience of past years, the seasonally-adjusted index advanced, rising from 114·9 at September 1, 1939, to 117·9 at October 1, when it was higher than the corrected figure for any other month since the end of 1937.

The unadjusted index, (based upon the average for the calendar year 1926 as 100) has been as follows at October 1 in recent years: 1939, 121·7; 1938, 116·7; 1937, 125·7; 1936, 110·1; 1935, 106·1; 1934, 100·0; 1933, 90·4; 1932, 86·7; 1931, 103·9; 1930, 116·2; 1929, 125·6; 1928, 118·8 and 1927, 110·3.

There was an exceptionally large increase in manufacturing at October 1, 1939, the number of persons added to the staffs of the co-operating establishments being substantially greater than at that date in any other autumn for which data are available; indeed, the increase of 22,234 persons, or 3·8 per cent since September 1, has infrequently been exceeded in any month in the years since 1920. The most pronounced gains took place in vegetable foods, textiles and iron and steel.

Among the non-manufacturing industries, logging, coal-mining, transportation and trade reported considerably increased activity, while highway and railway construction and maintenance and services showed curtailment, that on the highways being particularly marked. The expansion in logging and transportation was greater-than-normal in the experience of past years; on the other hand, the losses in construction also exceeded the average.

The records show that for October 1, 1938, 10,983 employers had reported payrolls aggregating 1,119,291 workers, or 14,426 more than at September 1; improvement had then been indicated in logging, mining, transportation, construction and trade, while employment in manufacturing and services had declined.

Employment in Financial Organizations

For some months, statistics of their employment have been collected from banks, trust companies and stock market operators. At the beginning of October, 414 firms and branches in these lines of business reported staffs aggre-

gating 33,334 persons, compared with 33,095 in the preceding month. The addition of these figures to the returns furnished in the manufacturing logging, mining, transportation, communications, construction, services and trade industries brings the total number of employees included in the October 1 survey of employment to 1,220,120 in 12,305 establishments, and slightly lowers the index of 121·7 in the industries above enumerated, to 121·3; when the employees of the co-operating financial organizations were added to the general figures for September 1, the index was lowered from 119·6 to 119·2. Comparable data for 1938 are not available.

Employment by Economic Areas

Considerable improvement was shown in Nova Scotia, Ontario and the four Western Provinces, while employment declined in Prince Edward Island, New Brunswick and Quebec. Except in Prince Edward Island, the level of activity was higher than at October 1, 1938. In the Prairie Provinces and British Columbia the index was also higher than at the same date in 1937, but elsewhere employment was in smaller volume; however, the situation generally was better than at the beginning of October in any of the preceding five or six years.

Maritime Provinces.—Further improvement was indicated in Nova Scotia, and in the Maritime Provinces as a whole, although the tendency was unfavourable in Prince Edward Island and New Brunswick. The 832 co-operating employers enlarged their payrolls from 86,049 persons at September 1, to 87,208 at the beginning of October. The general gain exceeds that indicated at the same date of last autumn, and compares favourably with the small loss reported, on the average, in these provinces as a unit at October 1 in the years since 1920. The index at 117·9 at the latest date, was 3·4 points higher than at October 1, 1938. Manufacturing as a whole showed a considerable advance at the date under review, mainly in vegetable food, pulp and paper, textile and iron and steel plants, while animal food and lumber products recorded seasonal curtailment. Among the non-manufacturing groups, logging afforded more employment, and there were also gains in mining, transportation and trade. On the other hand, hotels and restaurants and construction were slacker; the large reduction in the latter took place mainly in highway work.

The 799 firms furnishing data for October 1, 1938, had employed 83,810 men and women, or 831 more than in the preceding month.

Quebec.—Chiefly as a result of curtailment in construction, there was a contra-seasonal decline in employment in Quebec, where employment was, however, in greater volume than at October 1, 1938. Except in construction and hotels and restaurants, the trend was generally favourable, there being large increases in manufacturing, (notably of food, textile and iron and steel products) and in logging, mining, transportation and trade. Statistics were compiled from 2,950 establishments in Quebec with 360,815 workers, compared with 366,946 at the beginning of September. The index fell from 128·5 at September 1, 1939, to 126·4 at the date under review, as compared with 121·6 at October 1, 1938. Returns were then tabulated from 2,730 firms having 342,801 persons in their employ, as compared with 333,158 in the preceding report.

Ontario.—The trend continued upward in Ontario, according to 5,195 employers of 482,631 men and women, or 20,640 more than at the beginning of September. This gain was decidedly larger than that reported at October 1, 1938, and also greatly exceeded the increase at the same date in any other year of the record, except 1937. The index rose from 116·2 in the preceding month, to 121·4 at the date under review, when it was higher than in any other month since the end of 1937; with the exception of six months in that year, it was also the highest index recorded in any month since December, 1929.

There were important advances in manufacturing at the beginning of October, 1939, most of the industrial groups sharing in the expansion. The largest gains were in the vegetable food, textile and iron and steel divisions, but there was also heightened activity in leather, pulp and paper, rubber, beverage, chemical, electrical apparatus, non-ferrous metal and other classes. Among the non-manufacturing industries, logging, land transportation, building and trade recorded decided improvement. On the other hand, there were contractions in mining, shipping, hotels and restaurants, laundries and dry cleaning establishments and highway construction and maintenance.

For October 1, 1938, 4,780 firms had reported a staff of 452,944, as compared with 449,675 in the preceding month. The index then stood at 115·8, or 5·6 points below the latest figure.

Prairie Provinces.—There were increases in employment in Manitoba, Saskatchewan and Alberta, those in Saskatchewan being greatest. An analysis of the returns by industry in the Prairie Provinces shows heightened activity in manufacturing (mainly of food and textile products), and in mining, transportation, highway construction and trade, while hotels and restaurants, building and railway construction

were quieter. Returns for the date under review were received from 1,687 establishments with an aggregate working force of 151,713 employees, compared with 148,699 at September 1. The index at the latest date, 116·4, was the highest for any month since December, 1931, being over three points above that for the beginning of October in 1938, when the 1,538 co-operating employers had reported 144,434 persons on their payrolls, compared with 143,149 in the preceding month.

was reported by the 1,136 employers furnishing statistics for October 1, 1938; this was a decline of some 700 from their September 1 staffs.

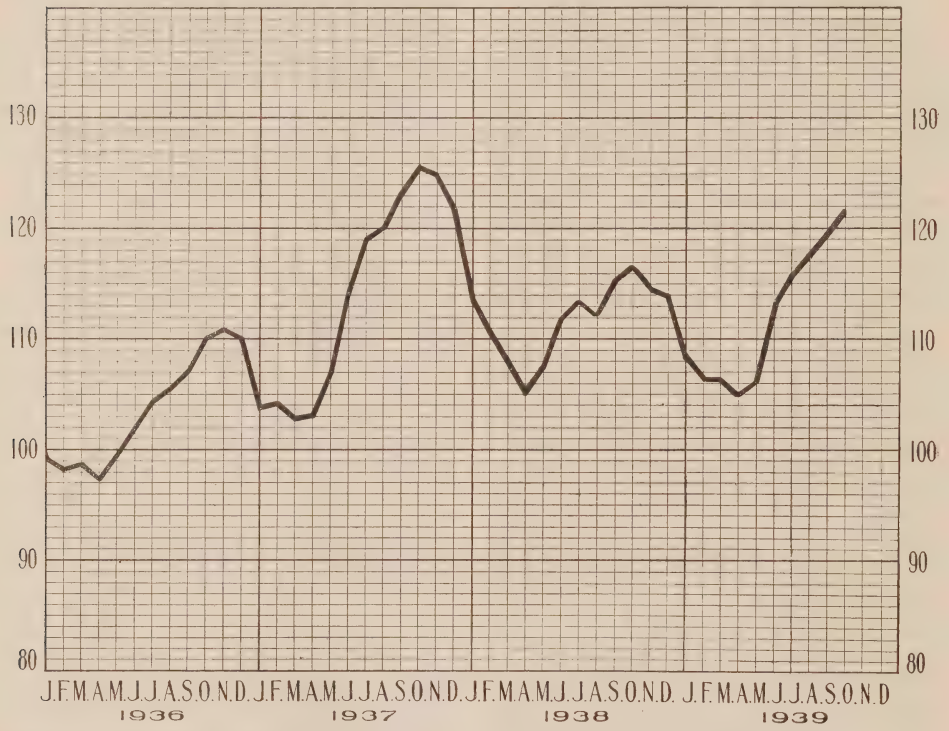

Table 1 gives indexes by economic areas.

Employment by Cities

The trend at the beginning of October was upward in Montreal, Toronto, Ottawa, Hamilton, Windsor and Winnipeg, while activity declined in Quebec City and Vancouver. The indexes of employment in Montreal, Toronto,

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

British Columbia.—Employment in British Columbia showed improvement, chiefly in vegetable food and metal-using factories and in logging and trade. On the other hand, animal food and lumber plants, mining, transportation and hotels and restaurants reported lowered activity. Data were tabulated from 1,227 firms, whose staffs, rose from 102,551 at September 1, to 104,419 at the beginning of October. Moderate losses had been registered at October 1, 1938, and the index at 111·3, was then much lower than at the date under review, when it stood at 118·7. An aggregate working force of 95,302 men and women

Ottawa, Hamilton, Winnipeg and Vancouver were higher than at October 1, 1938, but in Quebec City and Windsor they were rather lower.

Montreal.—There was a further increase in the number at work in Montreal, where the 1,715 co-operating establishments employed 171,034 persons, or 1,406 more than at September 1. Manufacturing on the whole was brisker, there being considerable gains in iron and steel and textile plants, together with smaller increases in food, tobacco, leather, non-ferrous metal and some other lines. Transportation and trade also afforded more em-

ployment, while there were pronounced losses in construction work. Improvement had also been noted at the beginning of October of last year, when the index of employment stood at 108·2, compared with 110·2 at the latest date. For October 1, 1938, data had been furnished by 1,582 firms having 165,547 employees, compared with 163,302 in the preceding month.

Quebec.—Employment in Quebec declined at the date under review, according to information from 210 employers with a staff of 15,509, or 2,276 fewer than at September 1. There were losses in services and construction, while manufacturing afforded rather more employment. The index, at 111·5, was 5·6 points lower than at the beginning of October, 1938, when 191 establishments had reported 15,992 men and women on their paylists.

Toronto.—Continued expansion was indicated in Toronto, according to 1,761 firms employing 146,697 workers, compared with 142,032 in their last report. Manufacturing showed improvement, particularly in the metal, electrical apparatus, vegetable food and printing divisions; building construction and retail trade also absorbed more workers. On the other hand, services were somewhat quieter. Smaller additions to staffs had been made at October 1 of a year ago, when employment was at a lower level; 1,620 employers had then reported a combined working force of 137,285 persons, and the index had stood at 109·4, compared with 114·1 at the latest date.

Ottawa.—Manufacturing, construction, trade and transportation were rather more active, while other industries showed little change on the whole. The forces of the 231 establishments furnishing data aggregated 15,063, or 345 more than at September 1. The index of employment was slightly higher than at the same date in 1938, when a small decrease had been recorded by the 204 co-operating firms, whose payrolls had included 14,343 workers.

Hamilton.—Important expansion was indicated in Hamilton, mainly in manufacturing, where there was improvement in textiles and iron and steel, that in the latter being particularly pronounced. Other industries showed little general change; transportation and trade were rather more active, while services were seasonally quieter. Statements were tabulated from 331 businessmen with 35,265 employees, compared with 33,190 in the preceding month. Employment at the beginning of October of last year was in rather smaller volume; a reduction in personnel had been reported by the 302 employers whose statistics were then included in the survey, and who had a staff of 33,318 at October 1, 1938.

Windsor.—There was an increase in the number working in Windsor, chiefly in automobile and other iron and steel plants, and in beverage and chemical factories. One hundred and ninety-six concerns employed 17,260 persons, as against 15,928 at September 1. A smaller advance had been indicated at the beginning of October of last year, when the 190 co-operating establishments had reported 17,317 employees. The index of 126·7 at October 1, 1938, was nearly two points higher than that of 124·8 at the date under review.

Winnipeg.—Further improvement was shown in Winnipeg at October 1, when the 529 firms furnishing data employed 43,112 men and women, or 265 more than in the preceding month. Transportation, construction, services and trade were rather more active, while manufacturing on the whole was practically unchanged. A slight falling-off had been recorded at the beginning of October a year ago by the 499 employers whose statistics were received, and who had 41,423 workers on their paylists; the index then was slightly lower, standing at 96·3, as compared with 98·8 at October 1, 1939.

Vancouver.—Employment in Vancouver at October 1 declined from the preceding month, according to information from 523 establishments with an aggregate staff of 38,689 persons, compared with 39,172 at September 1. Construction and trade reported improvement, but there was a falling-off in transportation and services; manufacturing was also quieter, chiefly due to seasonal slackening in fish-preserving plants. A smaller reduction had been recorded at the beginning of October, 1938, but the index then stood at 114·7, as compared with 115·8 at the date under review. Statements for October 1 of last year had been received from 473 firms, whose employees had numbered 37,362.

Employment by Industries

Manufacturing.—As already stated, there was very pronounced expansion in factory employment at October 1, when the 6,468 co-operating establishments reported a staff of 613,558 persons, or 22,234 more than in the preceding month. This increase of 3·8 per cent has seldom been exceeded in previous months of the record; the exceptions are almost entirely the gains recorded at February 1 in a number of years, which represent partial recovery from the usual year-end losses. The index, based on the 1926 average as 100, rose from 115·3 at September 1 to 119·7 at October 1, as compared with 112·5 at the same date of last year; while it was two points lower than the October 1, 1937, figure, it was higher than in any other October of the record except that of 1929.

The unadjusted index numbers in manufacturing at the beginning of October in recent years, based on the 1926 average as 100, are as follows: 1939, 119·7; 1938, 112·5; 1937, 121·7; 1936, 109·0; 1935, 103·3; 1934, 94·4; 1933, 86·7; 1932, 84·1; 1931, 91·8; 1930, 107·8; 1929, 120·2; 1928, 115·7 and 1927, 106·4.

On the average, employment in manufacturing generally at the beginning of October in the period, 1921-1938, has shown only a slight increase, the tendency having been downward in nine, and upward in the same number of years. The unusually large increase at the date under review therefore resulted in an important gain in the seasonally-adjusted index, which advanced from 112·1 in the preceding month to 116·0 at October 1; this was the highest figure since that for December 1, 1937.

Seasonal curtailment was noted at the date under review in fish canneries and lumber mills, and there were also moderate reductions in tobacco, clay, glass and stone and electric light and power plants. On the other hand, there were exceptionally large increases in employment in vegetable food, textile and iron and steel factories, supplemented by gains on a smaller scale in the leather, pulp and paper, rubber, beverage, chemical, electrical apparatus, non-ferrous metal and other divisions.

The manufacturers making returns for the beginning of October of last year, numbering 6,209, had employed 573,157 men and women, compared with 579,791 in the preceding month. The most marked losses had then been reported in canneries and lumber mills.

Animal Products—Edible.—There were losses in dairies and fish-preserving establishments, but improvement was indicated in meat-preparing and packing plants. Statistics were received from 321 manufacturers, employing 29,385 persons, as compared with 31,081 in the preceding month. This contraction, which was most marked in British Columbia, was on a larger scale than that registered at the corresponding date of last year, but the index was then many points lower.

Leather and Products.—An increase was reported in footwear and other leather plants at October 1, mainly in Ontario. The 332 employers making returns reported 24,636 workers, or 528 more than at September 1. Employment at the beginning of October a year ago had shown a decrease from the preceding month; the index number then stood at 113·3, compared with 119·5 at the date under review.

Lumber and Products.—Seasonal contractions in personnel were indicated in the lumber group, in which employment was at a much higher level than at October 1, 1938. The reduction at the date under review took place very largely in rough and dressed lumber mills, while furniture, vehicle and other wood-using factories showed improvement. A combined working force of 49,336 persons was reported by the 950 co-operating manufacturers, as compared with 50,146 at the beginning of September. The tendency was downward in New Brunswick, Ontario and the Western Provinces.

Musical Instruments.—A slight decline was registered in musical instrument plants, in which the employment level was unchanged from last autumn. Thirty-six establishments reported 1,661 employees, as compared with 1,709 in the preceding month.

Plant Products, Edible.—The canning of vegetable foods showed a decided advance, while flour and cereal, sugar and syrup, bread and bakery and chocolate and confectionery factories were also more active. The staffs of the 546 reporting firms aggregated 48,841 persons, or 5,056 more than in their last return. There were gains in all five economic areas. The general improvement compared favourably with the large decrease registered at the corresponding date in 1938, when the index was many points lower.

Pulp and Paper Products.—An upward movement was indicated by 710 employers in this group, who had 69,407 workers on their payrolls, as compared with 68,330 at the beginning of September. Recovery took place in pulp and paper mills, and there were also gains in paper product manufacturing, while no general change was shown in printing and publishing. A smaller increase had been reported at the beginning of October a year ago, and the index number then was several points lower.

Rubber Products.—Employment in rubber goods showed further expansion at October 1, 1939; data were compiled from 54 firms with 14,329 employees, as against 14,023 in their last report. A smaller gain had been recorded at the same date in 1938, when employment was at a decidedly lower level.

Textile Products.—Cotton, woollen, silk, hosiery and knitting, garment and other textile factories reported greatly heightened activity; 1,168 manufacturers enlarged their payrolls from 104,290 workers at the beginning of September, to 110,066 at the date under review. Quebec and Ontario recorded the bulk of this expansion, although the trend was favourable in all provinces except British Columbia. Smaller increases had been noted at the beginning of October last year, and the index then was lower by 3·5 points than at October 1, 1939.

Beverages.—An upward tendency was in evidence in these industries at the beginning of October, according to the 147 establishments furnishing statistics, which employed 10,010 workers, or 289 more than in the preceding month. Employment was brisker than at October 1, 1938, when a slight loss had been indicated.

Tobacco.—Curtailment was reported in tobacco manufacturing, the 45 factories whose data were tabulated reducing their staffs by 184 to 8,159 at October 1. The index was higher than at the same date in 1938; a decline had then also been recorded.

Chemicals and Allied Products.—Further expansion was noted in chemical factories, 302 of which had a working force of 19,636, as compared with 18,839 in the preceding month. Most of the increase took place in Quebec and Ontario. Employment was in greater volume than at the first of October of last year, when little general change had been indicated.

Clay, Glass and Stone Products.—Clay product and glass factories showed reduced activity, while the stone division of this group reported slight improvement. Statements were received from 222 manufacturers employing 11,029 persons at October 1, compared with 11,210 at the beginning of September. The index was rather higher than at the corresponding date in 1938, a greater loss on the whole having then been recorded.

Electric Light and Power.—There was a falling-off in electric light and power plants at October 1, when 101 establishments reported 17,944 workers, compared with 18,077 in the preceding month. A gain had been noted at the same date of last year; however, the index number then stood at 136·6, compared with 141·7 at the beginning of October in 1939.

Electrical Appliances.—In the electrical apparatus division, 125 works employed 18,507 men and women, or 503 more than in their last report. A decrease had been indicated at October 1, 1938, when the index was slightly higher.

Iron and Steel Products.—Increases were shown at the beginning of October in the crude, rolled and forged, automobile, railway rolling stock and other vehicle, boiler, engine and tank, machinery, agricultural implement, heating appliances, and many other divisions of the iron and steel group, in which the general advance was especially large for the time of year. Statements were received from 931 manufacturers, whose payrolls aggregated 132,916 persons, as compared with 123,215 in the preceding month. Employment advanced in most provinces, the gains in Ontario being particularly pronounced. A decline, on the whole, had been shown at the first of October of last year, when activity was at a decidedly lower level, the index then standing at 92·4, compared with 101·5 at the latest date.

Non-ferrous Metal Products.—A combined working force of 26,183 persons was reported by the 190 co-operating employers, who had 25,295 at the beginning of September. There was improvement in the precious and the base metal divisions. The index was some nine points higher than in the autumn of 1938.

Non-metallic Mineral Products.—The personnel of the 98 firms furnishing data in these industries aggregated 13,041, or 259 more than in the preceding month. A loss had been noted at October 1, 1938, when employment was in rather smaller volume.

Logging

Statements were tabulated from 370 logging companies, whose staffs were enlarged by 16,262 workers to 33,988 at the date under review. This expansion was on a much greater scale than in the early autumn of 1938, also exceeding the usual seasonal gain from September to October in the years since 1920. The index, at 115·6 at October 1, 1939, was higher than at that date in 1938, when it stood at 78·8. However, it was lower than the October 1, 1937, figure of 208·5. Camps in Quebec, Ontario and British Columbia reported most of the gain.

Mining

Coal Mining.—There was an important seasonal advance in coal-mines, in which the index of employment was fractionally higher than at October 1, 1938, when the increase from September had been smaller. Returns were received from 101 operators employing 25,179 persons at October 1, 1939, as compared with 23,972 in their last report. The gains took place mainly in the Albertan coalfields.

Metallic Ores.—Employment in this group showed slight improvement, 229 companies reporting 43,843 workers, or 36 more than at the beginning of September. Nova Scotia and Quebec mines were rather more active, but there was a falling-off in Ontario and the Western Provinces. Greater expansion had been noted at the corresponding date last year; the index number then, however, was some twenty points lower.

Non-Metallic Minerals, other than Coal.—A moderate decline was reported in this group, in which statistics were received from 103 firms employing 10,086 persons, compared with 10,214 in the preceding month. Activity in these industries was higher than at October

1, 1938, when little general change had been indicated.

Communications

Communications gained slightly from the last report; the companies and branches furnishing data recorded a staff of 23,363 employees, as compared with 23,314 at September 1; an increase on telegraphs was largely offset by a loss on telephones. The index was fractionally higher than at the same date in 1938, employment in communications having then declined.

Transportation

Street and Electric Railway, Cartage and Storage.—Considerable additions to payrolls were indicated in local transportation and storage, 665 persons being taken on by the 288 co-operating firms, who employed 30,865 men and women. Employment in this industry was in greater volume than at October 1 of last year, although a larger advance had then been shown.

Steam Railways.—Statistics were tabulated from 100 employers in the steam railway operation group, whose payrolls were enlarged from 61,937 at September 1 to 67,053 at the beginning of October. The advance, which was widely distributed, was due in part to the engagement of men for guard duty. A smaller gain had been indicated at the same date of last year, and the index, at 77·9, was then several points lower than at the latest date, viz., 84·3.

Shipping and Stevedoring.—A slight falling off was registered in the water transportation group, in which 122 companies employed 16,921 workers; this was a reduction of 67 from September 1. A greater decline had been noted at October 1 of last year, but the index then stood at 96·1, as compared with 91·2 at the beginning of October of the present year.

Construction and Maintenance

Building.—There was a further increase in building, 632 persons being added to the forces of the 883 co-operating contractors. They had 34,964 employees; this number was above that reported at the beginning of October of a year ago, although a larger gain had then been indicated. Considerable improvement was recorded in Ontario at the date under review.

Highway.—Employment in this group was curtailed in most provinces, Manitoba and Alberta being the exceptions; the losses in Quebec were the largest. Statements were tabulated from 436 employers throughout the Dominion, whose payrolls, standing at 94,048, were smaller by 24,667 workers than at September 1. The number employed on road work was below that reported at October 1, 1938, when an increase had been noted.

Railway.—There was a falling-off in railway construction and maintenance. The forces of the 33 companies and divisional superintendents furnishing returns declined from 31,001 at the beginning of September, to 30,147 at the date under review. A larger reduction had been registered at October 1, 1938, and the general level of employment in this industry was then slightly lower.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1936=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Oct. 1, 1927	110·3	108·1	110·0	111·1	111·7	107·8

[1] For explanation of term "Relative Weight", see footnote to Table 3.

Services

The closing of summer hotels caused a considerable contraction in employment, while laundries and dry-cleaning establishments were also slacker. The staffs of the 597 service firms whose returns were received, aggregated 30,056 at October 1, as against 33,510 in the preceding month. Although the seasonal shrinkage indicated at the same date last year had been on a smaller scale, employment in the service division was then at the same level as at the date under review.

Trade

Retail and wholesale trading establishments largely increased their personnel; 2,075 firms reported 132,715 employees, compared with 129,202 in the preceding month. This advance approximated that recorded at October 1, 1938, but considerably exceeded the average gain noted at the beginning of October in

the years, 1921-1938. The index at the date under review stood at 138·6, compared with 134·5 at October 1, 1938.

TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employes reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns at the date under review.

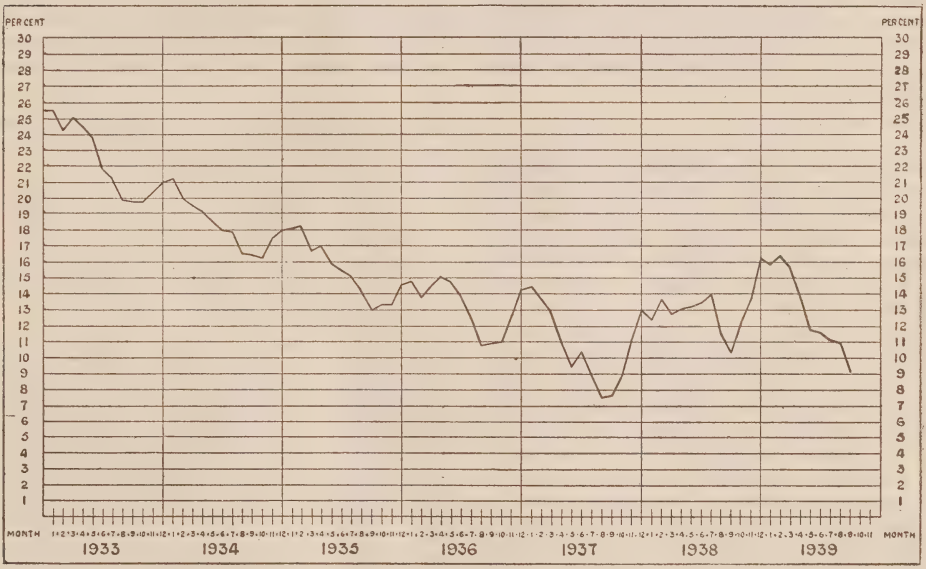
(2) Unemployment in Trade Unions at the Close of September, 1939

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle because of illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployed is based, it should be understood that such figures have reference only to the organizations reporting.

The unemployment volume among local trade union members, which has been dropping steadily from the close of February this year, attained a new level in September when 9·1 per cent of inactivity was reported, this percentage being the smallest which has been indicated in any month of our records since October, 1937. Returns for the month reviewed were compiled from 1,932 labour organizations with 243,569 members, 22,081 of whom were idle on the last day of the month. In August the percentage of unemployment stood at 10·9. A higher level of activity was reflected also from September last year when 10·4 per cent of the members reported were out of work. The seasonal pick-up in orders in the Alberta coal mining area was in evidence to a marked degree during September, and was the determining factor in the noteworthy advancement registered from that province when compared with August conditions. In Quebec, Ontario and New Brunswick gains of a rather small nature were indicated and the trend for Manitoba, Saskatchewan and British Columbia members was toward heightened activity. Nova Scotia unions alone showed curtailment in work afforded which was of moderate proportions, the iron and steel trades particularly reflecting employment cessation. Contrasted with the returns for September last year, Manitoba members showed a considerably better situation during the month reviewed due largely to the improved conditions existing in the manufacturing industries, especially among garment and iron and steel workers. In New Brunswick and Alberta also the situation was somewhat more favourable, Quebec, Ontario and Saskatchewan showing but a slightly upward tendency. Retarded activity on a small scale, however, was manifest by Nova Scotia and British Columbia members.

A separate compilation is made each month of unemployment in the largest city in each province except Prince Edward Island. Saint John members during September reflected a marked increase in employment from the preceding month, and advances of considerably lesser degree were noted by Toronto, Vancouver and Montreal members. In Halifax, Winnipeg and Regina the situation improved by less than one per cent. Employment for Edmonton members, on the contrary eased off slightly from August. Considerably greater activity was manifest in Saint John and Winnipeg during September than in the corresponding month of 1938, and a moderately better situation obtained for Vancouver, Edmonton and Montreal members. In Toronto and Regina there was but a slightly upward employment movement. Retarded activity on a small scale, however, was manifest by Halifax members.

From the chart which accompanies this article and illustrates the trend of unemployment from January, 1933, to date, it will be noticed that the curve during September this year showed a further extension in the downward trend pursued since the close of February. The curve also rested at a level below that of September last year, an indication of improved conditions during the period reviewed.



In the manufacturing industries, as a whole, there was but a slight change in the situation during September from either the previous month of September a year ago according to the returns compiled from 570 local unions, embracing a membership of 97,073 persons. Of these, 10,528 or a percentage of 10·8 were unemployed on the last day of the month in comparison with percentages of 11·9 in August and 11·8 in September, 1938. Garment and jewellery workers, and papermakers showed a moderate rise in employment during September from August, and slight gains were apparent among leather, and textile and carpet workers, printing tradesmen and general

labourers. Metal polishers were decidedly more active, but their membership was small and hence did not seriously affect the situation in the manufacturing industries. Glass workers on the other hand, were considerably slacker than in August, and the situation declined slightly for fur, wood, hat, cap and glove, brewery, iron and steel, and cigar and tobacco workers. Bakers and confectioners reported the same volume of unemployment as in August. When a comparison is made with the returns for September, 1938, textile and carpet workers and metal polishers were afforded a much greater volume of employment during the month reviewed, and bakers and confectioners, garment, jewellery and brewery workers showed a noteworthy increase in activity. More moderate gains were registered by iron and steel workers, and conditions for cigar and tobacco workers improved slightly. Leather, hat, cap and glove, and glass workers, however, were much quieter than in September last year, and fair-sized recessions were indicated by fur and wood workers. The situation also tended downward for papermakers, general labourers and printing tradesmen.

Due to the commencement of the busy season in coal mining activities unemployment showed a noteworthy drop during September from the previous month. This was apparent from the reports compiled for September from 55 local unions involving a membership of 21,418 persons, 1,287 or 6·0 per cent of whom were idle at the end of the month in contrast with a percentage of 11·7 in August. The volume of employment, however, was slightly below the September, 1938, level when 5·5 per cent of inactivity was registered. Alberta members showed a pronounced increase in work available from August, and in New Brunswick the improvement was more moderate. In British Columbia, on the contrary, there was some easing up in employment, while Nova Scotia members indicated approximately the same volume of work afforded as in August. The Alberta coal fields, as in the previous comparison, reflected a substantial gain in activity during September over the corresponding month last year which was, however, slightly more than offset by marked declines noted in British Columbia and the small losses reported from Nova Scotia. In New Brunswick all members were busily engaged as in September, 1938.

The building and construction trades, with 204 local unions representing a total of 26,012 members, showed that 5,546 or a percentage of 21·3 were unemployed on the last day of the month in contrast with percentages of 28·1 in August and 26·7 in September a year ago. The bulk of the improvement from August was centred among bricklayers, masons and plasterers, and carpenters joiners, who showed large gains in activity. Steam shovelmen also indicated noteworthy employment advances, and a more favourable situation prevailed for electrical workers, plumbers and

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

steamfitters, and hod carriers and building labourers. On the other hand, extensive losses in work available were apparent among tile layers, lathers and roofers which, however, affected few persons as their membership was small. Bridge and structural iron workers, and granite and stonecutters also suffered employment curtailment of considerable degree. Among painters, decorators and paperhangers more moderate recessions occurred. In comparing with the returns for September, 1938, carpenters and joiners were much busier during the month surveyed, and substantial improvement was noted by bricklayers, masons and plasterers, and granite and stonecutters. Heightened activity of somewhat lesser importance was manifest by plumbers and steamfitters, electrical workers and steam shovelmen. Decidedly less favourable conditions, however, obtained for painters, decorators and paperhangers, and hod carriers and building labourers, and the situation declined for bridge and structural iron workers, and tile layers, lathers and roofers.

The employment tendency in the transportation industries during September was upward from August though the variation was but fractional, the 838 organizations forwarding reports with a membership numbering 65,867 persons showing that 2,760 or 4·2 per cent were out of work on the last day of the month as compared with a percentage of 4·8 in August. In the steam railway division, which constituted over 79 per cent of the entire group membership reported, there was a slight rise in activity from August as was the case among teamsters and chauffeurs, and street and electric railway employees. Some slowing up in available work, however, was recorded by navigation employees. The situation in the transportation industries, as a whole, was also slightly more favourable than in September, 1938, when unemployment stood at 5·8. In this comparison steam railway employees accounted almost entirely for the better movement apparent, the increase noted by street and electric railway employees being practically negligible. Navigation workers, as in the previous comparison, reflected noteworthy curtailment in employment and activity for teamsters and chauffeurs was slightly retarded.

Retail shop clerks, with 6 locals reporting for September a total of 1,393 members, indicated only 0·1 per cent of these unemployed at the end of the month, in comparison with a fully engaged situation in both the previous month and September, 1938.

The situation for civic employes during September remained approximately the same as in both the preceding month and September last year, unemployment standing at 1·2 per cent in contrast with a percentage of 1·1 in each of the months used for comparison. Reports for September were tabulated from 79 organizations of these workers with a membership aggregate of 9,457 persons, 113 of whom were without employment on the last day of the month.

The miscellaneous group of trades reflected some slight improvement during September over August conditions, though the expansion noted from September last year was quite pronounced. This was evident from the reports received from 140 labour organizations, involving a membership of 10,713 persons, 691 or 6·5 per cent of whom were unemployed at the close of the month as compared with percentages of 8·1 in August and 15·2 in September a year ago. Hotel and restaurant employees were considerably better engaged than in August, and increases in activity on a smaller scale were recorded by unclassified workers, and stationary engineers and firemen. Moderate curtailment in available work was

reported by theatre and stage employees, and minor contractions occurred among bakers. All groups within the miscellaneous trades maintained a higher level of activity than in September last year, unclassified workers particularly, showing decided expansion, while in the other groups the gains were small.

Some slackening off in employment for fishermen was apparent during September from both the preceding month and September a year ago, the recessions in the latter comparison being the more noteworthy. This was evident from the reports compiled from 5 locals, with a membership total of 2,226 persons, 175 of whom or a percentage of 7·9 were out of work in contrast with percentages of 3·3 in August and 1·1 in September, 1938.

Lumber workers and loggers indicated little change in conditions during the three months used for comparative purposes, the 5 locals furnishing reports with 2,314 members showing that 490 or 21·2 per cent were idle on the last day of the month in contrast with an unemployment percentage of 23·0 in August and with 22·0 per cent in September last year.

Table I shows by provinces the percentage of members who were on an average unemployed, each year, from 1929 to 1938 inclusive, and also the percentages of unemployment by provinces for September of each year from 1929 to 1936 inclusive, and for each month from September, 1937, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table .I

(3) Employment Office Reports for September, 1939

The volume of business transacted by the offices of the Employment Service of Canada during the month of September, 1939, showed an increase of about one per cent in the average daily placements over that of the preceding month and one of 6 per cent over the average for the corresponding period a year ago. Placements in the majority of industrial groups were more numerous under both comparisons, the gains in logging, services and manufacturing being quite substantial, while construction and maintenance recorded a heavy loss both from the previous month as well as from the corresponding period last year, farming a major reduction from August and transportation a minor decline from September, 1938.

The accompanying chart shows the trend of employment since January, 1937, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curve both of vacancies and of placements in relation to applications declined steadily throughout the month, the level of vacancies dropping nearly 9 points and that of placements over 7 points. At the close of the period, however, both levels were slightly above those reached at the end of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 58·4 during the first half and 54·9 during the second half of September, 1939, in contrast with ratios of 58·7 and 53·7 during the corresponding periods of 1938. The ratios of placements to each 100 applications during the periods under review were 55·1 and 53·1, as compared with 54·8 and 52·1 during the corresponding month of 1938.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during September, 1939, was 1,658, in contrast with 1,650 during the preceding month and with 1,572 in September a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,928, in comparison with 2,515 in August, 1939, and with 2,799 during September last year.

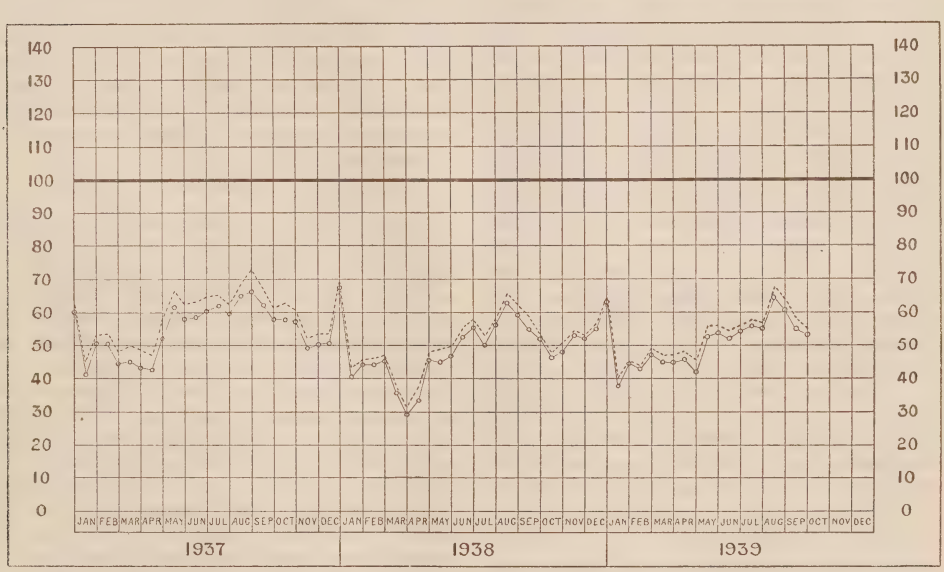
The average number of placements made daily by the offices of the Service during September, 1939, was 1,585, of which 1,099 were in regular employment and 486 in work of one week's duration or less, as compared with a total daily average of 1,573 during the preceding month. Placements in September a year ago averaged 1,495, daily, consisting of 970 placements in regular and 525 in casual employment.

During the month of September, 1939, the offices of the Service referred 41,359 persons to vacancies and effected a total of 39,608 placements. Of these, the placements in regular employment were 27,455, of which 21,770 were of men and 5,685 of women, while placements in casual work totalled 12,153. The number of vacancies reported by employers was 29,415 for men and 12,018 for women, a total of 41,433, while applications for work totalled 73,178, of which 52,341 were from men and 20,837 from women. Reports for August, 1939, showed 44,549 positions available, 67,901 applications made and 42,470 placements effected, while in September, 1938, there were recorded 39,279 vacancies, 69,960 applications for work and 37,367 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment

Service, each year, from January, 1929, to date:

Year	Placements		
	Regular	Casual	Totals
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939 (9 months)	185,422	110,702	296,124



NOVA SCOTIA

During September, employment offices in Nova Scotia received orders for nearly 5 per cent more workers than in the preceding month and over 6 per cent more than during the corresponding month of last year. There was an increase also in placements of nearly 5 per cent when compared with August and of nearly 8 per cent in comparison with September, 1938. Placements were higher in services, manufacturing and logging than during September of last year, but these increases were partly offset by a decline in farming. Small changes only were reported in all other groups. Industrial divisions in which most of the placements were effected during the month were manufacturing 38; logging 55; farming 54; construction and maintenance 548, and services 539, of which 441 were of household workers. During the month 416 men and 157 women were placed in regular employment.

NEW BRUNSWICK

There was a decrease of nearly 15 per cent in the number of positions offered through employment offices in New Brunswick during September, when compared with the preceding month, but an increase of nearly 8 per cent in comparison with the corresponding month of last year. Placements declined nearly 15 per cent when compared with August, but were nearly 9 per cent higher than during September, 1938. An increase in services accounted for the gain in placements over September of last year for the province as a whole, as small increases in construction and maintenance and transportation were offset by a decline in logging. Placements under construction and maintenance numbered 393 and in services 667. Of the latter, 460 were of household workers. There were 66 men and 109 women placed in regular employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

QUEBEC

The demand for workers, as indicated by orders received at employment offices in the Province of Quebec during September was over 1 per cent higher than in the preceding

month, but nearly 12 per cent below the corresponding month of last year. There was an increase of nearly 6 per cent in placements when compared with August, but a decrease of nearly 11 per cent in comparison with September, 1938. The most noteworthy decline in placements by industrial groups was in construction and maintenance and was responsible for the decrease from September of last year for the province as a whole. There was a moderate loss in transportation, but fairly large increases in services and logging, and smaller gains in manufacturing and farming. Placements by industrial divisions included manufacturing 219; logging 1,021; farming 144; construction and maintenance 2,060 and services 3,721, of which 3,413 were of household workers. Placements in regular employment numbered 3,528 of men and 2,240 of women.

ONTARIO

Positions offered through employment offices in Ontario during September were nearly 20 per cent higher than in the preceding month and 27 per cent above the corresponding month of last year. Placements also showed an increase of nearly 17 per cent when compared with August and of nearly 26 per cent in comparison with September, 1938. All industrial divisions participated in the increase in placements over September of last year, the most important gains being in manufacturing and logging. Other groups in which placements were higher were farming, construction and maintenance, transportation, mining, services, and trade. Placements by industrial divisions included manufacturing 1,715; logging 1,374; farming 2,372; mining 146; transportation 207; construction and maintenance 4,425; trade 427 and services 3,931, of which 2,571 were of household workers. During the month 7,155 men and 1,666 women were placed in regular employment.

MANITOBA

There was a decline of over 47 per cent in the number of positions offered through employment offices in Manitoba during September when compared with the preceding month, but an increase of nearly 26 per cent in comparison with the corresponding month of last year. Placements were over 46 per cent fewer than in August, but over 28 per cent above September, 1938. There was a substantial increase in placements under construction and maintenance when compared with September of last year, and a moderate gain in farming. The changes in other groups were small and included a decline in services and increases in manufacturing, trade, mining and logging. Industrial divisions in which most of the placements were effected during the month were manufacturing 76; logging 153; farming 609; construction and maintenance 2,296; and services 836, of which 691 were of household workers. During the month 3,061 men and 380 women were placed in regular employment.

SASKATCHEWAN

Orders received at employment offices in Saskatchewan during September called for nearly 41 per cent fewer workers than in the preceding month, but nearly 46 per cent more than during the corresponding month of last year. There was a decrease in placements of nearly 39 per cent when compared with August, but an increase of nearly 49 per cent in comparison with September, 1938. The most important increase in placements over September of last year was in farming. There was a fairly large gain in construction and maintenance and small improvement in trade. The changes in all other groups were nominal only. Placements by industrial divisions included farming 2,730; construction and maintenance 450 and services 629, of which 459 were of household workers. Placements in regular employment numbered 3,019 of men and 301 of women.

ALBERTA

Opportunities for employment, as indicated by orders received at employment offices in Alberta during September, were over 22 per cent better than in the preceding month, but nearly 22 per cent less favourable than in the corresponding month of last year. There was an increase of 25 per cent in placements over August, but a decline of nearly 22 per cent in comparison with September, 1938. Farm placements were considerably fewer than during September of last year and accounted for the decline for the province as a whole under this comparison. The changes in all other groups were small and included gains in logging, mining and trade, and losses in construction and maintenance, services, and manufacturing. Industrial divisions in which most of the placements were effected during the month were manufacturing 63; logging 99; farming 2,599; construction and maintenance 230, and services 613, of which 464 were of household workers. During the month 3,032 men and 382 women were placed in regular employment.

BRITISH COLUMBIA

Employment opportunities, as indicated by orders received at employment offices in British Columbia during September were less

than 1 per cent below those of the preceding month, but nearly 25 per cent lower than during the corresponding month of last year. Similar percentages of loss were reported in placements under both comparisons. A large decrease in construction and maintenance accounted for the decline in placements for the province as a whole from September of last year. There was a moderate decrease in logging, a fairly large increase in services and moderate gains in trade, manufacturing and transportation. Other groups showed minor increases. Placements by industrial divisions included manufacturing 112; farming 151; transportation 80; construction and maintenance 2,046; trade 129, and services 954, of which 674 were of household workers. There were 1,493 men and 450 women placed in regular employment.

Movement of Labour

During the month of September, 1939, the offices of the Employment Service of Canada effected 27,455 placements in regular employment, 14,625 of which were of persons for whom the employment was outside the immediate district of the offices at which they were registered. Of the latter, 1,115 were granted the Employment Service reduced transportation rate, 1,009 travelling to centre within the same province as the despatching office and 106 to other provinces. The reduced transportation rate which is 2·5 cents per mile with a minimum fare of $4 is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

The movement of labour in Quebec during September originated at Hull from which centre 43 bushmen were transported at the reduced rate to Pembroke. Ontario offices were responsible for the despatch of 943 persons during September to employment within the province. At Port Arthur 393 bush workers, 16 highway construction workers, 5 building construction workers and 2 hotel employees secured certificates for diverse points within the same zone. From Fort William 122 bush workers, 2 painters and one electrician and from Sudbury 114 bush workers were conveyed to points within their respective zones. The Port Arthur zone, in addition, received 69 bushmen from Ottawa and one bookkeeper from Pembroke, while to the Sudbury zone were shipped 88 bushmen from Pembroke, 15 bushmen from North Bay, 2 bushmen from Toronto and one blacksmith from Ottawa. The Ottawa office also despatched 112 bushmen to Pembroke. In Manitoba during September 67 persons took advantage of the Employment Service reduced rate, 4 of whom went to provincial situations and 63 outside the province. All of these were issued their certificates for transportation at the Winnipeg office. Destined to points in the Winnipeg zone were 2 construction labourers, one camp cook and one farm hand, while the interprovincial movement was to the Port Arthur zone and included the transfer of 41 bush workers, 20 mine workers, one building construction labourer and one farm hand. Alberta transfers at the reduced rate during September numbered 60, all of which were provincial. These were effected by the Edmonton office which was instrumental in the despatch of 36 highway construction workers, 15 mine workers, 6 bush workers, one school teacher, one labourer and one farm domestic to different sections of the Edmonton zone. Two workers benefited by the Employment Service reduced rate in British Columbia during September, these going to centres within the province. From New Westminster one apple packer was bound for the Penticton zone and from Vancouver one mine worker went to employment at a point within the Vancouver zone.

Of the 1,115 persons profiting by the Employment Service reduced transportation rate during September, 587 were carried by the Canadian National Railways and 528 by the Canadian Pacific Railway.

In order to facilitate the movement of harvest labour within the Prairie Provinces there was in addition to the 2·5 cent rate referred to in the above a special harvest rate afforded by the railway companies effective from August 1 of this year and terminating October 15. Under this arrangement the railway companies granted a special rate of 1·5 cents per mile to all applicants upon presentation of a certificate supplied by the offices of the Employment Service in Manitoba and Alberta, the movement of labour being confined entirely to the localities within their respective Provinces. The September transfers under this plan included 14 harvest workers in Manitoba and 245 in Alberta, a total of 259 persons. Of these 174 journeyed over the Canadian National Railways and 85 over the Canadian Pacific Railway.

(4) Building Permits issued in Canada during September, 1939

The value of the building authorized in 58 cities during September was estimated at $4,104,401; this was a decrease of $2,055,067 or 33·4 per cent from the total of $6,159,468 reported in August, 1939, and of $1,181,596 or 22·4 per cent, in comparison with September of last year, when the permits granted represented building estimated to cost $5,285,997.

The value of the building authorized in the first nine months of the present year was $43,911,494; this slightly exceeded the aggregate of $43,183,393 recorded in the period January-September, 1938, and that of $42,960,983 in 1937, while it was decidedly higher than in the first nine months in any other year since 1931. However, the cumulative total for the same period in each of these years has been very much lower than in earlier years for which data are available. The wholesale prices of building materials have recently been lower than in the same months of either 1937 or 1938, although they continue higher than in any of the years, 1931-1936.

Some 50 cities furnished detailed statistics for September, showing that they had issued more than 450 permits for dwellings estimated to cost approximately $1,500,000, and about 2,100 permits for other buildings valued at about $2,290,000. During August, permits were granted for the erection of about 700 dwellings and 2,200 other buildings, estimated to cost approximately $2,250,000 and $3,275,000, respectively.

All provinces reported decreases in the value of the building authorized as compared with August, 1939, those of $582,833, or 40·5 per cent, in Quebec and $609,574, or 22·6 per cent, in Ontario being the largest actual losses, while the greatest proportionate decline was that of $300,720, or 50·3 per cent in Alberta.

Improvement as compared with September, 1938, was reported in Prince Edward Island, New Brunswick and Ontario, the gain of $558,107, or 36·5 per cent, in Ontario being considerable. Of the reductions elsewhere recorded in this comparison, that of $1,036,682, or 54·7 per cent, in Quebec was most pronounced.

Of the larger cities, Montreal, Winnipeg and Vancouver showed lower totals of authorized building than in either August, 1939, or September, 1938, while in Toronto, there was a decline in the first comparison, but an increase over September of last year. Of the other centres, Chatham, London, Oshawa, Ottawa, Kamloops and Prince Rupert recorded increases as compared with either August, 1939, or September, 1938.

Table I gives the value of the building authorized by 58 cities during September, and in the first nine months of each year since 1926, as well as index numbers for the latter, based upon the total for the corresponding period of 1926 as 100. The average index number of wholesale prices of building materials in the period, January-September, of the years since 1926 are also given, (average 1926=100).

Table I

Year	Value of permits issued in September	Value of permits issued in first nine months	Indexes of value of permits issued in first nine months (1926=100)	Average indexes of wholesale prices of building materials in first nine months (1926=100)
	$	$		
1939.....	4,104,401	43,911,494	36·5	88·1
1938.....	5,285,997	43,183,393	35 9	90·2
1937.....	5,111,780	42,960,983	35·8	95·2
1936.....	3,657,271	30,683,412	25·5	84·8
1935.....	3,672,845	36,680,796	30·5	81·2
1934.....	2,281,874	19,715,146	16·5	82·8
1933.....	1,986,903	16,394,014	13·6	77·5
1932.....	2,449 735	35,026,199	29 1	77·6
1931.....	10,407,999	88,602,995	73·7	82·7
1930.....	11,093,020	126,361,350	105 2	92·7
1929.....	17,117,017	186,011,017	154·8	99·2
1928.....	20,374,149	165,621,634	137·8	96·7
1927.....	14,462,243	141,152,535	117·5	96·3
1926.....	11,047,503	120,163,936	100·0	100·7

The aggregate for the first nine months of this year was slightly higher than in 1938 or 1937, and substantially exceeded that for the same period in any of the preceding five years. While the average index number of wholesale prices of building materials was lower than in 1938 or 1937, it was rather higher than in preceding years since 1930.

Table II gives the value of the building permits issued by 58 cities during September, 1939, and September, 1938. The 35 cities for which data are available since 1910 are marked thus "*".

[1] Report not received.

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF OCTOBER, 1939

Reports of Superintendents of the Employment Service

THE employment situation at the end of October was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritimes were busy ploughing and gathering in the remainder of the root crop, although heavy rains had considerably hampered apple picking in the Annapolis Valley. A number of farmers, however, were taking advantage of the Department of Agriculture scheme for breaking up new land. Under the plan the Department supplies a government tractor, plough and operators at $1 to $1.50 per hour, with a view to increasing the acreage of field and grain crops, thereby making the farms more self-supporting. Logging was practically at a standstill; nevertheless a few companies were repairing and building new camps for winter operations; some dressed lumber also was being shipped. Fishing was very fair. Mackerel had been taken in large quantities, and regular shipments of oysters had been made to upper Canadian markets. Coal mines in the New Glasgow area operated five and six days per week, while those in Cape Breton and vicinity worked from four and a half to six days. Manufacturing plants, particularly clothing factories, where war orders had increased their business, were working at full capacity, and no idleness was reported by the iron and steel industry. All building under way was progressing steadily. Road construction for the season was nearly finished, but there was marked activity in airport construction at Yarmouth and Stanley, as well as a dam and power development project in Hants County. Transportation, both freight and passenger, was quite heavy. Boats operating on the Saint John River were carrying full cargoes of winter supplies up river and bringing back root crops. Trade, wholesale and retail, was better. Increased vacancies for female household workers were listed in the Women's Division and placements made accordingly.

Owing to the advanced season, farming in the Province of Quebec had decreased considerably, but logging was very active, even though unfavourable weather in some localities had handicapped operations. Manufac-

turing centres reported as follows:—Port Alfred and Chicoutimi—all industries very busy; Hull —all plants engaged, but few orders received; Matane—sawmills closed, as cutting was completed; Montreal—general improvement noted, especially in leather, shoe and garment concerns, the latter industry also being very active at Quebec City; Rouyn—sash and door plants quiet, but busy at Thetford Mines, although boot and shoe establishments at the latter centre were slack; Three Rivers—paper mills and metal industries operating steadily; Val d'Or—sash and door factories quieter and no change reported by food manufacturers. Building was much brisker and fewer experienced tradesmen were idle. Some road contracts had been completed, but in parts of the province additional crews had been hired in order to finish the highways before colder weather came. In consequence, several hundred men had found work for an additional period of five or six weeks. Trade was fair. Calls for domestics in the Women's Division remained steady, both regular and casual employment being found for many persons.

The usual seasonal decline was noted in calls for farm help in Ontario as harvesting was completed, however, many experienced hands had been placed, some as apple pickers, others for pulling turnips, or for corn husking. Stripping tobacco had not yet started, as buying of the crop will not begin until later. Bush operations were increasing, and many of the camps were filled to capacity, so that requests for bushmen had abated somewhat. Mining was quiet, except at Timmins, where there was a fair demand for various classes of miners. Employment in manufacturing plants continued steady, all industrial divisions operating at nearly full capacity. Increased production was noted, particularly in textiles, clothing, shoes, sugar refineries, canning establishments and in the iron and steel group. Skilled mechanics also were in demand. Building was slowing down with the approach of colder weather and the completion of many contracts, however, alterations in various centres, where military units had been placed, afforded employment for a large number of skilled and semi-skilled workers. Sewer and highway construction continued, but on a reduced basis. Trade was good. The domestic situation had not changed noticeably; good household help was scarce and day work fair. Graduates from the Home Service Schools in different cities readily found positions and in most cases were working very satisfactorily. Orders also had been received for textile operators and factory workers in leather, soap and food establishments.

Recent snow storms in the Prairie Provinces had put an end to harvesting. This resulted in decreased requests for farm help, as farmers in general had not yet begun to hire men for winter work, although enquiries were being made concerning the Farm Bonus Plan. In Manitoba, logging placements were double those of the previous period and pulpcutters and loggers were in good demand at satisfactory wages. Cordwood camps also were beginning to ask for workers. Colder weather had caused a large increase in coal orders and at Drumheller all mines were running with full crews. At Edmonton, improvement in this industry also was noted and a scarcity of certified miners resulted, but at Estevan, a strike had handicapped the larger mines, although all the smaller ones were working to capacity. At Winnipeg, manufacturing was quiet. Building construction was not so brisk, except at centres where alterations in military billets were absorbing a number of artisans, but fewer men were employed on highway construction. Railway operation was still fairly active and registration of younger men for Youth Training projects particularly heavy. Trade was fair. There was a steady call for farm domestics in the Women's Division, with many applicants arriving from the country, who were looking for city positions. Farm domestics still continued to be in the minority.

Farming was quiet in British Columbia, the only request being for general hands able to milk, with wages averaging $25 per month. In the fruit growing districts nearly all of the apples had been placed in storage before the recent cold weather arrived. The annual sheep sale at Kamloops was most successful, as it brought in a large number of people from the surrounding country. Logging camps were operating at about eighty-five per cent capacity, but sawmills were working at high speed in order to supply lumber for domestic use, as well as that required for the Department of National Defence. Coal mines were active; metal mines were quieter. Herring and salmon fishing continued, but with somewhat reduced salmon catches. Building construction was slacker, except at certain points where men were needed for war emergency work; a few others had been placed on section gangs. Christmas tree cutting also was at its busiest, with a large number of men employed. Drydocks and shipyards were quiet at Prince Rupert. Longshore work was slack at New Westminster, but more active at the former port, due to trans-shipments of fish from Alaska. At Victoria, both shipyards and waterfront were busy; a lighthouse keeper had secured a position and labourers had been supplied to the Naval Yards. Trade was moderate. Casual work in the Women's Department was greater in volume, but calls for regular help in domestic service were not so numerous.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JULY TO SEPTEMBER, 1939

EMPLOYMENT conditions, as indicated by the business transacted by the offices of the Employment Service of Canada during the quarter July to September, 1939, showed a gain over that of the corresponding quarter last year, as there was an increase of over 2 per cent in vacancies listed and of nearly 3 per cent in placements effected. This

gain was chiefly accounted for by substantial improvement shown in logging, services and manufacturing, which was largely offset, however, by a marked decline in construction and maintenance. Other changes were not outstanding, these consisting of gains in mining and trade and reductions in farming and transportation.

Provincially, New Brunswick, Ontario, Manitoba and Saskatchewan reported more vacancies and placements than in the corresponding quarter of 1938, the greatest expansion being recorded in Ontario. The remaining provinces registered declines, the most pronounced being in British Columbia, where a heavy drop took place in the construction and maintenance group.

in British Columbia, where a heavy drop took place in the construction and maintenance group.

From the chart on page 1155, which accompanies the article on the work of the Employment Offices for the month of September, it will be noticed that the curves of vacancies and placements in relation to applications rose slightly during the first half of July, remained practically stationary during the latter half of the month, then followed a marked upward trend until the middle of August, when the course followed was downward until the end of September, the levels of both curves at the close of the quarter under review being only slightly higher than those shown at the end of the corresponding period last year. During the period July to September, 1939, there was an average of 59·9 vacancies and 57·4 placements for each 100 applications for employment, as compared with 58·7 vacancies and 56·0 placements for each 100 applications during the corresponding quarter a year ago.

The average number of positions listed daily during the present quarter was 1,548, of applications registered, 2,583 and of placements effected, 1,482, in contrast with the daily average of 1,514 vacancies, 2,579 applications and 1,444 placements in regular and casual employment during the corresponding quarter of 1938.

During the three months July to September, 1939, the offices reported that they had made 118,010 references of persons to positions and effected a total of 114,080 placements, of which 81,343 were in regular employment and 32,737 in casual work. Of the placements in regular employment 65,290 were of men and 16,053 of women, while casual work was found for 20,136 men and 12,601 women. Records for the corresponding quarter of 1938 showed 111,125 placements, of which 73,908 were in regular employment and 37,217 in casual work. Applications for employment during the period under review were received from 146,518 men and 52,315 women, a total of 198,833, in contrast with a registration of 198,537 persons during the same period in 1938. Employers notified the Service during the quarter July to September, 1939, of 119,133 vacancies, of which 85,943 were for men and 33,190 for women, as compared with 116,553 opportunities for work during the corresponding period a year ago.

In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of September, 1939.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, October, 1939, summarized the employment situation as follows:—

The outbreak of the war created new demands for labour, but at the same time caused some dislocation affecting the employment of workpeople in many directions. At September 11, 1939, the total number of persons on the registers of Employment Exchanges in Great Britain showed an increase of 99,236 as compared with August 14. The number of males fell by 75,745, but the number of females rose by 174,981.

An appreciable part of the increase in the number of females on the register was due to the registration of evacuated women and of others offering their services for work in connection with the war. The increase of 84,115 in the number wholly unemployed in Great Britain included 57,248 persons who were not applying for benefit or allowances, of whom 49,366 were women and girls. Two-thirds of this number had not previously been in insured employment.

Between August 14 and September 11 an increase in unemployment among women occurred in every Division, the increases being most marked in the London, North-Western and Scotland Divisions. In the case of men, there was a considerable increase in London, and minor increases in the South-East of England, but substantial decreases occurred elsewhere, particularly in the North Midlands, North-Eastern, North-Western, and Scotland Divisions.

These changes are reflected in the figures for particular industries. There were decreases in the numbers unemployed in coal mining, building and public works contracting, engineering, ship building and repairing, the iron and steel and pottery industries, boot and shoe manufacture and local government service. On the other hand the numbers unemployed increased in hotel and boarding house service, entertainments and sport, the distributive trades, the fishing, clothing, furniture and printing industries, motor vehicle manufacture, and the leather, cotton weaving, carpet and certain food manufacturing industries.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at September 11, 1939, was 9·0, as compared with 8·6 at August 14, 1939, and 12·4 at September 12, 1938. For persons insured under the general scheme the corresponding percentages were 9·2 at September 11, 1939, 8·8 at August 14, 1939, and 12·8 at September 12, 1938. For persons within the agricultural scheme the percentages were 3·4, 3·8 and 4·1 respectively.

United States

According to an official press release dated October 24, issued by Miss Frances Perkins, Secretary of Labour, employment in all manufacturing industries increased by nearly 300,000 from August to September. Miss Perkins stated that the increase from September to October was somewhat smaller because of the large seasonal decrease in canning and an industrial dispute involving about 50,000 workers in automobiles. However, it was estimated that there was an increase of something in excess of 200,000 from September to October. The increase in manufacturing industries other than canning and automobiles was 3·9 per cent as compared with 2·4 per cent from August to September. Normally there is but little change in manufacturing employment from September to October.

The following paragraphs taken from the official press release indicate the employment situation in the United States to be as follows:—

Preliminary reports for October indicate that increases in manufacturing activity were widespread. Among the industries of major importance in which substantial gains in employment were reported were iron and steel, cotton goods, woollen goods, meat packing plants and electrical machinery and equipment. Decreases except in canning were small and largely seasonal in character.

The October factory employment gain, combined with the increases shown in the two preceding months, indicates more than 700,000 additional wage earners employed in factories in mid-October than in mid-July of this year. Of this total gain, less than 300,000 may be attributed to customary seasonal expansion.

More than 500,000 workers were returned to employment in non-agricultural occupations between August and September. A major portion of this increase was in manufacturing industries, although there were also substantial gains in wholesale and retail trade, mining, and transportation. Compared with September a year ago there were approximately 1,150,000 more workers employed in September 1939 in non-agricultural industries. These figures do not include employees of Works Progress Administration and National Youth Administration projects nor enrollees in the Civilian Conservation Corps.

Factory Employment.—About 300,000 additional wage earners found employment in American factories in September and weekly factory pay rolls were $7,200,000 greater than in the preceding month.

Gains were widely reported in manufacturing industries, 72 of the 90 industries surveyed by the Bureau of Labor Statistics reporting increased working forces and 66 showing a rise in pay rolls. The September factory employment index (100·1 per cent of the 1923-1925 average) reached the highest level since November 1937. While the recovery in recent months has been unusually pronounced, and the employment index has passed the 1923-1925 average level for the first time in 22 months, factory employment in September 1939 was still approximately 10 per cent below the levels reached in July and August of 1937.

Employment in Non-Manufacturing Industries.—The non-manufacturing industries also reported substantial increases in employment. Coal mines continued to recall more workers in September, anthracite mines increasing their working forces by 1·9 per cent or 1,200 workers, and bituminous coal mines by 5·3 percent or 19,000 workers. In each of these industries, pay rolls rose more sharply than employment, reflecting increased production during the September pay period. Metal mines also reported an employment gain (2·1 per cent or 1,500 workers), while quarries and nonmetal mines reported a smaller-than-seasonal decline of 0·4 per cent. Oil wells reduced their forces 3·0 per cent, reflecting the effects of curtailed operations in a number of States.

A slightly greater-than-seasonal increase (1·6 per cent or 24,000 workers) was reported by wholesale firms, virtually all lines of wholesale activity reporting gains. The September employment level in this industry (90·5 per cent of the 1929 average) was above that registered during any of the preceding 19 months. Employment in retail trade also advanced seasonally, following the usual summer recession, the gain of 5·5 per cent indicating 178,000 additional workers employed in September. General merchandise stores reported a gain of 10·8 per cent, while reports from other retail establishments showed a gain of 4·0 per cent. In the group of business and personal service industries, employment conformed generally to expected seasonal trends, with the exception of brokerage. In brokerage houses, increased activity in Sep-

tember resulted in an employment gain of 6·1 per cent.

Employment in Private Construction.—Private building construction contractors reported a gain of 0·6 per cent in numbers of workers and reports from the Interstate Commerce Commission showed 14,000 more employees on Class I steam railroads in September than in the preceding months.

Employment on Public Works.—Employment on work relief projects operated by the Work Projects Administration continued to decline in September. The 1,720,000 at work represents a reduction of 115,000 since August and 1,400,000 since September 1938. Wage payments of $95,000,000 were $12,840,000 less than in August and $69,507,000 less than in September a year ago. Employment also declined on Federal projects under the Work Projects Administration.

Work projects of the National Youth Administration reported increased employment and the Student Aid program, after being inactive for two months, employed 40,000 students during September.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if their were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages Scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

> "All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;
>
> The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to

works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreement with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, rapair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the pay-

ment of higher rates in any instance where such higher rates are fixed by provincial legislation."

DEPARTMENT OF AGRICULTURE

Construction of an addition to the Advanced Registry Pig Testing Station at Edmonton, Alta. Name of contractors, Poole Construction Co., Edmonton, Alberta. Date of contract, October 23, 1939. Amount of contract, $9,125. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 90
Cement finishers	0 60
Cement and concrete mixer operator:	
Steam	0 70
Gasoline or electric	0 55
Driver, horse and cart	0 60
Driver, team and wagon	0 75
Drivers	0 45
Electricians (inside wiremen)	0 85
Labourers	0 45
Motor truck drivers	0 50
Motor truck driver and truck	1 50
Painters (spray)	0 85
Painters and glaziers	0 75
Plumbers and steamfitters	1 05
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen	0 50
Roofers, composition	0 55
Roofers, felt and gravel—patent	0 50
Sheet metal workers	0 90
Pipelayers, caulkers and solderers	0 56
Road grader operator:	
Horse-drawn	0 50
Including team	0 80
Gasoline	0 60
Tractor operators	0 67½
Watchman	0 40

NATIONAL HARBOURS BOARD

Construction of a bait freezing and storage plant, Halifax Harbour, N.S. Name of contractors, McDonald Construction Co., Ltd., and James P. Vaughan, Halifax, N.S. Date of contract, October 13, 1939. Amount of contract, $151,375. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 45
Carpenters and joiners	0 70
Cement finishers:	
Walls	0 80
Floors	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 85
Engineers on steel erection	0 75
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Engineers, crane (steam, gasoline or electric)	0 70
Firemen, stationary	0 45
Hoist operators—tower (gasoline or electric)	0 50
Insulation worker (cork)	0 60
Labourers	0 40
Machinists	0 70
Machinists' helpers	0 45
Motor truck drivers	0 45
Motor truck drivers and trucks	1 45
Painters (spray)	0 65
Painters and glaziers	0 60
Pipefitters—surface (temporary work)	0 55
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 85
Pumpmen	0 50
Riggers (general)	0 50
Roofers:	
Composition	0 50
Felt and gravel—patent	0 45
Rodmen, re-inforcing steel	0 50
Sheet metal workers	0 70
Structural steel workers	0 75
Tractor operators	0 50
Watchmen	0 35
Welders and burners:	
Acetylene or electric	0 70
On steel erection	0 75

Construction of a water supply system at Pier 9 extension, Halifax Harbour, N.S. Name of contractors, McDonald Construction Co., Halifax, N.S. Date of contract, October 17, 1939. Amount of contract, $3,866. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 60
Asphalt tampers	0 45
Blacksmiths	0 70
Blacksmith helpers	0 45
Carpenters	0 70
Cement finisher	0 60
Concrete mixer operator	0 50
Drivers	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Foreman	0 50
Grader operator	0 45
Labourers, ordinary	0 40
Machinists	0 70
Machinists' helpers	0 45
Motor truck drivers	0 45
Motor truck drivers and trucks	1 45
Motor patrol (grader) operator	0 50
Pavers	0 60
Plumbers	0 85
Plumbers' helpers	0 45
Roller operators	0 50
Tractor operators	0 50
Watchmen	0 35
Welders and burners (acetylene and electric)	0 70

Construction of a roadway at Pier 9 extension, Halifax Harbour, N.S. Name of contractors, Standard Paving Maritime Ltd., Halifax, N.S. Date of contract, October 17, 1939. Amount of contract, $12,995. The preceding fair wages schedule was also included in this contract.

Department of Public Works

Construction of a ferry wharf at Albion, Fraser River, B.C. Name of contractors, The Vancouver Pile Driving & Contracting Co., Ltd., Vancouver, B.C. Date of contract, October 10, 1939. Amount of contract, approximately $4,564.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver foreman	$1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45
Watchman	0 45

Construction of a breakwater at Longue Pointe de Mingan, Saguenay Co., P.Q. Name of contractor, Mr. Joseph R. Lemieux, Levis, P.Q. Date of contract, September 25, 1939. Amount of contract, approximately $17,445.80. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Compressor operators (gasoline or electric)	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drill runners	0 45
Engineers operating, steam:	
Single or double drum	0 60
Three or more drums	0 70
Firemen, stationary	0 40
Hoist operators—tower (gasoline or electric)	0 45
Labourers	0 35
Machinists	0 60
Motor boat operators	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Powdermen	0 45
Steam shovel engineers	0 85
Steam shovel firemen	0 55
Steam shovel cranemen	0 65
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Reconstruction of a wharf at Port Hawkesbury, N.S. Name of contractor, Mr. Ralph M. Hall, Halifax, N.S. Date of contract, September 22, 1939. Amount of contract, approximately $15,642. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Drivers	0 35
Driver, horse and cart	0 50
Driver, with team	0 60
Driver, with four horses	0 80
Hoist operators—tower (gasoline or electric)	0 45
Labourers	0 35
Motor truck driver	0 40
Motor truck driver and truck	1 35
Pile driver and derrick foreman	0 70
Pile driver and derrick engineers	0 60
Pile driver and derrick men (rigging, setting and signalling)	0 50
Pile driver and derrick firemen	0 40
Pile driver and derrick labourers	0 40
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of breakwater repairs at North West Cove (Tancook), N.S. Name of contractor, Mr. Ralph M. Hall, Halifax, N.S. Date of contract, September 22, 1939. Amount of contract, approximately $7,975. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Drivers	0 35
Driver horse or ox and cart	0 50
Driver, team or oxen and wagon	0 60
Hoist operators—tower (gasoline or electric)	0 45
Labourers	0 35
Motor boat operators	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of a protection wall at Rock Island, Quebec, P.Q. Name of contractors, Stewart Construction Co., Ltd., Sherbrooke, P.Q. Date of contract, September 22, 1939. Amount of contract, approximately $10,916.44. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	$0 55
Cement and concrete mixer operators:	
Steam	0 60
Gasoline or electric	0 45
Cement finisher	0 50
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Labourers	0 35
Motor truck driver	0 40
Motor truck driver and truck	1 35
Watchman	0 30

Construction of alterations and extension to the second and third floors of the Winch Building, Vancouver, B.C. Name of contractors, Allan & Viner Construction Co., Ltd., Vancouver, B.C. Date of contract, September 27,

1939. Amount of contract, $20,380. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 90
Cement finishers	0 90
Cement and concrete mixer operators:	
Steam	0 90
Gasoline or electric	0 60
Drivers	0 45
Driver, team and wagon	1 00
Electricians (inside wiremen)	1 00
Engineers on steel erection	1 12½
Engineers, operating, steam:	
Single or double drums	0 90
Firemen, stationary	0 50
Hoist operators—tower (gasoline or electric)	0 60
Labourers	0 45
Lathers, metal	1 00
Lathers, wood	0 75
Linoleum layers	0 75
Mastic floor layers	0 85
Mastic floor rubbers and finishers	0 60
Mastic floor kettlemen	0 60
Mastic floor labourers	0 50
Motor truck drivers	0 50
Motor truck driver and truck	1 50
Ornamental iron workers	1 12½
Painters and glaziers	0 80
Plasterers	1 00
Plasterers' helpers (mixing and tempering material)	0 62½
Plumbers and steamfitters	1 00
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Roofers, felt and gravel—patent	0 50
Roofers, sheet metal	1 00
Sheet metal workers	1 00
Structural steel workers	1 12½
Tile setters (ceramic)	1 12½
Tile setters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 45
Waxers and polishers	0 50
Welders and burners on steel erection	1 12½

Construction of an addition and alterations to the public building at Mont Laurier, P.Q. Name of contractors, Messrs. Kelly Brothers, Hawkesbury, Ont. Date of contract, September 28, 1939. Amount of contract, $11,275 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 75
Brick and hollow tile layer's helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 55
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 60
Gasoline or electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Electricians (inside wiremen)	0 60
Engineers, operating, steam:	
Single or double drums	0 60
Three or more drums	0 70
Engineers on steel erection	0 75
Firemen, stationary	0 40
Labourers	0 35
Lathers, metal	0 55
Lathers, wood	0 50
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Ornamental iron workers	0 55
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 60
Roofers, felt and gravel—patent	0 40
Roofers, sheet metal	0 60
Sheet metal workers	0 60
Stonecutters	0 65
Stonemasons	0 75
Stonemasons' helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 75
Tile setters (asphalt tile)	0 75
Tile setters' helpers (all men assigned to help tradesmen)	0 40
Watchman	0 30
Waxers and polishers—floor	0 40
Welders and burners on steel erection	0 75

Construction of wharf repairs and improvements at Quathiaski Cove and Gow's Landing, New Westminster District, B.C. Name of contractors, Victoria Pile Driving Co., Ltd., Victoria, B.C. Date of contract, October 19, 1939. Amount of contract, $3,604.33. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver foreman	$1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45

Construction of an extension to the wharf at Boischatel, Montmorency Co., P.Q. Name of contractor, Mr. George A. Murphy, Lauzon, P.Q. Date of contract, September 30, 1939. Amount of contract, approximately $11,851.30. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Compressor operators (gasoline or electric)	0 45
Drivers	0 35
Driver, team and wagon	0 60
Driver, horse and cart	0 50
Drill runners	0 45
Engineers operating steam:	
Single or double drums	0 60
Three or more drums	0 70
Firemen, stationary	0 40
Hoist operators (gasoline or electric)	0 45
Labourers	0 35
Motor boat operators	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Powdermen	0 45

	Per hour
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of a wharf at Bentinck Cove, Prince Co., P.E.I. Name of contractors, Messrs. W. Noy, A. Raynor, Wm. Baglole and J. Noy, Ellerslie and Summerside, P.E.I. Date of contract, September 28, 1939. Amount of contract, approximately $5,928.62. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Driver	$0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Engineer, operating, steam:	
Single or double drum	0 60
Three or more drums	0 70
Fireman, stationary	0 40
Labourers	0 35
Hoist operators, tower (gasoline or electric).	0 45
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of a warehouse at Rondeau, Kent Co., Ont. Name of contractors, Sterling Construction Co., Ltd., Windsor, Ont. Date of contract, September 20, 1939. Amount of contract, approximately $7,869. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Brick and hollow tile layers	0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 60
Cement and concrete mixer operators:	
Gasoline or electric	0 45
Drivers	0 35
Driver, team and wagon	0 65
Electricians, inside wiremen	0 65
Engineers, operating, steam:	
Single or double drums	0 65
Engineers on steel erection	0 80
Firemen, stationary	0 40
Hoist operators—tower (gasoline or electric).	0 45
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck	1 45
Painters and glaziers	0 55
Roofers, felt and gravel—patent	0 40
Sheet metal workers	0 65
Structural steel workers	0 80
Watchmen	0 30

Construction of an extension to the breakwater at Little Harbour, Richmond Co., N.S. Name of contractor, Mr. S. W. Hagerty, Monastery, N.S. Date of contract, September 27, 1939. Amount of contract, approximately $9,055. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 55
Blacksmith's helpers	0 40
Boatmen (rowboats)	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drivers	0 35
Fireman, stationary	0 40
Hoist operator—tower (gasoline or electric).	0 45
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchman	0 30

Alterations to toilet rooms in the Old Customs Building, Montreal, P.Q. Name of contractors, R. M. Clark Construction Co., Ltd., Montreal, P.Q. Date of contract, October 10, 1939. Amount of contract, $4,393. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 65
Brick and hollow tile layers	0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Labourers	0 40
Lathers, metal	0 75
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 66
Painters and glaziers	0 66
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 75
Terrazzo layers	0 70
Terrazzo finishers and helpers	0 55
Tile setters (ceramic)	0 90
Tile setters' helpers (all men assigned to help tradesmen)	0 45

Construction of repairs to the breakwater at Tiverton, Digby Co., N.S. Name of contractor, Mr. Thomas N. Kenney, Truro, N.S. Date of contract, October 12, 1939. Amount of contract, approximately $23,005. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40

	Per hour
Boatmen (rowboats)	0 35
Drivers	0 35
Driver, horse or ox and cart	0 50
Driver, team or oxen and wagon	0 60
Hoist operators—tower (gasoline or electric)	0 45
Labourers	0 35
Motor boat operators	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of a public building at Schrieber, Ont. Name of contractor, Mr. M. Cebrario, Schreiber, Ont. Date of contract, September 27, 1939. Amount of contract, $12,350 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 45

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Vegetable Foods, Etc.

LIVERPOOL, N.S.—A YEAST MANUFACTURING ESTABLISHMENT AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 348).

Agreement to be in effect from May 1, 1939, to May 1, 1940, and thereafter from year to year, subject to notice.

The company recognizes the union and agrees that permanent employees who are eligible are expected to be union members and new employees to join the union. Preference in employment to be given union members if available and if efficient.

Hours: 8 per day, 48 per week.

Overtime: time and one half for all work over 8 hours for day workers. Time and one half for all workers for Sunday work from 8 a.m. Sunday morning to 8 a.m. Monday morning, and for the three specified holidays.

Hourly wage rates: for tourmen, 44 cents for first man, 41 cents for second man, 39 cents for third man; packers 44 cents, mixer 38 cents, experienced girls 25 cents, maintenance men 59 cents.

Grievances to be taken up by the plant superintendent with the adjustment committee of the union. If satisfactory settlement not reached, it will be referred to the president of the international union, and later, if necessary, to the board of arbitration whose decision will be final and binding.

Manufacturing: Tobacco and Liquors

LETHBRIDGE, ALBERTA.—A CERTAIN BREWERY AND THE UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, LOCAL 354.

Agreement to be in effect from April 1, 1939, to March 31, 1941.

The terms of this agreement are similar to the agreement for breweries in Edmonton, which was summarized in the LABOUR GAZETTE, August, page 848, with certain exceptions:

Although double time is provided for any work done on the seven legal holidays, the Lethbridge agreement does not provide for pay on these days if no work is done.

Wages: the wage scales are similar except that in Lethbridge, general mechanics are paid 75 cents per hour, mechanics' and pipe fitters' helpers 65½ cents, wrapper men 68¾ to 75 cents, labourers 67½ to 68¾ cents.

One apprentice allowed to each department.

Vacation: one week's vacation is provided for, but it is specified that for such vacation the pay for all union employees on hourly rates will be 62½ cents per hour for 44 hours. "This does not apply to monthly men who receive their usual yearly holiday."

Manufacturing: Pulp, Paper and Paper Products

THOROLD, ONTARIO.—THE BEAVER WOOD FIBRE COMPANY LIMITED AND THE BEAVER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPERMAKERS (LOCAL 192) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 228).

The agreement covers the manufacture of beaverboard, pulpboard and newsprint, etc.

This agreement, which came into effect May 1, 1938, to remain in effect to May 1, 1939, and thereafter from year to year subject to notice, was amended to provide for a new scale from May 1, 1939, to July 1, 1939, and this wage scale was again renewed June 26, 1939, to continue to May 1, 1940. The last renewal provided that if additional newsprint tonnage is secured the

question of a wage increase will then be open for discussion.

Permanent employees paid on an hourly basis are to be union members. When available, union men to be employed, but any others employed are to join the union.

Hours: 8 per day, 48 per week.

Overtime: day workers requested to remain after regular hours to be paid time and one half; day workers called after regular working hours to go on duty for other than repair work to be paid time and one half for all overtime with not less than four hours' pay; any employee called back for emergency repair work to receive at least four hours' pay, and if required to work more than four hours to receive time and one half from the time he started work. Time and one half for work between 8 a.m. Sunday and 8 a.m. Monday and for work on three specified holidays. A tour worker to continue work at end of tour if the next tour worker has not come to relieve him. Tour workers required to work overtime at other than tour work to be paid time and one half. Tour workers engaged in putting on wires at a time other than their regular shift to receive six hours' pay for such work, and while working on repair work to receive time and one half after 8 hours.

Seniority to be considered in laying off men and in making promotions.

Grievances which cannot be settled by the local union with the superintendent or local manager will be referred to an executive of the company and an international officer of the union, and later, if necessary, to a board of arbitration whose decision will be final and binding.

Certain hourly wage rates in effect from May 1, 1939 in Beaver Wood Fibre Company Limited: wood room—sawmen 50 cents, labourers 46 cents; grinder room—grindermen, woodhandlers 56 cents, bull screen operator 51 cents; lapping—wet machine operator 49 cents, wet machine cleaner 46 cents; board mill beaters—beatermen 68 cents, furnishers 48 cents, cleaners 46 cents; board machines—machine tenders 92 cents, back tenders 72 cents, third hands 65 cents, fourth hands 54 cents, fifth hands 50 cents, brokemen, screenmen, spare hand 48 cents, feltman 51 cents, cleaner 46 cents; stock room runners 65 cents; news machine—machine tenders $1.24, back tenders $1.07, third hands 83 cents, fourth hands 65 cents, fifth hands 62 cents, oilers 51 cents; steam power—engineers 68 cents, firemen (2nd class papers) 71 cents, assistant firemen 55 cents, firemen 63 cents, coal labourers 47 cents; electrical power—operators 71 cents, electricians 82 cents, maintenance 71 cents, helpers 51 cents; truck driver 67 cents; switch engine—engineer 63 cents, switchmen 51 cents; sizemen 58 cents; general—oilers 51 cents, elevator operators 46 cents, storekeepers 54 to 62 cents; finishing roll stock labourers 48 cents; finishing sheet stock labourers 48 cents; shipping board mill—foreman 57 cents, labourer 48 cents; finishing newsprint—head finisher 71 cents, cores and heads 58 cents, finishers 53 cents; shipping newsprint—weighers 59 cents, shippers 53 cents; mechanical department—head millwright 78 cents, millwrights 71 cents, second millwrights 64 cents, head machinists 78 cents, machinists 71 cents, machinist helper 58 cents; pipefitter, bricklayer, blacksmith, carpenter, 71 cents, painter 56 cents, machinist's helper and pipefitters' helper 58 cents, labourers 46 cents.

Certain hourly wage rates for Beaver Company Limited: machinists (hand) 49 to 67 cents, sizing 49 cents, reclaim men 49 cents, small sizes 49 to 51 cents; bundlers 49 cents; shippers 49 and 54 cents; sweepers 49 cents; varnish makers 56 cents, silicate mixer 54 cents.

Manufacturing: Printing and Publishing

Montreal, Quebec.—Certain Commercial Printing Shops and the International Stereotypers and Electrotypers Union, Local 33.

Agreement to be in effect from January 1, 1940, to December 31, 1941, but either party may open the agreement after one year.

Union members to be employed, if competent. No member of the union will work for less than the hourly rate provided in this agreement.

Hours: 8 per day, 5 days a week, a 40 hour week. From January 1, 1940, to June 30, 1940, members may, however, be employed on Saturday morning at straight time rates.

Overtime: double time for work after the first three hours overtime and for all work on Sundays and statutory holidays. From July 1, 1940, work on Saturday morning to be paid at time and one half, and from that date, work on Saturday afternoon to be paid at time and one half for first three hours and double time thereafter.

Minimum wage rate for journeymen stereotypers and electrotypers: $40 per week of 40 hours.

Not more than one apprentice may be employed in each department, one in moulding, one in stereotyping and one in the finishing department. Apprentices to serve six years.

Wages for apprentices to be from $12 per week during first year to $32 during sixth year.

All disputes which cannot be settled between the parties to the agreement will be referred to a chairman mutually agreed on and his decision will be final and binding.

Manufacturing: Metal Products

Toronto, Ontario.—A Certain Manufacturer of Sheet Metal and Enamelware Products and their Employees who are Members of Lodge 1111 of the Steel Workers Organizing Committee.

Agreement reached following strike which is reported on page 1098 of this issue. Agreement to be in effect from November 2, 1939, to December 31, 1940, and thereafter from year to year subject to notice.

The company agrees to recognize a negotiating committee of seven employees as representing the union members in matters pertaining to hours of work, rates of pay, general working conditions or terms or conditions of employment. No discrimination or intimidation to be shown by the Company or the employees on account of union activity or union membership.

Hours: on shift work in the enamel department, 8 per shift, 5 shifts per week, a 40 hour week, except for the day shift for whom hours are 8 per day from Mondays to Fridays, 4½ on Saturdays, a 44½ hour week. A week's work for the night shift in the plant to be 9½ hours per night for four nights and 10 hours for one night, a 48 hour week. Elsewhere in the plant, hours to be 8¾ per day from Monday to Friday inclusive, 4¼ on Saturday morning, a 48 hour week.

Overtime: time and one half for first four hours, double time thereafter, with 30 minutes for lunch period allowed. Time and one half for all work on Sundays or eight specified holidays. Overtime to be evenly distributed among all those normally performing that work.

Wages: wages of all day workers to be increased from November 3, 1939, by 5 cents per hour over the previous rates; the rates of pay of all piece workers to be increased on the same date by 7½ per cent over the previous rates. Any alleged unfairness or inequalities in wage payments for similar or comparable work to be dealt with by the grievance procedure. If at June 1, 1940, the cost of living has increased more than 5 per cent over the cost of living at the time the agreement was made, the Company will grant a further increase to the extent of such excess over 5 per cent. If unable to agree as to such increase it will be referred to arbitration as noted below.

Seniority to prevail in lay-off, re-hiring and promotion, subject to special qualifications.

Meetings between representatives of the company and of the negotiating committee to be held regularly once a month, and at other times if necessary. Any grievance of an individual worker or a number of employees to be taken up first with the department foreman, and later, if no settlement reached, by the negotiating committee with the superintendent of the division concerned; then with the plant manger, the general manager, and then if a satisfactory settlement is not yet reached, with the president of the company. If the dispute is not then settled, it will be referred to a representative of the president or general manager of the company and a representative of the negotiating committee. If these two cannot reach a decision they shall refer it to arbitration by a third person mutually upon by these two.

NORTH VANCOUVER, B.C.—A SHIPBUILDING AND REPAIR COMPANY AND THE AMALGAMATED BUILDING WORKERS OF CANADA, ELECTRICAL WORKERS' SHIPYARD SECTION OF VANCOUVER (ELECTRICAL WORKERS).

See below under "Construction: Shipbuilding."

VICTORIA, B.C.—TWO SHIPBUILDING AND SHIP REPAIRING FIRMS AND CERTAIN OF THEIR EMPLOYEES (SHIPBUILDERS, BOILERMAKERS, ETC.).

See below under "Construction: Shipbuilding."

Construction: Buildings and Structures

REGINA, SASK.—REGINA BUILDERS' EXCHANGE AND THE BRICKLAYERS, MASONS AND PLASTERERS' INTERNATIONAL UNION, LOCAL NO. 1, SASKATCHEWAN (BRICKLAYERS AND MASONS).

Agreement to be in effect from March 1, 1939, to March 1, 1940.

This agreement is similar to those previously in effect and summarized in the LABOUR GAZETTE, August, 1938, page 942, November, 1937, page 1270 and July, 1935, page 693.

Wages per hour for journeymen bricklayers and stonemasons continue at $1.10 per hour, with a 44 hour week.

Construction: Shipbuilding

NORTH VANCOUVER, B.C.—A SHIPBUILDING AND REPAIR COMPANY AND THE AMALGAMATED BUILDING WORKERS OF CANADA, ELECTRICAL WORKERS' SHIPYARD SECTION OF VANCOUVER (ELECTRICAL WORKERS).

Agreement to be in effect from August 3, 1939, to August 2, 1940, and thereafter from year to year, subject to notice.

Only union members to be employed.

Hours: 8 per day, 44 per week for day shift, 40 hours for second and third shifts. The second shift to be between 4.50 p.m. and 12.30 a.m. with 20 minutes for lunch, for which 8 hours' pay allowed; third shift from 12.30 a.m. to 8 a.m., with 20 minutes for lunch, for which 9 hours' pay will be allowed.

Overtime: work on Sundays and holidays, double time.

Wages: for journeymen electrical workers, $1 per hour; first year helpers 45 cents; experienced helpers 62½ cents.

Apprentices to be governed by the legislation of the provincial government.

VICTORIA, B.C.—TWO SHIPBUILDING AND SHIP REPAIRING FIRMS AND CERTAIN OF THEIR EMPLOYEES (SHIPBUILDERS, BOILERMAKERS, ETC.).

Agreements to be in effect from October 16, 1939, to March 31, 1940, and thereafter subject to 30 days' notice.

No discrimination against any member of the union. (These employees are members of the Boilermakers and Iron Shipbuilders of Canada, No. 2.) Preference in employment to be given residents of Victoria and vicinity, and to a list submitted by a committee representing the employees of the firm concerned. No member who is on this list may work for other firms except under the conditions of this agreement.

Hours: 8 per day, 4 on Saturdays, a 44 hour week for day shift. When second shift necessary, it will be from 4.30 p.m. to 12.30 a.m. with 30 minutes for lunch, for which 8 hours' pay allowed. When there are three shifts, the third shift to be from 12.30 a.m. to 8 a.m. with 30 minutes for lunch, for which 8 hours' pay allowed. For second and third shifts, 40 hours to be a week's work, except in the case of a second shift employed on emergency war work, in which case 44 hours may be worked.

Overtime: time and one half for first four hours and double time thereafter. Double time for all work on Sundays and eight specified holidays.

Wages: mechanics, anglesmiths, boilermakers, chippers, caulkers, rivetters, shipfitters, welders, burners, drillers and tappers, 90 cents per hour, $7.20 per day; punch and shearmen and holders on, 76 cents per hour, $6.08 per day; passer boys 45 cents per hour, $3.60 per day; reamers and countersinkers 70 cents per hour, $5.60 per day; heaters 68 cents per hour, $5.44 per day; drilling out rivets 75 cents per hour, $6 per day; iron workers' helpers and blacksmiths' helpers, 67 cents per hour, $5.36 per day. Time and one quarter to be paid for dirty work and work in confined spaces.

Employees called in to work to receive at least four hours' pay.

When employees are required to work at outside points, they shall be paid travelling time and first class board and room at the field scale of $7.20 per day for mechanics and $6.20 for helpers.

Transportation and Public Utilities: Telegraphs and Telephones

Province of Alberta (Except Edmonton).—Schedule of Wages and Hours Governing Electrical Workers, Employees of Alberta Government Telephones.

Regulations and wage schedule to be in effect from April 1, 1939, to March 31, 1940, and thereafter from year to year, subject to notice.

(Electrical workers employed by the Telephone Department of the City of Edmonton are included in the civic agreement, as noted in the Labour Gazette, May, 1939, page 526.)

"No discrimination against employees on account of affiliation or relations they may, or may not have, will be permitted."

Hours: 8 per day for five days, a 40 hour week except floating gang employees for whom hours are 44 a week. When necessary to work shift work, any eight consecutive hours, except intermission for meals, to constitute a day, and such shift hours, if permanent, may include Saturday afternoons, Sundays and holidays. Except city employees at Calgary, Lethbridge and Medicine Hat, employees may be called to work on Saturday, when straight time will be paid as part of the 40 hour week terminating at 5 p.m. Saturday. City employees at Calgary, Lethbridge and Medicine Hat who are not on shift duty, if called to work on Saturday between 8 a.m. and 5 p.m. will be paid half time overtime in addition to the equivalent number of hours off duty during that or the following week.

Overtime for all employees except floating gangs shall be based on 173⅓ hours divided into the monthly salary of the employee. Overtime for floating gangs to be paid at $1.04 per hour for foremen (with merit), $1.01 for foremen (without merit), 90 cents per hour for linemen (with merit), 87 cents per hour for linemen (without merit). Overtime to be paid at time and one half except between hours of 10 p.m. and 8 a.m., when double time will be paid. Overtime to district inspectors will be paid only in cases of extraordinary disturbance caused by storms, fires, floods or accidents. Employees on regular holiday shift duty on one of the eight specified holidays will be granted equivalent time off during the same or the next week; and in addition will be paid overtime pay on the basis of half time. Overtime will be paid for holidays, in cases of emergency. No deduction in pay to be made for any legal holiday not worked.

Wages per month: foremen $175, foremen of repairshop $166.50, wire chiefs $161.50 and $175, district plant inspectors $153, plant inspectors $151.50, switchboardmen (travelling) $153, subforemen (exchange) $160, chief installer $160; switch foremen $166.50, $170 and $185; cable splicers $161.50; troublemen and switchboardmen $151.50; switchmen (automatic) $156.50, linemen (exchange) $151.50, repair shopmen $151.50, rackmen $142.50, repeatermen $156.50, installers $151.50; foremen of floating gang $142.50 and board and lodging; sub-foremen of floating gang $125 and board and lodging; linemen $115 and board and lodging. After three years' service in any grade above apprentice, a merit rate of $5 per month shall be allowed.

Wages per month for apprentices: apprentice repair shop men, apprentice linemen, apprentice switchboardmen, apprentice troublemen, apprentice plant inspectors, from $52 during first six months to $130 during fourth year; apprentice linemen in floating gang, from $36 and board and lodging during first six months to $100 and board and lodging during fourth year; apprentice cable splicers, from $50 during first six months to $145 during eighth six months; apprentice switchmen, from $52 during first six months to $140 during eighth six months.

Higher salaries than specified in the wage schedule may be paid when warranted by ability or quality of service rendered.

Vacation: one week's vacation with pay to employees who have completed one year's continuous service; two weeks' vacation with pay to employees who have completed two years' continuous service; three weeks' vacation for those with twenty years' service.

Board and lodging to be paid for employees working away from headquarters unless such absence exceeds 14 days when the employee will be advised before leaving his headquarters that the job will not be considered a temporary job for which board and lodging is allowed. Transportation to be furnished or allowed employees where considered necessary. When a married man is moved from one headquarters to another, he shall receive transportation for himself, his family and household effects.

The Department to receive complaints from any employee or committee of employees at any time.

Service: Recreational

Guelph, Ontario.—Two Theatres and the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators, Local 357.

Agreements to be in effect from September 6, 1937, to August 31, 1940.

Only union members to be employed, the union to furnish competent workers.

Hours: from 2 p.m. to 5 p.m., and from 7 p.m. to 11 p.m. Two projectionists to be paid.

Overtime: all time after 11 p.m. (except where 15 minutes is required to finish the show) to be paid at $1 per hour. Midnight shows at $5 per show per man.

Wages per week: In one theatre, first projectionist to be paid $36.40 during first year, $37.49 during second year and $38.62 during third year; second projectionist to be paid $31.20 during first year, $32.14 during second year, $33.10 during third year. In the other theatre, both projectionists to be paid $39.52 during first year, $40.70 during second year, $41.93 during third year. All extra men required to work road shows to be paid $3.50 per man per show and both regular employees and extra men to be paid 75 cents per hour to take in and put out show.

Galt, Ontario.—Three Theatres and the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators, Local 357.

One agreement is in effect from September 6, 1937, to August 31, 1940, another from December 19, 1938, to August 31, 1941 and the third from September 1, 1939, to September 1, 1940.

Only union members to be employed, the union to furnish competent workers.

Hours: from 2 p.m. to 5 p.m. and from 7 p.m. to 11 p.m.

Overtime: $1 per hour. In two theatres, extra shows to be paid at $3 per show; in the third theatre $5 for each man for midnight shows.

Wages per week for projectionists: in one theatre, $38.62; in another theatre, $36.40 during first year, $37.49 second year and $38.62 third year; in the third theatre, $37.50 first year, $38.62 second year and $39.77 third year. All extra men required to work road shows to be paid $3.50 per man per show and both regular employees and extra men to be paid 75 cents per hour for taking in and putting out show.

KITCHENER, ONTARIO.—THREE THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, LOCAL 357.

Agreements to be in effect from September 6, 1937, to August 31, 1940.

Only union members to be employed, the union to furnish competent workers.

Hours: in two theatres, when there is continuous showing of pictures, hours are from 1.30 p.m. to 11.30 p.m. and when only three shows per day, hours to be from 2 p.m. to 5 p.m. and from 7 p.m. to 11 p.m.; in the third theatre, for continuous running of pictures, hours to be from 1 p.m. to not later than 12 p.m.

Overtime: in two theatres, overtime for projectionists, $1 per hour; in the third theatre, 75 cents per hour. For extra shows, $5 per show per man to be paid in one theatre, $2.50 in the third theatre.

Wages per week for projectionists: in two theatres, where there is continuous showing of pictures, from 1.30 p.m. to 11.30 p.m., three projectionists to be employed, of whom two to be paid $39 first year, $40.18 second year and $41.38 third year and the third projectionist to be paid $33.80 first year, $34.81 second year and $35.85 third year. In these same theatres when the showings are from 2 p.m. to 5 p.m. and from 7 p.m. to 11 p.m. weekly wages are $39 first year, $40.18 second year and $41.38 third year. In the third theatre with continuous running of pictures from 1 p.m. to 12 p.m. two projectionists and one apprentice to be employed; the first projectionist to be paid $32.50 first year, $33.50 second year and $33.50 third year; the second projectionist to be paid $29 first year, $30 second and third years.

STRATFORD, ONTARIO.—TWO THEATRES AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, LOCAL 357.

Agreements to be in effect from September 6, 1937, to August 31, 1940.

Only union members to be employed, the union to furnish competent workers.

Overtime: $1 per hour; in one theatre, extra shows to be paid at $5 per man per show; in the other theatre at $3 per man per show.

Wages per week for three shows per day (matinée and two evening shows): at one theatre, projectionist to be paid $38.48 first year, $39.65 second year, $40.82 third year; in the other theatre, first projectionist to be paid $36.40 first year, $37.49 second year, $38.61 third year, second projectionist to be paid $28.60 first year, $29.46 second year, $30.34 third year.

Collective Labour Agreements Act, Quebec

The following amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Sash, Door, Wrought Wood and Casket Manufacturing, Jonquière and Kenogami (amendment).

Building Trades, Sherbrooke and Eastern Townships (amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

ONTARIO

Loggers, Timmins-Cochrane zone.

Jewellery Manufacturing Industry, Toronto.

Coal Handlers and Drivers, Toronto.

SASKATCHEWAN

Carpenters, Regina (cancellation and correction).

Barbers, Swift Current (amendment).

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the LABOUR GAZETTE, page 503. Amendments to the Act are noted in the LABOUR GAZETTE, June, 1939, page 576. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all em-

ployers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issue beginning May, 1938.

Recent proceedings under the Act include the amendment of two agreements, as summarized below. In addition, Orders in Council were published in the *Quebec Official Gazette,* October, 7, approving the amendment of the constitution and by-laws of two joint committees, and authorizing the levying of assessments by another joint committee, as listed below.

Manufacturing: Miscellaneous Wood Products

Sash, Door, Wrought Wood and Casket Manufacturing, Jonquière and Kenogami.—An Order in Council, approved September 29, and published in the *Quebec Official Gazette,* October 7, amends the original Order in Council for this industry (Labour Gazette, July, 1939, page 728) by providing that it be enforced by the Joint Committee of Industry and Commerce of the Lake St. John District.

Construction: Buildings and Structures

Building Trades, Sherbrooke and Eastern Townships.—An Order in Council, approved September 29, and published in the *Quebec Official Gazette,* October 7, amends the previous Orders in Council for these trades (Labour Gazette, June, 1938, page 693, October, page 1173, November, page 1299 and July, 1939, page 729) by providing that in the town of Magog, wages for journeymen carpenter-joiners be 55 cents per hour, journeymen painters 40 cents and painter contractors (personal services) 50 cents.

Joint Committees

Amendments to the constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the *Quebec Official Gazette,* October 7:

Fur Manufacturing Industry, Quebec (amendment).

Building trades, Sherbrooke and Eastern Townships (amendment).

Notice was published in the *Quebec Official Gazette,* October 7, that authorization was given by Order in Council for the joint committee to levy assessments on employers and employees, parties to the following agreement:

Barbers and hairdressers, St. Hyacinthe.

Home Improvement Loans

Home Improvement loans reported to the Department of Finance in October numbering 3,519 and aggregating $1,360,907.73 are shown in a statement released recently by the Honourable J. L. Ralston, Minister of Finance. These figures, which compare favourably with the same month last year, bring the aggregate volume of Home Improvement loans to above $37,000,000 and the number of loans to over 91,300 since November 1, 1936, the date on which the plan was put into operation, and October 31, 1939.

During the month of October there were 6,241 accidents reported to the Ontario Workmen's Compensation Board, as compared with 5,395 during September, and 5,008 during October a year ago. Benefits awarded amounted to $478,542.11, of which $395,620.61 was for compensation and $82,921.50 for medical aid.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Saskatchewan

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the Labour Gazette, as follows: Ontario, in the issues of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, May, 1938, page 501, and June, 1939, page 574; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, June, 1938, page 633, and June, 1939, page 567; Nova Scotia, in June, 1936, page 604, and July, 1939, page 671; Saskatchewan, in the issue of June, 1937, page 635, May, 1938, page 507, and June, 1939, page 581. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Similar legislation is in effect in Part II of the Fair Wage Act of Manitoba for certain industries (Labour Gazette, May, 1938, page 499, and June, 1939, page 570) and in the Industrial Standards Act of New Brunswick, 1939 (for the construction industry), in effect since August 10. Up to the end of October, however, no schedules had yet been made obligatory in these two provinces.

Ontario

Logging

Loggers, Timmins-Cochrane Zone.—An Order in Council, dated September 29, and published in *The Ontario Gazette,* October 7, makes binding the terms of a schedule of wages and hours for the logging industry in the Timmins-Cochrane zone, from June 1, 1939, to June 1, 1940.

This schedule is similar to the one previously in effect in the Timmins zone, as summarized in the Labour Gazette, August, 1938, page 948, and May, 1938, page 579, with the exception of some changes in the piece work scale, the monthly and daily rates for those not on piece work being unchanged.

Manufacturing: Miscellaneous Products

Jewellery Manufacturing Industry, Toronto.—An Order in Council, dated September 29, and published in *The Ontario Gazette,* October 7, makes binding the terms of a schedule of wages and hours in the jewellery manufacturing industry in the city of Toronto and adjacent suburban area.

The Order in Council is to be in effect from October 17, 1939 to August 31, 1940, and is similar to the one previously in effect and summarized in the Labour Gazette, September, 1938, page 1047, with these exceptions:

Hours are 8 per day, 4 on Saturdays, a 44 hour week throughout the year.

Overtime: no work on Sundays nor on seven specified holidays.

No change is made in the minimum wage rates for time workers and for apprentices, but additions have been made to the classes of workers comprising the piece work schedule.

Trade

Coal Handlers and Drivers, Toronto.—An Order in Council, dated October 20, and published in *The Ontario Gazette,* October 28, makes binding the terms of a schedule of wages and hours in the coal industry in the city of Toronto and neighbouring municipalities.

The schedule is to be in effect from October 7, 1939, "during pleasure", replacing the previous schedule which was summarized in the Labour Gazette, May, 1938, page 581.

The coal industry is defined as all work usually performed in connection with the storage, warehousing, transfer and delivery of all kinds of coal and coke.

Work on Sundays, on seven specified holidays (except when unloading boats and except in

emergency deliveries authorized by the police licence bureau) to be paid at time and one half. Minimum hourly wage rates: boat trimmers, stackers on conveyors, truck drivers and teamsters, 55 cents; yard men 50 cents; truck drivers' helpers 45 cents. (These are increases of 5 cents per hour over the rates of the previous schedule).

Employers are permitted to engage truck drivers on a tonnage basis for the delivery of coal or coke in bags, and for those so employed tonnage rates are specified for the hauling of coal from the docks and from retail yards, which rates are also higher than in the previous schedule. (In the previous schedule tonnage rates were also given for the engagement of trucks and drivers but these are omitted from the present schedule).

The advisory committee may fix a lower minimum rate of wages for any handicapped employee or any employee whose work is only partly subject to this schedule or one whose work is included in more than one classification of employees.

Saskatchewan

Construction: Buildings and Structures

Carpenters, Regina.—An Order in Council, approved September 7, and published in *The Saskatchewan Gazette,* September 30, cancels the 1938 schedule (Labour Gazette, August, 1938, page 948) from the date the new schedule came into effect (Labour Gazette, October, 1939, page 1069).

Another Order in Council, approved October 12, and published in *The Saskatchewan Gazette,* October 30, corrects the previous Order in Council (Labour Gazette, October, 1939, page 1069) by a change in wording which does not alter the summary as given in the Labour Gazette.

Service: Business and Personal

Barbers, Swift Current.—An Order in Council, approved October 2, and published in *The Saskatchewan Gazette,* October 16, amends the previous Order in Council for this trade (Labour Gazette, February, 1939, page 220) by increasing the minimum prices for certain services.

I.L.O. Exhibit at the New York World's Fair

Of interest to labour and industry is the exhibit of the International Labour Organization at the New York World's Fair, depicting what the organization is doing to establish adequate standards of work and living for the wage earners of its member countries.

The central feature of the exhibit is a brightly coloured, illuminated map. Blue, yellow, red, green, and orange lights, flashing continuously, inform the visitor that the member countries have ratified certain conventions. An illuminated key at the bottom of the map explains the significance of the lights in connection with the nature of the conventions.

A bit of the Old World atmosphere is found in the large photographic murals tinted in pastel shades, which were made in Geneva, and sent to the United States especially for the exhibit. Also made in Geneva, and of especial interest to many of the visitors to the exhibit, are colourful wooden statistical charts, showing for the member as well as non-member countries the cost of living, status of employment, the value of industrial products, and amount of exports and imports.

A history of the organization, as well as its aims and functions, is portrayed by ecru panels. Included in the exhibit is a mechanical book with moving leaves giving an illustrated story of the International Labour Organization and a glass display case which contains the collection of specially surcharged stamps that were issued by the Swiss Government for the International Labour Organization.

A representative of the International Labour Organization is on duty at the exhibit to supply visitors with information concerning the International Labour Organization.

Cost-of-Living Survey in New York State

The Industrial Commissioner of New York State, Miss Frieda S. Miller, announced recently that the New York Department of Labour was preparing to make its annual survey to measure the cost of living of working women in New York State.

According to the announcement, twenty-one towns and cities are to be visited, six more than in 1938. The addition of these six communities, which have populations ranging from 5,300 to 15,000 is to provide figures on the cost of living in small communities.

It was pointed out by Miss Miller that these cost of living studies are made in compliance with the New York Minimum Wage Law. Under this law wage boards consider current costs of living in recommending a minimum wage for women workers in an industry.

In 1938 the survey disclosed that a working woman living as one of a family needed $1,059.68 a year for health and maintenance, while a working woman living alone needed $1,160.75.

PRICES, RETAIL AND WHOLESALE IN CANADA, OCTOBER, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

THE cost per week of a list of staple foods, fuel and ligthing and rent entering into a family budget was considerably higher at the beginning of October than at the beginning of September due to an advance in the cost of foods and fuel, while the Dominion Bureau of Statistics weekly index number of wholesale prices was somewhat higher at the end of October than at the beginning but the increase was much less than in September.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of average retail prices in sixty-nine cities was $8.77 at the beginning of October as compared with $8.07 for September, an advance of slightly less than nine per cent. The cost of this list of foods between February and September, 1939 was at a relatively lower level than had prevailed in the preceding two and one half years. As a result of the advance in the prices of foods after the first month of war the cost at the beginning of October was somewhat higher than in any month since the end of 1937 with the exception of August, 1938, when the cost was $8.81. Comparative figures for the cost of the list at certain other dates are $8.45 for October, 1938; $8.75 for October, 1937; $8.24 for October, 1936; $6.67 for March, 1933 (the low point in recent years); $11.68 for October, 1929; $11.48 for October, 1921; $16.92 for June, 1920 (the post-war peak); and $7.99 for October, 1914. All of the items in the list of twenty-nine foods were higher in cost at the beginning of October than for September except milk, bread, and vinegar which were unchanged. The largest increases were recorded in the cost of meats, butter, eggs, lard, flour, potatoes, beans, coffee and tea. Including the cost of fuel and rent with that of foods the total cost was $17.69 at the beginning of October as compared with $16.93 for September; $17.35 for October, 1938; $17.51 for October, 1937; $16.87 for October, 1936; $15.41 for June, 1933 (the low point in recent years); $21.96 for October, 1929; $22.01 for October, 1921, $26.92 for July, 1920 (the post-war peak); and $14.48 for October, 1914. In fuel considerable advance was recorded in the price of United States anthracite coal with less important increases in bituminous coal and wood. Rent was practically unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number at the end of October was about 1·4 per cent higher than at the end of September and about 8·5 per cent higher than at the beginning of September. Comparative figures are 79·0 for the week ended October 27; 77·9 for the week ended September 29 and 72·8 for the week ended September 1. The latest figures available on a monthly basis are for September when the index number was 78·2 as compared with 74·1 for October, 1938; 84·7 for October, 1937; 77·1 for October, 1936; 63·5 for February, 1933 (the low point in recent years); 96·8 for October, 1929; 99·6 for October, 1921; 164·3 for May, 1920 (the post-war peak); and 66·8 for October, 1914. Among the commodities to advance in price were raw wool, raw silk, lumber, pulp, steel sheets, coal, live stock, hides, leather and eggs. Of the eight principal groups in the classification according to chief component materials Vegetable Products was the only one to record a decline in the month under review while the others advanced the largest increases being in the Fibres, Textiles and Textile Products Group and in the Wood Products Group.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of October of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unem-

(Continued on page 1194)

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA) OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in Other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended October 27, 1939; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(*Continued from page 1186*)

ployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of food tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expendi-

ture for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

†No statistics as to prices of clothing for October; information available indicates a slight average increase.

Retail Prices

Meat prices averaged considerably higher at the beginning of October than one month earlier. Sirloin steak was up from 27·7 cents per pound to 29·9 cents; rib roast of beef from 20·4 cents per pound to 22·1 cents; mutton from 22·6 cents per pound to 24·6 cents; fresh pork from 23·5 cents to 24·5 cents; and breakfast bacon from 33·1 cents to 35·9 cents. Lard averaged more than 2 cents per pound higher than for September but was still lower than in 1938. The average price was 13·3 cents per pound at October 1 as compared with 11·2 at September 1 and 14·9 cents for October, 1938. Egg prices generally were substantially higher the Dominion average price for fresh grades being up from 32·8 cents per dozen to 38 cents. The price at October 1, 1938 was 39·7 cents per dozen. Milk was unchanged at an average price of 10·8 cents per quart. The price of creamery butter advanced more than 5 cents per pound, to the lighest level reached this year but it was lower than the price prevailing for the first five months of 1938. The prices are 31·9 cents per pound on October 1 as compared with 26·2 cents September 1 and 39·7 cents at April 1, 1938. Bread averaged 6·5 cents per pound the same as in the previous month. The price of flour was up in the average from 2·9 cents in September to 3·5 cents in October. Canned vegetables averaged somewhat higher tomatoes being up from 10·6 cents per tin to 11·3 cents. Beans were generally higher the Dominion average price being up from 5·1 cents per pound to 6·4 cents. Potatoes advanced in price from $1.51 per 100 pounds to $1.73. Prices were above the Dominion average in Ontario and Alberta but were somewhat below it in other provinces. Granulated sugar averaged 6·8 cents per pound at October 1 as compared with 6·6 cents the previous month. The price of coffee averaged about 6 cents per

pound higher at 40·2 cents per pound while tea was up from 58·3 cents to 60·8 cents. United States anthracite coal averaged about 50 cents per ton higher being $14.57 per ton at the beginning of October. Coke advanced from an average price of $11.77 per ton to $12.03 and hard wood in stove lengths from $11.54 per cord to $11.73.

The following are the prices per ton reported for Welsh coal "cobbles" and "French nut" at the beginning of October; Halifax $15.50; Charlottetown $13.50-$14; Moncton, $16; Saint John $14.50; Quebec $14; Three Rivers $15.50 and $14.50; Sherbrooke $14.75; St. Hyacinthe $15; Thetford Mines $17.25; Montreal $15 and $15.25; Ottawa $16.75; Kingston $16; Peterborough $17.50; Oshawa $15.50; Toronto $15; St. Catharines $15.75; Hamilton $15.50 and $15; Brantford $16.25; Galt $16,-$16.50; St. Thomas $16.50; Cobalt $19; Timmins $19.75; Port Arthur $18; Fort William $18; Winnipeg $20.50.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and certain of the principal industrial and commercial countries appeared in the October issue of the LABOUR GAZETTE.

Since these monthly notes are all compiled from British and foreign sources the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the LABOUR GAZETTE. In the present instance the effects of the present war appear for the first time. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

In most of the continental European countries some measure of control over prices and distribution has been put in force with consequent effects upon prices. In some of these countries the publication of price data has been suspended and in the case of Germany direct information will henceforth be unobtainable although information contained in the official publications of neutral countries and in the press will be noted.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number on the base 1930=100, was 105·2 for September, as compared to 98·1 in each of the preceding three months. This increase of 7·2 per cent for the month was due to increases in each of the eleven sub-groups. The index of prices of food and tobacco rose from 90·4 to 100·7 or 11·4 per cent during the month, there having been increases of 16·9 per cent in the prices of cereals, 10·4 per cent in meat, fish and eggs and 8·4 per cent in other food and tobacco. The index of prices of industrial materials and manufactures rose from 102·2 to 107·4 or 5·1 per cent, the largest increases in its sub-groups being in cotton which increased 21·5 per cent, textiles (other than wool and cotton), 9·9 per cent, and miscellaneous commodities, 9·1 per cent.

COST OF LIVING.—The Ministry of Labour index number, on the base July, 1914=100, was 165 at the begininng of October as compared with 155 a month earlier. The index of food prices increased from 155 to 165 or 8·7 per cent during the month, there having been marked increases in the prices of sugar, fish, eggs, butter and bacon and some increases in the prices of a number of other foods, including beef, mutton, flour, bread and cheese. Retail prices of a number of commodities have been limited by Orders issued during September and the early part of October by the Ministry of Food under Defence Regulations, 1939. Clothing prices rose about 7 per cent, fuel and lighting material about 1 per cent and sundries about 3 per cent. The index of rent was unchanged, the Rent and Mortgage Restriction Acts, having set the maximum permissible rent at the figure in force on September 2, 1939, subject to increases for subsequent structural alterations and improvements and for rate increases where these are paid by the landlord.

United States

WHOLESALE PRICES.—The Bureau of Labor Statistics index number, on the base 1926=100, was 75·0 for August as compared to 75·4 for July. Of the ten groups which make up the index six showed decreases, two were unchanged and two showed increases. With the exception of the farm products group, whose index declined 2·6 per cent, no changes were more than 0·5 per cent. Compared with the corresponding figure for August, 1938, the August index was down 4·0 per cent.

Cost of Living.—The index number of the Industrial Conference Board on the base, 1923=100, was 85·9 for September as compared with 84·5 for August, an increase of 1·7 per cent for the month. During the month all the groups making up this index showed increases which were as follows:—food, 5·2 per cent; fuel and lighting materials, 0·5 per cent; clothing, 0·4 per cent; housing, 0·2 per cent; and sundries, 0·1 per cent. The general index for September, 1939, was exactly the same as that for September, 1938.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1939

THE number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the third quarter of 1939 was 273, there being 111 in July, 84 in August and 78 in September.

The report for the second quarter of 1939, showing 219 fatalities, was given in the Labour Gazette, August, 1939, page 876. In the third quarter of 1938, 286 fatal accidents were recorded (Labour Gazette, November, 1938, page 1316).

The supplementary list of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contains 33 fatalities for the first half of 1939.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, the Board of Transport Commissioners of Canada, and certain other official sources as well as from the correspondents of the Labour Gazette. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the third quarter of 1939 were as follows: agriculture, 51; logging, 22; fishing and trapping, 6; mining, non-ferrous smelting and quarrying, 39; manufacturing, 15; construction, 35; electric light and power, 11; transportation and public utilities, 68; trade, 9; service, 17.

Of the mining accidents, 39 were in "metalliferous mining," 8 in "coal mining," and 5 in "non-metallic mineral mining and quarrying, n.e.s."

Of the accidents in manufacturing, 1 was in "vegetable foods, drink and tobacco" group, 1 in "animal foods," 3 in "saw and planing mill products," 4 in "pulp, paper and paper products," 5 in "iron, steel and products," 1 in "non-metallic mineral products."

In construction there were 13 fatalities in "buildings and structures," 2 in "railway," 15 in "highway and bridge," and 5 in "miscellaneous construction."

In transportation and public utilities there were 29 fatalities in "steam railways," 1 in "street and electric railways," 20 in "water transportation," 3 in "air transportation," 10 in "local and highway transportation," 2 in "storage," and 3 in "telegraphs and telephones."

In trade there were 2 fatalities in "wholesale," and 7 in "retail."

Of the fatalities in service, 10 were in "public administration," 1 in "recreational," 3 in "custom and repair," 2 in "personal, domestic and business," and 1 in "professional establishments."

There was no serious disaster resulting in the loss of a large number of lives during the period under review. Accidents involving the loss of two or more lives were as follows:

On September 11, two engineers and a brakeman were killed in a collision of two trains, near Sprague, Manitoba.

When a freighter crashed into their schooner, in the St. Lawrence River, near Deschaillons, Quebec, a mate, skipper, and cook were drowned on July 22.

A sewage inspector and two labourers were asphyxiated and drowned when overcome with gas in a septic tank, at Galt, Ontario, on July 11.

At St. Canut, Quebec, a farmer and his son were struck by lightning on July 31.

Two river drivers were drowned at Canal Flats, British Columbia, when their boat upset on July 24.

On July 9 two fishermen were drowned off Campbell Cove, Prince Edward Island, when their dory was swamped.

When a dynamite blast misfired, near Jessica, British Columbia, on July 16, two miners lost their lives.

A machine boss and a machine man were killed by a fall of rock in a coal mine at Drumheller, Alberta, on September 13.

Supplementary List of Accidents

A supplementary list of accidents occurring during the first half of 1939 has been compiled containing 33 fatalities, of which 4 were in agriculture, 6 in logging, 1 in fishing and trapping, 5 in mining, non-ferrous smelting and quarrying, 3 in manufacturing, 6 in construction, 1 in electric light and power, 6 in transportation and public utilities, and 1 in service. One of these accidents occurred in February, 3 in March, 2 in April, 12 in May and 15 in June.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 39] DECEMBER, 1939 [NUMBER 12

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

THERE was a substantial, contra-seasonal expansion in industrial activity at the beginning of November, according to returns furnished to the Dominion Bureau of Statistics by 11,914 firms with 1,206,185 employees, as compared with 1,187,269 at October 1. Each of these firms ordinarily employs a minimum of 15 workers. The index, (based on the average for the calendar year 1926, as 100), advanced from 121·7 in the preceding month to 123·6 at the date under review, as compared with 114·6 at November 1, 1938. At that date in recent years of the record, the index was as follows:—1937, 125·2; 1936, 111·0; 1935, 107·7; 1934, 100·2; 1933, 91·3; 1932, 84·7; 1931, 103·0; 1930, 112·9; 1929, 124·6; 1928, 118·9 and 1927, 108·8. Employment was in greater volume at the beginning of November, 1939, than at that date in any other year of the record, except 1937 and 1929.

Since the improvement over October 1 was contrary to the usual seasonal trend from October and November in the last eighteen years, the seasonally-adjusted index showed an important advance, rising from 115·8 in the preceding month to 118·3 at the beginning of November.

Unemployment in Trade Unions.—At the beginning of November, 1939, reports were forwarded to the Department of Labour by 1,951 local trade unions combining a membership of 244,063 persons, 22,039 or a percentage of 9·0 of whom were out of work as contrasted with percentages of 9·1 at the beginning of October and 13·3 at the beginning of November, 1938.

Employment Office Reports.—Reports received from the offices of the Employment Service of Canada during October, 1939, indicated a decline of 10 per cent in the average daily placements effected, when the figures were compared with those recorded during the previous month, but a nominal gain in comparison with October, 1938, the losses in the first instance being chiefly in farming and construction and maintenance and the gains in the second instance in logging, services and in manufacturing, the increases under the latter comparison being practically offset by a substantial loss in construction and maintenance and in farming. Vacancies in October, 1939, numbered 37,157; applications, 73,057, and placements in regular and casual employment, 35,505.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was $17.77 at the beginning of November as compared with $17.69 for October and $16.93 for the beginning of September. The slight increase for November over the level of the previous month was due to the higher cost of foods and fuel. Comparative figures for certain earlier dates are $17.29 for November, 1938; $17.58 for November, 1937; $15.41 for June, 1933 (the low point during recent years); $22.03 for November, 1929; $20.89 for November, 1922; $26.92 for July, 1920 (the post war peak); $14.36 for November, 1914; $14.48 for October, 1914; $14.33 for September, 1914 and $14.41 for August, 1914. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics continued gradually higher week by week during November due in large part to higher prices for grains, raw textiles and livestock. The figures for the index are 80·2 for the week ended December 1, 79·0 for that ended October 27 and 77·9 for the week ended September 29. Comparative figures on a monthly basis are 79·3 for October; 78·2 for September; 72·4 for August; 73·5 for November, 1938; 83·1 for November, 1937; 63·5 for February, 1933 (the low point in recent years); 95·7 for November, 1929; 98·3 for November, 1921; 164·3 for May, 1920 (the post war peak); and 67·2 for November, 1914.

Business Statistics.—The latest statistics available reflecting industrial conditions in Canada are given in the table on page 1200. The index of the physical volume of business for October was at the highest point recorded for any month with the exception of January,

MONTHLY STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA*

(Official statistics except where noted)

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended December 1, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending December 2, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending November 4, October 7, and September 9, 1939; November 5, October 8, and September 10, 1938. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation. (9) Excluding gold.

1929. The increase as compared with September was about six per cent and as compared with October, 1938, about twelve per cent. The increase in the volume of business indicated by the figures for October over the preceding month was due to the greater activity indicated in the manufacturing group resulting from gains in leading manufacturing industries notably foodstuffs, tobacco, rubber, newsprint, lumber, iron and steel, automobiles and petroleum. The other principal groups recorded decline in the same comparison including mineral production, construction, electric power output, and distribution. In the mineral production group the decline was substantial due in part to lower exports of nickel, copper, zinc and asbestos as well as to lower imports of bauxite. In the distribution group, trade employment was slightly higher but carloadings, imports and exports were lower. Greater activity in October, 1939, than in October, 1938, was indicated for manufacturing, electric power output and distribution while lower activity was indicated for mineral production and construction. Information available for November shows advance both as compared with October, 1939, and with November, 1938, in the figures for employment and wholesale prices. The number of cars of revenue freight and the gross earnings of the Canadian National Railways were smaller than in the previous month but greater than in November, 1938. The value of contracts awarded was lower than in the previous month and also than in November, 1938. The amount of sugar manufactured was greater for the four weeks ended November 4 than in the previous four weeks but lower than in the corresponding period of 1938.

Strikes and Lockouts.—The number of strikes and lockouts during November was 15, involving 5,088 workers with time loss of 37,381 man working days, as compared with 25 disputes during October, involving 6,630 workers with 35,201 days' time loss. Most of the time loss in each month was due to disputes involving coal miners in Nova Scotia, Saskatchewan and Alberta, gold miners in British Columbia, fish handlers in Nova Scotia, textile factory workers at St. Jerome, P.Q., and sheet metal workers at Toronto, Ont. In November, 1938, the only disputes causing much time loss were those involving leather goods factory workers at Montreal, P.Q., and lime plant workers at Blubber Bay, B.C., but there were 9 disputes recorded, involving 675 workers with time loss of 6,409 man working days. Of the fifteen disputes recorded for November, 1939, nine were terminated during the month, two resulting in favour of the employers, and one in favour of the workers involved while compromise settlements were reached in five cases and the result of one dispute was recorded as indefinite. Six disputes, involving approximately 1,000 workers, were recorded as unterminated at the end of November. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions involved.

Industrial Disputes Investigation Act

During the past month reports were presented to the Department of Labour by Boards of Conciliation and Investigation in the case of four disputes between (1) the Malagash Salt Co., Limited, and its employees, (2) the City of Winnipeg and four groups of civic employees, (3) the Winnipeg Hydro Electric System and electrical workers at Pointe du Bois and Slave Falls, Manitoba, and (4) the Hull Electric Company and its street railway employees.

Four applications for the establishment of boards were received in the department, and one board was established.

Details of proceedings under the Industrial Disputes Investigation Act and the texts of the boards' reports will be found in the section commencing on page 1207.

Clarification of powers of Wartime Prices and Trade Board

As intimated in the radio address of Hon. Norman A. McLarty, Minister of Labour, on December 10, the powers of the Wartime Prices and Trade Board have been re-enacted in amended form by an Order in Council. (The text of the Minister's address is found elsewhere in this issue commencing on page 1224. This revision and clarification of the Board's powers is largely the result of the conference held recently by the Board with the Attorneys-General of the provinces; the purpose of most of the changes is to facilitate co-operation between the Dominion and the provinces in the administration and enforcement of the wartime regulations relating to the price and the distribution of necessaries of life.

Among the more important changes is a provision that existing provincial regulations in these matters will continue to operate so long as they are not in conflict with action taken by the Board. Another change protects individuals against malicious or frivolous prosecutions by providing that no prosecutions may be undertaken without the permission of the Board or of the Attorney-General of the province in which the offence was committed.

Most of the other changes are of a more or less routine or legal nature While in some

instances the powers of the Board have been extended, those extensions really serve to clarify the objectives of the Board and to set forth more adequately the enforcement measures which may be taken. The powers of the Administrators, who act under the direction of the Board, have been defined; importers and exporters have been included in the classes of persons whose operations come under the authority of the Board; powers of investigation have been broadened; and the Board may recommend the reduction or removal of Customs duties, when it appears to be in the public interest. In order to take local conditions into consideration, any given area may be excluded from the application of an order fixing maximum prices.

As in the past, certain powers of the Board may be exercised only with the approval of the Governor in Council. Only pursuant to a further empowering Order in Council may the Board fix prices, buy or sell necessaries of life, commandeer supplies, prohibit exports, or institute licensing of producers and distributors.

In a further statement made by H. B. McKinnon, Chairman of the Board, it was stated that the enactment of the new regulations does not mean any change in the present policies of the Board. The Board will continue to work out the problems with which it is faced by consultation and co-operation with all interested groups, consumers, distributors and producers.

Wartime Prices Board fixes price on certain grades of wool

In order to maintain an adequate flow of wool into manufacturing channels, the Wartime Prices and Trade Board on November 24 issued an order fixing the price for certain grades of wool. The price was set upon the recommendation of the Wool Administrator and under the authority of an Order in Council.

The Order covers quarter-blood fleece and pulled wools of 44s to 50s quality on which the maximum price will be 45 cents a pound, clean basis, f.o.b. usual distribution points with proportionate prices for ungraded wools and tops. The Wool Administrator is empowered to arrange for the inspection, grading and valuation of wool and the cost of such appraisals may be assessed to the holder.

The grades of wool covered by the Order are those most in demand for military purposes and for blankets, socks, and sweaters, as well as for papermaker's felts. Although most of the wool produced in eastern Canada is of this class, the normal principal source of supply is New Zealand.

This action of the Board will place present holders of these wools on an equal basis with the Co-operative Wool Growers Association and others in the trade who—in order to meet national needs—had already voluntarily sold their wool at prices suggested by the Wool Administrator.

While the 45 cent price becomes effective on sales made on or after December 1, the conditions and restrictions of the Order in no way affect the price at which any farmer or sheep-raiser may sell the wool produced by his own sheep.

War pensions and compensation for Canadian seamen and fishermen

By the authority of three orders in council issued under the War Measures Act of November 10, the personnel of ships of Canadian registry on license and Canadian salt water fishermen, who suffer death or disability "as a result of enemy war-like action or counter action against the same" are covered by regulations which provide:

(1) payment of pensions.
(2) free medical, surgical or other treatment.
(3) compensation for loss or war damage to personal effects.

The order relating to pensions provides that in the case of death or disability to officers and crew members of Canadian ships, pensions will be payable only to the wife, widow or orphan children of the person on whose behalf the pension is claimed.

Payments of pensions and compensation will be made out of the war appropriation, "the amount of such payments to be recouped from funds accruing to the custodian of enemy property as and when available," the order stipulated.

Officers and crew members were classified according to ranks and rating of the Naval Forces of Canada and the rate of pension will be payable according to these classifications under the pension act as applicable to the Naval Forces. Thus the master of a ship engaged in foreign trade would receive the same rate of pension as a commander in the naval forces.

Under these regulations vessels have been classified in three divisions, those engaged in foreign trade, in home trade and those in inland and minor waters trade.

Masters of ships in home and inland trade were ranked as lieutenants in the matter of pensions, a lower rank than that given the master of a ship engaged in foreign trade. Other officers of ships in the three divisions were ranked downward while crew members received the same rating as an able seaman in the Naval Forces.

The pension order further provides that "masters of salt water fishing boats of 60 registered tons or more shall be entitled to the same rate of pensions as lieutenants in the Canadian Naval forces while masters of smaller boats will be on the same footing as naval sub-lieutenants. Other members of fishing crews will receive the same pension treatment as able seamen in the navy."

The Canadian Pensions Commission will adjudicate all claims.

The order concerning free medical treatment stipulates that it be provided by the Department of Pensions and National Health.

The order relating to compensation for loss of personal effects establishes such compensation on a graduated basis according to rank and rating, and also according to the classification of the ship, viz.: ships engaged in foreign trade, in home trade, or in inland or minor waters trade.

Housing loans restricted to limit of $4,000

The Honourable J. L. Ralston, Minister of Finance, announced on December 6 that in order to conserve financial resources for war purposes the government has decided to discontinue making loans under the National Housing Act on certain classes of buildings. The Act contains a provision authorizing the government to designate the amount of loan and the type of building on which loans will be made, and it has been decided that loans for sums above $4,000 will not be made under the act after December 31 of this year, nor will loans be granted after that date on apartment houses and duplexes. The effect of this policy is that activities under this statute will be confined to making loans of $4,000 or less on individual dwellings. This will make the benefits of the Act apply particularly to persons of small or moderate means desiring to build their own homes, which was the primary purpose of the legislation.

It has also been decided to discontinue the policy of giving assistance under Part III of the Act to meet municipal taxes, but this will not apply to houses the construction of which is commenced by May 31, 1940. Hereafter the only municipalities which will qualify under this part of the Act will be those which have before January 1, 1940, taken the steps which the Act prescribes to make themselves eligible.

In commenting on this decision, Mr. Ralston said he believed that the step taken would be regarded as advisable and necessary. The heavy demands of the war are making it essential to divert our expenditures more and more from peace time projects in order to concentrate on war activities. This action regarding housing was, he said, to be regarded as part of a general program to release the greatest amount of capital possible in order to throw our maximum weight into helping to win the war, which must be our dominant objective. He did not expect that these restrictions of the housing program would cause any reduction in building activities within the next few months and by that time opportunities should have developed for employment on wartime constructions and projects.

It is expected that apartment houses and more expensive single family homes will continue to be financed by private lending institutions.

Mr. Ralston said that the Act had achieved definite success both in stimulating employment in the building industry and enabling people to obtain homes at reasonable cost and on moderate terms. He disclosed that about $46,700,000 had been loaned under the Act, three-quarters of which had been on single family homes and only about one-quarter on apartment houses and duplexes.

Statistics of relief recipients for October

The grand total of all classes of persons on urban and agricultural relief across Canada in October this year was 536,000, a decrease of about one-half of one per cent from the previous month. These figures were released by the Honourable Norman A. McLarty, Minister of Labour, and are the preliminary results from the registration of all direct relief cases carried out for the Department of Labour by the provinces and municipalities in October. The grand total for October, 1939, compared with the same month of 1938, showed a decrease of 16 per cent, while compared with October, 1937, the Dominion figure was down by almost exactly one-third. In contrast with a very slight decrease from September into October this year in the numbers on relief, earlier years showed a considerable advance in October. Thus, in 1938 October increased by 15·8 per cent over September, and in 1937 in the same comparison the increase was 10·6 per cent. In 1937 and 1938 both urban and agricultural relief showed increases in October. This year numbers on agricultural relief increased, but urban relief totals showed a small decline.

Unemployed but fully employable persons on relief in October this year numbered 123,000, a small decrease (less than two per cent) from the revised September total. The figure for October this year showed little change (a decrease of less than one per cent) from October a year ago, and an increase of 1·1 per cent over October, 1937.

A total of 473,000 persons were receiving non-agricultural relief in October, a decrease of 2·7 per cent from the corrected figures for the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed practically no change from the figure for October, 1938, and an increase of under one per cent from the figure for October two years ago.

The number of farmers and members of their families in receipt of agricultural relief showed a sharp decline from a year ago. A total of 12,000 farmers who, together with their dependents, account for a farm population of 63,000, were reported as receiving agricultural relief for subsistence in October.

The Dominion total on agricultural relief in October showed an increase of 18·3 per cent from the revised September figure, but was 62·5 per cent less than in October, 1938, and was 81 per cent less than in October, 1937. In the Province of Saskatchewan, October showed a decrease of 72 per cent from a year ago, an increase of 35 per cent from September, 1939, and a decrease of 86·5 per cent from October, 1937. The Saskatchewan total on agricultural relief still represented, however, 63·5 per cent of the Dominion total.

Re-adjustment of labour in Great Britain in wartime

The British Minister of Labour and National Service recently made an announcement concerning the number of registered unemployed on September 11, 1939, from which it appears that at the beginning of the war there were a number of new openings, but also a certain amount of disorganization in the employment market.

There was a reduction of 76,000 in the number of unemployed male workers on the date in question, as compared with the number registered on August 14, and an increase of 175,000 in the number of unemployed female workers. This increase in female unemployment is explained by the fact that a large number of women have lost their employment owing to evacuation, that others have been dismissed owing to reductions of staff in certain trades, and that a large number of women previously not employed are offering their services. In this connection, the Ministry of Labour states that 49,400 women at present registered as unemployed are claimants neither for benefit nor for allowances.

The Minister further stated that the industries mainly contributing to the increase in the numbers unemployed included hotels and boarding-houses, the distributive trades, the entertainments and sports industries, and the fishing trade. In some districts a decline in employment was also reported in the furniture trades, the tailoring, dressmaking and millinery trades, some of the textile industries, motor-car manufacture, and dockers' work. On the other hand, improvements in employment were reported in the coal-mining industry, iron and steel manufacture, and the engineering and shipbuilding industries.

Over the greater part of the country there was a reduction in male unemployment and a roughly equivalent increase in female unemployment. In London and the south-eastern countries there was an increase both among men and women registered as unemployed.

The Minister's statement forecasts that, as the momentum of the war effort increases, all the country's resources of man and woman power will be called upon, and that there will rapidly cease to be any unemployment of fit persons.

Working hours in baking industry in Great Britain

The first order of the Minister of Labour confirming the minimum rates of wages fixed by the trade board for the baking trade set up in 1938 under the Trade Boards Acts, 1909 and 1918, came into force on September 4. The order applies to both male and female workers in England and Wales employed in establishments where the main business is the making of bread, pastry and flour confectionery. The rates vary according to the district, the size and character of the locality in which the work is carried on, the occupation and, in some cases, the age of the worker.

The normal number of hours of work in the trade is declared to be 48 in a week and any time in excess of 48 or on Sunday is regarded as overtime. The first six hours worked in excess of 48 hours a week must be paid for at the rate of time and a quarter and time and a half must be paid for any work in excess of 54 hours in a week. Any work carried on for at least three and a half hours between 7 p.m. and 7 a.m. must be paid for at a minimum rate 10 per cent higher than the ordinary rate. Any hours worked between 12 midnight on Saturday and 9 p.m. on Sunday must be paid for at double time. If a worker is employed for less than 24 hours per week in the bakehouse and for the rest of his time on delivery, the overtime rate of time and a quarter is paid only after 54 hours, the ordinary minimum being payable for the hours between 48 and 54.

French employers and workers in wartime collaboration

A far-reaching agreement between employers and workers in France was concluded after two meetings, held on October 2 and 7, 1939, which were attended by Mr. Dautry, Minister of Munitions, Mr. Pomaret, Minister of Labour, Mr. Lambert-Ribot, French Employers' representative on the Governing Body of the International Labour Office, Mr. Jouhaux, French Workers' representative on the Governing Body of the International Labour Office, Mr. Lenté, Chairman of the Union of Metal and Mining Industries, and Mr. Chevalme, Secretary of the Metal Workers' Federation. The agreement, reports the November 6 issue of *Industrial and Labour Information* provides for collaboration between employers' and workers' associations and the public authorities in regulating conditions in munition factories.

The object of these meetings was to find a means of developing, in all undertakings and factories in any way concerned in the manufacture of armaments, that spirit of co-operation and trust which was manifest from the first meeting between the Minister of Munitions, employers, supervisory staff and workers.

The employers' and workers' representatives, convinced that they were expressing the opinions of those they represented, gave their unreserved support to a statement which reads as follows:

> The task of supplying the armies of the Republic with the material means of a victory to be won with the least possible suffering for all can be brought to a successful conclusion only by wholehearted and lasting agreement between all those called upon to share in the work.
>
> To-day there is no obstacle to such agreement, and all opposing principles are now obsolete.
>
> There is not a single Frenchman, there is not a single citizen of a free nation throughout the whole world who does not understand and realize that France and England have not embarked on the present struggle for personal motives, but for the future of mankind as a whole.
>
> It is the wish of every Frenchman that not only a better France, but a better world shall emerge from this struggle. And all citizens of free nations expect that it will lead to an era of progress for the whole human race, an era which will be based on liberty, peace and respect for individual and collective rights.
>
> This condition of social and human progress, which can never have an international character if it is not built on national foundations, requires preparation. Mr. Albert Thomas, the first Minister of Munitions during the war of 1914-1918, and subsequently Director of the International Labour Office, gave that institution the following watchword: "If you wish for peace, establish justice." Animated by the same sentiments, the French nation with one voice completes this thought by saying: "If you wish for liberty based on justice, work for victory."

91170—2

At the conclusion of the meetings, and with the agreement of the Minister of Labour, it was decided that meetings for the practical application of the above principles should be convened in industrial districts throughout the country between employers' and workers' representatives of the armament industries and the labour inspectors.

The plan will, of course, form part of the general measures which are being taken by the Minister of Labour in regard to national production as a whole.

War-time functions of employment offices in Germany

Quoting a war-time regulation printed in the *Frankfurter Zeitung* of September 26, the International Labour Office publication, *Industrial and Labour Information*, indicates the use to be made of war prisoners in Germany under the direction of the employment offices in the Reich as follows:

"Prisoners of war are available for labour. The choice of the work and of the places in which they will be allowed to work will depend on the general labour supply situation and on the special needs of war economy. Consequently, the supply of war prisoners for this purpose is to be undertaken by the employment offices, which will work in close co-operation with the prisoners' camps. Undertakings which desire to receive prisoners must, therefore, apply to the competent employment office. In view of the special importance of agriculture in war-time, prisoners will, in the first place, be employed in agriculture."

Duties of Employment Office Directors.— By a decision of the German Minister of Labour, the directors of employment offices have, since August 1, 1939, become the executive organization of the labour trustees, intervening in such matters as the appointment or removal of members of confidential councils, and the supervision of their work, the regulation and supervision of conditions of employment, and the examination of notices of dismissal, etc.

By an Order of September 14, 1939, measures have been taken to assimilate the operation of private employment agencies in certain areas incorporated in the Reich to that of agencies in the rest of Germany, as defined by the Act of November 5, 1935, concerning employment exchanges, vocational guidance and the placing of apprentices.

The Order provides that bodies in Austria, the Sudentenland and Memel which undertake non-profit-making placing and vocational guidance must terminate their activities not later than March 31, 1940, unless they have received authority from the Minister of Labour to continue those activities.

Agricultural employment for school children in Germany

That Germany experienced a shortage of labour, particularly in agriculture, even in the opening weeks of the war is evidenced by government Orders recently reprinted by the International Labour Office. One of these Orders, issued on September 22, refers to the employment of school children in Germany. It stated:

"Pupils of secondary and intermediate schools who have reached 16 years of age will be employed as auxiliary agricultural workers during the school holidays. In order to meet the needs of agriculture, the main holiday period will be arranged as a rule betwen May and October. For the pupils concerned, the holiday period may be extended up to six months a year. School children will be placed in employment by the employment exchanges. Girls will be employed as helpers in country and town households or in health and social services. Children of 10 to 16 years who attend ordinary schools may be employed locally on light work outside school hours provided that such work does not interfere with their studies."

Also to meet the present situation, the German Minister of Communications has issued an Order lowering the age of admission for employment in agriculture for persons driving tractors with a maximum speed of 20 kilometres an hour from 16 to 14 years.

Company Pension Plans and the U.S. Social Security Act

The National Industrial Conference Board Inc., New York, has issued another Bulletin (No. 16) in its series of studies in personnel policy entitled "Company Pension Plans and the Social Security Act."

This study was undertaken primarily to ascertain the effect of the Social Security Act upon previously established private pension plans and to record the steps taken by industry to adjust its pension program to the federal old-age benefits. The study is based upon information secured in April, May and June, 1939, from 275 companies which have had formal pension plans in operation at one time or another during the past decade. In the aggregate, these companies employed 1,472,000 persons.

The following are a few of the conclusions reached as a result of the study:

1. The enactment of the federal pension plan has caused the abandonment of only about one out of every ten formal pension plans covered. The depression was responsible for the discontinuance of another 10 per cent of these formal plans.

2. Of the 275 pension plans covered, 220, or 80 per cent, are still active. Of these active plans, a quarter have been adopted since August, 1935, while 39 per cent of the plans have been revised to supplement the federal benefits. Approximately 35 per cent of the active pension plans were reported as not having yet been revised because of the Act.

3. The most significant trend revealed in the present study is the shift from a non-funded, non-contributory, company-administered pension plan to a group-annuity plan, supported by joint contributions of employer and employee. Of the 220 active pension plans studied, 169, or 77 per cent, are now underwritten by insurance companies, while only 18 out of the 141 pension plans found to have been adopted or revised since the Social Security Act became effective were administered by the employing company.

4. Of the 169 group-annuity plans included, 123 definitely complement the Social Security Act. There are two types of annuity plans; the definite-benefit type and the money-purchase type. Both ordinarily provide for proportionately lower contributions and annuities on earnings up to $3,000 per year than on earnings in excess of this amount which are excluded from the federal plan. The definite-benefit type outnumber the money-purchase type four to one, but since the Social Security Act became effective, interest in the latter type has been stimulated.

5. In addition to the future-service annuities which are financed through joint contributions of employer and employee, practically all of the companies with group-annuity plans, 93 per cent, furnish past-service annuities free to employees meeting specified requirements. This past-service annuity is ordinarily computed by multiplying a specified percentage of earnings by years of accredited service to the date of the plan's adoption.

6. The age of normal retirement under the group-annuity plan is ordinarily set at sixty-five with provisions for earlier or later retirement. About a third of these plans permit women employees to retire five years earlier than men.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

FOUR applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) From 310 cartage service employees of the Canadian National Railways at St. Hyacinthe, Montreal, Brantford, London and Guelph being clerks, foremen, despatchers, auto mechanics, garagemen, painters, farriers, vehicle, tarpaulin and harness repairmen, stablemen, motormen, wagonmen, helpers, watchmen and watchboys, members of the Canadian Brotherhood of Railway Employees. The request of the employees for improved working conditions and increased rates of pay is stated to be the cause of the dispute.

(2) From underground miners, millmen, mechanics, surface workers, steel sharpeners, hoistmen, cage tenders, etc., in the employ of the Teck-Hughes Gold Mines, Ltd., Kirkland Lake, Ontario. The cause of the dispute is stated to be the refusal of the company to recognize the Kirkland Lake Local No. 240 of the International Union of Mine, Mill and Smelter Workers as the barganing representatives of the employees; also the company's refusal to negotiate with a committee of that union in respect to the employees' demand for increased wages to offset any increase in the cost of living.

(3) From approximately 2,435 employees of the Algoma Steel Corporation, Ltd., being members of the Algoma Steel Workers' Union. The dispute arises in connection with the employees' request for a general increase in wage rates.

(4) From employees of the City Engineer's and Waterworks Departments of the City of Edmonton being members of the Edmonton Civic Employees' Federal Union No. 30. Two hundred and sixty-five employees are directly concerned in this dispute and 700 indirectly. The dispute relates to the employees' request for increased wages, payment for legal holidays and certain changes in working conditions; also strict observance of certain clauses in the existing agreement.

The personnel of the Board of Conciliation and Investigation established on November 4 to deal with a dispute between the Niagara, St. Catharines and Toronto Railway and its motormen, polemen, conductors and brakemen engaged in freight service, members of the Brotherhood of Locomotive Engineers and Brotherhood of Railroad Trainmen, respectively, was completed during November by the appointment of Mr. C. V. Langs, K.C., of Hamilton, as board member on the recommendation of the company, and of the Honourable Mr. Justice C. P. McTague, of Toronto, as third member and chairman of the board. Mr. Justice McTague's appointment was made on the joint recommendation of Mr. Langs and Mr. Arthur W. Roebuck, K.C., the board member nominated by the employees.

A Board of Conciliation and Investigation was established by the Minister of Labour on December 8 to deal with two applications received from employees of the Canadian National Railways, being (1) sleeping car porters operating from Winnipeg, members of Division 130, Canadian Brotherhood of Railway Employees, and (2) sleeping car conductors and porters in Ontario and Quebec, members of the Canadian Brotherhood of railway employees. Board members were appointed as follows: on the employees' recommendation, Mr. Edward H. Crawford, of Winnipeg, Man.; on the employer's recommendation, Mr. F. C. Dobell, K.C., of Montreal, P.Q. Messrs. Crawford and Dobell will confer looking to a joint recommendation for a third member, who will be chairman of the board.

Report of Board in Dispute between the Corporation of the City of Winnipeg and Various Classes of Its Employees

The findings of the Board of Conciliation and Investigation established in August to deal with differences between the Corporation of the City of Winnipeg and various groups of its employees were received in the Department of Labour during November.

Five applications in all were referred to this board. Four of these applications were dealt with by a board constituted as follows: Honourable Mr. Justice W. J. Donovan of the Court of King's Bench, Winnipeg, chairman, appointed on the joint recommendation of the other board members, Mr. C. V. McArthur, K.C., Winnipeg, nominated by the civic authorities, and Mr. R. B. Russell, Winnipeg, nominated by the employees. All three members signed the Board's report, Mr. R. B. Russell, however, submitting a minority recommendation concerning wages.

When dealing with the fifth application, that received from electrical workers in the employ of the Hydro Electric System at Pointe du Bois and Slave Falls, Manitoba, Mr. Russell was replaced on the board by Mr. Clive K. Tallin, of Winnipeg. The report of the board in this case is signed by the chairman and Mr. McArthur. Mr. Tallin submitted a minority report.

Following are the texts of the various reports:—

Report of Board in Dispute Involving Clerical Forces, Electrical Mechanical Workers, Waterworkers, Operators and Diggers Employed by the City of Winnipeg.

In the matter of the Industrial Disputes Investigation Act, R.S.C. 1927, Chapter 112; and in the matter of a dispute between the Corporation of the City of Winnipeg and various classes of its employees, namely.

(1) Clerical forces and meter readers of the Hydro Electric System and Water Works System of the Civic Employees Clerical Branch;

(2) High pressure pump employees, pumphouse employees, electrical maintenance men, engineers, boiler operators, trimmers and helpers, chauffeurs, and helpers, storekeepers, bath and park board employees, municipal hospital employees and machine shop employees, members of the Electrical Mechanical Workers Unit, Federation of Civic Employees;

(3) Diggers, air compressormen and joint makers, members of the Water Workers (Diggers) Unit, One Big Union;

(4) Meter repairmen, hydrant repairmen, turnkeys, service testers, valve repairmen, their helpers and apprentices and clerical workers, members of the Water Workers Operators Union.

In addition to the above four original groups, there were other classes of civic employees not coming within the direct scope of the Industrial Disputes Investigation Act who were entitled to Boards under the Provincial Act to Prevent Strikes and Lockouts in Industry, and, as the City and the employees had both agreed to have the disputes of these groups dealt with by this Board rather than have two sets of Boards dealing with the same dispute, the Board also dealt with the dispute of the following groups:—

(1) Clerical Branch, Federation of Civic Employees;

(2) Hospital Commission employees, members of the Mechanical and Electrical Unit, Federation of Civic Employees;

(3) Public Parks Board employees, members of the Mechanical and Electrical Unit, Federation of Civic Employees;

(4) Sewer Maintenance Branch, Federation of Civic Employees;

(5) Street Cleaning Employees Unit, O.B.U.;

(6) Engineers Maintenance Employees Unit, O.B.U.;

(7) Scavenger and Incinerator Employees Unit, O.B.U.;

(8) Parks Board Employees Unit, O.B.U.

The employees were represented by:—

(1) Mr. A. Walker, chairman of the Central Council, Federation of Civic Employees and affiliated Unions;

(2) Mr. R. Robbins, secretary of the Central Council, Federation of Civic Employees and affiliated unions;

(3) Mr. G. Hugo, Clerical Unit, Federation of Civic Employees;

(4) Mr. S. R. Channing, Electrical and Mechanical Unit, Federation of Civic Employees;

(5) Mr. E. W. Masters, and Mr. W. H. Eaton, Water Works Operators Union;

(6) Mr. C. Forrest, Street Cleaners Unit, One Big Union;

(7) Mr. J. H. Patterson, Engineers Unit, One Big Union;

(8) Mr. C. Edinborough, Scavenger and Incinerator Workers Unit, One Big Union;

(9) Mr. G. Fogelberg, Parks Board Employees Unit, One Big Union;

(10) Mr. V. Rudko, Water Workers (Diggers) Unit, One Big Union.

The City, including the Winnipeg Hydro Electric System, was represented by,—

(1) Mr. J. Prudhomme, K.C., Solicitor for the City of Winnipeg;

(2) Alderman C. R. Smith;

(3) Mr. W. B. Brown, Deputy City Treasurer;

(4) Mr. J. W. Sanger, Chief Engineer of the Hydro;

(5) Mr. G. F. R. Bond, of the office of City Solicitor.

The main question under investigation was the application of the employees for restoration of cuts or reductions in pay made in the years 1932 (10 per cent) and 1933 (9 per cent).

The written reply of the City filed with the Department of Labour and attached to the form of reference to the Board and further attached to the form of application sets out (in abbreviated form) the following:—

1. (*a*) That a world-wide depression brought the heavy burden of unemployment onto the City and a heavy reduction in revenues;

(*b*) The City in 1932 made a 10 per cent reduction in the wages of its employees and in 1933 made a further reduction of 10 per cent of the then balance of the employees' wages;

(*c*) A restoration of the wages of 3½ per cent was made by the city in 1934;

2. Following the application for a Board of Conciliation by the employees in 1937 the Dysart Board by a majority report recommended an increase of 5 per cent in the then wages of the employees except those of the police department. That Board by unanimous finding recommended a 10 per cent increase to employees of the police department;

3. In the year 1937 the McPherson Board dealing with an application by members of the Pointe du Bois and Slave Fall Units of the Union of Electrical Workers recommended restoration of the balance of the second 10 per cent cut in the wages of those employees. The city as of June 1, 1938, made a restoration of 5 per cent subject to certain modifications in respect of certain employees who had been exempt from the first 10 per cent reduction;

4. In that reply the city refers to recommendations made by the Goldenberg Commission on March 18, 1939, and to the difficulty for the city in balancing its budget for the year 1939;

5. Reference is made to specified items in showing that it was necessary for the city in balancing its budget to resort to some exceptional means of providing monies for the year, such means including the following:—

(*a*) Divert to current expenditures monies from sinking fund instalments;
(*b*) Increase of two mills in mill rate;
(*c*) Contribution from Hydro Electric System;
(*d*) Otherwise as set out in detail in the answer filed.

The city's answer appears to be summarized in the last sentence of their reply as follows:—

"In view of the foregoing however the City submits that it is not now in a position to consent to the restorations which the employees are now seeking."

It seems to follow then from the aforementioned documents that the wage reductions were made to meet what was then considered to be an emergency and that it was clearly understood by both parties that restoration of the reductions in wages would take place when such emergency situation was relieved.

On the briefs submitted by the parties and argument it would appear that the implied promise to restore was not contingent only on removal in whole or in part of the unemployment relief burden but should be fulfilled on it appearing that the city's financial position warrants such fulfilment in whole or in part.

In substantiation of that view is the fact that the two aforementioned restorations were made at times when the unemployment relief burden had not been reduced.

The issue it seems to us may be considered as falling mainly within the following:—

(1) Is the city now in a position financially to further restore the reductions in wages?

This question should be, it seems to us, considered not merely in terms of ability to pay on past or present revenues but also in respect of possible new sources of revenue. Neither party has suggested that there should be any cut in social or other essential services now being rendered.

(2) What are the indications or prospects for a reduction in the unemployment relief burden?

By the briefs submitted reduction may take place from,—

(*i*) A greater share of that burden being taken over by the Dominion or the Province;

Under that heading the possibility was considered whereby the Dominion might take over or cancel some of the indebtedness incurred to date by the city.

(*ii*) A reduction in the number of persons on relief in the city which might take place as a result of,

(*a*) absorption into industry or other employment;
(*b*) enlistment in the military forces of persons now on relief, or their dependents;

(*iii*) Improved general conditions in industry and generally in business as a result of more profit for business, including mining and farming in the Province.

Definite evidence on each of the foregoing was not put before the Board but it appeared to be undisputed that relief may with confidence be expected from one or all of the foregoing ways. It was stated that a reduction of over 500 families in a total of some 3,400 families on relief had taken place in the fall of the present year. The possibility was suggested in answer that some of that reduction was seasonal only.

Since the reductions in question were made respectively the employees have received what we considered were improvements in their working or employment conditions. Those were,—

(1) annual and statutory holidays with pay;
(2) thirty days' sick pay;
(3) improved pension arrangements;
(4) increased workmen's compensation allowances.

It was not contended by the city or admitted by the employees that these improvements were in lieu of wage restorations.

It appears probable that those concessions or improvements might have materialized as being in accord with the times and a better recognition of what was due to those employed on a permanent basis.

That the city granted those benefits should be considered as evidence of good faith and a disposition to consider improvements in the working conditions of its employees.

The financial position of the city appears to have become improved in a number of ways since 1932.

(1) It has secured from the Legislature of the Province the right by taxation to secure new sources of revenue.

(2) The city has been relieved from making a purchase of power from an outside corporation which power its own system is now able to produce.

(3) There has been a reduction in the city's proportion of general unemployment relief costs.

(4) Arrears of taxes are considerably reduced.

(5) The city is now receiving larger contributions from its public utilities.

On the other side it appears that because of war conditions the city will sustain some extra expense and loss. It appears that depreciation in value of securities held by it has taken place and the necessity of paying exchange charges on its securities payable in the United States will require extra payments.

It was pointed out that in the effort to balance its budget for the year 1939 the city made available or secured payment of monies which for the most part will not in like amounts (and in some cases not at all) be available in 1940 or in succeeding years.

Those items have been hereinbefore referred to and are set out in detail in the reply of th city filed with the Department of Labour.

Through the study made during the last year of the city's financial condition by its departmental officials, and especially by its treasury department, it appears that there is now a better understanding of the financial problems confronting it.

It appears to follow that there is more confidence in the financial ability of the city to meet its liabilities.

There appears also to be some grounds for expectation that the city will be relieved by the Dominion of Canada of some of the burden of unemployment relief.

The taxing powers of the city have been increased since the wage reductions were first made and especially the right given to tax

(*a*) electric light and gas bills of city residents;

(*b*) motor vehicles owned by city residents;

(*c*) purchases made of spirituous liquors by city residents;

(*d*) business taxes on an increased scale.

The case as presented to the Board appears to show that the wage reductions in question were made at a time when the city was confronted by an exceptional difficulty in financing which resulted from the heavy new unemployment relief expenses. It appears to be undisputed that both the city officials and the employees in question had a right to and did expect that such exceptional expense would not be a continuing one in such large proportions. It was then as now the expectation that the Dominion of Canada and the Province of Manitoba would take the view that unemployment was for the great part not a municipal question.

It appears to the undersigned two members of the Board that the case for at least some further restoration of wage reductions has been made out in the event of either of the following conditions arising:—

(*a*) A reduction of the expense to the municipality of the unemployment relief.

There appears now to be definite evidence of a real decrease in the number of those on relief as a result of,—

(*i*) war enlistments;

(ii) improved industrial and employment conditions.

(*b*) Improvements in the city's financial position. That improvement it appears may arise from,—

(*i*) increase in tax payments;

(*ii*) wider taxation rights;

(*iii*) relief by the Dominion of Canada from a part or all of the outstanding indebtedness incurred for relief payments;

(*iv*) a further decrease in the city's share of unemployment relief, general expense and especially of the cost of administration of that department.

It is our opinion that further restoration of the employees' wage cuts should take place on either:

(1) reduction in the unemployment relief expense to any substantial degree, or

(2) improvement in the city's financial position or in its ability to pay.

On the evidence put before the Board it appears that for the period since the cut in wages was made in 1932 the cut amounted to an average difference between the amount received by the employees and the total amount they would have received of over $420,600 per year.

The two partial restorations in the meantime have tended to reduce the yearly difference.

It appears to us that restorations should be in proportion to the substantial decreases in unemployment expense or in increases in the financial ability to pay. Regard should be had for exceptional and uncontrollable expenditures which the city might be called upon to pay, but in offsetting the right to restoration because of improved financial conditions we do

not think ordinary increases or new controllable liabilities should be considered.

In conferences between the parties at Board meetings it was the hope of the members of the Board that some form of agreement or definite arrangement for future provisional restorations might be made. In the end it appeared to be the wish of the parties that the Board should make a definite finding one way or the other on the various aspects of the question as the facts appeared to warrant.

The members of the Board regret that because of the exceptional circumstances and indefinite financial prospects ahead of the city, arising in part from war conditions, it was found impossible to make a more definite finding but we consider that the contingencies enumerated on which restorations should in our opinion take place should be a definite guide.

We are confident however that the parties to the dispute have each now a better understanding of the claims and attitude of the other party.

If the parties accept the views hereinbefore expressed in respect especially to the right of the employees to get restorations contingent on improvement in the financial position of the city, or on definite and fairly substantial reduction in the city's share of unemployement relief costs, we expect that something definite will be contributed by the work of the Board.

The working conditions of certain employees of the Parks Board were by consent of the parties referred to a committee of the city for further adjustment.

In addition to the employees for whom definite applications to the Department were made and pursuant to approval of Department and consent of the parties, the Board heard the application of common labourers in departments enumerated as numbers 4, 5, 6, 7 and 8 and, in application number three namely, Water Workers (Diggers), for increase in the hourly rate of wages for common labourers from 42 cents to 45 cents per hour and a minimum of $21.60 a week.

The Board (all members concurring) recommends that there be paid to such labourers a minimum of $21.60 for a 48 hour week.

We each express our thanks for the courteous and efficient manner in which the facts and evidence were presented by the representatives of each of the parties.

(Sgd.) W. J. DONOVAN,
Chairman.

MINORITY REPORT

Mr. Russell, as a minority member of the Board, recommends further as follows:—

It appears to me that the case for at least some further restoration of wage reductions has been made out. It is my opinion that an immediate 5·12 per cent restoration to the employees should be made.

Member.

Report of Board in Dispute Involving Electrical Workers in the Employ of the Winnipeg Hydro Electric System at Pointe du Bois and Slave Falls, Manitoba.

In the matter of The Industrial Disputes Investigation Act, R.S.C. 1927, Chapter 112; and in the matter of a dispute between the Corporation of the City of Winnipeg and various classes of its employees; namely, International Brotherhood of Electrical Workers, Local Unions B964, 1037 and B1129, consisting of Foremen Linemen, Linemen, Troublemen, Underground Cable Splicers, Pitmen and Labourers, Journeymen Electricians, Repairmen, Station Maintenance, Journeymen and Helpers, Station and Sub-station Operators, and Assistant Operators and Floormen, Metermen, Journeymen, Class A, B and C and Apprentices, Tramwaymen and all classes as above stated at Pointe du Bois and Slave Falls, Manitoba.

The employees were represented by:—

(1) Fred Keeley, president of Local Union 435, and general representative of the Electrical Workers for this application;

(2) George W. Boorman, president of Local Union B1129.

The city, including the Winnipeg Hydro Electric System, was represented by,—

(1) Mr. J. Preudhomme, K.C., solicitor for the city of Winnipeg;

(2) Alderman C. R. Smith;

(3) Mr. W. B. Brown, Deputy City Treasurer;

(4) Mr. J. W. Sanger, Chief Engineer of the Hydro;

(5) Mr. G. F. R. Bond, of the office of City Solicitor.

In the application of the employees for the establishment of a Board of Conciliation and Investigation their cause of dispute and claims are set out as follows:—

City of Winnipeg and City of Winnipeg Hydro Electric System have consistently refused, and still refuse, to complete restorations of wage reductions heretofore imposed on the within applicants. A Wage Schedule was submitted by the applicants on February

6, 1939, and on February 10, 1939, respectively, providing for a restoration of 12·3 per cent.

The reply filed to that application is in the same form as that filed in the case of the Clerical Forces, etc., and as set out in abbreviated form in the report dated November 10, 1939, of the Board of Conciliation consisting of the Honourable Mr. Justice Donovan, chairman, C. V. McArthur, K.C., and R. B. Russell, members.

The applicants herein are engaged in the work of the City of Winnipeg Hydro Electric System and represent only a section of the employees of that system. Another section was represented by the applicants to the Board of Conciliation hereinbefore mentioned.

The wage reductions referred to in the application herein were a part of the general wage reductions made by the City of Winnipeg, namely,—

(1) Ten per cent. (10 per cent) in the year 1932;

(2) Nine per cent (9 per cent) in the year 1933.

The reply of the city herein is in the same form as that filed in answer to the application by the clerical workers etc., and dealt with by the other Board. It may be summarized as follows:—

(1) (*a*) That a world wide depression brought the heavy burden of unemployment onto the city and a heavy reduction in revenues;

(*b*) The city in 1932 made a 10 per cent reduction in the wages of its employees and in 1933 made a further reduction of 10 per cent of the then balance of the employees' wages;

(*c*) A restoration of the wages of 3⅓ per cent was made by the city in 1934;

(2) Following the application for a Board of Conciliation by the employees in 1937 the Dysart Board by a majority report recommended an increase of 5 per cent in the then wages of the employees except those of the police dpartment. That Board by unanimous finding recommended a 10 per cent increase to employees of the police department;

(3) In the year 1937 the McPherson Board dealing with an application by members of the Pointe du Bois and Slave Falls Units of the Union of Electrical Workers recommended restoration of the balance of the second 10 per cent cut in the wages of those employees. The city as of June 1, 1938, made a restoration of 5 per cent subject to certain modifications in respect of certain employees who had been exempt from the first 10 per cent reduction;

(4) In that reply the city refers to recommendations made by the Goldenberg Commission on March 18, 1939, and to the difficulty for the city in balancing its budget for the year 1939;

(5) Reference is made to specified items in showing that it was necessary for the city in balancing its budget to resort to some exceptional means of providing monies for the year, such means including the following:—

(*a*) Divert to current expenditures monies from sinking fund instalments;

(*b*) Increase of two mills in mill rate;

(*c*) Contribution from Hydro Electric System;

(*d*) Otherwise as set out in detail in the answer filed.

The city's answer appears to be summarized in the last sentence of their reply as follows:—

> "In view of the foregoing however the city submits that it is not now in a position to consent to the restorations which the employees are now seeking".

It seems to follow then from the aforementioned documents and the exhibits filed herein and statements made that the wage reductions were made to meet what was then considered to be an emergency and that it was clearly understood by both parties that restoration of the reductions in wages would take place when such emergency situation was relieved.

On the briefs submitted by the parties and argument it would appear that the implied promise to restore was not contingent only on removal in whole or in part of the unemployment relief burden but should be fulfilled on it appearing that the city's financial position warrants such fulfilment in whole or in part.

In substantiation of that view is the fact that the two aforementioned restorations were made at times when the unemployment relief burden had not been reduced.

The applicants herein contend that as employees of a self-sustained utility which is now showing a substantial profit it should be held that a part of that profit should go towards restoring the reductions in wages which were made when that utility was not in such a good financial condition. They contend that the question of the general financial condition or general financial inability to restore the amount of cuts in wages of city employees should not stand in the way of their own restorations.

That contention is based mainly on the view that at least so far as the employees are concerned the Hydro Electric System should be considered to be a separate business entity from the municipal corporation (the city of Winnipeg).

The employees' representatives have pointed out that the Hydro Electric System:

(1) was created as a result of special provincial legislation, particularly in respect

of its general operations and of its plant and equipment located outside the city limits;

(2) has separate, accounts, reserves and generally a financial set-up of its own;

(3) is separate in its financing to at least the extent that it should be regarded as a subsidiary rather than a mere department of the city;

(4) did not have its establishment based on levies on city properties or Winnipeg citizens;

(5) has met its own liabilities from its earnings.

On the other side it was contended in reply and on behalf of the city that,

(1) the Hydro Electric System is not in law a separate entity;

(2) its control, general policy and employees are subject to city control;

(3) its financial undertakings originate in city authority and the city has the ultimate financial responsibility the same as in respect of other departments of the government of the city;

(4) its securities are issued under the authority of by-laws passed by the city and these by-laws have been subject to all the provisions of the city charter—by-laws passed authorizing the issue of debentures to borrow money for purposes of the Hydro Electric System have directed the levying of rates for the payment of debts and these by-laws authorize the rates to be levied on the rateable property of the city;

(5) in practice and in law the city is entitled to the profit from the business of the Hydro Electric System—the credit of the Hydro Electric System is based not alone on its assets and undertakings but also on the general credit of the city.

The facts produced by the employees in evidence and our inspection of the electric system plants establish that generally speaking the work of the employees who have made the application herein hold positions requiring skill, trustworthiness and responsibility.

It may be however that such aspects of such employment were taken into consideration when their rates of pay were increased. If not, such a question might well be taken into consideration by the parties.

The application to the department did not in our opinion show that such a question was to be considered as part of the reference to the Board.

On the foregoing and other considerations put before the Board in the form of written briefs and arguments it does not seem to the chairman and Mr. McArthur, one of the members of the Board, that the applicants are entitled to preferential treatment above other city employees in the matter of the restoration of wages claimed merely because the city and the Hydro Electric System should in operation be considered separate entities. It appears to be an established fact that the Hydro Electric System is not a separate legal entity as a corporation or business. It undoubtedly is conducted as a department of the city's business and its citizens and ratepayers have the ultimate responsibility for the conduct of its business.

The undersigned members of the Board are of the opinion that further restoration should be given by the city when and as either,

(1) the expense of unemployment relief in the city has been further reduced in some substantial degree, or

(2) the city's financial ability to restore has become improved in some substantial degree.

We recommend that such contingent restoration should be made in a fair proportion to improvement in either of the aforementioned ways. In this respect reference should be made to the unanimous part of the Board's finding in the report on the application of the city's employees (clerical forces, etc.) submitted a week ago.

All of which is respectfully submitted,

(Sgd.) W. J. DONOVAN,
Chairman.

(Sgd.) C. V. MCARTHUR,
Member.

Dated at Winnipeg,
this 15th day of November,
A.D. 1939.

Minority Report

In the matter of a dispute between the Corporation of the City of Winnipeg and City of Winnipeg Hydro Electric System, (Employer); and the International Brotherhood of Electrical Workers, Local Unions B964, 1037 and B1129, consisting of Foremen Linemen, Linemen, Troublemen, Underground Cable Splicers, Pitmen and Labourers, Journeymen Electricians, Repairmen, Station Maintenance, Journeymen and Helpers, Station and Sub-Station Operators, and Assistant Operators and Floormen, Metermen, Journeymen Class A, B and C and Apprentices, Tramwaymen and all classes as above stated at Pointe du Bois and Slave Falls, Manitoba, (Employees).

Winnipeg, Manitoba,
November 13th, 1939.

To:
The Hon. N. A. McLarty,
Minister of Labour,
Ottawa, Canada.

I have had the benefit of seeing the opinion of the majority of this Board and regret that I cannot concur in their findings.

They have based their recommendations upon the City Hydro being nothing more than part of the machinery of the Corporation of the City of Winnipeg and upon the further provision that the employees of the Hydro have no claim to be treated in any way differently from the general body of employees of the City of Winnipeg in the matter of wage restorations.

I have come to the conclusion that there is a great deal of merit in the employees' submission that Hydro has a separate and distinct existence apart from the general functions of the Corporation of the City of Winnipeg. Conducting an ordinary commercial enterprise is no part of the customary and recognized functions of a municipal corporation as are the construction and maintenance of streets and sewers, to which the Hydro has been compared by the representatives of the city, and to the provision of police and fire protection. It required exceptional statutory powers to endow the City of Winnipeg with powers sufficient to enable it to inaugurate an undertaking such as Hydro and ever since its inception the City Hydro has been financed on an entirely different footing from any of the other utilities of the city. No citizen of Winnipeg pays or has ever paid taxes to maintain Hydro; in which Hydro differs from the Waterworks Department or the Sewage Disposal System, but, on the other hand, Hydro does what no other utility does, pays taxes on its property situated within the city, and I can see no reason or logic in the City of Winnipeg paying taxes to itself upon its own property if it did not distinguish Hydro in some way from those utilities which have an equal amount of property but which pay no taxes. The City has recognized that the Hydro is something separate and apart and its consistent and commendable practice of keeping Hydro's accounts, reserves, financing and management separate from the city's general business and accounts demonstrates sufficiently its accord with these principles. I would compare the city Hydro to a wholly owned subsidiary whose liabilities are, in fact, underwritten and guaranteed by the City so as to enable the subsidiary to obtain more favourable financial terms and to whose profits the city is entitled. Up to the present time the Hydro has met, and more than met, all its liabilities including bond interest, taxes to the City of Winnipeg and other charges and when it has had deficits has recovered them from its own earnings. Therefore, while it may be conceded that the city is entitled, as the owner of the Hydro, to its profits, those profits should only be computed after the wages of the Hydro's employees have been paid upon the scale which has been agreed upon as reasonable, that is, on the 1931 base rate.

Arguments similar to the above appealed to the majority of the McPherson Board as sound and they concluded that in practice at least Hydro was a separate entity and as such its employees should be treated separately, and with this conclusion I feel bound to agree; but even if I should be wrong upon the issue of Hydro's separate entity, I still cannot entirely agree with the conclusions of the majority of this Board, differing as I do upon the issue of whether or not the city should treat all its employees alike.

It seems to me that the city's expressed desire to treat all its employees alike may be philosophically ideal but suffers from certain practical difficulties because such things as economic necessity and the law of supply and demands, and perhaps even practical politics, might compel deviation from such a policy. The very fact that the city wage scales for different classes of workmen and employees are founded upon different bases is sufficient to show the impossibility of treating different types of workmen, each of whose occupations demands its peculiar education, training, skill and ability, in the same manner. While the city maintains that those factors just mentioned, together with conditions of labour and hours of employment and such special risks and dangers to which the workmen are exposed, are sufficiently provided for in the differences in basic rates, I do not think that this argument should prevail. The necessity and urgency of maintaining certain civic services, coupled with a limited number of men capable of maintaining them might make it expedient and desirable that the city should consider and grant the request of such a group of employees for restoration before the demands of those less essential to the well-being of the community. This is essentially the position adopted by the employees before this Board, who argue that the city has not in the past hesitated to discriminate between various groups, examples of which are the concessions granted the firemen, the machine shop employees, and the linemen, and not only the city but previous Boards of Conciliation have recognized that even restorations must be made to some employees before others; undoubtedly the Dysart Board recognized it in recommending the preferential restorations of 10 per cent to the Police, and the McPherson Board recognized it with the very men in this dispute. Our inspection of the plants at Pointe du Bois, Slave Falls and the Rover Street Substation in Winnipeg, which extended over two days, and our conversations with the various employees convinced me of the considerable skill, knowledge and ability demanded of the Hydro Workers and of the great responsibility which rests upon them.

The importance of maintaining their present high standard of efficiency and their good-will can hardly be overestimated when it is realized that upon Hydro's continuous and proper functioning now depends such essential services as street lighting, water supply, high pressure water for fire-fighting and sewage disposal, to say nothing of the industrial and domestic life of the citizens at large. Upon Hydro and its employees depends public safety, health and convenience, and I can conceive no other factors which would warrant greater concern on the part of a municipal corporation so as to move them to a favourable consideration of the request for restoration.

The men have also submitted evidence to show that in other cities where men employed in similar work had suffered reductions during the years of the depression, full restorations have been made and in one or two cities increases have even been received, although no evidence was offered on the general financial position of the cities or utilities involved.

Had I been able to agree with the majority of this Board upon the other branches of the case I should probably have come to the same conclusion as they upon the issue of the ability of the City of Winnipeg to make restoration to its employees at the present time and I might have concurred with them in their recommendations for future restoration; however, as I have concluded that the Hydro is a separate entity and as an examination of the evidence submitted by both the employees and the City has convinced me that there is plenty of money available from the profits of Hydro to enable the restorations requested by the men to be made, and as there is no dispute whatever about the justness of the basic rates set in 1931, I can see no reason why immediate restoration should not be effected to the employees who are applicants to this Board.

All of which is respectfully submitted.

(Sgd.) CLIVE K. TALLIN,
Member.

Report of Board in Dispute between Malagash Salt Company, Limited, and its Employees

The findings of the Board of Conciliation and Investigation established to deal with a dispute between the Malagash Salt Company, Limited, and its employees being members of the United Salt Mine Workers, Local Industrial Union No. 323, C.I.O., were received by the Minister of Labour on November 27, The board's report is signed by the chairman, His Honour Judge J. Welsford Macdonald, of Pictou, N.S., and the board member nominated by the employees, Mr. Forman Waye, of Sydney, N.S. The member of the board nominated by the employer, Mr. George D. Macdougall, of New Glasgow, N.S., submitted a minority report in regard to the matter of wages.

The members were sworn in on November 4, 1939. Sessions were held at the Braeside Hotel, Pictou, and at the mine of the employer, Malagash Mines, N.S.

The employer was represented by:—

(1) Mr. G. W. MacKay, President of the Company.
(2) Mr. J. S. Gillespie, General Manager of the Company, and
(3) Mr. J. L. Cavanagh, Plant Manager of the Company.

The employees were represented by:—

(1) Mr. Lawrence Sutherland, President Local Union, C.I.O. No. 323.
(2) Mr. Robert Farrow, Secretary Local Union, C.I.O. No. 323, and
(3) Mr. Lee MacDonald, Financial Secretary Local Union, C.I.O. No. 323.

Evidence was submitted by thirty-two witnesses, there being twenty-five called by the employees and seven called by the employer.

The board also heard Mr. J. P. Messervey, Inspector of Mines, Province of Nova Scotia, and Mr. F. A. Nightingale, Chartered Accountant. The latter was appointed by the board, at the request of the men, to give an expert opinion on the financial statements of the company.

The board also inspected the company's plant and mine.

The mine is situated at Malagash, Cumberland County, N.S., and produces mined salt to be used for various purposes, such as: ice cream manufacture, railway refrigeration and track purposes, curing hides, beef curing, fish curing, chemical manufacture and highway uses.

In conjunction with those above operations there is an evaporating plant which produces a higher grade of salt for particular uses.

The board states that the ultimate capacity for mined salt is 60,000 tons per year and for evaporated salt 6,000 tons per year, but that these figures have never been realized in operation due to restricted market.

The company employs one hundred and seven men, all members of United Salt Mine Workers, C.I.O., L.I.U. No. 323, which since its inception has been recognized and doing business with the company.

The men's classifications and rates of pay are as follows:—

Surface:

39 at 26 cents—Labourers, bagging, loading cars, etc.
1 at 27 cents—Hostler.
1 at 28 cents—Shipper.
6 at 30 cents—Diesel operators and repairmen.
7 at 32 cents—Locomotive firemen, diesel repairmen, blacksmith, electrician, carpenter, truckman, millman.
4 at 35 cents—Two machinists, one electrician, one welder.
1 at 36 cents—Horse and cart.
1 at 40 cents—Locomotive driver.

60

Underground:

21 at 26 cents—Muckers and trammers.
1 at 28 cents—Pump man.
11 at 30 cents—Drill helpers and main hoistmen.
8 at 32 cents—Drillers and cutter helpers.
3 at 36 cents—Timbermen—core drill.
1 at 38 cents—Shaftsman.
2 at 45 cents—Cutter operators.

47

In the formal application for a board the employees set forth their claims as follows:

(1) An eight-hour day for all employees.
(2) An increase in daily wages generally of 25 per cent with a minimum wage of $3.75 per day and with special wage adjustments in certain individual cases.
(3) Free lamps for underground workers.
(4) The elimination of existing hazards to the safety of employees and the elimination of conditions and practices which are detrimental to the health and welfare of employees.

In its report the board deals with these claims separately.

Eight-Hour Day

Evidence was submitted by both sides in regard to this question. The board states that after due consideration it "is of the opinion that the eight-hour day system should be put into effect as soon as it is practical without disrupting the industry."

Wage Increase

With respect to the matter of wages the board recommends "that the wages of all men now receiving less than $3 per day be increased to that amount; this increase to take effect December 1, 1939."

Mr. Macdougall in a minority report dissents from the recommendation that wages should be increased at the present time.

Free Lamps for Underground Workers

The report contains the following remarks on this subject:—

The matter of free lamps for underground miners was not stressed. The lamps now in use are electric lamps, leased from the Mine Safety Appliance Co. These replaced carbide lamps formerly in use, which lamps were owned by the men but the carbide for same was furnished by the company. The present lamps are much superior to the carbide lamps. There are 60 lamps in use. A statement furnished us shows that when using the carbide lamps the cost to the company for carbide per month was $36. The present cost to the company for operation of the electric lamps, being rental plus care of lamps, less the 50 cents per month per man paid by the men, is $45.36.

Your board in view of the above facts feels it cannot make any recommendation.

Hazards

Concerning hazards, the board reports as follows:—

In reference to elimination of existing hazards to the safety of employees and the elimination of conditions and practices which are detrimental to the health and welfare of employees, the board examined a large number of witnesses from the men and company officials, and also Mr. Messervey, the Mine Inspector for the Provincial Government. The board found that some of the outstanding hazards had been removed by advice of Safety Committee and Mine Inspector, and the board was advised by the company officials that other matters of this nature would be attended to at once. The board inspected the workings of the mine and while underground found that in dead ends where explosives had been used the fumes would remain in the places for some time, causing severe headaches in some instances. The board recommend that some measures be taken to supply the men with pure air, either by the installation of booster fans or other means.

The evidence of the Inspector of Metalliferrous Mines and Quarries for the Province of Nova Scotia revealed a confused situation as to proper inspection of surface plants such as evaporator, power house, etc. This should not be, and either the Inspector above referred to should inspect the entire plant, or the Nova Scotia Government Factory Inspector should be instructed to inspect certain sections of the plant. Some definite arrangement as to jurisdiction should be established so that competent inspection of entire operations be provided.

General

The following general comments are contained in the board's report:—

Your board believes it necessary to call attention to the general salt situation insofar as it affects the Malagash operations, influencing as it does both the finances of the Company and the earning possibilities of the employees.

The greatest production of mined salt was during the fiscal year 1938, being 48,425 tons in 243 days. The shipments of mined salt were, for this year, 44,492 tons. For the fiscal year 1939 the amounts were slightly lower, being 42,888 tons and 39,208 tons, respectively, representing 225 working days.

We are informed that the salt used each year for fishery purposes in Newfoundland, St. Pierre, Prince Edward Island, New Bruns-

wick, Eastern Quebec and Nova Scotia is in the vicinity of 150,000 tons.

Insofar as mine production capacity is concerned, we can expect under favourable conditions an output of about 60,000 tons on full-time operations. Such salt as is now sold, is sold in three principal grades:

A.—No. 2, No. 3 and No. 4 mesh.
B.—No. 5 and No. 8 mesh.
C.—Finer grade.

The proportion of the present production is roughly one-third to each grade.

The "A" grade is sold for ice cream manufacture; for use by railways for refrigeration and for track purposes; for curing hides; for beef curing, etc. The "B" grade is the size usually used in fish curing. The "C" grade is used for chemical purposes in the newsprint trade and for highway treatments.

The prices obtained for the above grades vary as to sizes and the use of the larger grained salt is being to some extent replaced by mechanical refrigeration.

To correct a situation in which the gainful employment of over 100 men is concerned and in which the safety of a considerable invested capital is also involved, and also adversely affecting what should be a thriving community, your board believes a solution should be sought. This solution should be such as will give Malagash salt a rightful place in the "Atlantic Coast of Canada" salt market.

At the present time this market is practically closed to Malagash salt, due to the importation of "solar" salt from the West Indies and the Mediterranean at very low prices; these low prices being due largely to the lower labour rates and standard of living in those districts.

On a production of 60,000 tons of Malagash salt per year, some 30,000 to 40,000 tons would be available as fishery salt. As this is only 20 per cent to 25 per cent of the potential market it seems a tragedy that, with this market at the door, foreign cheap salt gluts the market, so that both our capital and our labour cannot expect reasonable returns.

And it should not be forgotten that mined salt is free from bacteria and that the cost of the salt used in a quintal of dry fish costing say $4.50 is less than 50 cents.

Unquestionably the Federal Department of Fisheries can provide the answer.

While the "evaporated salt" situation is not exactly the same, yet the Malagash plant has a capacity of some 6,000 tons per annum, while the yearly sales have been usually less than 3,000 tons, and in only one year exceeded this figure and then only slightly.

A series of suggestions for assisting the Malagash Company and employes is included in the report relating to remission of royalties, past, present and future for ten years; favourable consideration of cancellation of indebtedness to the Canadian National Railways; consideration of a rebate by the Canadian National Railways of 50 cents per ton, or, if this cannot be achieved, some application of subventions. In submitting these suggestions the board states that it is prompted by a desire to discover some "effective and immediate aid to an industry which is of considerable importance." The suggestion is made that the Halifax station of the Fisheries Bureau be charged with the task of carrying out the necessary investigation and instruction to fish curers so that Nova Scotia salt will be used to cure Nova Scotia fish and similar efforts be directed elsewhere in Canada. "This," the board states, "is of great importance," and adds "in fact all these suggestions are made in the hope they will lead to some solution of the present low wage scale now paid in the mined salt industry."

Report of Board in Dispute between the Hull Electric Company and its Street Railway Employees

A unanimous report was received by the Minister of Labour on December 12th from the Board of Conciliation and Investigation established to deal with a wages dispute between the Hull Electric Company and its employees being members of Division 591, Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America.

The personnel of the board was as follows: Honourable Mr. Justice Lucien Cannon, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other board members; Mr. H. P. Hill, K.C., Ottawa, Ont., nominated by the company, and Mr. Alexandre Tache, K.C., Hull, P.Q., nominated by the men.

The text of the report follows:—

Report of Board

In the matter of a dispute between the Hull Electric Company and its employees being members of Division 591, Amalgamated Association of Street and Electric Railway and Motor Coach Employees of America.

To the Minister of Labour,
Ottawa.

Dear SIR,

Under the provisions of Chap. 112 of the Revised Statutes of Canada, the Board sat in Ottawa in the offices of the Board of Transport Commissioners for Canada.

The company was represented by Mr. A. V. Gale, Vice President, and the employees by Mr. Magnus Sinclair.

An exhaustive survey of the matter in dispute was carried out.

Messrs. J. R. Beaudry and A. C. Brittain on behalf of the company, and Messrs. J. H. Noel, G. Proulx and W. A. Sullivan on behalf of the employees, were heard as witnesses and gave verbal and documentary evidence of considerable usefulness.

At the chairman's suggestion a meeting of the interested parties took place during the reference in an endeavour to reach a settlement of the dispute, but no such settlement was then arrived at.

Throughout the proceedings the parties showed a spirit of friendliness and fair-mindedness which the Board cannot too highly commend.

Having carefully inquired into the dispute and all matters affecting the merits and right settlement thereof, the Board unanimously recommend that the wages of the employees be increased to the extent of three cents per hour. The said earnings to be effective from 15th October, 1939.

The Board has been informed and has every reason to believe that this unanimous recommendation will be accepted by both parties to the dispute.

Yours truly,

(Sgd.) LUCIEN CANNON,
Chairman.

(Sgd.) H. P. HILL,
Member.

(Sgd.) ALEXANDRE TACHE,
Member.

December 9th, 1939.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1939

THE following table shows the number of disputes, workers involved and time loss for November, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Numbers of employees involved	Time loss in man working days
*Nov. 1939	15	5,088	37,381
*Oct. 1939	25	6,630	35,201
Nov. 1938	9	675	6,409

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

Although the number of strikes and lockouts was considerably less in November than in October and the number of workers involved showed a slight reduction, there was an appreciable increase in time loss. There was a substantial amount of time loss in both months due to strikes of coal miners in Nova Scotia, Saskatchewan and Alberta, gold miners in British Columbia, fish handlers in Nova Scotia, textile workers in St. Jerome, P.Q., and sheet metal workers in Toronto, Ont. In November, 1938, the only disputes of importance were those involving leather goods workers in Montreal and lime plant workers at Blubber Bay, B.C.

Six disputes, involving 2,093 workers, were carried over from October and nine disputes commenced during November. Of these fifteen disputes, nine were terminated during the month, two resulting in favour of the employers and one in favour of the workers involved while compromise settlements were reached in five cases and the result of one dispute was recorded as indefinite. At the end of the month, therefore, there were six strikes or lockouts recorded as in progress, namely: gold miners, Pioneer Mines, B.C., coal miners, Estevan, Sask., coal miners, Port Hood, N.S., men's clothing factory workers, Montreal, P.Q., sheet metal workers, Toronto, Ont., and fish handlers, Lockport, N.S.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to seven such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938, one employer; stationary engineers, Toronto, Ont., March 2, 1939, one employer; and fur factory workers, Toronto, Ont., October 17, 1939, one employer.

The dispute involving dressmakers employed by one firm in Montreal, P.Q., commencing January 20, 1939, and listed in the above paragraph for some months, is reported by the union to have terminated on November 21, many of the strikers having secured work in other establishments and the remainder returning to work under the same conditions as

prior to the cessation. The dispute has consequently been removed from the list.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A strike of ten pin boys in one bowling alley in Montreal, P.Q., occurred on October 29, the strikers demanding an increase in piece rates from two cents per string to two and one-half cents. The management agreed to raise the rate if other bowling alleys did also and work was resumed on the next day. A strike in another alley from November 6 to November 14 is recorded in the statistical table. This strike was unsuccessful.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to November

GOLD MINERS, PIONEER MINES, B.C.—Following proceedings under the British Columbia Industrial Conciliation and Arbitration Act, during which the strike had been called, the president of the local union was fined $150 on November 2 for calling the strike contrary to the statute and five other members of the union executive were charged with violation of the statute in bringing on the cessation. On November 14 these were fined also. In the meantime the union had taken action before a supreme court judge to quash the proceedings on various grounds. On November 16 a number of workers, not members of the International Union of Mine, Mill and Smelter Workers, having requested the management to re-open the mine, twenty-five repair and maintenance men were put to work but these were withdrawn about November 21 owing to picketing by numbers of strikers and other miners from the district. At the end of the month the mine was still closed and the union declaring the strike in effect.

COAL MINERS, ESTEVAN, SASK.—At the end of October, following the issue of a court order restraining the pickets from watching and besetting the property of one of the operators, intimidating workmen, etc., one of the principal mines involved, a stripping mine operated by steam shovels, resumed operations on a substantial scale. On November 2, on application of counsel for the United Mine Workers of America, the injunction was altered to clearly permit peaceful picketing. On November 4 and November 6 two miners charged with violating the Vehicles Act, were convicted and sentenced to a fine of $25 and thirty days' imprisonment. A charge of assault was dismissed. On November 6 pickets dissuaded men from working when two mines were to be re-opened. On November 9 the provincial government issued a statement urging the parties to the dispute to reach a settlement. On November 15 charges against two pickets for violation of the Vehicles Act were reported to have been withdrawn. One man was found guilty of assault on November 17, fined $15 and costs and bound over to keep the peace for six months under bonds. Another man charged with watching and besetting elected trial by jury. Toward the end of the month it was reported that small numbers of miners were at work in some of the mines but the pickets had persuaded some to quit. On November 30 the provincial government held a conference of the parties involved in the dispute. On December 8 it was announced that a settlement had been reached, both unions involved, the United Mine Workers of America, affiliated with the Congress of Industrial Organizations and the Saskatchewan Mine Workers' Union, affiliated with the Canadian Federation of Labour, having agreed to withdraw from the field for the duration of the war and one year later. A new union is to be organized including all the miners. A minimum wage rate of 40 cents per hour for labourers is to be recognized; also the principles of collective bargaining, the closed shop and seniority.

SHOE FACTORY WORKERS, TORONTO, ONT.—As mentioned in the LABOUR GAZETTE for November, this dispute was settled early in November as a result of conciliaton by the Ontario Department of Labour and work was resumed on November 2. An agreement with the United Shoe Workers of America was signed providing for increases in wages to some employees. The agreement is outlined elsewhere in this issue.

TEXTILE FACTORY WORKERS (SPINNING, KNITTING AND WEAVING), ST. JEROME, P.Q.—Work was resumed on November 9 as a result of negotiations, it having been agreed that the management would recognize a local union representing its own employees and within three months reach an agreement as to wages and working conditions.

SHEET METAL AND STEEL WARE FACTORY WORKERS, TORONTO, ONT.—The settlement resulting in resumption of work on November 3, providing for increases in wages and union agreement, was outlined in the LABOUR GAZETTE for November on pages 1098 and 1179.

FISH HANDLERS, LOCKEPORT, N.S.—The fishermen and fish-handlers involved in this dispute took over an establishment not in use for some time and set up a co-operative fish handling business early in November. Shipments of fish by the establishments involved

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1939*

*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

were prevented by the picket and it was reported that the names of certain persons were taken and the facts reported to the provincial Attorney General. On November 16 the unions made inquiries as to proceedings under the Industrial Disputes Investigation Act and later a conciliation officer of the Department of Labour proceeded to the locality.

Disputes Commencing During November

LOGGERS, GOGAMA, ONT.— Employees in two camps out of three operated by one employer ceased work on November 10 to secure increases in rates of pay per log and removal of the charge for horses, claiming that no payment was made for logs culled by the management but used for low grade lumber. As a result of negotiations the employer reported that the charge for horses was eliminated, wages and piece rates being unchanged.

COAL MINERS, SPRINGHILL, N.S.—Miners in two collieries operated by one company ceased work on November 6 in protest against the removal of certain men from the bankhead on the ground that owing to decreased output they were not required. It was reported the men were offered a transfer to the yard staff. The union alleged that under the agreement the change should have been negotiated with the union executive instead of their merely being notified. The district officers advised the miners to resume work pending negotiations but the members voted to continue the strike. A proposal from the Nova Scotia Minister of Mines that the men be reinstated and work resumed pending an inquiry by a judge was accepted and work was resumed on November 14.

COAL MINERS, EAST COULEE, ALTA.—Miners ceased work on November 21 when two men were transferred to another part of the mine alleged to be less favourable, on the ground that their output was insufficient. Work was resumed on November 25 when the management agreed to reinstate the men.

COAL MINERS, PORT HOOD, N.S.—A dispute involving about twenty-five miners engaged to produce coal in one shaft in connection with preparing an abandoned mine for reopening has been reported in the press. It appears that the men ceased work on November 23 demanding an increase in the rate per ton from 85 cents to $1.25 with a minimum of $3 per day instead of $2.75. Detailed reports on the dispute have not been received and a settlement by the end of the month has not been reported.

TEXTILE FACTORY WORKERS (WOOLLEN), GRAND MERE, P.Q.—The weavers in one establishment ceased work on November 7, being joined by other workers, demanding an increase in wages of twenty per cent. As a result of negotiations with the assistance of

the local member of the legislature and the Mayor a settlement was reached providing for an increase of fifteen per cent to the weavers and ten per cent to other classes, the increase for the weavers being subject to a finding by the local member as to labour conditions in other woollen mills in the province. Work was resumed on November 10.

MEN'S CLOTHING FACTORY WORKERS (CONTRACTORS' SHOPS), MONTREAL, P.Q.—A cessation of work by upwards of 1,000 employees in the shops of about forty-five clothing contractors occurred on November 22 as a result of a dispute between the contractors and the manufacturers from whom they receive contracts. An increase in wages of ten per cent, effective December 4, was agreed upon between the various employers' associations and the Amalgamated Clothing Workers of America and approved by an Order in Council under the Collective Labour Agreements Act on November 16. The contractors employing about 2,000 workers desired an increase in the prices paid by the manufacturers and this was conceded by several of the large establishments, affecting about 1,000 workers in fifteen contractors' shops. The other contractors, with the support of the union, closed down their shops on November 22 to enforce their demand. From time to time various contractors made a settlement but at the end of the month about twenty per cent of those involved were reported to be still on strike.

SHEET METAL WORKERS, TORONTO, ONT.—A strike was called on November 21 in an establishment manufacturing heating equipment by the Steel Workers' Organizing Committee, affiliated with the Congress of Industrial Organizations, when twelve union members and two others were laid off and eight other employees also ceased work. Union recognition was demanded. On the previous day the management had met a union committee and the union organizer and stated that a vote of the employees had been taken, a majority being against the union. The union claimed the vote was not fair in certain respects. The union requested the Toronto representative of the Department to inquire into the dispute and he interviewed the management on the following day. It was stated that the lay-off was due to shortage of material, not union membership, and that most of them would be taken back when work increased; also that a committee of employees had been elected to deal with grievances. At the end of the month a settlement had not been reported.

TRUCK DRIVERS, FERGUS, ONT.—Employees of a contractor on a dam in connection with the Grand River Conservation Project ceased work on November 4 demanding an increase in wages from 40 cents to 50 cents per hour and a guaranteed minimum eight hour day owing to weather conditions. This was refused and after three days, the work for which trucks were required having been completed by other truck drivers and the use of other equipment, the truck drivers were re-employed as labourers at 40 cents per hour.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month bringing down to date that given in the March, 1939, issue in the review of Strikes and Lockouts in Canada and Other Countries, 1938. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details of the more important ones. These details which are published after investigation do not always agree with the information given earlier in the press.

The number of disputes which began during October was 80 and 10 were unterminated at the end of September, making a total of 90 in progress during the month; involving 37,000 workers with a resultant time loss of 102,000 man working days.

Of the 80 which began during October, 29 arose out of demands for increases in wages and 11 were over other wage questions. Questions regarding working hours lead to 4 disputes, 16 were over the employment of particular classes or persons, 11 were over questions regarding working conditions, and questions of trade union principle led to 7 strikes. Two disputes were due to sympathetic action.

Final settlements reached during the month numbered 72. Of these, 17 were settled in favour of the workers, 44 were settled in favour of the employers and 11 resulted in compro-

mises. In the case of 10 disputes work was resumed pending negotiations.

The strike which involved the largest number of workers during October occurred in South Wales and Monmouthshire when 7,000 tinplate workers ceased work in support of certain classes who demanded wage increases. The strike began on October 30. Work was resumed unconditionally on November 4.

On October 12 the refusal of the management of a coal mine at Shotts, Lancashire, to take over "hole-boring" from the workers led to a strike of 415 miners; 65 workers were indirectly involved. The next day 2,200 miners in other collieries in the same locality went out in sympathy with the strikers but work was resumed the same day in all these collieries without any change in conditions.

Dissatisfaction with the amount of a proposed increase in wages led to a strike of 2,080 colliery work people near Prestwick, Ayrshire, on October 20. The result of this strike was not reported but work was resumed the next day.

The suspension of a workmen's inspector for a breach of the Coal Mines Act lead to a strike of 1,718 underground and surface workers at a colliery at Pontefact, Yorkshire, on October 11. Workers indirectly involved numbered 217. On October 14 work was resumed on the advice of trade union officials.

At Bishopton, Renfrewshire, 1,500 building labourers and bricklayers employed by several firms struck on October 12 for increased wages and a guaranteed week. They resumed work the next day without having gained any of their demands.

A strike of 1,302 employees of a linoleum factory at Kirkcaldy, Fife, for recognition of their trade union began on October 9. Work was resumed on October 14 when the employers agreed to meet representatives of the union.

In London, 492 carmen and other employees of a road transport firm went on strike on October 3, as the result of a dispute respecting working hours following the introduction of lighting restrictions. Other workers numbering 808 were indirectly affected. Work was resumed on October 6 after an amicable settlement had been reached.

New Zealand

The Dominion of New Zealand has recently published statistics dealing with industrial disputes during the first six months of 1939. During the period there were 44 strikes, which involved 11,256 employees of 608 firms and which resulted in a time loss of 29,160 man working days. The estimated loss in wages was £33,472. During the corresponding six months of 1938, there were 39 strikes, involving 5,078 workers and resulting in a time loss of 12,796 man working days.

United States

Preliminary estimates of strikes in September, 1939, which as the Bureau of Labour Statistics points out are based on "scattered information from newspapers and other sources and are subject to revision as more definite reports are received," show 175 strikes as beginning during the month which with 155 unterminated at the end of August made a total of 330 in progress during the month. The number of workers involved in these disputes was approximately 90,000 with a resultant time loss of 750,000 man working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 371 strikes in progress involving about 95,000 workers with a resultant time loss of 900,000 man working days.

The strike of automobile workers employed by Chrysler Corporation which began when efforts to negotiate a new contract between the employer and the United Automobile Workers affiliated with the Congress of Industrial Organizations, broke down about October 6, was settled on November 29 and work was resumed about December 1.

The commencement of this strike was reported in the LABOUR GAZETTE, November, 1939, page 1099. The union demanded: wage increases, a union shop, a system of arbitration and a voice in fixing production schedules. The number of workers directly involved numbered between 50,000 and 70,000 and it was estimated that upwards of 100,000 employees of sales forces and in allied plants were indirectly affected. The strike ran for 54 days, ten days longer than the strike of General Motors employees in 1937 (LABOUR GAZETTE, January, 1937, page 22 and February, 1937, page 164). Unofficial estimates place the loss to workers' wages at approximately $15,000,000 and the loss in sales in excess of $100,000,000.

By the terms of the settlement the company, granted a general wage increase of three cents an hour instead of ten cents as originally demanded by the union and agreed to set up arbitration machinery which would deal with the workers' complaints especially in regard to alleged "speed up" of production. The company did not grant the union a closed shop nor a voice in fixing production schedules. On its part, the union agreed to ban "sit-down," "stay-in" or "slow-down" tactics.

While there was no strike of the Chrysler Corporation's employees in Canada, shortage of materials manufactured in their United States plants made it necessary for the Canadian plants to curtail their operations.

WARTIME PRICES AND TRADE BOARD

Functions and Objectives Reviewed by Minister of Labour in National Broadcast

The Minister of Labour, Hon. Norman A. McLarty, in a nation-wide radio broadcast on December 10, gave a comprehensive review of the functioning of the Wartime Prices and Trade Board in its objective, which, as the Minister stated in commencing, "is designed to serve in the prosecution of the war effort of the Canadian people."

Since the subject matter of the address concerns a phase of operations on the "home front" of vital importance in the national effort, the text is reproduced herewith as a part of the record of Canadian achievement:

On Sunday, the 3rd September, Great Britain declared a state of war existed with Germany. Four hours later there was appointed in Canada the "Wartime Prices and Trade Board." That Board was composed of five men generally recognized as among the very ablest in the Government Service. The Board's function was to insure that when our energies were being exerted in the prosecution of war there would be no profiteering, no hoarding and no undue enhancement of price of the necessaries of life.

The powers conferred on this Board originally quite broad, have just been widened by an Order in Council as a consequence of conferences in Ottawa participated in by the Board itself, the Department of Justice and the Attorneys-General of the various Provinces. I would like to pay tribute to those provincial officers charged with the administration of justice in each of the Provinces for the generous manner in which they have co-operated with the Board in respect of the enforcement of its Regulations; which Regulations, in their newly amended form, owe much to the contributions made by those gentlemen at the recent conference.

This Board is empowered to investigate costs, prices and profits; to license persons who deal in any way in necessaries of life; to fix maximum prices and markups; to regulate the sale and distribution of any commodity; to take possession of stocks being withheld; to buy and sell goods, as has been done in the case of sugar; to recommend embargoes on exports.

The power to enforce licensing, to fix maximum prices or markups, to prohibit exports, to buy and sell, and to take possession of necessaries of life are exercisable only with the consent and approval of the Governor General in Council.

Meeting the Sugar Problem

The Board met first on the day of its appointment. It has now been functioning—usually far into the night—for three months.

In that time it has maintained the distribution of the necessaries of life at fair and reasonable prices. It has so far successfully checked hoarding and profiteering and has effectively curbed those who might have been tempted to turn national needs and perils into profits.

In the three months too it has dealt with many thousands of complaints respecting half a hundred necessaries of life, and has investigated the proper distribution of a great many commodities, a few of the more important ones, by way of illustration, being wool, leather, coal, beans and sugar.

It will be impossible in the time at my disposal to-night to deal with each of these commodities; but the work which this Board has performed can perhaps be best illustrated by the action taken in the case of two of these commodities—sugar and wool.

Let us deal briefly with sugar—a commodity of which every man, woman and child in Canada consumes, on an average, one hundred pounds per year. Before the Board had been appointed the run on sugar had commenced. Remembering the experience of the last war—and the then rapid climb of sugar prices—housewives throughout Canada quite naturally wished to protect themselves against the anticipated rise, and, where ordinarily they had bought but five pounds, they bought one hundred pounds. In addition, the canning season was at hand; and the advent of war made the prudent housewife believe that more canning should be done this year than ever in the past.

They were not hoarders or profiteers; but when I tell you that between twenty-five and thirty million pounds of sugar were removed from circulation as a result, you will realize something of the magnitude of the problem with which the Board was immediately confronted in dealing with this essential commodity. Complaints came pouring in by the hundreds—yes by the thousands—that there was a shortage of sugar and that the price was soaring in each locality.

That was the problem. How did the Board meet it? Within three days of its appointment it summoned the sugar refiners to Ottawa and arranged that they would release

twenty-five per cent more sugar than their normal release in September, and that they would do so without any increase in price. On the very day the refiners agreed to do this, and agreed to do it with no price increase in face of the unprecedented demand, sugar prices in New York were pushed up one dollar and thirty-five cents per hundred pounds.

Response of Refiners

The refiners responded nobly. Not only did they release the twenty-five per cent additional at no price increase despite the enormous demand; but in some instances they released more than the additional twenty-five per cent and emptied their bins in an effort to meet the situation; and they maintained their price at the pre war level for the entire month of September.

Within the next few days the Board arranged a coast to coast inspection; and by September 11 every wholesale house in Canada had been inspected to see that there had been no stoppage of the flow of sugar to the consumer at these distributing points. It was found that there was no stoppage.

It immediately made a wide inspection of the retail stores to ascertain that a free flow was there being maintained; and it found with very few exceptions—and in those cases prosecutions naturally followed—that the retailers were selling the sugar as rapidly as they could receive it.

So the Board was forced to the conclusion, that while some of the sugar was being used to meet additional canning requirements incident to the war, that the vast bulk of it was finding its way into the bins of apprehensive housewives.

And the demand still continued with unabated vigour. From the Okanagan Valley came the message that unless they got sugar immediately two thousand cars of fruit would rot. They got the sugar! Then again messages came from different sections of the country that unless the necessary sugar was supplied two thousand beekeepers would have to destroy their colonies. They too get the sugar. From many manufacturers—large and small—came the message that unless they got sugar they would require to close their doors.

The Board again appealed to the refiners and once again the refiners responded; but their bins were practically empty. The Board was then forced to draw on the stocks of several large industrial users of sugar. This sugar was the private property of the owners, and in nearly all instances had been purchased months previously. The owners made a generous response; and within a week the Board secured from this source an additional six million pounds.

All in all—as a result of the efforts of the Board there was made available to the Canadian consumer in September alone forty million more pounds of sugar than normal consumption; and September last ranks as by far the greatest sugar purchasing month in the history of Canada.

Refilling Depleted Bins

September passed. The refiners had maintained their agreement not to raise their price; but by the 1st of October it became apparent that there would be difficulty in obtaining raw sugar and the refiners raised their price a half a cent a pound. This increase was justified by the refiners on the ground that it was necessitated by, and went no further than, the increase which had occurred in war freight rates and war insurance on supplies of raw sugar.

But the situation was still critical. The Board still felt that there was danger of a sugar panic; and the refiners had practically emptied their bins. Their stocks of raw sugar were running extremely low; and, more important, there was no more raw sugar in sight. The situation was indeed a critical one.

On October 3 the Board appointed Mr. S. R. Noble as Sugar Administrator; and to prevent the possibility of a sugar panic early in October the Sugar Administrator and the Board recommended that the dumping duty on refined sugar be temporarily suspended. The Minister of National Revenue approved this recommendation and acted on it immediately.

But the problem still remained—to obtain the supplies of raw sugar to enable the refilling of the depleted bins. The British Sugar Controller was then negotiating an agreement with all the sugar producing countries of the British Empire to purchase all the raw sugar grown in that wide area of production. The Board immediately contacted the British Sugar Controller and suggested that we participate in the purchase of our raw sugar requirements, amounting to approximately four hundred and fifty thousand tons a year, and that we do so through the British Sugar Controller. The Government accepted this recommendation and on September 18 we entered into an agreement with the British Sugar Controller that we would purchase our current year's raw sugar supply from him at cost.

Assured Supply

The effect of this arrangement is that we will purchase raw sugar at practically prewar prices. The advantage of this trans-

action will be obvious to those who are familiar with the rapid advance of world raw sugar prices that immediately followed the outbreak and continued throughout the last war; and which had already shown definite signs of being repeated in the present one.

But the Board felt we should go even further and extend the period of our agreement, subject to an annual readjustment as to the price, for the duration of the war. The agreement to do so entered into between the Canadian and the British Sugar Controller was concluded yesterday (December 9), and we can therefore now look forward to a reasonable stabilization of sugar prices during the period of the war.

I believe complete frankness about the effect of this sugar agreement with the British Sugar Controller is desirable. At the time we entered into the agreement and to-day we are buying this raw sugar at below the world open market price. It is, of course, possible that this will not always be so. The Board and the Government have obtained the most expert and competent advice on the subject it is possible to obtain; and that advice is that if the world price sinks below the level of the price we pay, it will be for a temporary period only—and such recession in world prices will only be consequent upon, and the result of, the adoption of this Sugar Control Scheme which has undoubtedly the effect of largely closing Empire markets to non-Empire sugar. Certain it is that if it were not for this agreement the world price of raw sugar would have continued to mount and be substantially higher than it is to-day.

To summarize—the action of the Board averted what appeared to be a serious sugar panic—its action resulted, in the first three months of the war, in a rise in price of only a half a cent per pound as against a rise of two and a half cents per pound in the same period of the last war; it has provided a sure and stable supply of raw sugar which should and will ensure against any undue inflation of the price of this commodity during the period of the war.

So much for sugar!

Wool Situation

But at the same time as it was dealing with the sugar problem the Board had to deal with other commodities—one of the most important of which was wool.

Canada imports approximately eighty per cent of its wool. At the outbreak of war the United Kingdom had purchased the entire Australasian wool clip for the duration of the war; and exports of wool from Australia, New Zealand and Great Britain were prohibited; in brief, the door was locked on the source of eighty per cent of Canada's wool supply.

But this was not all. Prior to the outbreak of war many dealers and manufacturers in Canada had not been buying in normal quantities. Consequently Canada entered the war with low stocks of wool.

During the very weeks in which the sugar crisis was at its height, this Board was faced with an equally important and equally difficult wool problem. In the realization that it was facing this extremely difficult problem the Board recommended in the early days of the war, and the Government appointed Mr. David C. Dick as Wool Administrator.

Immediately steps were taken to allocate the available wool supply in accordance with the need—and, to conserve our domestic supply, an embargo was placed on the export of wool, rags and waste. All cars containing wool were immediately turned back at the international border.

Within two days of his appointment the Wool Administrator was able to advise that he had secured seven hundred and fifty thousand pounds of wool urgently required in Canada, which the United Kingdom had agreed to release. Subsequently the Wool Administrator was able to secure the shipment to Canada of more than double this amount.

But action was taken also to augment the available supply of wool in the domestic market. Manufacturers were advised against using wool for civilian purposes where such wool was required for military needs. Even the co-operation of the rag and shoddy trade was requisitioned to augment the necessary supply.

The Board enjoys the right, subject to the approval of the Governor General in Council, to fix the price of any commodity which is a necessary of life. The woollen trade affords the first and up to the present the only illustration of how this power can be appropriately used. Wool is a commodity which under war conditions would naturally enhance in value very rapidly.

At the outbreak of war, bearing in mind Canada's requirements as compared with our production, there were not substantial quantities on hand; but some quantities of wool were in the hands of the Co-Operatives—representing the farmers—on the one hand; and some—perhaps three-quarters of a million pounds—in the hands of the wool dealers or middlemen on the other. The Board and the Wool Administrator dealt first with the Co-Operatives; and after some discussion a mutually satisfactory agreement was arrived at, namely; that the price of forty-five cents

a pound (clean basis) for a certain quality of wool was fair and reasonable. This price was somewhat more than the pre-war price; but on the other hand somewhat less than the producers might have anticipated in war time. This price was agreed to as well by many of of the dealers. It was regarded as fair, both by the Co-Operatives and by many of the dealers, as well as by the Board itself, and substantial quantities of wool were delivered at this agreed price.

The dealers and the middlemen—with one possible exception—had all purchased their wool below this price; and forty-five cents would show a fair and reasonable profit. But some dealers thought that the advent of war justified a demand for a much higher price and suggested sixty, sixty-five and seventy cents a pound. One rather interesting and illuminating fact is that one particular company, which might at best break even and would probably absorb some small loss at this price, was prepared to take it, if it was assured that no higher price would be paid to others.

This then was the situation—the Co-Operatives, anxious to assist in the national emergency, had sold and delivered their wool at forty-five cents. Certain middlemen to whom that price would represent a reasonable profit were holding back their delivery because they hoped for much higher prices. Would it be fair to ask the Co-Operatives, with their desire to co-operate, to accept the lower price and then pay the middlemen more? To ask that question is to answer it.

Board Utilized Its Power In Fixing Price

The Board consequently recommended to the Government that the price of that particular quality of wool be fixed at forty-five cents per pound and the Government immediately accepted the recommendation and by Order in Council dated the 22nd day of November it was so fixed.

The results have already manifested themselves. Substantial quantities of these wools, which had been held in stock for some months, are now moving to the woollen mills where they will be used in the manufacture of socks, clothing and other military woollens.

This was the first occasion on which the Board was required to use the teeth with which the Government has furnished it. But as the occasion arose it did so unflinchingly and without hesitation—in the interest of course of the people of Canada.

Let me make this clear. This price fixing order relating to wool does not apply to the price at which any farmer or sheep-raiser may sell the wool produced by his own sheep, since the farmers and sheep-raisers had already sold their wool stock. Like a number of the largest dealers who held a large quantity of wool, the Canadian Co-Operative Wool Growers, representing a large number of wool producing farmers, promptly released their holdings of several hundred thousand pounds on the basis suggested by the Wool Administrator.

I have endeavoured to point out that the normal flow of wool to Canada was interrupted by the British purchase of Australasian wool supplies at the outbreak of the war.

It necessarily took some little time to overcome this dislocation of our normal supply. And while it is naturally impossible to announce any details, I believe that the Canadian people may feel assured that not only is everything being done to avoid a shortage of wool, but that shortly largely augmented supplies will be available in Canada.

Nevertheless I must emphasize at this point that we still continue to be gravely concerned over the scarcity of cross-bred wools. While this situation is receiving the closest attention, for some time to come wools of these grades must be used with the strictest economy. However I can say, quite frankly, that due to the efforts of the Board, we have every hope and expectation that the wool problem will shortly be solved.

Might I suggest that if it had not been for the prompt action taken by the Board—bearing in mind the inevitable and widespread demand which would have undoubtedly followed the outbreak of war—that the price would necessarily have risen to unwarranted and unprecedented heights.

To-day the Wool Administrator is engaged in making a study—among other things—as to whether the many thousands of Canadian women, who are daily contributing their splendid effort to render more happy the lot of our soldiers by knitting socks and sweaters, are not paying too much for their yarn, based upon the price of wool which has been recommended by the Board and which the Government has fixed.

I have chosen sugar and wool to illustrate to you the effective functioning of the War-time Prices and Trade Board. I might have given other illustrations. I might, for example, have selected coal. It is a commodity for which, in this northern climate, there is a great demand. It was naturally anticipated that war needs would increase the industrial requirements, and domestic users were beginning to apprehend the effect of this increased demand upon prices. The Board appointed Mr. J. McGregor Stewart of Halifax as Coal

Administrator; and already four thousand five hundred coal dealers throughout Canada have been placed under licence. Current supplies have been arranged for; and provision made that no undue enhancement of the price of this commodity will occur for the duration of the war.

I might also refer you to the appointment by the Board of Mr. Maurice Samson of Quebec as Hides and Leather Administrator. That commodity is one which will probably not make the same appeal to the popular imagination as sugar, as wool, or as coal but it is, nevertheless, extremely important in the prosecution of a war.
